

Supply Chain Data Governance Program at Corning Optical Communications

Mustafa Dadawalla, Data Governance Manager, Corning Optical Solutions
Ginger Gatling, Senior Director Product Marketing, SAP
ASUG83579

About the Speakers

Mustafa Dadawalla

- Global Data Governance Manager, Corning Optical Communications
- Established data governance program and processes for sustainability program
- Loves to Golf

Ginger Gatling

- Senior Director, Product Marketing, SAP
- Former SAP trainer and product manager for integration technologies, covers SAP Data Hub today
- Love music by Johannes Brahms

Key Outcomes/Objectives

1. Data is a key asset regardless of company size or industry
2. A disciplined approach to data governance and data quality is required for industries such as supply chain
3. Don't boil the ocean, start small with governance and grow based on successes

Agenda

- SAP's key capability offerings for data governance and information quality
- Corning Optical Communications: Why data governance
- Corning Optical Communications: How implemented data governance
- Key take-aways

Typical customer journey to information excellence

Extend governance and stewardship of data across enterprise and next-gen data (IoT, social, streams, Hadoop, cloud)

Profile your data, catalog your metadata, discover data quality problems, create balanced data quality scorecards, establish data quality standards

Information Excellence is a journey, not a destination. Having the right combination of people, processes, policies, and technology can help your organization stay ahead of ongoing change and challenges

