

SURGICAL CARE

Consumables Catalogue

A blurred background of a person in a blue surgical gown and mask, with surgical instruments in the foreground.

Inspiring Confidence

Here you will find surgical solutions and feel at ease knowing that Hospital Products Australia only source the best products from around the globe and have dependable relationships and reliable supply.

Our values begin in our work environment with collaboration, innovation, and respect. This carries through to our customer and supplier relationships and encompasses commitment and performance.

Dependable Relationships

We have direct and secure relationships with manufacturers to guarantee improved service, product performance and price stability. These relationships also ensure a stronger knowledge transfer of updates and latest R&D. HPA is the centre stone where our customer's needs are not only met but they can discuss future needs or changes that we can then engage with the manufacturer.

Reliable Supply

National warehouse locations in Sydney, Melbourne, Perth and Brisbane, and soon to join the list is Adelaide. These facilities hold extensive amounts of inventory in Australia to ensure constant supply and your orders are dispatched same day.

Value-Based Health Care

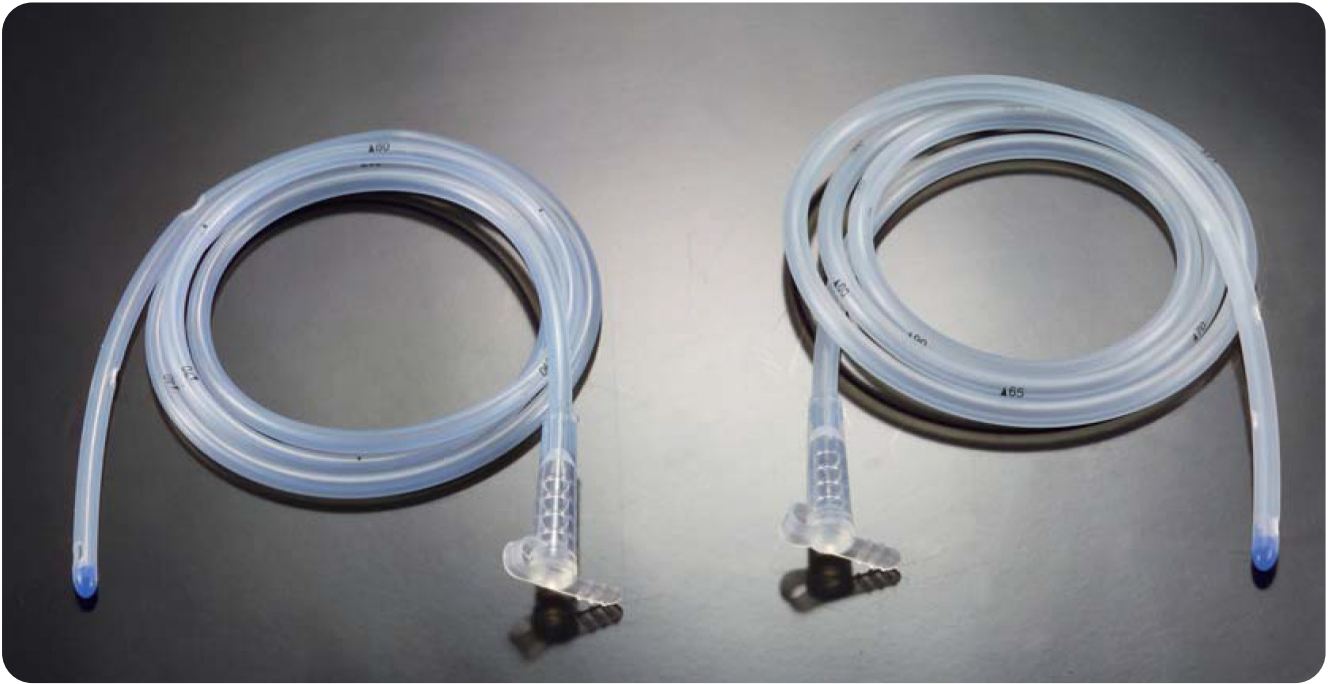

Commitment to supporting value based responses to health care problems and helping to deliver effective and efficient care.

