MONTEREY BAY AQUARIUM OPENS 'TENTACLES' SPECIAL EXHIBITION, CELEBRATES 30th ANNIVERSARY WITH SPECIAL EVENTS AND ACTIVITIES

Highlights include seahorse and cephalopod special exhibitions, romance tours and behind-the-scenes tours, and a transformed restaurant

Journey to a world of undersea magicians, masters of disguise and quick-change artists when <u>Monterey Bay</u> <u>Aquarium</u> opens its newest special exhibition, "<u>Tentacles: The Astounding Lives of Octopuses, Squid and</u> <u>Cuttlefishes</u>", on April 12.

"Tentacles" is just one of many special activities and events planned in 2014, when the acclaimed aquarium celebrates its 30^{th} anniversary.

"Tentacles" is the largest, most diverse living exhibition ever created to showcase these amazing animals. Over the life of the exhibit, visitors might see any of the two dozen species that will rotate through a dozen exhibits, from the giant Pacific octopus to chambered nautilus, the Hawaiian bobtail squid to wunderpus octopus and more. On occasion lucky visitors may see never-before-exhibited deep sea squid and octopuses collected in collaboration with the aquarium's sister organization, the <u>Monterey Bay Aquarium Research Institute</u>.

The aquarium's other special exhibition, "<u>The Jellies Experience</u>," put jellies center stage. These graceful, dancing drifters that pulse and glow, flash colorful lights and often pack a powerful sting are alive in all their psychedelic glory in this mind-blowing special exhibition.

"Tentacles" and "The Jellies Experience" are just two of the many exciting things to see and do in 2014 at the award-winning <u>Monterey Bay Aquarium</u>, which opened its doors on Monterey's historic <u>Cannery Row</u> in October 1984. Besides engaging live exhibits, visitors can enjoy special weekend events, extended hours on summer weekends, Aquarium Adventures and other programs, as well as great dining options.

In addition to its changing special exhibitions, the aquarium's permanent exhibits include a <u>towering three-story</u> <u>kelp forest</u>; touch pools and other hands-on exhibits; the <u>Splash Zone</u> family galleries; and the million-gallon <u>Open Sea</u> exhibit, home to sandbar and hammerhead sharks, sea turtles, ocean sunfish and on occasion, a <u>great</u> <u>white shark</u>.

Guests can get a deeper aquarium experience by booking <u>behind-the-scenes tours and other Aquarium</u> <u>Adventures</u> programs, including sleepovers, kids' SCUBA experiences, and special Romance Tours – perfect for marriage proposals, anniversaries and other moments to share with a special someone.

Culinary fans mark their calendars for the aquarium's annual <u>Cooking for Solutions</u> celebration, three days of sustainable and organic gourmet fare featuring celebrated chefs like Alton Brown, Carla Hall, Richard Blais and MasterChef Junior winner Alexander Weiss. This year's events take place on May 16-18, including ticketed events and other programs open to all aquarium visitors.

Great food and drink is available all year long at the aquarium's culinary gem, <u>Cindy's Waterfront Restaurant &</u> the Monterey Bay Aquarium Cafe. The restaurant and cafe feature a fantastic menu from the aquarium's James Beard Award-winning culinary partner, Chef Cindy Pawlcyn – the creator of Mustards Grill in Napa Valley and many other celebrated restaurants – and from resident Executive Chef Jeff Rogers.

Special exhibitions and all exhibits and programs except Aquarium Adventures are included with aquarium admission. Rates and hours vary by season. The aquarium is located on historic Cannery Row in Monterey and is open daily except December 25. Visit <u>MontereyBayAquarium.org</u> for more information on exhibits and daily programs, and to purchase tickets online. Advance tickets can also be purchased toll-free by phone from the aquarium at (866) 963-9645.

The website also hosts streaming live web cams.

The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans.

DISCOVER THE WONDERS OF THE OCEAN AT THE MONTEREY BAY AQUARIUM

On October 20, 1984, the fish came back to Monterey's historic Cannery Row.

They came back in style, too, as the stars of the world-acclaimed Monterey Bay Aquarium. Today, more than 35,000 creatures representing over 550 species fill 34 major galleries. With nearly 200 exhibits in all, the aquarium is a showcase for the habitats and sea life of one of the world's richest marine regions.

Since its opening, in surveys of peers and public alike, the aquarium has consistently been ranked No. 1 in the United States for its innovative exhibits and unsurpassed visitor experience. Among many accolades, the aquarium was named the No. 1 family-friendly aquarium by *Parents Magazine* and *Forbes Traveler*, and the best aquarium and the third overall top-rated family attraction in the country, according to the Zagat Survey® U.S. Family Travel Guide. It has also grown to become one of the leading ocean conservation organizations in the world.