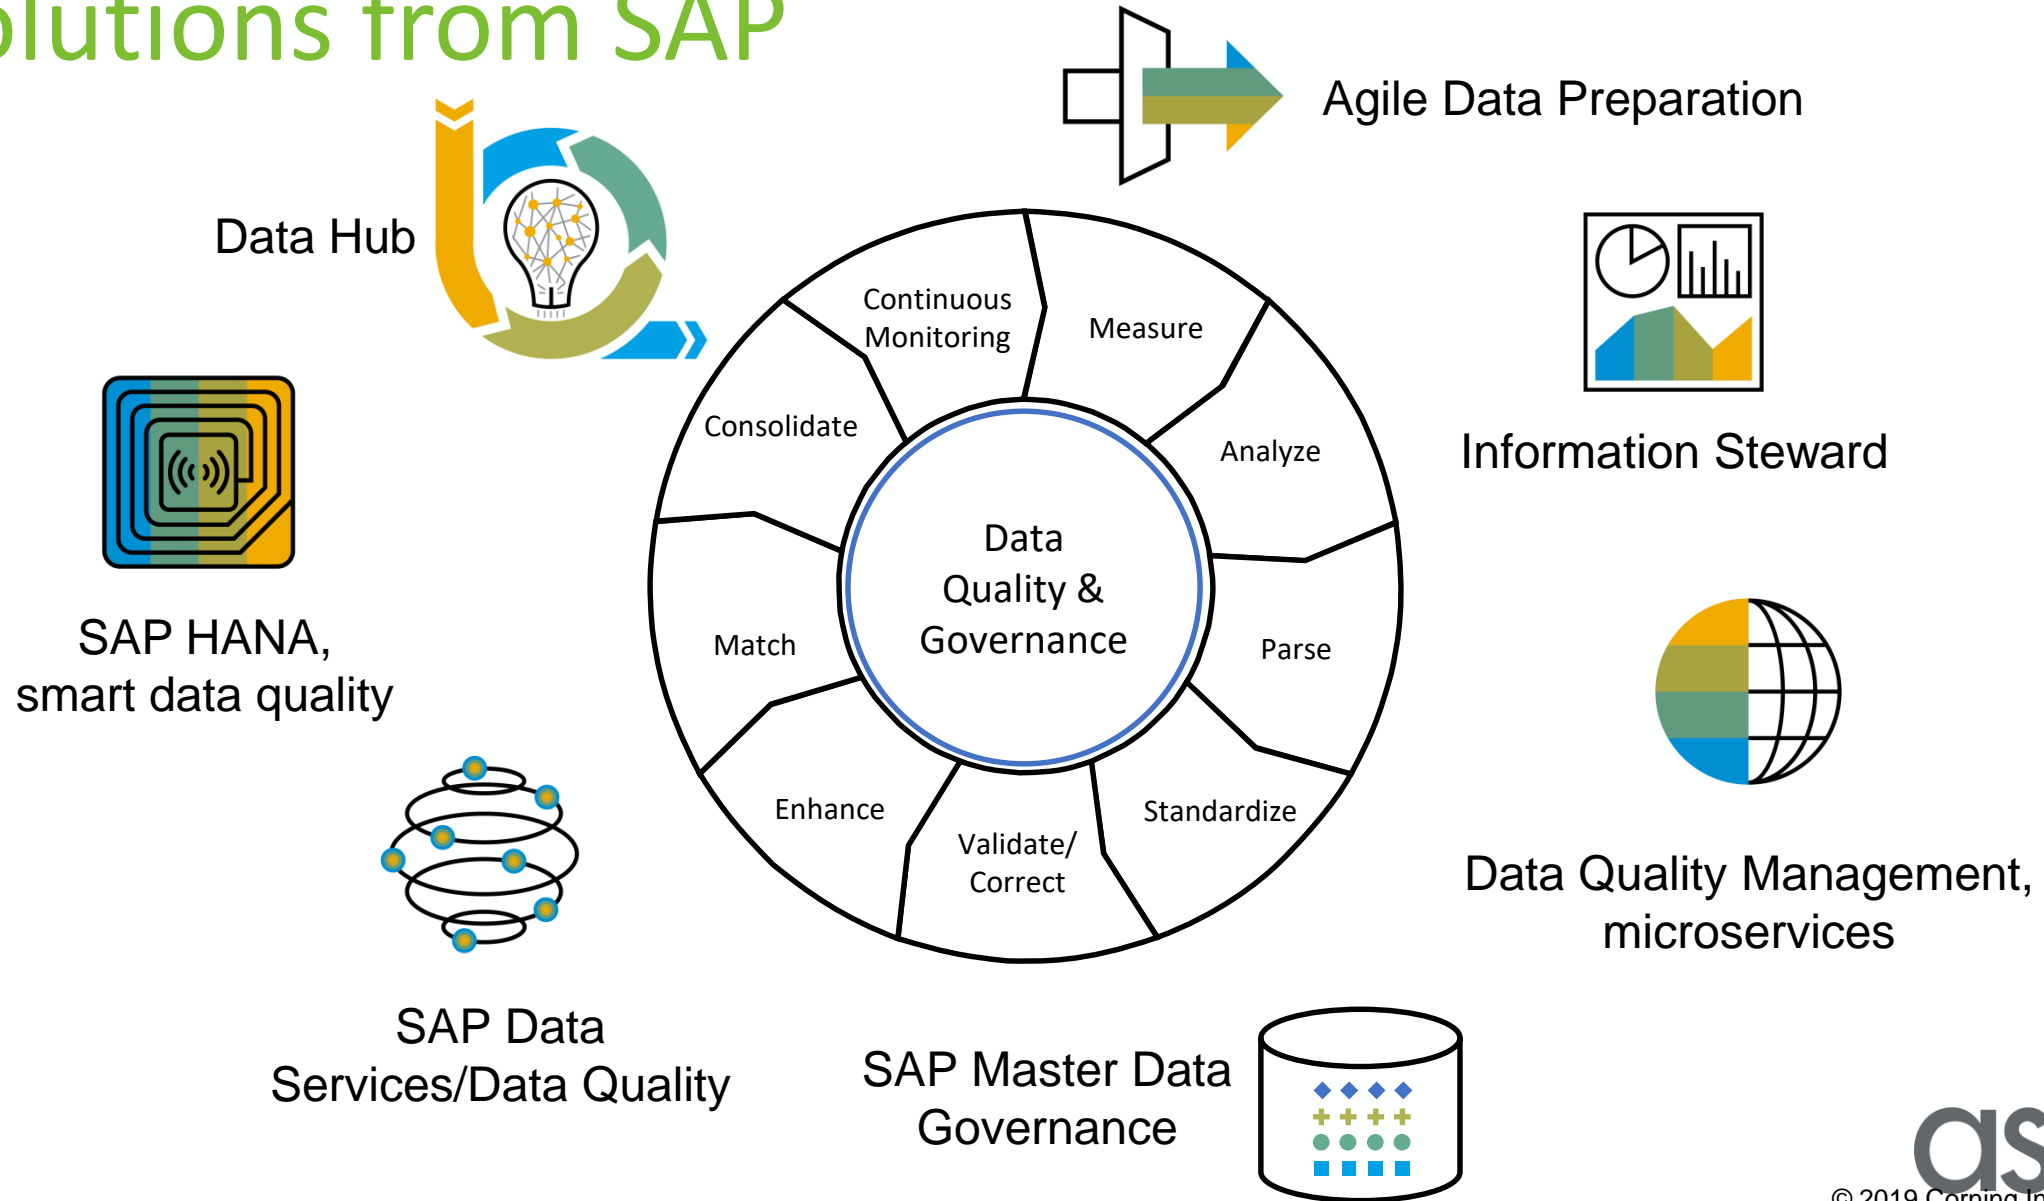

Implement centralized, governed master data maintenance processes to improve efficiency and accuracy (active data governance)

Remediate existing data quality issues (passive data governance), implement a data quality firewall

Data Governance & Information Quality Solutions from SAP

Corning Incorporated

Founded:
1851

Headquarters:
Corning, New York

Employees:
~57,000 worldwide

2018 Sales:
\$12B

Fortune 500 Rank (2018):
293

- Corning is the world leader in specialty glass and ceramics.
- We succeed through sustained investment in R&D, more than 167 years of materials science and process engineering knowledge, and a distinctive collaborative culture.

Corning Market Segments

 <p>Display Technology</p>	 <p>Optical Communications</p>	 <p>Environmental Technologies</p>	 <p>Life Sciences</p>	 <p>Specialty Materials</p>	 <p>Other Products and Services</p>

Corning Optical Communications Locations

42 active SAP locations with 4,400 users
55K materials created every year (total 300K +)