Nasogastric Tubes

Silicone Nasogastric Tubes Sterile Single Use

Features

- Features a radiopaque stripe for X-Ray detection
- Depth markings for placement assessment
- Port can be closed with a sealing plug
- Integrated tip to assure no breakage
- Latex free
- Double sterile package, ISO 11607-1:2019
- Conform to the biocompatibility requirement as per ISO10993, ISO20695:2020

| CODE | SIZE | LENGTH | ID | OD | PACKAGE |

Chest Drainage/Catheters

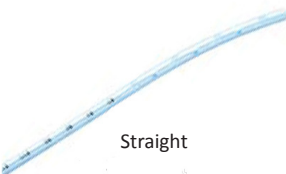

Intercostal Catheters without Trocar Sterile Single Use

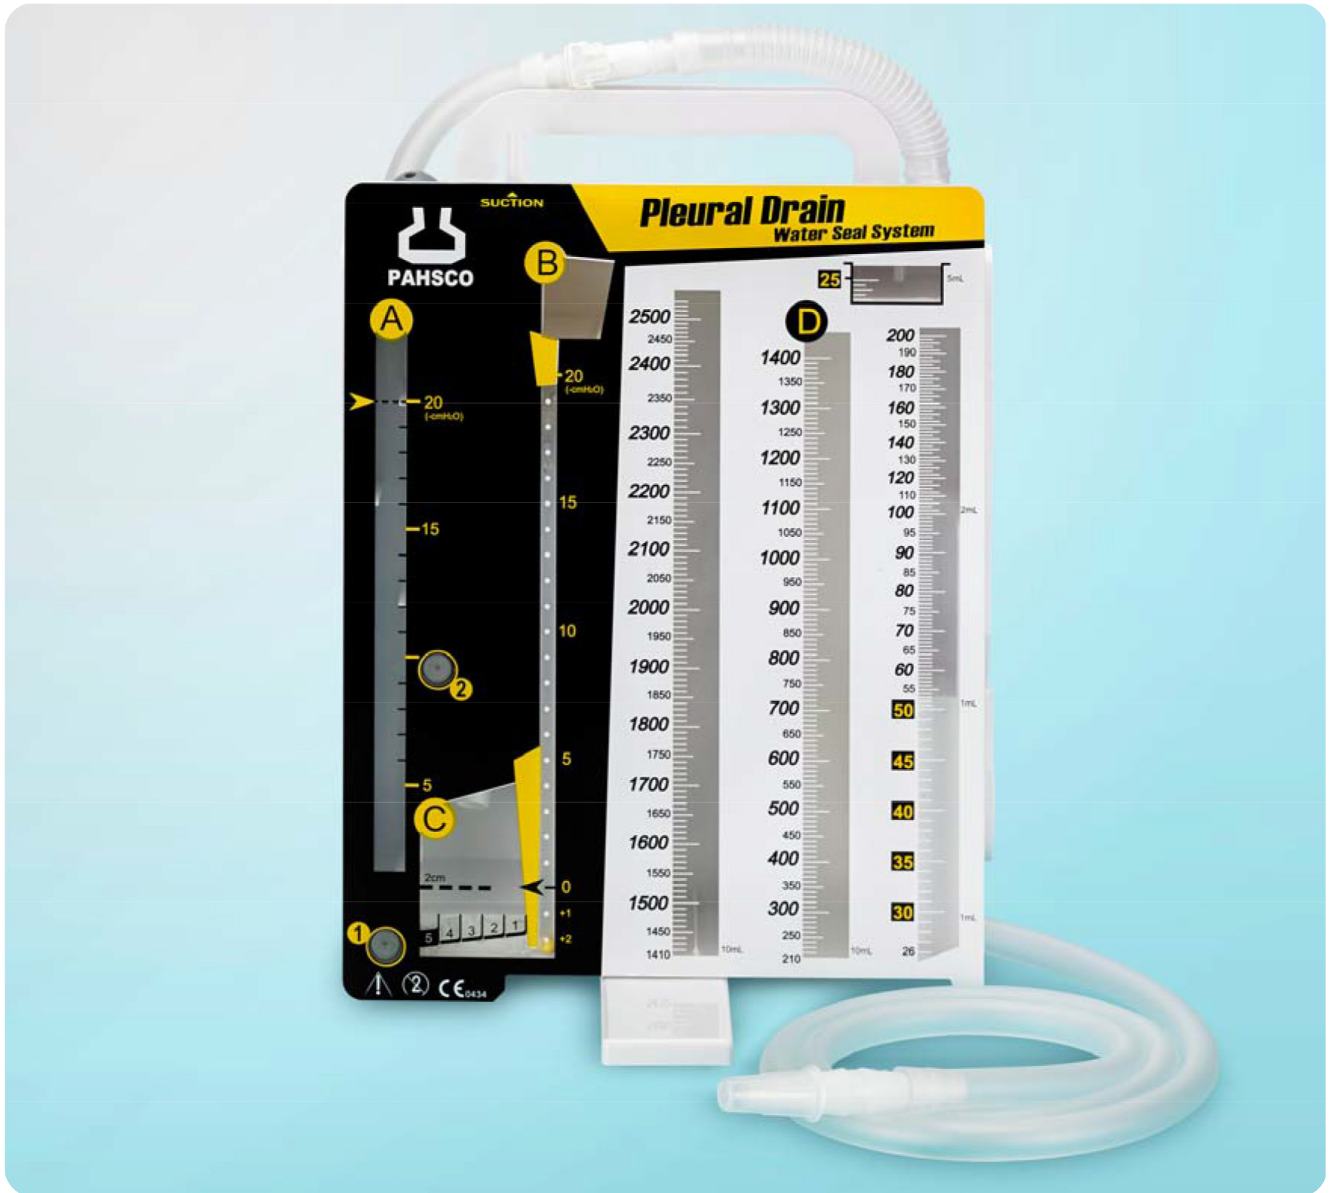

Features

- Biocompatible, haemocompatible, thrombus-resistant silicone catheter
- Soft-touch and kink-resistant conforms to anatomical structures with bevelled end for atraumatic insertion
- Radiopaque X-ray aids in accurate positioning
- Smooth staggered elliptical side eyes and open distal tip minimises occlusion and encourages fluid evacuation
- Straight catheter in 8-36Fr: 50 cm with 12 cm perforated length
- Right angled catheter in 24-36Fr: 60 cm with 10 cm perforated length
- Double sterile package, ISO 11607-1:2019

Wound Drainage Reservoirs

Wound Drainage System Low Vacuum replacement reservoir Sterile Single use

Wound Drainage Reservoirs Top Outlet

Features

- Single and dual drainage outlets are available
- Anti-back flow valve prevents reflux of drainage fluid
- An easy-clip is provided to attach to bed, wheelchair, or IV stand for mobility
- Low vacuum design provides continuous gentle suction and minimises tissue trauma
- Size available: 100ml, 150ml, 200ml, 400ml, with top-outlet or bottom-outlet
- Double sterile package, ISO 11607-1:2019
- Conform to the biocompatibility requirement as per ISO10993-1, 10993-5, 10993-10, 10993-18

Penrose Sterile Single Use

Drainage Tube – Penrose Round
 Drainage Tube – Penrose Flat

Features

- Designed for use in superficial wounds dependent on gravitational forces, capillary action, and overflow for wound fluid drainage
- Constant wall thickness over entire length
- Radiopaque effectiveness
- Packaged in peel-open pouch for easy handling
- Double sterile package, ISO 11607-1:2019
- Conforms to the biocompatibility requirement as per ISO10993-1, 10993-5, 10993-10, 10993-18

Smooth integration ensures removal with less pain.

