Surface and Floor Care

When cleaning a facility, Safety, Efficiency, and Cleanliness are top priorities. In developing cleaning systems, Unger has taken these priorities and created a line of cleaning systems and tools designed to maximize each.

From the custodian designed RestroomRx system, to the massive pushing capacity of AquaDozer Max, the many small, unique elements that only Unger includes are what set Unger apart in the cleaning industry.

Dual Bucket System

SmartColor™ Cleaning System

Increase Productivity & Improve Hygiene

The Unger RestroomR$_x$ Bucket System sets the standard for cleaning efficiency and hygiene.

Its many distinctive ergonomic design features enhance worker productivity, reduce injuries, and increased cleaning performance.

- **Separate Cleaning Solution from Soiled Rinse Water**
- **Prevent Cross-Contamination**
- **Save on Water and Chemicals**
- **Up to 63% Lighter when Full**
- **Mounts on all Standard Cleaning Carts**
- **Casters Removable for Additional Stability**
- **Two 4-Gallon Capacity Compartments**
- **Additional Cleaning Tools can be Stored on Front Handle or in Optional Side Bucket**

Immerse mop in front compartment for fresh cleaning solution

Wring and rinse soiled mop in rear compartment to release dirt
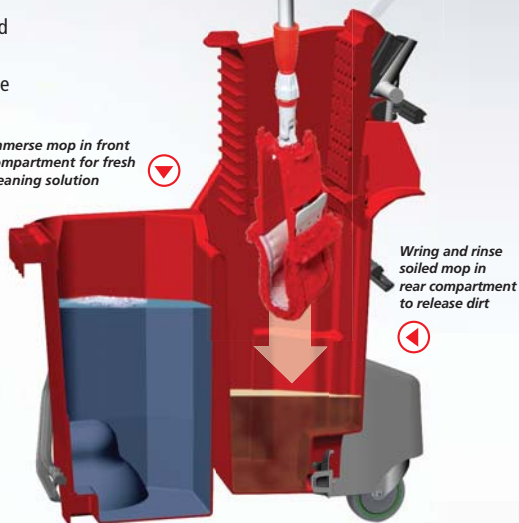

Dual Bucket System vs. Single Bucket

Black light experiment reveals the advantages of using the Unger Dual Bucket System. Dirt is captured and removed by the microfiber mop and wrung out in the back of the bucket. The mop is then dipped into the unsoiled front compartment containing floor cleaning solution and mopping continues. In a single bucket, the mop is dipped into the soiled water then wrung out returning soiled water to the floor surface.
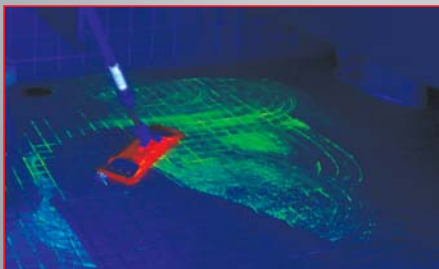

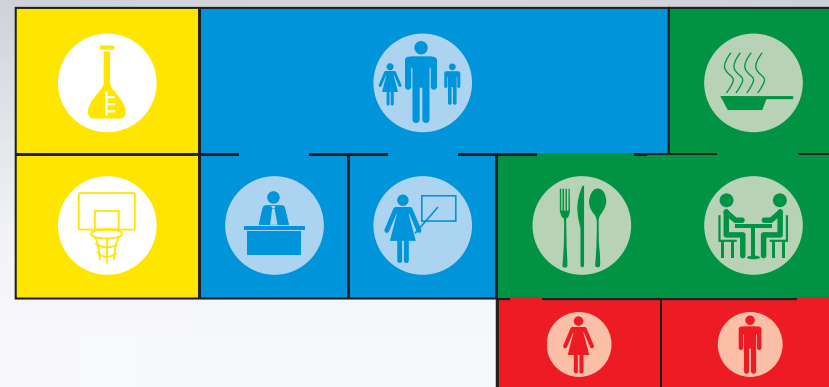

After cleaning with Unger's Microfiber Mop and Dual Bucket, all soils are captured and removed from the floor.
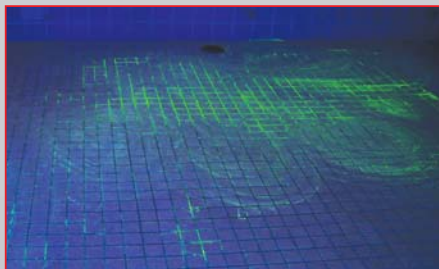

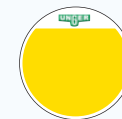

After cleaning with a traditional single bucket, remaining soil appears neon yellow.

