Parts Department Policies and Procedures

To: All Sundowner Dealers

Due to the tremendous and continual growth of our Parts Department, we must make a few changes in our procedures. We always strive to give our dealers and customers the best service possible in the horse trailer parts business, and with your help and cooperation, we hope to continue this tradition.

EFFECTIVE IMMEDIATELY:

- * All parts orders must be submitted to the Parts Department on our current parts order forms, via fax at (775) 227-6253 or the web. When all necessary information is completed on your faxed order, it will then be signed and dated as confirmed by the person processing your order. This confirmed order would then be returned to you by fax. Incomplete orders will be returned without confirmation until all necessary information is obtained on the order. Only after these steps are completed will the Parts Department process your order. If you have any questions or need help with your orders, please call The Sundowner Parts Department.
- * All parts orders must be received and confirmed at least 24 hours before shipment. In the past, we have tried to ship orders of most bought and some fabricated parts on the same day of which they were received. **We regret that this is not longer possible, as we now schedule all shipments one day in advance.**
- * If you discover you need parts and you have trailers on today's shipping list, you will need to contact the shipping coordinator, ext. 2177, to put your trailer on hold for parts that were not previously on order. If you need to ship parts on another dealer's trailer, you will need to make arrangements with the parts department and shipping coordinator. The shipping coordinator will then contact the Parts Department with shipping instructions.
- * Any orders to be shipped by load, UPS, to the dealer or customer must be put on separate order forms.
- * Any parts needing to be switched from one load to another load will generate a new work order and will not be processed until the following day. NOTE: There will be an additional charge of \$25.00 to off load parts off of one trailer onto another.
- * All aluminum-fabricated parts have at least a 48-hour lead-time. Fabricated parts include all built parts, cut tubing or rails, running boards and any aluminum or steel sheets.
- * Any fabricated part built and then canceled is subject to a 20% re-stock fee. Any canceled non-current fabricated part will be billed at full price.
- * We do not build custom fabricated parts.
- * Shipping parts in trailer is the preferred means of transporting part to your dealership. Freight, UPS or US Mail is used for in between trailer shipments.
- * Most extrusions and rails will be shipped in minimum quantities of 10 to 12 ft. sections. This is for better inventory control and to make shipping easier and more readily available. Very small items, such as screws and rivets, will be shipped in minimum quantities of 25-50. All nose skins will be shipped in 3-piece sections.
- * The Sundowner Parts Department has begun to seal the doors of trailers that are loaded with parts with a tamper evident security tag. Upon receiving your trailer, check the rear doors for this tag to be sure that the trailer has not been opened.
- * All stainless steel door skins in the book are full size skins. If you need a half stainless skin you must use the part number for stainless steel sheet and convert to square feet and note the measurements needed.
- * When ordering large or long parts to be shipped on a load, your trailer must be large enough to accommodate any extra width or length for these parts. For example, an 8 ft wide ramp will not fit on a 2-horse straight load trailer, a 16 ft. awning will not fit on a 3-horse slant load trailer.
- * Due to the size and weight of Roof Coil and Axles, the Parts Department will not accept responsibility for damage that may occur to the parts or the trailer if order is shipped on a trailer.
- * UPS Overnight or 2nd Day air shipments are very expensive and should be used in emergencies only. UPS

now have guaranteed ground delivery, and depending on where you are located, many dealers get their packages within one or two working days at no extra charge.

* Any error in shipments or damaged parts must be reported immediately upon receipt of goods to the Parts Department and notated on the driver's delivery form. A copy of this form must be faxed to the Parts Department before any corrections can be made.

* Handling charges per package are as follows:

\$6.00 - UPS Ground

\$10.00 - UPS Ground Overnight, 2nd or 3rd Day

\$3.00 - US Mail

\$3.00 - Priority Mail

\$25.00 Minimum - Truck Freight

\$25.00 - to remove parts previously loaded on any trailer for shipment

\$15.00 - per package on oversize 3 packages (i.e. Length + Girth is more than 130", "Fender")

Crate Charges:

\$75.00 - Small Crate - up to 48x48x24 Deep * 16 SF.

\$100.00 - Medium Crate - up to 48x96x24 Deep * 32 SF.

\$125.00 - Large Crate - over 48x96x24 Deep * 32 SF. Plus.

* Additional charges may be added for special or extra packaging.

* Sales policies are Master Card, Visa, Discover or open account upon approval of credit.

* Dealers on hold will not be shipped parts without prior payment of credit card.

* All parts sales are billed through the Parts Department. If you are billed in error or dispute any Parts Department invoice, you must call the Parts Department for any corrections or credits. Tim Willmeth at extension 2240.

* When returning parts, you must first call the Parts Department for a DSO (Returned Material Authorization) number. This number is to be used on the parts return form. Please fill out all pertinent areas of the return form and send with the returned part. Any parts received without authorization and proper paperwork will be returned to the dealer at the dealer's expense.

* All returned parts must be received within 30 days of receipt for any credits to be issued.