Perforated Sterile Single Use

Drainage Tubes – Perforated

Features

- Asymmetric perforated tube reduces tissue invagination
- Radiopaque effectiveness
- Indicator dot makes drain placement quick and easy
- 4 mm is the best choice for minimally invasive plastic surgery
- Double sterile package, ISO 11607-1:2019

Wound Drainage T-Tube Sterile Single Use

Drainage Tube – T-Drain

Features

- Perfect integration of vertical/horizontal lines to reduce pain on removal
- Kink-free tubes to avoid any obstruction while draining
- Radiopaque line for visualisation
- Double sterile package, ISO 11607-1:2019
- Conform to the biocompatibility requirement as per ISO

Suction Tubing with Universal Connectors Sterile, Various Lengths

Features

- Clear PVC tubing serves as the conduit from suction sources to suction instruments
- Manufactured from non-toxic, non-irritant, medical grade PVC
- Pressure resistant to prevent kinking and twisting

| CODE | DESCRIPTION | PACKAGE |
|--------|--|---------|
| I10110 | Suction Tube Smooth surface, S/S connector OD: 10 mm, ID: 7 mm, 2M | 50/box |
| I10119 | Suction Tube Smooth surface, S/S connector OD: 10 mm, ID: 7 mm, 3M | 50/box |

Suction Handle Orthopaedic Sterile Single Use

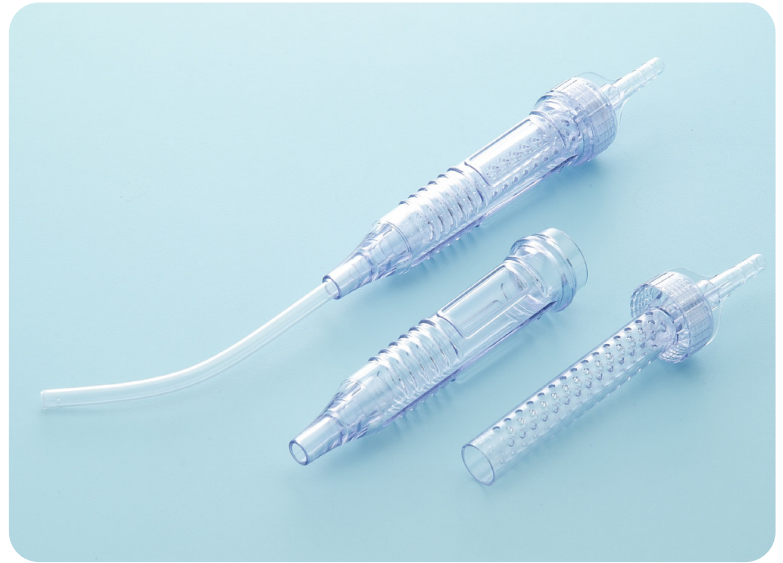

Paco Flow Orthopaedic Suction Set

The Paco-Flow is for intra-operative suction of exudates, fluid and debris in Orthopaedic surgery. For single use only.

It includes: Suction canister with filter/ 15 cm or 23 cm curved tip or 28 cm straight tip/250 cm connecting tube (optional).

Features

- High-capacity filter prevents debris blockages
- Crossflow filter cartridge retains and collects bone fragments, cement and coagulated blood
- Filter can easily be removed and replaced within seconds
- The removable, reversible tip is suitable for either acetabular or femoral suction
- Ergonomic shape for ease of use and ensures stability and control

| CODE | DESCRIPTION | PACKAGE |
|---------|--|-----------------|
| QP09282 | Orthopedics Suction Set 15 cm & 23 cm curved tip, 28 cm straight tip with additional filter | 10/box, 60/case |

Suction Handle Poole Sterile Single Use

Poole's Suction Handle

Poole's Suction Tip is for removal of large quantities of blood, fluid and debris from surgical sites during a procedure. Often used during abdominal procedures the suction tube has multiple eyes.

