

# SwagUp Sustainable Swag Options

2020

**When it comes to sustainability, we recognize swag has a bad rap...**

## **With that in mind we:**

1. Use high quality items that people will love and use, not trash
2. Use sustainably-sourced items and recycled materials when possible
3. Focus on products that replace single-use items like totes and bottles
4. Partner with suppliers/brands that support sustainability efforts

**What follows is some of our favorite sustainable swag**

\*confidential internal document, do not share