Over its 29 years, the non-profit Monterey Bay Aquarium has been lauded for creating an expertly designed "undersea tour" of Monterey Bay's hidden world. From coastal wetlands to the open sea, from kelp forests to a mile-deep submarine canyon, the bay shelters an amazing range of habitats and sea life. The bay is also at the heart of the largest marine sanctuary along the shores of the continental United States.

Visitors can discover the plants and animals of Monterey Bay in a series of remarkable exhibits that have changed the face of aquarium design. With the debut of its award-winning "Open Sea" galleries in 1996, Monterey Bay Aquarium became the first in the world to create open ocean exhibits on a grand scale. The exhibits are shining light on epic migrations of ocean animals across the Pacific and the constant motion of life in the open ocean.

The million-gallon Open Sea exhibit houses a diverse community of open-ocean animals, including tunas, pelagic stingrays, mackerel, sardines and scalloped hammerhead sharks.

Elsewhere in The Open Sea galleries visitors can immerse themselves at one of the largest permanent jellyfish galleries to be found at any aquarium.

Marine life closer to shore is the highlight of the aquarium's "Ocean's Edge" galleries. Here, visitors can explore habitats including coastal wetlands, the rocky shore, a living kelp forest and the undersea waters of Monterey Bay.

Visitors can enter the realm of the giant octopus, explore an expanded shorebird aviary and coastal wetland exhibit, and venture beneath crashing waves. They also can step into the "Real-Cost Cafe" and learn how to order a seafood meal that pleases the palate and protects ocean wildlife.

Sevengill sharks, salmon, giant sea bass and other fishes roam the 90-foot-long, 326,000-gallon Monterey Bay Habitats exhibit, which recreates a cross-section of the bay's major habitats: sandy seafloor, shale reefs, deep

reefs and wharf pilings. Sea otters frolic inches away from visitors in a two-story exhibit where they're on view both at the surface and underwater. A towering 28-foot-high Kelp Forest exhibit offers a diver's-eye view of a living kelp forest community.

The aquarium not only puts people eye-to-eye with a host of creatures, it puts them in touch with sea life, too. Kids and adults alike can touch bat rays in the Bat Ray Pool and sea stars, gumboot chitons and abalone in the Ocean's Edge Touch Pool. They can stroll through an open-air shorebird aviary, walk under a kelp canopy, and pass beneath life-size models of orcas, gray whales, porpoises and dolphins.

Microscopes, magnifiers, telescopes and even a viewer-guided underwater macro-video camera bring visitors closer to the mysterious world beyond the aquarium's decks. A hands-on learning gallery lets younger children and their families explore the adaptations that allow marine mammals to survive in the ocean.

More than 1.8 million people visit the 322,000-square-foot aquarium annually. There's always something new to see and do – even for those who return often – such as new animal arrivals, days with special animal-themed programming such as sharks, and other family events. Among the aquarium's unique programs are kelp forest feeding shows where a diver talks with the audience through a two-way communications mask, and daily video broadcasts of deep sea marine life, sent to the aquarium from a scientific research submarine operating as much as 12,000 feet below the surface of Monterey Bay. Hands-on "discovery stations" and interactive exhibits help make each aquarium visit a memorable experience.

Elsewhere in the aquarium, visitors can explore "The Jellies Experience," which opened in March 2012, placing jellies center stage. These graceful, dancing drifters that pulse and glow, flash colorful lights and often pack a powerful sting are alive in all their psychedelic glory in this mind-blowing special exhibition.

Opening on April 12, 2014, <u>"Tentacles: The Astounding Lives of Octopuses, Squid and Cuttlefishes"</u> is the most dynamic special exhibition ever from the aquarium that pioneered award-winning exhibits of jellies and deep-sea animals.

In 2014, "Aquarium Adventures" programs will again let visitors enhance their experience with behind-thescenes tours and activities. Offerings include daily behind-the-scenes tours, a new jellies tour, a seasonal surface SCUBA diving for kids ages 8 to 13 in the Great Tide Pool, pre-opening feeding tours and other adventures.

Other permanent exhibits at the aquarium include "Vanishing Wildlife: Saving Tunas, Turtles and Sharks," that focuses on why these magnificent animals need our protection and what individuals can do to help.

The "Splash Zone: Ocean Homes" family galleries features interactive exhibits and living species designed to engage the imaginations of young visitors and inspire a lifelong connection with the wonders of the oceans. The galleries encourage families with children to play and learn together, exploring three ocean habitats – the Enchanted Kelp Forest, Coral Reef Kingdom and Rugged Rocky Shore.

