#### **Terms and Conditions**

For all our terms and conditions please go to www.justkampers.com Just Kampers Limited. Unit 1 Stapeley Manor, Long Lane, Odiham, Hants. RG29 1JE

When we set up Just Kampers way back in September 1989 I was a hard and fast air-cooled VW enthusiast. Fast-forward to 2013 and I am equally enthusiastic about the VWT5 and, love driving one as my daily. As I live and work out in the sticks I chose the 4-motion panel van. I couldn't resist adding a few of my own ideas to make it unique using parts you'll find in this catalogue.

We also have as 2009 T5 panel van that has been remapped by Pendle Performance and shod with a set of 20" Wheelwright rims. The reason we wanted a T5 and T5.5 or GP as they are officially known, is that we test our products before they make it into our catalogue, so needed one of each style.

Even as were sending this catalogue to print we were adding new products to the range, so I would advise you to keep visiting www.justkampers.com to see the latest additions.

Thinking about it, in many ways we have gone full circle and gone back to 1989, as we have recently set up our own workshop with a fully-trained mechanic and an in-house coach-trimming department. So, if you need mechanical work, conversion work or upholstery work we can help. Please call us for more information.

Finally, if you have any ideas for new products please drop us a line.

Mark Reynolds, **Managing Director** 

P.S. My T5 is the black and grey one in this catalogue.

# **Technical Info**

#### A brief history of the VWT5 2003 onwards

#### April 2003 to August 2009

The T5 was the replacement for the T4 and is the fifth generation of Volkswagen Transporter. Available as a medium sized light commercial vehicle and people carrier, it featured petrol and diesel options as well as a choice of front wheel drive or 4 wheel drive (4-Motion).

In June 2009, VW announced that the one-millionthT5 had rolled off the production line in Hanover.

#### September 2009 onwards

The T5 was revised with a facelift and new engine and transmission options, including a 7-speed (DSG) double clutch gearbox.

#### Service Regimes for Diesel Engines\*

The LongLife Service Regime is so called because there are no set intervals. The intervals between services will vary depending on how you drive your vehicle and the conditions of use. There is however maximum time/distance parameters set and if the service light has not come on it will do so when either maximum mileage or time limit is met.

The maximum mileage/time parameters vary by model, for more detailed information on LongLife Service regimes and their suitability for your requirements please contact your local Van Centre.

If you would like a more traditional service regime the vehicle can be adapted by your authorised Volkswagen Van Centre or Van Service Centre to the Time/Distance regime. This can be done at the point of vehicle sale or when an inspection service is carried out. An oil change is required every 10,000 miles for Caddys and Transporters and 12,500 for Crafters on the Time/Distance regime.

#### LongLife Service Regime

We recommend this service if you are likely to drive more than 25 miles a day, and if you tend to drive in the following way:

- Regular long distance driving
- Driving at a constant speed with minimum vehicle and engine loading, and minimal towing
- Economical driving

This LongLife regime has been made possible due to the development of new Volkswagen engines with the latest technically advanced longlife oil. These engines use built-in sensors that continually monitor the oil quality, making it possible to enjoy reliable and confident motoring for up to a maximum of 18,000\* miles or 24 months (whichever occurs first).

#### Time and Distance Service

We recommend this service if you are likely to drive less than 10,000\* miles in a year, and if you tend to drive in the following way:

- Mainly city centre driving, short journey with frequent cold starts
- High engine loading activities, e.g. frequent hill climbs, driving with your vehicle fully loaded and towing
- Uneconomical driving using high rpms with heavy acceleration and heavy braking

\*Please note that all mileages are approximate as the service indicator system uses kilometres as the distance measurement.

#### Frequently asked questions:

What is LongLife oil?

LongLife oil is a high grade, fully synthetic oil with increased resistance to ageing and high temperatures

Can I use any high grade fully synthetic oil even just to top up?

No! All Model Year 2007 and later Caravelle and Transporters require LongLife III VW norm 50700 oil. Although this oil is designated 5w30, not all 5w30 oils are the same. The critical oil standard is VW 50700 which MUST be displayed on your bottle. Use of the incorrect specification of oil may cause damage to your engine.

# Legals: It's down to you

The alloy wheels we supply are covered by a limited 12-month warranty against material defects and workmanship. We do not offer any warranty against surface degradation and corrosion as this depends entirely on customer care and

It is the customer's responsibility to check that our wheels and tyres comply with the conditions of their insurance company. You must make certain the C rated (commercial vehicle), RF (Reinforced) or Extra Load tyres you use have the correct load rating.