* All returned parts must be in new condition to receive credit.

* All returned items shipped as ordered are subject to a 20% restock fee.

* Any non-current parts shipped as ordered are not returnable.

Repair Estimates and Scheduling: Greg Alford, Ext. 2121 or grega@sundownertrailers.net

The Parts Department will always strive to do our best to serve our dealers. However, there are times when our workforce gets extremely overloaded with parts to ship out on a day to day basis and sometimes errors do occur. Considering the amount of parts shipped out daily, our shipping errors are low but from time to time we do neglect to load something or mis-load the incorrect part. Taking this into consideration, if we do have a loading error, we will definitely load it on your next available load. Only in emergency situations will the Parts Department cover shipping charges via UPS Ground or common carrier if we are responsible for the shipping error.

	GVWR Formula
GN	$GVWR = (\text{Weakest Link} \times \# \text{ of Axles Used}) + [25\% \times (\text{Weakest Link} \times \# \text{ of Axles Used})]$
BP	$GVWR = (\text{Weakest Link} \times \# \text{ of Axles Used}) + [15\% \times (\text{Weakest Link} \times \# \text{ of Axles Used})]$

Sample Trailer
GN Trailer has 16" 10PLY Tires and 2-7000# Axles
Axle Capacity = 7000 lbs Tire Capacity (w/ 2 Tires) = 6084 lbs
Tire Capacity is the "Weakest Link" so it will be used
$GVWR = (6084 \times 2) + [25\% \times (\text{Weakest Link} \times \# \text{ of Axles Used})]$
GVWR = 15210

Shortcut GVWR formula

	Take the weaker link - 1 axle vs 2 tire capacity
BP	Weak link x 2.3 = GVWR
2 axle GN	Weak link x 2.5 = GVWR
3 axle GN	Weak link x 3.75 = GVWR

If GVWR exceeds 26,000, then the trailer will require FET.