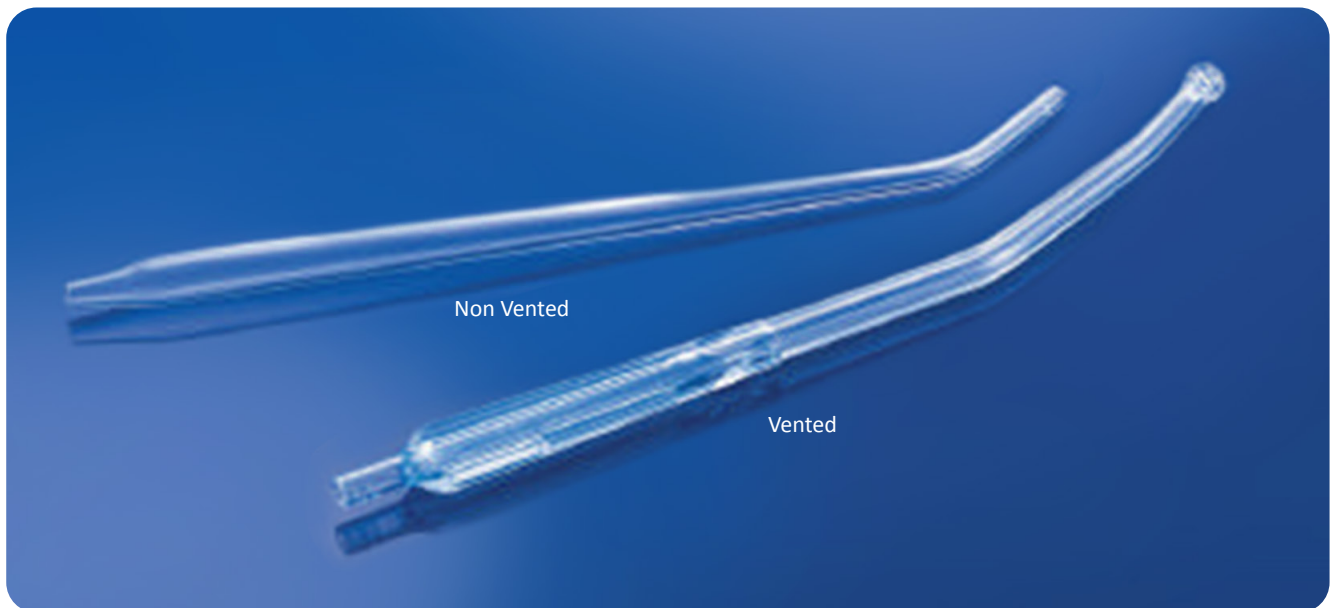

Features

- Two-part tube locks securely for use as an assembled unit:
 - Inner tube can be used for spot suctioning to reach into confined areas
 - Outer sleeve has multiple eyes promoting rapid, evenly dispersed suctioning of fluids to avoid clogging on fat particles
- Ergonomic handle allows for easy manipulation and positioning
- Fine lumen polished at the distal end for atraumatic tissue contact
- Angled tip model permits effective and tissue-friendly suction

| CODE | DESCRIPTION | PACKAGE |
|--------|---------------------|---------|
| I37502 | Poole's Suction tip | 1 unit |

Handles

Suction Handle Yankauer

Complete range of single-use Yankauer's designed for effective suction of fluids and meets all requirements in the operating theatre.