Corning Track Record of Innovation

Why Data Governance – Driven by Key Supply Chain trends

1. Flat supply chains

SC Network increasing horizontal

2. Digitalization

Velocity to communicate customer demand

3. Standardization

Process consistency, Automation

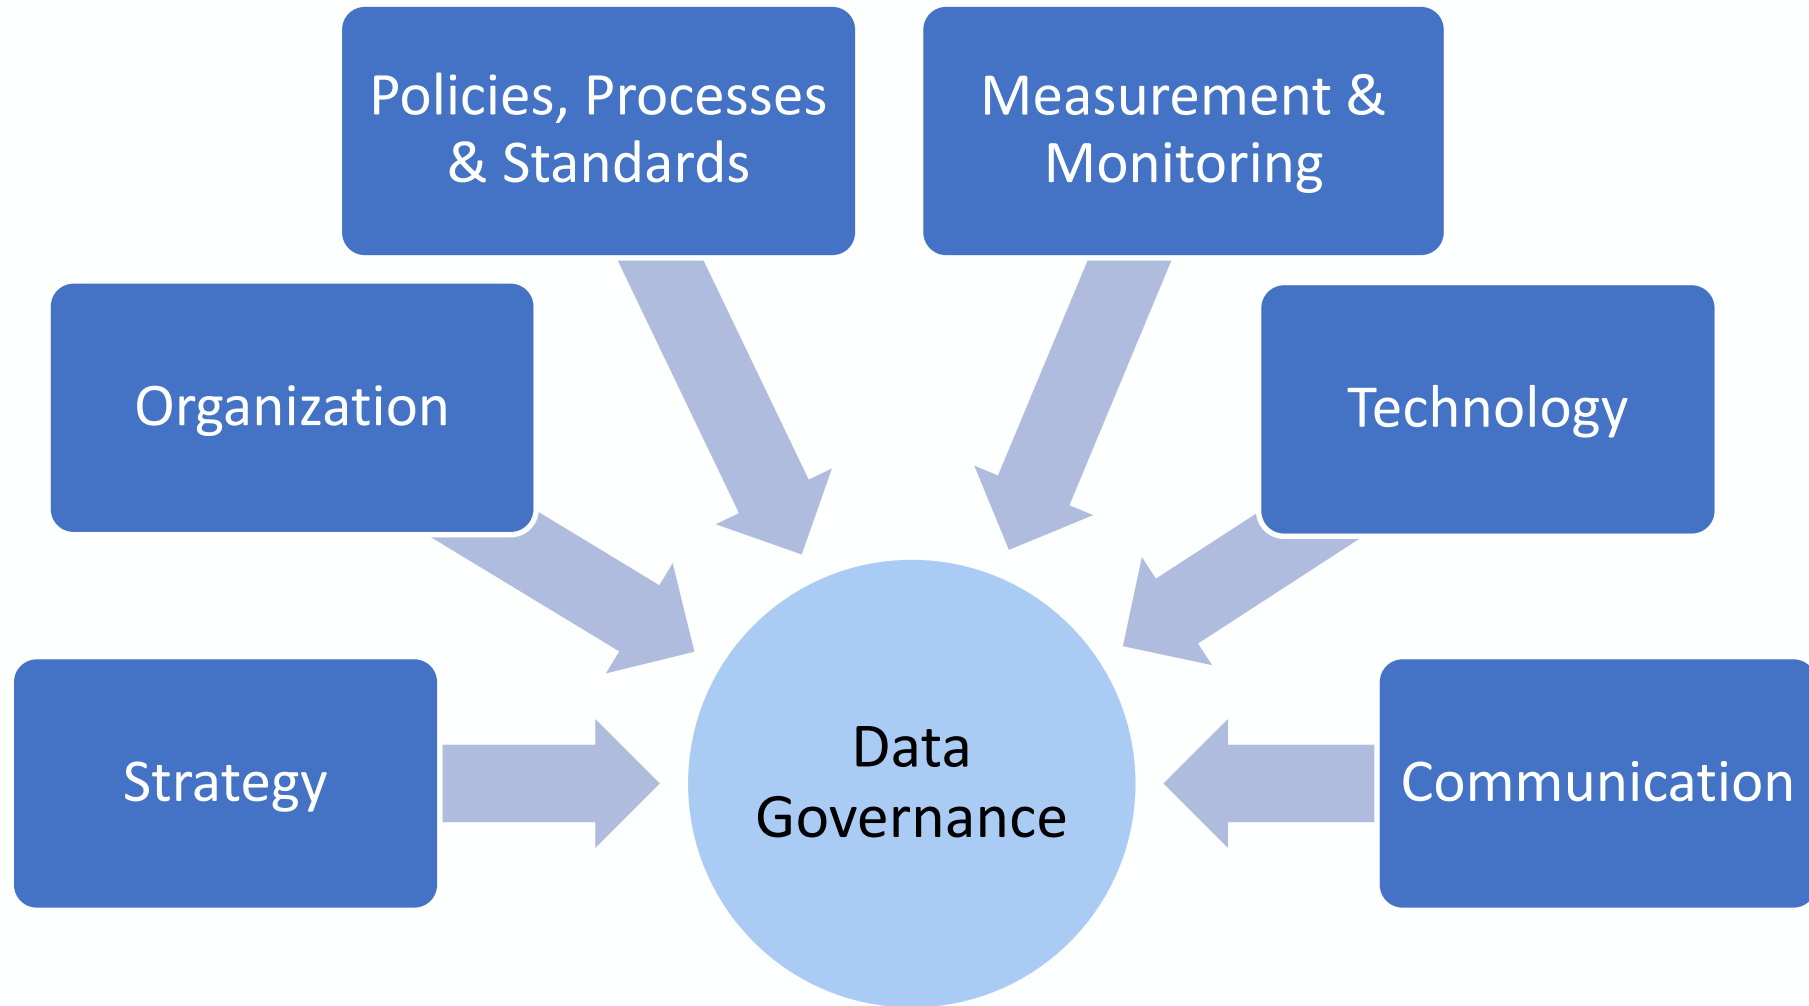

Data is the new currency in digital Supply Chains

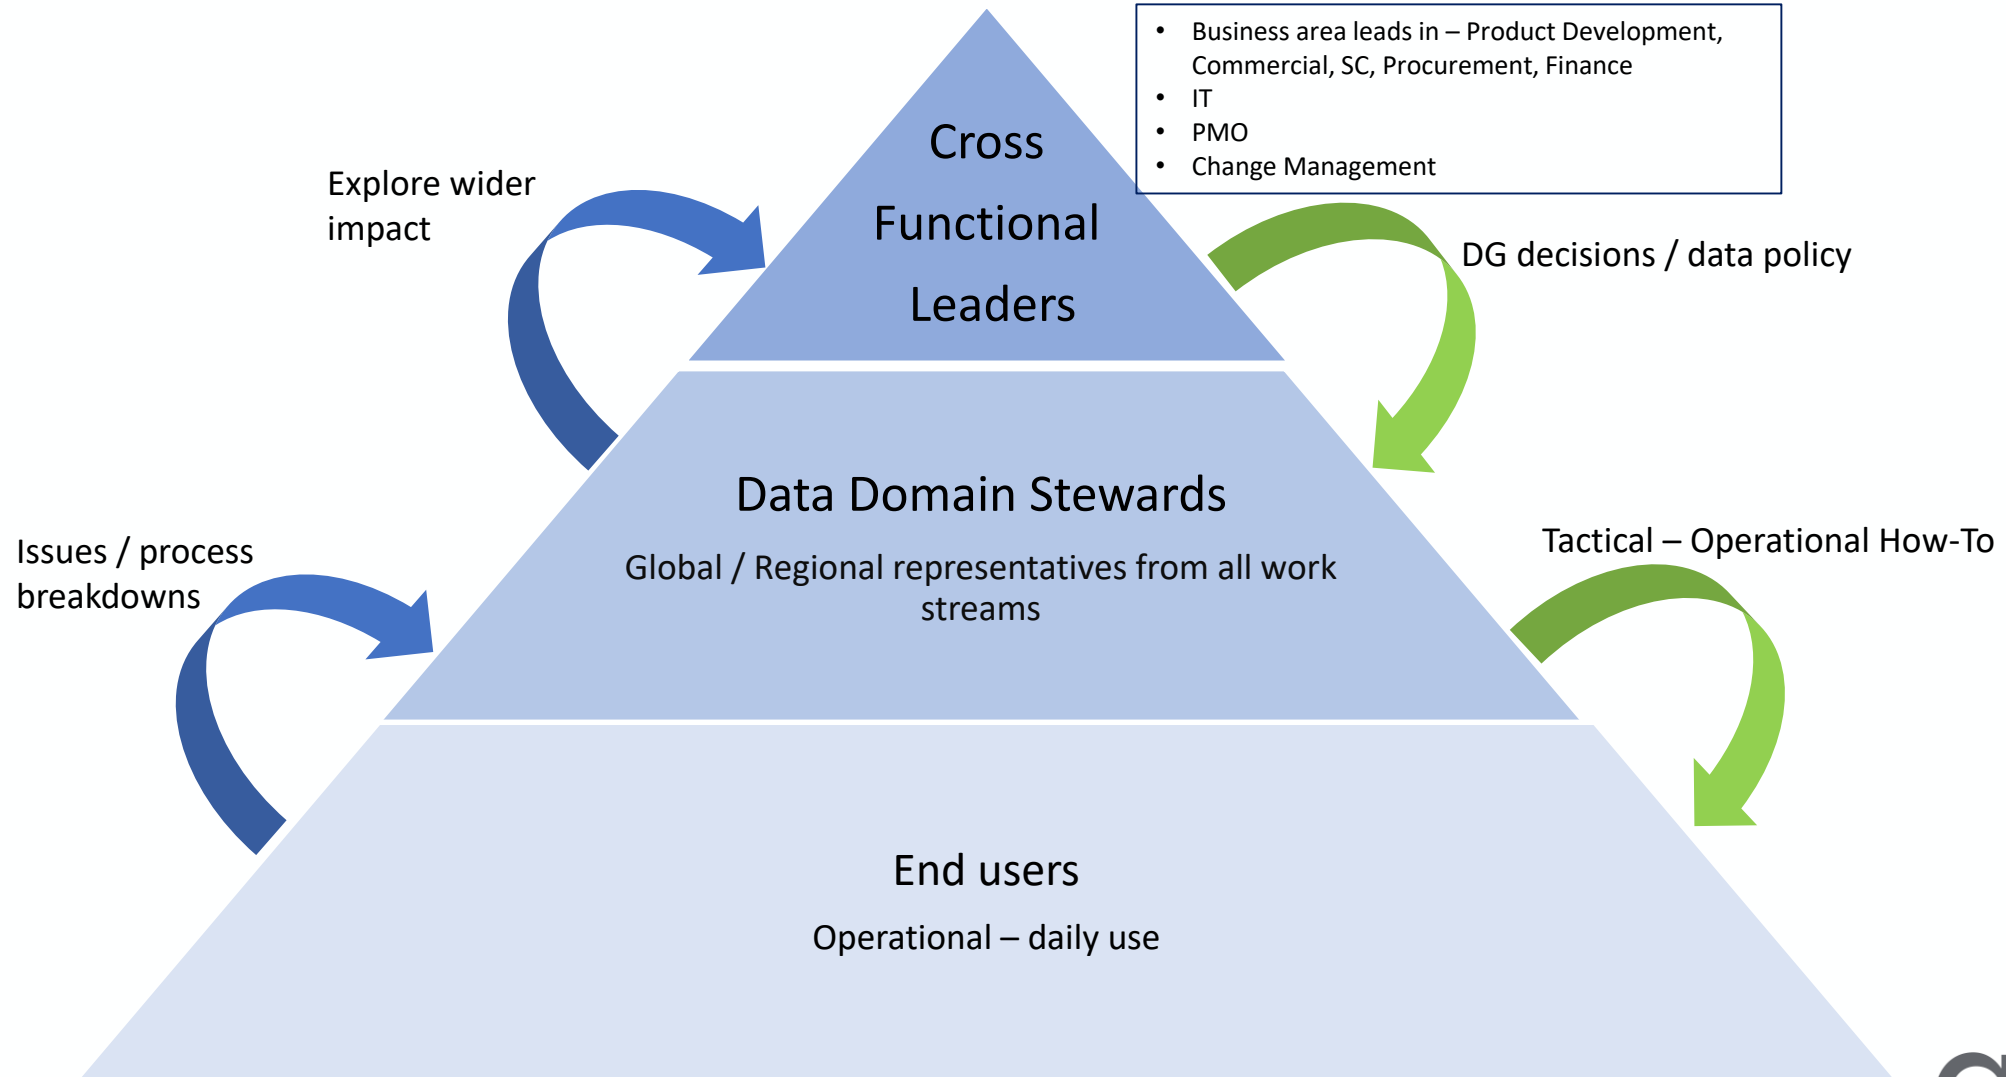

Why Data Governance

- Purpose
 - Develop a common language
 - Define clear ownership of data and processes
 - Establish global standards
- Outcomes
 - Increase revenue and business value
 - Manage cost and complexity
 - Support risk management and compliance efforts