The Advantages of Color-Coding:

Improves Training and Communication • Prevents Cross-Contamination
Enhances Building Safety • Deters Chemical Misuse
Simplifies Supply Management • Elevates Employee Performance

Every facility is unique, which is why the Unger SmartColor is the first visual coding system designed to adapt to the specific, and changing, needs of your business. As your building's footprint grows or personnel needs fluctuate, SmartColor will keep your business ahead of all its cleaning demands.

SmartColor achieves its distinct color-coding through interchangeable features and durable metallic decals. This gives you the flexibility to easily re-task tools for different areas or functions as required.

Use the color-coded stickers to identify which products are to be used in which areas of a facility.

Restroom Cart Systems

RESTROOM RX
A HIGHER LEVEL OF CLEAN

70% Savings on Chemical and Water Usage!

The best way to clean is with an efficient system, and the Unger RestroomRx is the first janitorial cart developed as a completely coordinated system by cleaning professionals.

Every detail is designed for ergonomics and safety. Tools stay organized and securely fastened in place while moving from job to job.

The Unger RestroomRx streamlined cart systems will enable your custodians to work faster and more productively than ever.

▶ **EASY TO MANEUVER**
The handrail allows you to maneuver the cart in and out of restroom entrances quicker and easier.

▶ **STAY ORGANIZED**
Every tool in the system has a designated position on the cart. Tools are always where they need to be, and always clipped on securely.

▶ **LARGE STORAGE**
With an expanded storage module, you'll substantially limit trips to the supply closet.

▶ **SMART DESIGN**
The narrow tool tower design allows all tools to remain within the boundaries of the cart. The base of the cart also acts as a drip tray catching excess liquid, so nothing ever drips on restroom or hallway floors.

SAFETY

The Ergo Rail eliminates poor posture. No matter which side of the cart you're on, it can be pushed and pulled with ease.

The handrail allows you to maneuver the cart in and out of restroom entrances quicker and easier.

Patented clip system ensures all tools have an identified position on the cart. Tools are securely in place while you are moving down the hall. No bending or reaching to get tools out/off of the cart.

EFFICIENCY

The Storage Module eliminates restroom complaints. The effort it takes to return to a supply closet to restock supplies can waste more than just time.

With an expanded storage module, you'll substantially limit trips to the supply closet. Even eliminating one trip increases productivity.

The patent pending Narrow Tool Tower design allows all tools to remain within the boundaries of the cart. Since no tools hang over the outside edge of the cart, getting through even tight doorways is easy.

CLEANLINESS

From the Dual Bucket to the Telescopic Dustpan, the tools that comprise the system were developed to deliver optimal productivity and cleaning results.

A patent pending Drip Tray keeps dripping from tools off the floor, and delivers ultimate bucket stability, even when going over curbs or thresholds.

Floor Mopping

Keep floors cleaner and safer than ever with Unger's selection of floor cleaning tools. Choose from a wide selection of microfiber flat mops, pads, and string mops that can handle even the toughest jobs.

To get the most out of a microfiber mop, begin by outlining the space to be cleaned. Then starting in the corner furthest from the exit, walk backwards creating an overlapping "S" motion with the mop. Adjusting the height of the mop to the individual user is important to avoid strain and maintain proper form.

A comprehensive flat mop system makes a significant difference in your facility's health and your floor's appearance. Studies demonstrate that flat mop systems, especially when used with microfiber mop heads, optimize efficiency, enhance floor safety and provide savings in labor and material.

![UNGER - Quality Tools for Smart Cleaning™]

SmartFit™ Floor Squeegees

Innovative Technology for Professional Floor Cleaning

Solid design for all floor types. Move large volumes of debris with high quality closed cell twin foam rubber blades.

Easy Tool Cleaning

The SmartFit™ Easy Flush & Rinse feature allows quick and easy cleaning of the squeegee socket. Large vents allow water to flush out dirt and let air back in to dry out the socket, preventing bacteria and odors to form.
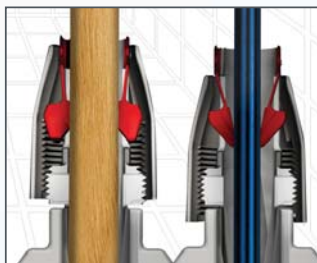

▶ **EASY CLEANING**
Prevent odor and bacteria build up.

▶ **HYGIENIC**
Washable in dishwasher, during last run.

▶ **DRYS CLEAN**
With no water accumulation, water can flow out in every direction.

Universal Power Socket

The Unger SmartFit™ squeegee locks onto standard handles including straight, tapered, thread and non thread tips.

▶ **ERGONOMIC DESIGN**
Collar designed for easy tightening and loosening of the socket.

▶ **HIGH QUALITY MATERIAL**
Strongest floor squeegee — four times stronger than others. Reinforced synthetic material and glass filled nylon for extra long durability.

▶ **SECURE FIT**
Squeegee handles won´t fall off or wobble.

SmartColor™ Coding System

Use the flexible coding chips to designate squeegees to specific cleaning zones. This will prevent cross-contamination.
