Overview

This document contains the minimum client hardware requirements, server recommendations and Terminal Server minimum hardware requirements supported

by the Microsoft Dynamics GP Technical Support Team. The following server recommendations are not minimum server requirements. The requirements and recommendations are based on experience with many different installations. Users

may need to increase these requirements due to environmental factors to achieve

individual performance expectations.

Review each Customer Profile below to determine what profile best fits the user

count, modules used and transaction volume for your environment. Use that Customer Profile as a recommendation for your server hardware implementation.

*****The System Requirements are subject to change until the release of Microsoft Dynamics GP 2018*****

Client Requirements

Item	Requirements	
	32-bit	x64
Operating System	Microsoft Windows 10 Professional Edition	Microsoft Windows 10 Professional Edition
	Microsoft Windows 10 Enterprise Edition	Microsoft Windows 10 Enterprise Edition
	Microsoft Windows 8 & 8.1 Professional Edition	Microsoft Windows 8 & 8.1 Professional Edition
	Microsoft Windows 8 & 8.1 Ultimate Edition	Microsoft Windows 8 & 8.1 Ultimate Edition
	Microsoft Windows 8 & 8.1 Enterprise Edition	Microsoft Windows 8 & 8.1 Enterprise Edition
Processor	1 Dual Core or 1 Single Core Processor 2.6 GHz or higher	1 Dual Core or 1 Single Core Processor 2.6 GHz or higher
Available Hard Disk Space	2GB or more on the system root	2GB or more on the system root

Minimum Available RAM	2GB or more	2GB or more

Network Card	1GB Ethernet
---------------------	--------------

Microsoft Office	Microsoft Office 2013 32bit & x64 Microsoft Office 2016 32bit & x64
-------------------------	--

NOTES:

1. If using Office x64, the server type in System Preferences (Microsoft Dynamics GP | Tools | System | Setup | System Preferences) must be set to Exchange.
2. The Exchange server type only supports XPS and DOCX.
3. If using Office 32bit, the server type in System Preferences can either be MAPI or Exchange

Internet Explorer	Internet Explorer 11.0 - Desktop Mode Only Edge
--------------------------	--

ODBC Driver	SQL Native Client 11.0 SQL Native Client 10.0

Software Virtualization

Microsoft Application Virtualization (App-V) 5.0

For additional Virtual Technology Support, click the link below to review the Virtualization Support Policy Wizard. Choose Products to see if your Virtual Technology is listed.<http://www.windowsservercatalog.com/svvp.aspx?svvppage=svvpwizard.htm>

NOTES

1. A 32-bit ODBC DSN is required for Microsoft Dynamics GP 2018 on a 32-bit and x64 machine. Refer to [KnowledgeBase Article 870416](#) for the steps to setup a 32-bit ODBC DSN on an x64 machine.
2. When you deploy a system in a virtual environment, make sure that you have sufficient hard disk space to avoid performance problems. Each computer that you deploy in a virtual environment should meet or exceed the random access memory (RAM) requirements and the hard disk space requirements. NOTES

1. It is recommended to have a dedicated Terminal Server/Citrix Server. There may be performance losses if Microsoft SQL Server is running on the Terminal Server/Citrix Server. Therefore, it is highly recommended to have two separate servers. One server with Terminal Server and/or Citrix and one server with Microsoft SQL Server.
2. If using Adobe, Adobe must be installed at the Terminal Server.
3. If using Lync for Unified Communications, a remote app for Lync must also be configured and copied to the client along with the Microsoft Dynamics GP remote app. The Lync remote app must be launched first and then the Microsoft Dynamics GP remote app.
4. If accessing Citrix, the hardware and software must be supported according to the Citrix configuration requirements.

5. Verify processors can be upgraded.
6. The amount of RAM needed depends on the number of concurrent users per Terminal Server.
7. Verify switch is capable of handling network traffic.
8. Increased user count may require greater RAM and Processor speed.
9. Users utilizing Management Reporter or Crystal reporting via Terminal Services may require increased hardware to increase performance.
10. When you deploy a system in a virtual environment, make sure that you have sufficient hard disk space to avoid performance problems. Each computer that you deploy in a virtual environment should meet or exceed the random access memory (RAM) requirements and the hard disk space requirements. Additional Information

1. This document represents configurations tested by Microsoft Business Solutions and supported by Microsoft Dynamics GP Technical Support. Use of technologies not specified in this document is not recommended and will not be supported. Testing is ongoing, and as newer technologies become supported this list will be updated.
2. The following are no longer supported with Microsoft Dynamics GP 2018:
 - a. Windows Server 2008 all editions.
 - b. Microsoft SQL Server 2012 all editions.
 - c. Microsoft Windows 7 all editions.
3. Click [HERE](#) to view a KnowledgeBase article regarding support in a virtual environment. The following virtual products have been tested: Microsoft Windows

Server 2016 Hyper-V, Microsoft Window Server 2012 R2 Hyper-V, Microsoft Windows

Server 2012 Hyper-V, Windows Server 2008 R2 Hyper-V, Microsoft Windows

For additional Virtual Technology Support, click the link below to review the Virtualization Support Policy Wizard. Choose Dynamics GP as the product.

<http://www.windowsservercatalog.com/svvp.aspx?svvppage=svvpwizard.htm>

4. The Microsoft Dynamics GP 2018 core application is supported in a peer to peer (workgroup) environment. This environment excludes all web applications such as Web Services, eConnect, and Management Reporter. This also excludes Workflow 2.0 as a domain is required. If web applications are used, a domain is required.

5. Click [HERE](#) for more information regarding SQL Server 2012 supported features with Microsoft Dynamics GP 2018.

6. If you have questions regarding licensing SQL Server for use with Microsoft Dynamics GP. Please contact a Licensing Specialist at 1-800-426-9400.