"Splash Zone" features over 45 bilingual interactive exhibits, many fascinating animals including penguins, cuttlefish and leafy sea dragons, as well as exhibits featuring the kelp forest habitat and an immersive touch pool. The aquarium's waterfront decks offer telescopes and sweeping views of Monterey Bay. Inside, visitors will find gift and bookstores, and the Monterey Bay Cafe and Restaurant, with its self-service cafe, ocean-view restaurant and full-service bar.

The aquarium is located on historic Cannery Row, just two and a half hours south of San Francisco and only 15 minutes from Carmel and Pebble Beach, at 886 Cannery Row in Monterey. Hours of operation vary by season.

Travelers can find more information about the aquarium's exhibits and the local marine environment – plus live web cams, a special events calendar, online games and more – at <u>www.montereybayaquarium.org</u>. All programs and special exhibitions (except for "Aquarium Adventures") are included with aquarium admission of \$39.95 adult (18 and over); \$34.95 senior (65+) and student (13-17 or with college I.D.); and \$24.95 children (3-12).

(**2014 rates; subject to change**). Children under 3 are admitted free. Discounted tickets for members of the military and their families can be purchased in advance at many California and Nevada installations.

Advance tickets can be purchased online at <u>www.montereybayaquarium.org</u>; or by phone from the aquarium at (866) 963-9645. To register for "Aquarium Adventures" programs, call (866) 963-9645. Guests at select Monterey Peninsula hotels can buy two-day tickets (at one-day ticket prices) at hotel front desks. Visitors can find aquarium hotel partners on the aquarium website. They can also book rooms and learn about special lodging packages with one toll-free phone call to (866) 900-9188; or at <u>www.seemonterey.org</u>.

Parking for visitors is located three blocks away, in the Cannery Row parking garage. From Memorial Day to Labor Day, the free MST Trolley links the aquarium and Cannery Row with downtown Monterey, Pacific Grove, and major waterfront destinations including Fisherman's Wharf.

For more information, call (831) 648-4800 or visit www.montereybayaquarium.org.

Updated: December 2013

Monterey Bay Aquarium Overview – 2014

| MISSION: | To inspire conservation of the oceans |
|---|---|
| GRAND OPENING: | October 20, 1984 |
| LOCATION: | 886 Cannery Row, Monterey, California |
| HOURS: | The aquarium is open daily, except Christmas Day. Hours of operation vary by season. Visit <u>www.montereybayaquarium.org</u> or call (831) 648-4800 for daily schedules. |
| ADMISSION RATES: | \$39.95 Adult (18 and over) \$34.95 Senior (65 and over) \$34.95 Student (13-17, or with college I.D.) \$24.95 Child (3-12) Group rates available for 12 or more (by reservation; 1-866-963-9645) |
| INFORMATION: | (831) 648-4800; <u>www.montereybayaquarium.org</u> |
| ADVANCE TICKETS/ RESERVATION CENTER: | (866) 963-9645 (toll free) or online at <u>www.montereybayaquarium.org</u> |
| OPERATING BASIS: | Private non-profit, self-supporting; no public funding; annual budget \$73 million |
| CAPITAL COST: | Nearshore galleries: \$55 million (opened October 1984) Outer Bay galleries: \$57 million (opened March 1996) New entry, ticket lobby and skywalk: \$10 million (opened May 2004) Ocean's Edge galleries (updated Nearshore galleries): \$11 million (opened May 2005) Open Sea galleries (updated Outer Bay galleries): \$19 million (opened July 2011) |
| CURRENT SPECIAL EXHIBITIONS: | "<u>The Jellies Experience</u>" puts jellies center stage. These graceful, dancing drifters that pulse and glow, flash colorful lights and often pack a powerful sting are alive in all their psychedelic glory in this mind-blowing special exhibition. Ongoing. "<u>Tentacles: The Astounding Lives of Octopuses, Squid and Cuttlefishes</u>" is the most dynamic special exhibition ever from the aquarium that pioneered award-winning exhibits of jellies and deep-sea animals. It opens on April 12, 2014. |
| GALLERIES AND MAJOR EXHIBITS: | Nearly 200 galleries and exhibits devoted to the diverse habitats of Monterey Bay. The four largest exhibits are the <u>Open Sea (1 million gallons)</u> ; the <u>Kelp</u> <u>Forest</u> (335,000 gallons); <u>Monterey Bay Habitats</u> (326,000 gallons); and <u>Sea Otters</u> (55,000 gallons). |
| LIVE EXHIBITS: | More than 35,000 animals and plants representing over 550 species of fishes, invertebrates, mammals, reptiles, birds and plants found in Monterey Bay and other marine habitats worldwide. |
| FEEDING SHOWS: | Sea Otters at 10:30, 1:30 and 3:30 daily Blackfooted Penguins at 10:30 and 3:00 daily Kelp Forest dive show at 11:30 and 4:00 daily Open Sea at 11:00 daily Laysan Albatross at 1:30 daily Watch shows via live <u>cams</u> |
| DIMENSIONS: | Site: 3.3 acres Exhibits and other public areas: 175,064 sq. ft. (excludes decks) |