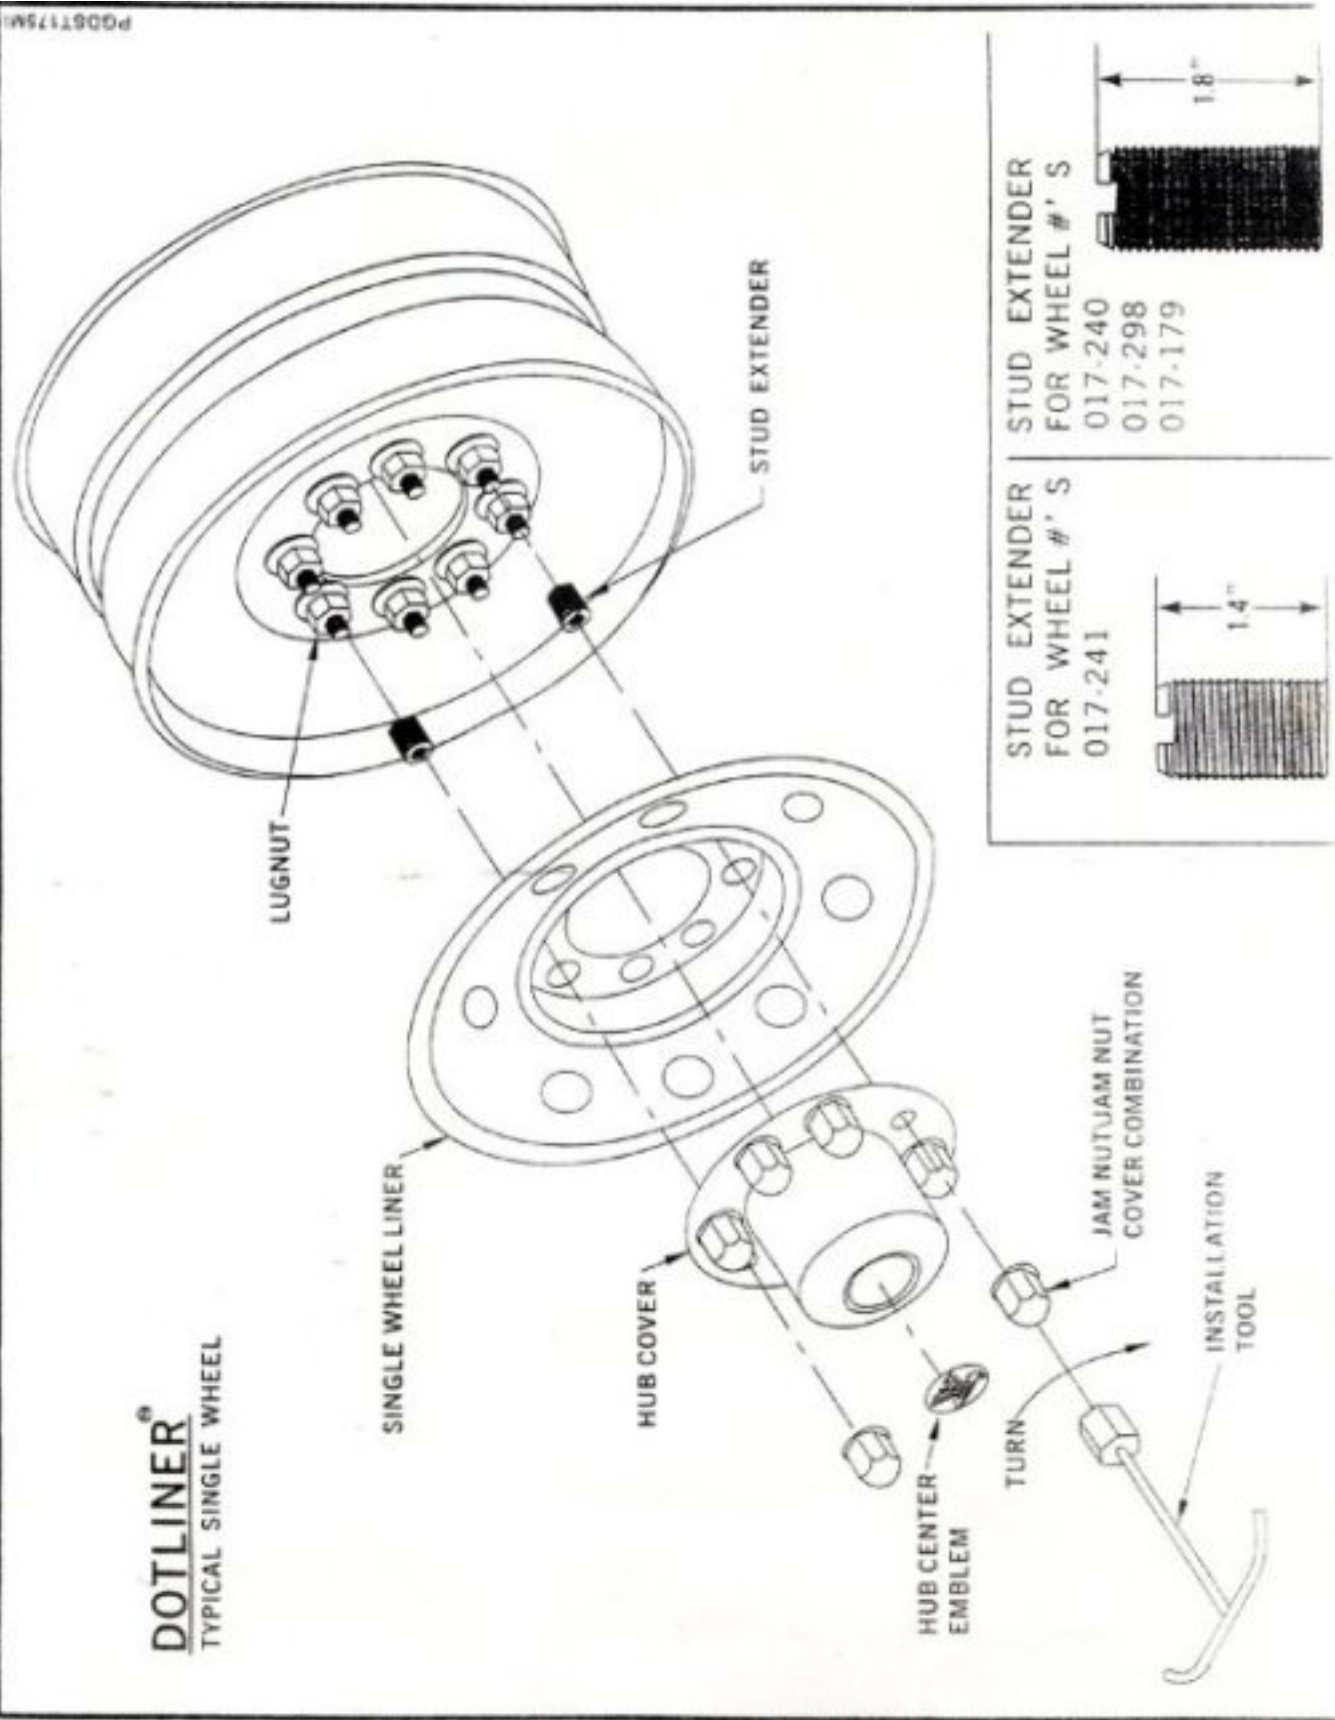

If the trailer has a standard coupler, the GVWR can be set at 25,000 to keep the trailer out of FET.

If the coupler is upgraded, you can set the loaded weight as the GVWR when it is less than 26,000 lbs. This will prevent FET as well.

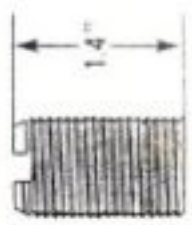

If the loaded weight exceeds 26,000 lbs, then the trailer will require FET. Set the GVWR using the axle and tire formula above when this happens.

FET=12% Federal Excise Tax.