 - Increase confidence in data

Data Governance Aspects

Data Governance Model / Organization - *virtual*

How: Implementation

Data Quality – Data *fit* for their intended use in operations, decision making and planning.

{Tom Redman (2008). Data driven: Profiting from your most important business asset (p. 56). Boston, Mass.: Harvard Business Press}

- Enforce – **Business rules enable** us to monitor and control when data goes outside of specification / acceptable limits
- Since data is touched by several processes and people – it is imperative that we govern/control its content (value)

How: Implementation – SAP Information Steward / Data Services

SAP Information Steward is used to control Data Quality

- Provides visibility of critical data
- Helps assess, measure and report on ERP Data Quality
- Enables improved Governance
- Web based – no deployment necessary

SAP Information Steward: Business Rule

Name:* MATERIAL_100_Missing delivery plant

Description: Delivery plant missing on saleable materials.
Impacts shipping, delivery processes.

Financial Impact Per Failure: \$ 1

Parameters:

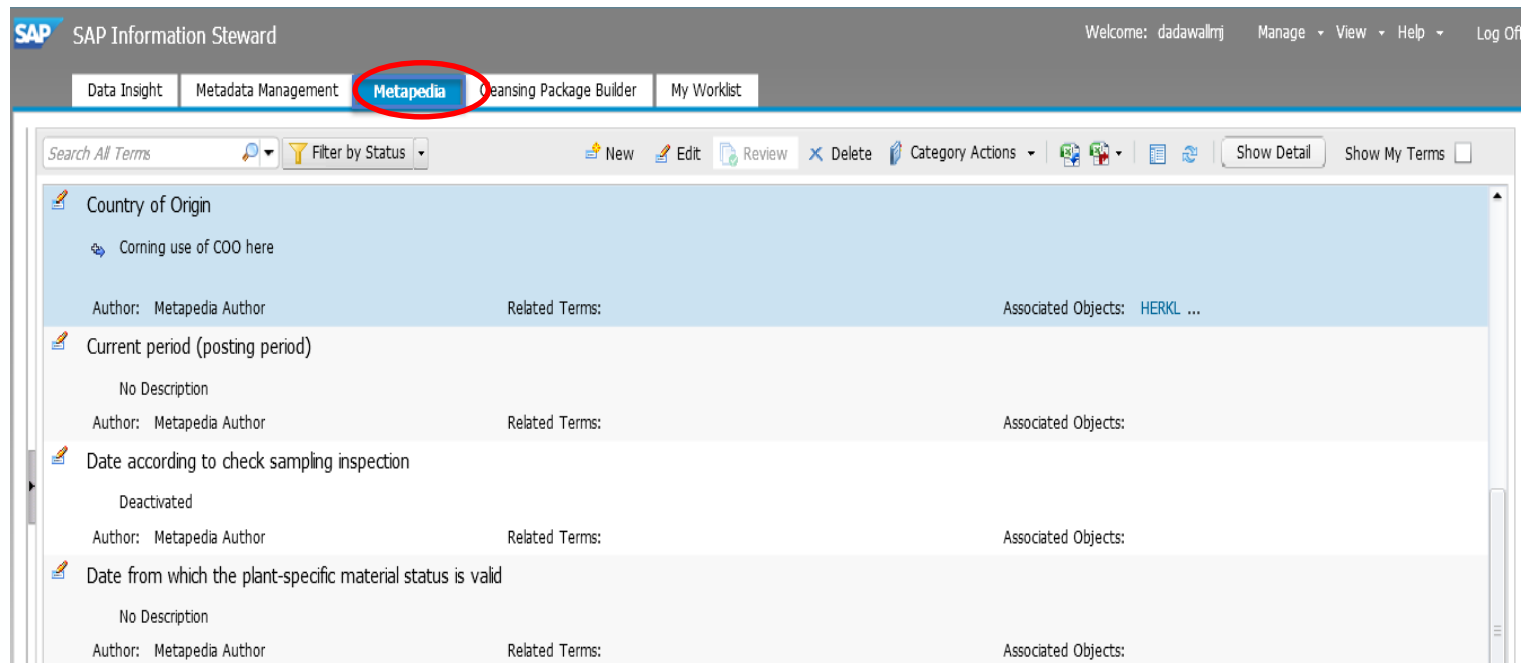

Name	Data Type
\$DWERK	varchar
\$MTART	varchar
\$VKORG	varchar
<input type="button" value="Add parameter"/>	