| ATTENDANCE: | Ocean-view decks: 25,500 sq. ft. Behind-the-scenes: 125,300 sq. ft. Total aquarium square footage: 322,000 sq. ft. Grand opening year: 2.37 million Open Sea grand opening year (1996): 2.41 million Total in 2013: 1.9 million Annual average: 1.8 million Total through 2013: 54 million |
|------------------------------|--|
| STAFF AND ADMINISTRATION: | Approximately 425 full and part-time staff; over 1,200 volunteers. |
| DISABLED ACCESS: | All exhibits and aquarium facilities are accessible to people with disabilities. Most exhibit videos are captioned; wheelchairs are available free for use during a visit. Ask for details at the Information Desk. |
| VISITOR INFORMATION: | Free visitor maps in several languages are available at the Information Desk. |
| ON THE WEB: | Information about all permanent and special exhibits, events and promotions, as well as an online newsroom with full press kits and photo and video libraries can be found online at <u>www.montereybayaquarium.org</u> . Become a fan of the aquarium on Facebook and follow us on Tumblr, Twitter, YouTube, Google Plus, Pinterest and Instagram. |

Updated: January 2014

INSPIRING OCEAN CONSERVATION

The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans. Approximately 425 full and parttime staff members and over 1,200 volunteers at the non-profit aquarium work toward these goals. The \$70 million annual budget of the Monterey Bay Aquarium Foundation is supported by earned revenue (admission, gift and bookstore sales) and contributed income (memberships and donations). Major endeavors include:

Exhibits

Aquarium exhibits are a living extension of Monterey Bay, which lies at the heart of the nation's largest marine sanctuary. Exhibits feature more than 35,000 creatures and over 550 species of plants and animals from the waters off California's central coast – and beyond. Seawater from the bay is piped into the aquarium at a rate of up to 2,000 gallons per minute (1 billion gallons a year) to sustain a three-story living kelp forest, a Monterey Bay Habitats exhibit with large sharks and schooling fishes, a two-story sea otter exhibit, a walk-through aviary and nearly 200 smaller exhibits and galleries devoted to the varied habitats around the bay, from rocky shores to coastal estuaries and the sandy seafloor.

The Open Sea galleries tell the story of marine life found in open ocean waters of the temperate Eastern Pacific. Exhibits include a million-gallon indoor ocean and large jellyfish galleries. Vanishing Wildlife focuses on why magnificent animals like sea turtles, sharks and tunas need our protection, and what we can do to help. Special exhibitions feature sea life stories and conservation topics from around the world.

Education & Outreach

Each year, free school programs serve over 80,000 visiting schoolchildren. In January, 2012 the aquarium welcomed its 2 millionth student as part of its education programs. Students take part in guided and self-guided tours and classroom programs taught by staff educators. The Splash Zone family gallery becomes an extended classroom for Head Start students and families around Monterey Bay. All education programs are offered free of charge. Other conservation and science initiatives for young people include Teen Conservation Leaders (TCL); Young Women in Science, a week-long summer program for teens; Watsonville Area Teens Conserving Habitats (WATCH), which support two local high schools with environmental education programs; and a Student Guide program in which young people learn to interpret Monterey Bay marine life for aquarium visitors.

Annual teacher workshops and teacher institutes help educators become more effective at teaching science and sharing their skills with colleagues. Materials for teachers and students are available online.

More than 500 volunteer guides (out of over 1,200 volunteers in all) receive ongoing marine science training from aquarium staff. They add depth to a visit by answering visitors' questions and leading tours.

Conservation Research

Biologists with the Monterey Bay Aquarium Sea Otter Research and Conservation program are assessing the long-term health of California's sea otter population and play key roles in recovery efforts for this threatened population. The research-oriented approach supports the priorities of the federal sea otter recovery plan released in April 2003 by the U.S. Fish and Wildlife Service to identify the possible causes that have slowed the growth of the southern sea otter population, including increased rates of infectious disease and parasites within the wild otter population.

The aquarium's program is the only one of its kind in the world to care for stranded otter pups and return to the wild those animals that can contribute to the recovery of the wild population. Staff and volunteers constantly refine their techniques for the care of injured and orphaned sea otters. Protocols developed at the aquarium will be applied in the event of a major oil spill in the sea otters' California range.