Features

- Ergonomic handles provide excellent and safe grip
- Silk smooth inner and outer surfaces minimise friction and eliminate obstruction or clogging
- Available with or without vent
- Universal connection
- Transparent tip with multiple size

Suction Handle Yankauer Vented Sterile Single Use

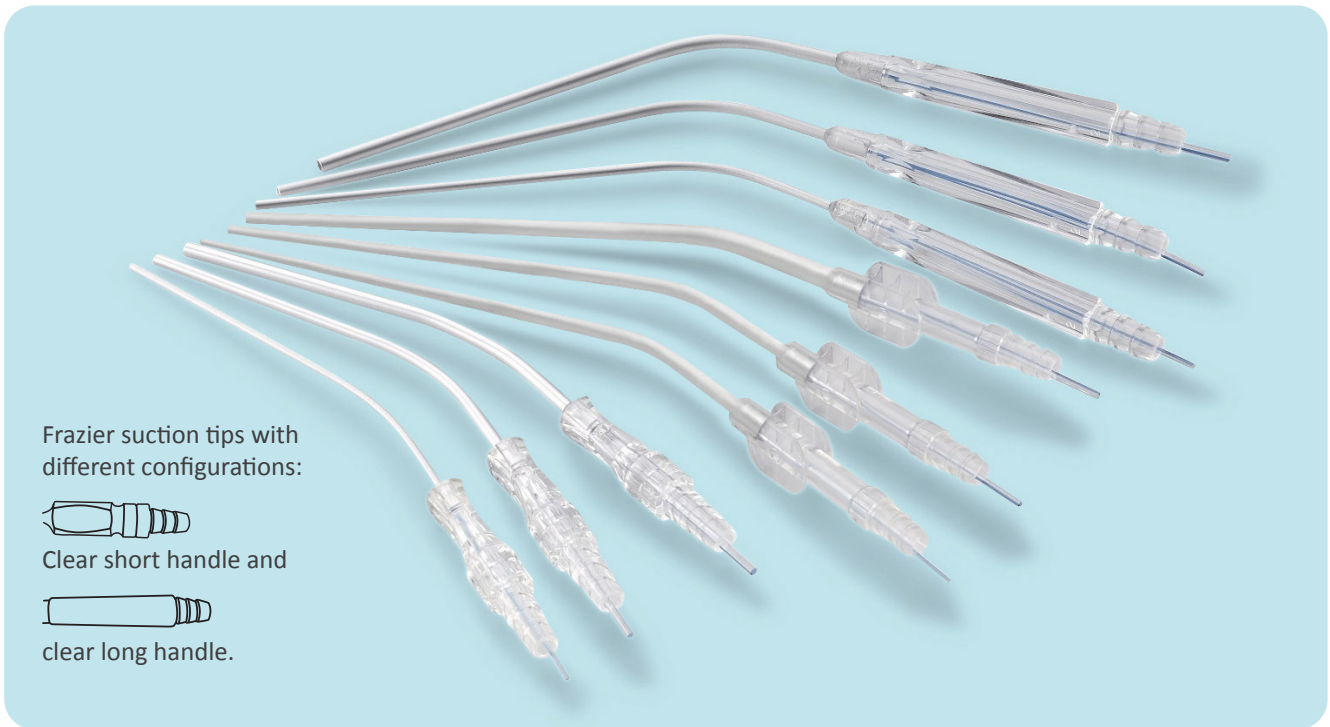

Yankauer Suction Handle – Vented

Frazier suction tips with different configurations:

Clear short handle and

clear long handle.

Suction Handle Frazier Sterile Single Use

Frazier Suction Tip

The Frazier Suction Tip is for delicate, fine and precise suctioning in Cardiac, Neuro, Plastic and ENT surgeries. Size available in 6 FR/8 FR/10 FR/12 FR/14FR for procedure versatility.

Features

- Malleable aluminium shaft can be bent to desired position provides flexibility during procedures, will prevent clogging during procedures
- The radius tip design is less traumatic to surrounding tissues
- Light weight plastic handle with Control vent facilitates excellent manoeuvrability

| CODE | DESCRIPTION | PACKAGE |
