2	License Activation Wizard
L	icense Activation Symantec.
tere train	License activation requires that you enter a license serial number or select a Symantec license file. You receive the license serial number or Symantec license file in an email after you purchase your Symantec product license.
	I have a serial number
	O I have a Symantec License file (.slf) @ What's this?
	These procedures assume you have already purchased a product license and that you have the license information available. If you do not have a license serial number or license file, contact your preferred Symantec Reseller or sales partner.
1	For more information, visit the Symantec Licensing Information Center

4.Install Symantec Endpoint Protection to Server or PCs

4.1 เลือก Install the client software on your computer

Ø	Client Deployment Wizard
	Select Deployment Type Symantee
	Welcome to the Client Deployment Wizard
	Use this wizard to install the protection client on computers in your network or update existing client communication settings.
	Note: For instructions to install the client on a computer that runs Symantec Mail Security or Symantec Scan Engine, see the Symantec Technical Support knowledge base article:
	Click here
	New Package Deployment
	Select packages from the server and specify client group and features.
	C Existing Package Deployment
	Choose from previously exported packages that are located on your hard drive.
	Browse
	Communication Undate Backane Deployment
	Create a package that changes the communication settings on an existing Symantec Endpoint Protection client installation. Use this option to restore communication between the client and Symantec Endpoint Protection Manager, to connect the client to a new Symantec Endpoint Protection Manager, or to convert an unmanaged client to a managed client.
	🔘 Create a package for Symantec Endpoint Protection clients that run on Windows. 🧳