Staff and research colleagues with our Project White Shark tag and track adult and juvenile great white sharks in the eastern Pacific, and collect DNA samples in an effort to map the migrations and genetic diversity of these top ocean predators. Project staff also attempts to bring young white sharks to the aquarium for exhibit; since 2004 six animals have been kept at the aquarium for periods up to six months before they were tagged and returned to the wild.

The Tuna Research and Conservation Center (TRCC), a joint project with Stanford University, is the world's leading center to study these ecologically and commercially important fishes. TRCC scientists have been working since 1996 to answer basic questions about tunas' marathon migrations by tagging individual fish in the wild with electronic data tags,

documenting genetic diversity and distribution of tuna populations across ocean basins through DNA analysis, and studying basic tuna physiology by studying captive populations of warm-blooded tuna and their cold-blooded relatives.

Aquarium researchers conduct long-term field studies of sea otter behavior; and study the basic physiology and husbandry of open-ocean and deep-sea animals, including sharks, jellies and schooling fishes. Our internship program brings college students to the aquarium for original research projects.

The independent Monterey Bay Aquarium Research Institute (<u>MBARI</u>) uses Monterey Bay as a living laboratory to study complex deep sea and open ocean systems. Engineers at the institute design new tools for scientists to use in their research. Aquarium visitors can see researchers at work during daily auditorium programs featuring live video from deep-sea research submersibles. And a permanent exhibit, Mission to the Deep, highlights MBARI's tools and technologies with interactive displays, high-definition footage and animation to transport visitors into the deep sea.

Shorebirds, corals and many marine animals breed in our exhibits or are reared behind the scenes. Some birds are returned to the wild, and animals deemed non-releasable can be shared with Association of Zoos and Aquariums (AZA) accredited institutions to reduce collecting from the wild.

Resource Conservation

The aquarium is a leader in conservation business practices, from our seafood buying policies and conservation requirements for vendors who deal with our gift and bookstores; to programs that reduce our carbon footprint, conserve water, encourage alternative transportation and promote recycling.

Staff use vanpools, receive free bus passes, pay reduced parking fees for carpooling, and enjoy incentives for riding a bike or walking to work. The aquarium helps subsidize a community shuttle bus serving waterfront destinations and hotels during summer months. Voluntary staff contributions to a Conservation Action Fund support habitat restoration projects in the Monterey Bay region.

Aquarium publications are printed on recycled paper or published online, and most waste generated by aquarium offices, shops and gift and bookstores is recycled. Cleaning materials and other chemicals used here have largely been replaced with nontoxic products. The aquarium's <u>Seafood Watch</u> program is a leader in transforming the seafood market to support sustainable fisheries and aquaculture. We created Seafood Watch guides for consumers and partner with restaurants and food service companies to help them shift to sustainable seafood purchasing

Updated: May 2013

Promotional Events Calendar 2014

Community Week (February 3-9)

Free admission for residents of Monterey, Santa Cruz and San Benito counties. Visitors must present a photo ID and proof of residence at the main entrance. Current student identification from colleges and universities in Monterey, Santa Cruz and San Benito counties, and current utility bills showing residence in one of those countries, are also valid proof of residence. Guests from outside the tri-county area – including relatives or friends of local residents – can accompany local residents, but will be charged regular admission fees.

Dia del Niño (April 6)

Celebrate children and families with live Latin performances, bilingual feeding shows, a craft room, prize drawings and more. Children 12 and under will be admitted free all day.

Cooking for Solutions (May 16 - 18)

Celebrity chefs from around the country gather for a celebration of sustainable seafood. Events include the signature Friday-night gala, weekend food and wine adventures, cooking demonstrations and more. On Saturday and Sunday, all visitors enjoy the Sustainable Foods Celebration featuring special food events, celebrity chef, tastings and book signings.

World Oceans Day Celebration (June 7 & 8)

Join in for a celebration of the amazing ecosystem that covers 70% of our planet. You'll learn about the treasures of the ocean, the threats it faces and what we can do to keep it healthy.

Evenings by the Bay – Saturdays & Sundays (July 5 through August 31)

Spend summer evenings on the bay with extended hours until 8 p.m. on summer weekends. Get a few more hours to commune with your favorite animals, enjoy special programs and live music.

Otter Days (September 20 & 21)

Learn about Monterey Bay's most charismatic creatures from experts who care for them at the Aquarium and researchers who study them in the wild. Special family activities and programs all feature adorable otters.

Fiesta del Mar (October 19)

Celebrate ocean conservation and Latin American cultural traditions. The day includes live music, cultural dance, bilingual feeding shows, crafts for kids and more. Children 12 and under will be admitted free all day.

Shark Days (November 1 & 2)

Explore the mysterious world of sharks and rays, shake the hands of aquarists who hand feed the ocean's most misunderstood predators, enjoy special animal feeding shows and presentations, and revel in the beauty and power that is the ocean.