It is your responsibility to check for changes in the law and the terms and conditions of your insurance company to make sure neither affects fitting of wheels or tyres purchased from

You must inform your insurer of any changes made to the specification you have made to your vehicle as failure to do so could invalidate your insurance policy. You should be aware that there have been cases where inappropriate tyres have resulted in the failure of accident claims, this includes both load and speed ratings. You should never use a lower spec tyre than is or was fitted by the manufacturer, but any change in size or spec should be agreed with your insurer.

Fitment of tyres and wheels should always be undertaken by a qualified person. The wheel nuts must be re checked and re-tightened after driving the first 30 miles.

The new revised VW T5 GP was introduced by Volkswagen in September 2009.

Whilst some refer to this model as the T5.5, the official VW name is T5 GP. For those who are wondering, GP stands for Große Produktaufwertung which basically translates to; Great product improvement. This is a term used by VW for vehicles which are facelifted. The good news is that it is very easy to make the same external changes to any VW T5 built between April 2003 and August 2009. We can supply all the parts you need as a kit with the options of front fog lights and a simple plug in wiring conversion needed for the headlights.

Please note all of the body panels come primed.

# Complete Electric Heated Mirrors (Primed)

Complete mirror unit for the RHD T5 GP Transporter. Primed ready for colour coding.

# The new Just Kampers SWB Kombination Seat

The Kombination Seat has been designed and manufactured exclusively in the UK, for Just Kampers.

We set out to address the obvious failings of the aftermarket 'rock and roll' seats on the market, the main one being the way they are mounted to the vehicle. The Kombination seat is unique in that it offers full-width seating for three adults in the center of the vehicle leaving the rear section as a van. The Kombination also offers load space under the seat.

We have designed the seat to be mounted to a frame which in turn mounts to the VW factory fitted pallet mounting points - as these are crash tested and far superior to other methods of aftermarket seat fitment, such as bolting it through the floor. Both the Kombination seat and the frame have been pull-tested to comply with all the current legistlation by the Specialist Transport Advisory & Testing Utility Society. The Kombination seat is also removable should you wish to have the full carrying capacity of the van.

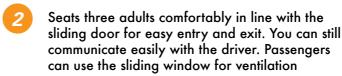

#### Six reasons to choose the Just Kampers SWB Kombination Seat:

The Kombination uses VW factory fitted 'pallet' mounting points.

Designed to offer load space under the seat, for trips to the DIY store, surf boards etc.

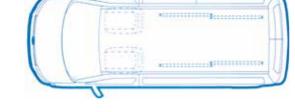

The Kombination is easy to remove from the mounting rails when the full carrying capacity of the van is needed.

Uses crash tested VW mounting points. S.T.A.T.U.S. pull-tested seat frame and mounts.

# **Interiors** - Noise Reduction & Thermal Insulation

Just Kampers is now the exclusive UK retailer of Dynamat products for T5s 2003 onward

If you kit your VW out with Dynamat products such as Dynamat Xtreme and Dynaliner from JK, you'll not only find the noise levels are greatly reduced but you'll also find the level

of heat in your vehicle is reduced.

All owners of Transporters should seriously consider using DynaDeck, as this would be a fabulous addition to your vehicle. DynaDeck is vinyl flooring, which has a very similar appearance to carpet, but is hardwearing and water resistant, and can be removed to be cleaned. The 1/8 of an inch vinyl top layer has a ½ inch noise and heat suppressing Dynaliner layer underneath it. This makes for a flooring which is not only easy to cut to shape – but it will drastically cut down road noise.

Dynamat Xtreme is a patented, lightweight elastomeric butyl and aluminum constrained-layer vibrational damper. Dynamat Xtreme can be die cut to shape and placed onto the body surface, directly on painted panels or after the sheet metal is cleaned before painting. Material performance is optimized for temperature ranges between 14°F and 140°F (- 10°C to +60°C). Material can withstand temperature extremes between -65°F and +300°F (-54°C to +149°C) and is highly resistant to aging.

#### Dynamat Xtreme Bulk Pack

The Dynamat Bulk kit contains 9 457  $\times$  812mm sheets of Dynamat Xtreme giving 36sq.ft coverage.

J27787 £144.50

#### Dynamat Xtreme Mega Pack

The Dynamat Mega Pack contains 9 609 x 1219mm sheets of Dynamat Xtreme giving 72sq.ft coverage.

J27788 **£248.50** 

# mark's thoughts...

"I was genuinely surprised at the difference it has made to my Ts. You can now hold a conversation on the motorway without having to shout. On the bumpy country lanes I travel on daily, it is like driving a different vehicle in terms of noise."

