Success Metrics

Comparison Methodology

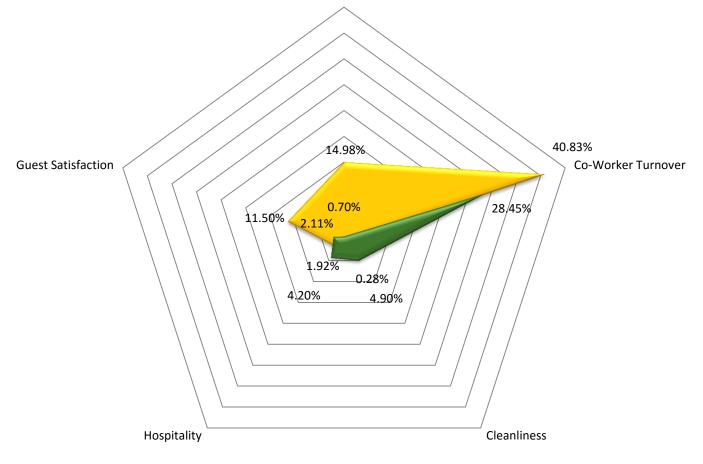

- Examined factors used to measure manager success
- Compared candidates to peers with more than 6
 months' experience
- But, over time the numbers became incomparable:
 - Changes in measurement systems
 - Labor pressures impacting turnover
 - Commodity prices impacting food cost
- Used % variance between inexperienced and experienced managers as comparison point
 - Goal is for inexperienced managers (<6 months) to be closer to performance of experienced peers (>6 months)

Hospitality Manager % Variance: <6 Months vs. > 6 Months

Labor Hours/100 Meals

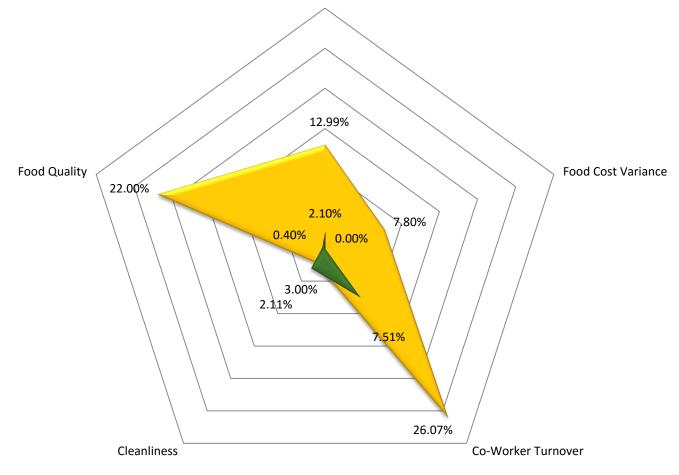

☑ Old Levels Program ■ New Tier Program

Kitchen Manager % Variance: <6 Months vs. > 6 Months

Labor Hours/100 Meals

□ Old Levels Program □ New Tier Program

Although not an objective of the program, experiencing cost savings of about \$1,000 per candidate