Community Open House (December 6-14)

Free admission for residents of Monterey, Santa Cruz and San Benito counties. Visitors must present a photo ID and proof of residence at the main entrance. Current student identification from colleges and universities in Monterey, Santa Cruz and San Benito counties, and current utility bills showing residence in one of those countries, are also valid proof of residence. Guests from outside the tri-county area – including relatives or friends of local residents – can accompany local residents, but will be charged regular admission fees.

'THE JELLIES EXPERIENCE' IMMERSES VISITORS IN A WORLD OF MIND-BENDING BEAUTY

New exhibition blends live exhibits of graceful drifters, unusual interactive activities

The magical world of jellies – graceful, dancing drifters that pulse and glow, flash colorful lights and often pack a powerful sting – comes alive in all its psychedelic glory in the Monterey Bay Aquarium's special exhibition, <u>"The Jellies</u> <u>Experience."</u>

This cool special exhibition is only found at the aquarium that pioneered the display of these delicate ocean animals, and features 16 species from around the world: from crystalline comb jellies that pulse like living rainbows to improbable flower-hat jellies with magenta and chartreuse highlights on transparent, pin-striped bodies; from elegant Japanese sea nettles to upside-down jellies; from a room that immerses visitors in an endless moon jelly swarm, to exhibits of fluorescent jellies and Day-Glo corals.

As visitors encounter these amazing jellies, they'll plunge into a sensory extravaganza of experiences that highlight the intriguing lives of these unlikely animals – their graceful movements, beautiful symmetry, deceptive fragility and surprising survival skills.

Through those experiences, the aquarium hopes to inspire a deeper connection among visitors to protecting the ocean that supports jellies and so many other living creatures.

"When people can see for themselves the beauty and diversity of ocean life, they come away with a deeper appreciation for the importance of a healthy ocean to our own survival," said aquarium Executive Director Julie Packard. "I hope our jellies exhibit continues to inspire our visitors to see the connection and get involved as stewards of our ocean planet."

"The Jellies Experience" immerses visitors in a world of animals that have no heads, hearts, brains, bones or true eyes yet have survived for hundreds of millions of years and rank among the ocean's major predators.

It brings visitors face-to face with species new to the aquarium, including elegant jellies, and past favorites like blubber jellies, Mediterranean jellies and crystal jellies. There will be occasional appearances by stunningly beautiful animals like the spotted comb jelly – found seasonally in Monterey Bay, exhibited only rarely, and only at the Monterey Bay Aquarium – and the potential for other new species, including thimble jellies (with golden gonads), Indonesian sea nettles, hairy jellies and crown jellies. Each of the six exhibit galleries in "The Jellies Experience" engages visitors in ways that connect them with the many dimensions of jellies' lives.

In the "Ocean Dance" gallery, people can get a trio of "virtual" jellies to pulse with the rhythm that propels jellies in the water. In the "Radiant Nature" gallery, visitors can become part of a kaleidoscopic image – their bodies as symmetrical as the jellies around them.

Fiber-optic chandeliers create an environment where visitors can get a sense for how jellies sting and eat their prey in the "Delicate Danger" gallery. They'll learn about the many varieties of jellies found in the ocean in "Jelly Fantastic" – and can create electronic jellies of their own before launching them into a virtual aquarium populated with other people's creations.

The "Jellies Explosion" gallery features cylinders of moon jellies and mirrored walls to create the feeling of swimming through a massive jelly swarm – a condition occurring more frequently around the world in recent years, perhaps the result of global changes in the ocean. In the final gallery, "Light Show," people experience fluorescent, bioluminescent and iridescent jellies and corals – and will be able to trigger light shows by simulated jellies with the wave of an arm, or by passing through a walk-through comb jelly sculpture flashing with LED lights.

"Part of the challenge is creating hands-on experiences that complement the beauty of the incredible living animals in the exhibits," said Exhibit Designer Koen Liem. "The animals are the real stars, and the interactive elements help tell their story in ways our visitors have never seen before. The psychedelic theme is a new approach for us, and one that really fits the subject matter."

Monterey Bay Aquarium first introduced visitors to the beauty of jellies in 1992 with "Planet of the Jellies," a special exhibition that remains one of the most popular in aquarium history. Exhibit design innovations and new husbandry techniques developed for the exhibit launched the jellies exhibit boom in the United States. They also provided the basis for the aquarium's award-winning permanent jellies exhibits that opened in 1996 as part of the Open Sea wing, and for the award-winning special exhibition "Jellies: Living Art" that opened in April 2002.

"People have an endless fascination with jellies," said Exhibit Developer Eileen Campbell. "I think they'll really enjoy this jellies experience. It'll be both fantastic and enlightening."