Expression:

```
BEGIN RETURN
  match_pattern($DWERK, '9999') OR match_pattern($DWERK, 'XX99');
END
```

SAP Information Steward: Metapedia – Common language and ownership

- Organized glossary used to define fields within SAP
- Provides consistent meaning of common business terminology across the organization
- Business users can contribute content

The screenshot displays the SAP Information Steward Metapedia interface. The top navigation bar includes 'Data Insight', 'Metadata Management', 'Metapedia' (highlighted with a red circle), 'Cleansing Package Builder', and 'My Worklist'. The user is logged in as 'dadawalrj'. The main content area shows a list of terms with the following details:

Term	Description	Author	Related Terms	Associated Objects
Country of Origin	Coming use of COO here	Metapedia Author		HERKL ...
Current period (posting period)	No Description	Metapedia Author		
Date according to check sampling inspection	Deactivated	Metapedia Author		
Date from which the plant-specific material status is valid	No Description	Metapedia Author		

Metapedia Term: Delivery Plant

Term Detail: Delivering Plant

Description: [Plant from which the goods should be delivered to the customer.](#) Definition

Status: Approved

Author: Metapedia Author  Approver: Metapedia Administrator

Synonyms: [MVKE-DWERK](#) SAP field name Keywords:

Categories: Related Terms:

Updated by: [DMO](#) Material View: [Sales: sales org. 1](#) SAP location

Owned by: [Commercial](#) Data owners

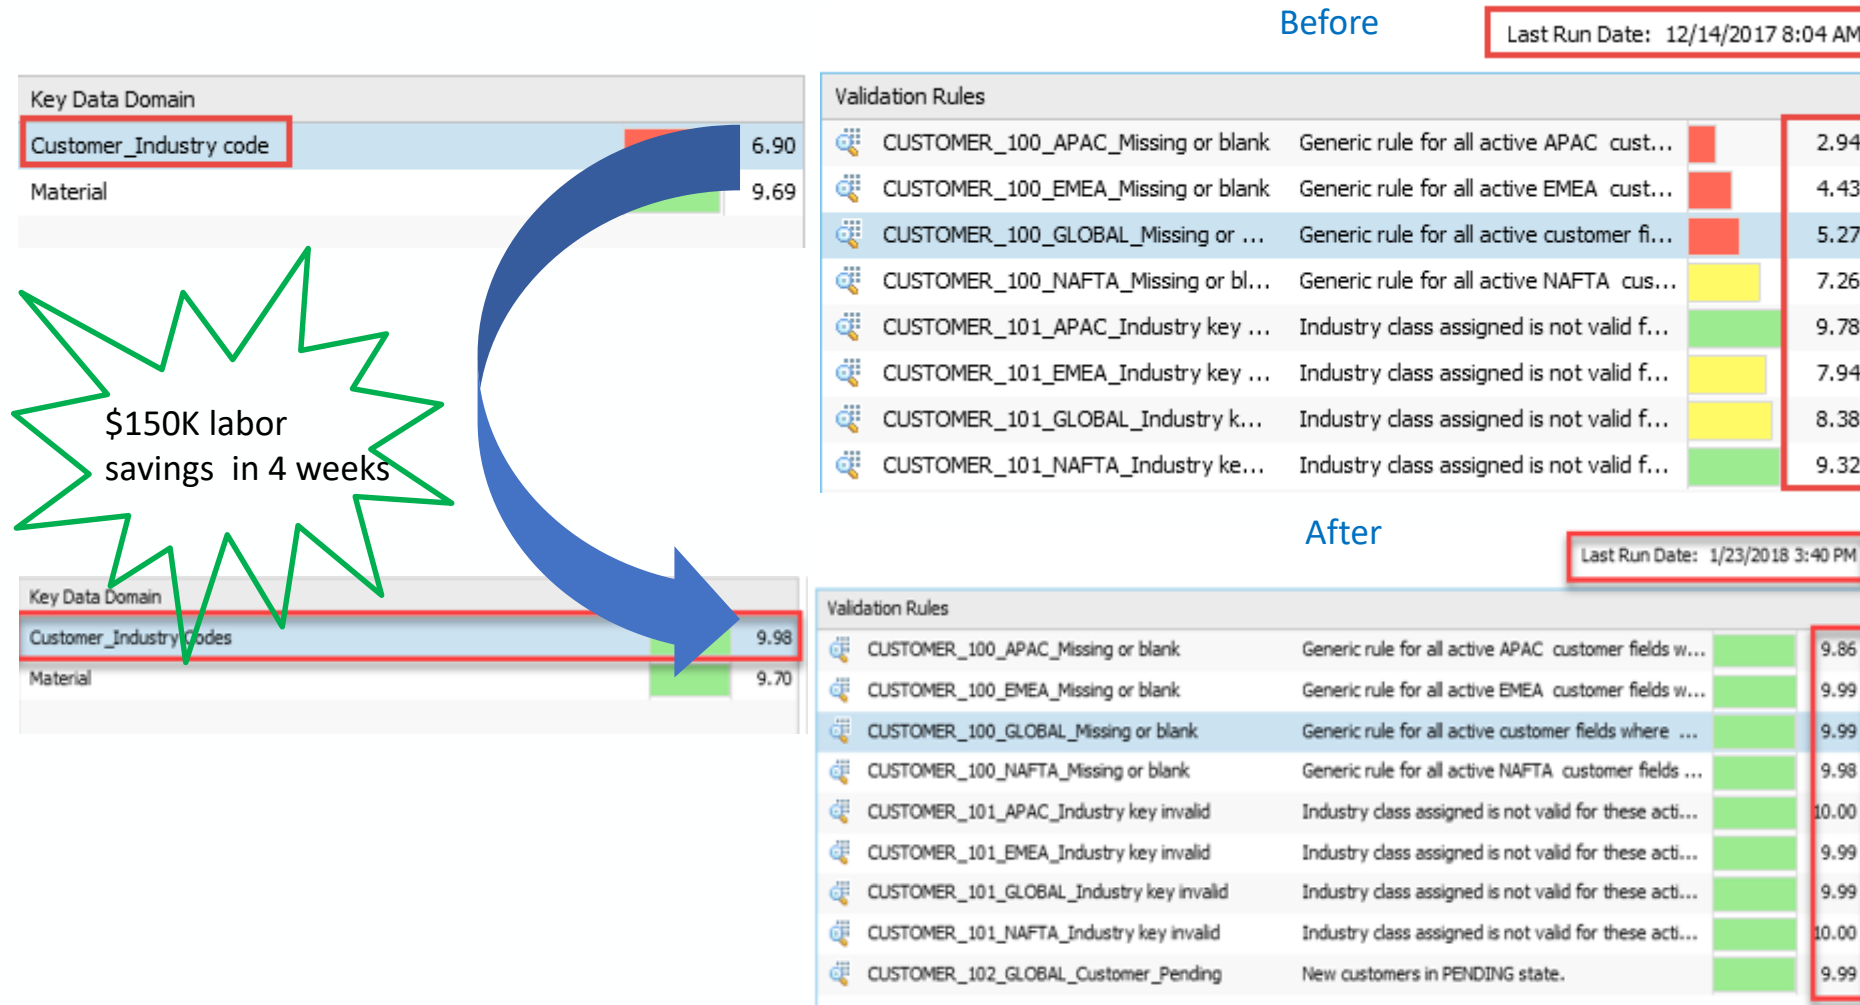

Associated Objects

Name	Path
 DWERK	Tables(MVKE) \ Columns(DWERK)
 MATERIAL_100_Missing delivery plant Link to Rule	Data Insight \ Approved \ MATERIAL_100_Missing delivery plant