Dynaliner is the perfect ultra light weight insulator to use on top of Dynamat. This durable crush and tear resistant material has the highest heat blocking properties available in a single layer synthetic foam-type material.

Dynaliner isn't affected by oil and does not absorb water. Dynaliner provides acoustic isolation and excellent thermal insulation for roof, bulkhead/firewall, floor, quarter panels, doors and even as under the bonnet on a T5.

1/8 inch

J27789 £39.90

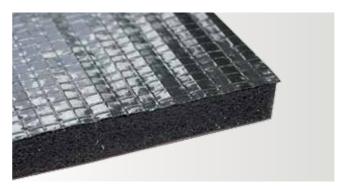

2 Dynamat Dynaliner 1/2 inch

J27791 **£80.00** 

The Hoodliner is a polyether, urethane-based, thermo-acoustic foam with a reinforced aluminiumsed facing and a pressure-sensitive adhesive on the application side. The Hoodliner is designed to be die cut to shape and then applied in a vehicle's engine compartment to the underside of the bonnet. The adhesive side is smooth, ensuring complete contact with the underlying surface without any air pockets of channels. Both material and adhesive can withstand temperature ranges between -40°F and +225°F (-40°C to +107°C).

This ultra-durable cab and load area carpet replacement is made of high grade 3/8" waterproof liner, utilising a 1lb/sq.ft. vinyl barrier over a 1/4" high efficiency thermoacoustic foam. Has a durable deep twist embossed vinyl grain top facing. This is the best all-round solution for the VW Transporter as it deadens sound, stops booming and makes great hard wearing flooring which can be removed to be cleaned.

# **Interiors** - Gas Heating

For over 20 years the Propex name has been synonymous with quality air heating and water heating products. From the early days of heaters designed for the leisure market and with their new Heatsource range, they now supply some of the most advanced gas heaters available today for a variety of applications from motor-homes and caravans to marine craft and horseboxes.

Propex heaters run on clean burning Propane gas or Butane gas so are entirely independent from the engine fuel supply, they produce less pollutants and are cheaper to run than diesel heaters.

All heatsource blown air heaters conform to the latest European Standards for gas fired heaters where focus is very much on safety. All Propex Blown air heaters and water heaters incoporate leading edge electronics that are constantly monitoring all operations of the water or air heaters to ensure maximum efficiency.

# Control Unit for the Propex Heatsource

# Easy Start Call

Eberspaecher is making the smartphone the control centre of personalised vehicle comfort. This has been made possible thanks to the new remote control app EasyStart Call. The associated free app for smartphone users turns the touchscreen into an easy-to-use operating interface. The start and running time, timer function of the pre-heater as well as numerous other service features can be controlled both via iPhone and android devices. Thanks to an integrated speech module and text instruction set, users of conventional mobile phones can also benefit; all that's needed is a call or text by landline or mobile phone – and the ideal temperature in the vehicle is guaranteed, no matter what the distance.

#### Fitting Rear Side Fixed Window Glass to an Uncut Rear Panel

When you fit front side windows to a Panel van you end up with a van that looks like a Kombi and still has van rear panels. If you want the versatility of a Kombi but the looks of a passenger Bus, we have the answer. Simply bond rear windows to the body! From the outside it looks as though you have windows, even though you don't. We carried out this nifty trick on the MD's black 4-Motion Panel van. To fit the windows you need to key the paintwork before Sikaflex (J18126) bonding the 'faux' windows in place.

#### Sikaflex 221 (Black) Sealant Bonding Agent (Black)

A high quality, multi-purpose, non-sag, polyurethane sealant and bonding agent. It cures on exposure to atmospheric moisture and is ideal for bonding glass onto T5 conversions.

# **Vehicle Care**

#### T5 Breathable Van Cover

Our own T5 breathable van cover has some great new features. The addition of a full length, under-vehicle securing strap and rain flaps on all the zips make the Deluxe van cover, in our opinion, the best value van cover on the market.

Made from aluminised, breathable, lightweight material, it helps to protect your vehicle from the elements, dust, sunlight, and more. It has an all-round elasticated hem, with 3 under-vehicle adjustable securing straps - one lengthways and two widthways. Door zips have rain flaps to provide extra weatherproofing and all door openings have ties to allow for airing when in winter storage.

Please note: if you have a T5 with electric wing mirrors the cover is a very snug fit!

#### Just Kampers are running a workshop again, just like 1989!

JK started out as a garage, and now that we have the space here at JK HQ in Hampshire we've gone 'back to the future' and are once again running a fully kitted out workshop, offering servicing and part fitting.

For more information about the workshop and the services that we're offering, just give us a call on 0845 1204717