"<u>The Jellies Experience</u>" is included with aquarium admission – \$39.95 adult; \$34.95 senior (over 65) and student (with current I.D.); \$24.95 children; under 3 free (**2014 prices; subject to change**).

The aquarium is located on historic Cannery Row in Monterey and is open daily except Christmas Day. Hours of operation vary by season. Daily schedules are available online at <u>www.montereybayaquarium.org</u> or by calling (831) 648-4800.

More information on aquarium exhibits and programs is available online at <u>www.montereybayaquarium.org</u> or by calling (831) 648-4800. Advance tickets can be purchased online or toll-free by phone from the aquarium at (866) 963-9645. Details about special events and programs, family activities and live web cams can all be found online at <u>www.montereybayaquarium.org</u>.

The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans.

BREAKTHROUGH 'TENTACLES' EXHIBIT TRANSPORTS VISITORS TO ASTOUNDING WORLD OF OCTOPUSES, SQUID AND CUTTLEFISHES

Exhibit features greatest variety ever of rarely seen animals, plus multimedia interactives, tattoos and art tracing 4,000 years of fascination with these many-armed masters of disguise

In summary:

- "Tentacles: The Astounding Lives of Octopuses, Squid and Cuttlefishes" opens April 12, 2014.
- It is the largest most diverse living exhibit ever created to showcase amazing animals that have gripped the human imagination for thousands of years.
- Over the life of the exhibit, visitors might see any of the two dozen species that will rotate through a dozen living exhibits, from giant Pacific octopus to Hawaiian bobtail squid, the wunderpus and others including one of the world's smallest squid and one of the world's largest cuttlefishes.
- "Tentacles" includes multimedia interactive exhibits that dramatize the animals' ability to change color and shape, and swim with jet propulsion. There will be art pieces highlighting 4,000 years of human fascination: replicas of Minoan pottery and Roman tiles; Victorian-era scientific and literary illustrations; modern-day tattoos; and contemporary mechanical sculptures commissioned exclusively for the exhibition.
- From time to time there may be displays of never-before-exhibited deep sea squid and octopuses collected in collaboration with the aquarium's sister organization, the Monterey Bay Aquarium Research Institute.
- "Tentacles" is included with aquarium admission.

Octopuses, squid and cuttlefishes have gripped the human imagination for thousands of years. From the kraken to Cthluhu (ku-thoo-loo), the myths surrounding them live in our collective memory. Now the <u>Monterey Bay</u> <u>Aquarium</u> is opening the largest, most diverse living exhibit ever created to showcase these amazing animals.

"Tentacles: The Astounding Lives of Octopuses, Squid and Cuttlefishes" is the most dynamic special exhibition ever from the aquarium that pioneered award-winning exhibits of jellies and deep-sea animals. It opens on April 12, 2014.

Over the life of the exhibit, visitors to "Tentacles" might see any of the two dozen species that will rotate through a dozen living exhibits, from <u>giant Pacific octopus</u> to Hawaiian bobtail squid, the Wunderpus and others – including one of the world's smallest squid and one of the world's largest cuttlefishes. From time to time there may also be displays of never-before-exhibited deep sea squid and octopuses collected in collaboration with the aquarium's sister organization, the <u>Monterey Bay Aquarium Research Institute</u>.

"Tentacles" includes multimedia interactive exhibits that dramatize the features that set these animals apart, and art pieces highlighting 4,000 years of human fascination: replicas of Minoan pottery and tiles from Pompeii and Herculaneum; Victorian-era scientific and literary illustrations; modern-day tentacle tattoos; and contemporary mechanical sculptures commissioned exclusively for the exhibition.

As always, the focus is on the living animals. As visitors enter the galleries, they'll encounter a 12-foot-long window into a school of nearly foot-long bigfin reef squid. Turning a corner, they'll enter a grotto housing two

giant Pacific octopuses. Elsewhere, they'll find smaller exhibits that can house seldom-seen species like flamboyant cuttlefish, chambered nautilus, Wunderpus and two-spot octopus.

Living exhibits may feature one of the world's largest cuttlefishes (the broadclub cuttlefish, more than a foot long) and the tiny northern pygmy squid, an inch or less in length. There will be an egg lab that showcases the aquarium's groundbreaking work in rearing these incredible animals – including <u>custom-built "bubblers"</u> <u>crafted out of empty soda bottles</u>. The galleries include an exhibit, with chilled seawater, set aside to house living deep sea squid and octopus species <u>if collection efforts prove successful</u>.

"These are all short-lived animals. Many are species that have never been exhibited for very long by any of our colleagues, or raised through their entire lifecycle," said Jennifer Dreyer, special exhibits coordinator for the animal care team. "This is definitely a first for any aquarium."