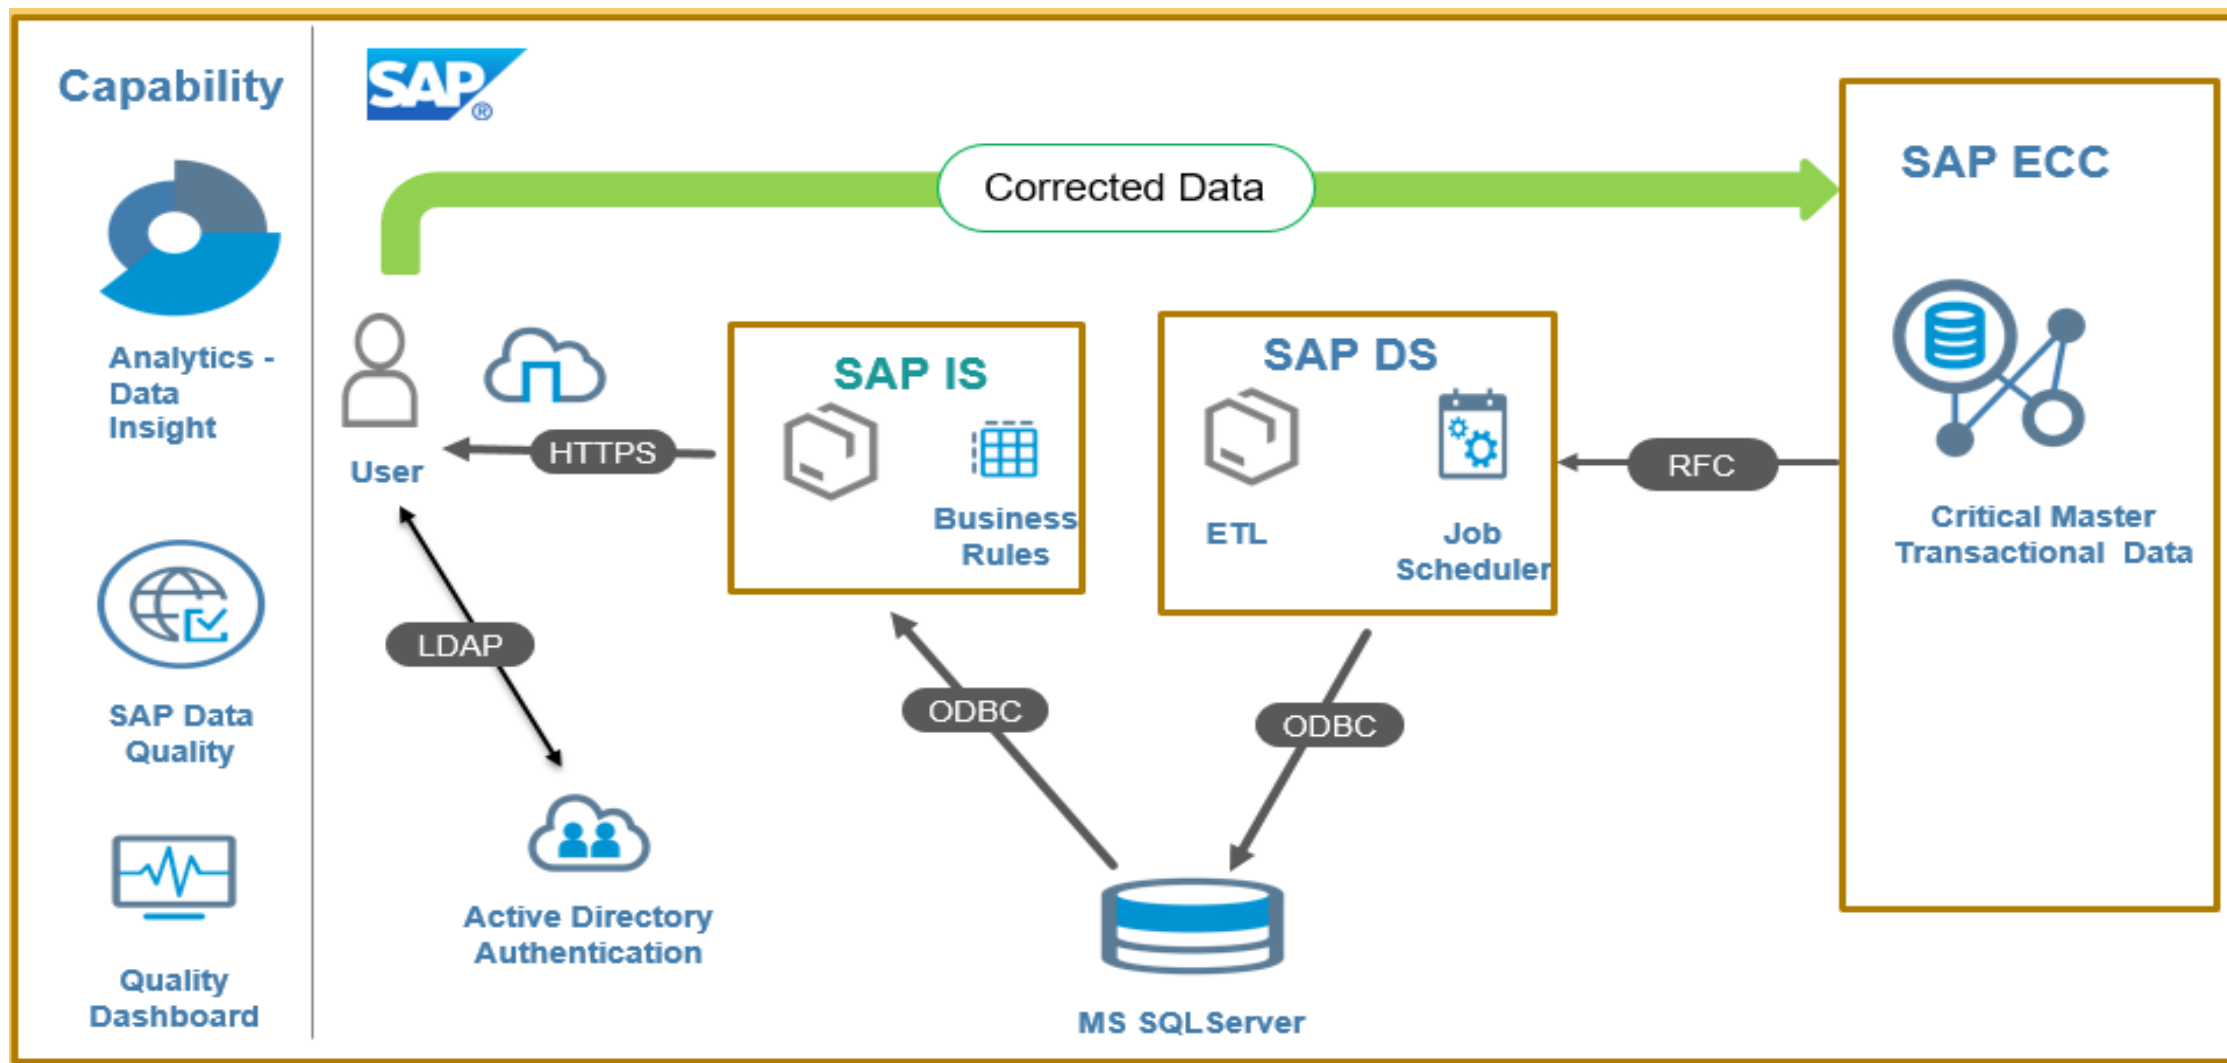

Last modified by webbrg on 2/8/2018 5:54:36 PM

Standardization: Customer Data

Rules helped *identify & maintain* non standard customer classifications

Architecture - SAP Data Services / SAP Information Steward

Key Take-Aways

- Start simple
- Begin to document pain points that cause Business process breakdowns
- Start with tools you already have
- Show results to earn buy-in; create a value-driven institutionalizing approach
- Don't boil the ocean!
- Value Add to any size company

Data is a key
strategic asset