Cephalopods – octopuses and their kin – are found from the poles to the tropics, in tide pools and the deep sea. They can be colorful or transparent, and range in size from less than an inch to more than 50 feet long.

Exhibits in "Tentacles" include video clips that reveal these animals' amazing color- and shape-changing abilities and other fascinating but rarely seen behaviors.

One interactive exhibit lets people transform themselves in ways that mimic the color-shifting skills that help squid, octopuses and cuttlefishes ambush their prey, hide from predators, or communicate with potential mates. Visitors can share their "cephalopod selfies" by email or through social media channels.

Other interactives give visitors control of a model chambered nautilus as it moves up and down a reef in search of food, and let them provide the jet propulsion to send a replica squid racing through the water.

Three mechanical sculptures commissioned by the aquarium from <u>contemporary Bay Area artist Nemo Gould</u> tell important conservation stories about the impacts that pollution, overfishing and habitat destruction have on these remarkable creatures.

"These animals capture our imagination," said Jaci Tomulonis, lead exhibit developer on the team that created "Tentacles." "This is a great opportunity for people to meet incredible animals and explore ways to protect them for their future."

"Tentacles: The Astounding Lives of Octopuses, Squid and Cuttlefishes" is included with aquarium admission.

More information can be found on the aquarium's website, www.montereybayaquarium.org.

The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans.

- 1988 American Institute of Architects Honor Award

Quotes (highlights)

"One of the most enchanting aquariums in the world." -- Forbes Traveler

"Not only is it one of the premier organizations fighting to save our oceans from overfishing and pollution, it is also a haven for marine life lovers eager to gaze at playful otters, undulating jellyfish, waddling penguins, respect-inducing sharks – and faithful re-creations of local underwater habitats." -- *Los Angeles Times*

"For my money, the best aquarium in America."

-- Keith Bellows, editor, National Geographic Traveler

"My apologies to Baltimore, which has a really great aquarium, but Monterey is very likely the world's best." - *Washington Post*

"...arguably the greatest aquarium in the world." -- The Guardian (United Kingdom)

"Coolest aquarium in the world." -- Bill Nye, "The Science Guy"

"Monterey Bay Aquarium is the most technically sophisticated – and perhaps the most esthetically successful – public aquarium yet built." -- *Newsweek*

"...set a new bar in the art of showing off sea creatures to the public." -- USA Today

"As soon as you enter the aquarium, the cathedral aura of the Kelp Forest, with sunlight streaming down from above, turns your head and pulls you over, bidding you to slow down and meditate on the majesty that lies hidden just offshore." -- *National Geographic*

"As a habitual aquarium-goer, I've seen my share of these institutions...The Monterey Bay Aquarium is, for me, the clear winner...Like all great aquariums [it] offers not just an assemblage of fish but a passionate argument that the ocean is far more intricate and alive than you ever imagined it to be." -- *Travel/Holiday*

"In my mind, the Monterey Bay Aquarium is the most beautiful and most effective aquarium in the world." --Dr. Carl Safina, executive director, Blue Ocean Institute

"Stunning seems too meager an adjective for the facility...." -- Dallas Morning News

"...knock-your-socks-off marine exhibits." -- Boston Globe

"A quantum leap was made with Monterey; nobody will be able to do it again." -- John McCosker, California Academy of Science

"A superstar....a perfect balance between education and entertainment." -- Copley News Service

"It's hard to find enough superlatives to describe what's going on at the Monterey Bay Aquarium." -- Reno Air Approach

"This aquarium routinely makes history." -- National Geographic Traveler

"One of the world's most impressive aquariums." -- Financial Times of London

"Making the ordinary extraordinary is business as usual at the (Monterey Bay) aquarium."

-- Chicago Sun-Times

"Remarkable.... As I watched the schools of fish slowly circling...I began to slip into the rhythm, the silence, of life under the surface of Monterey Bay, a deep and boundless home."

-- New York Times

"It won't get you wet, but it will make your head swim." -- Sacramento (Calif.) Bee

"Standing before the showpiece of the Outer Bay wing – the world's largest window, opening onto a seemingly infinite water world swirling with tuna, barracuda, bonitos and sharks – I realize I'm confronting the newest Wonder of the World." -- American Airlines' American Way

"Ranked one of the nation's top family attractions, it's the Disneyland of aquariums, housing one of finest collections of sea creatures on the planet. It's like strolling through an aquatic dream where more than 350,000 marine animals and plants coexist in a magical setting." -- *www.localgetaways.com*

"We dare you not to be mesmerized and enriched by this eco-conscious aquarium."

-- www.lonelyplanet.com
