Imagine the Possibilities

The Classic Look

Cement tile has a long tradition that is still going strong. Some of these classic patterns go back thousands of years to clay and mosaic mediums. Many of our contemporary patterns also continue the traditional styles, for a timeless look.

Moroccan Style

Morocco has a long history of cement tile production, and many arabesque motifs lend themselves well to the medium. These patterns are often based upon complex mathematical design.

Cuban Spirit

“Cuban Tile” has always been popular in Florida. Cuban cement tile patterns often fall into one of two categories: the ornately floral, and the wildly Art Deco. We have traveled & done extensive research on cement tile in Cuba.

Coastal Life

Art imitates life, and every region is unique. Cement tile has a strong history on the coasts of the Mediterranean and Adriatic, and Villa Lagoon Tile itself was founded on the U.S. Gulf Coast. We have several traditional and contemporary patterns for spaces that need coastal flavor.

Borders

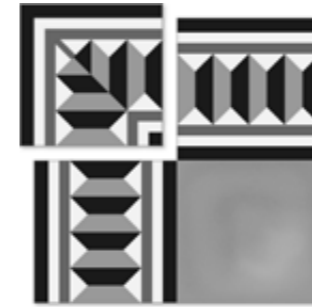

Borders are a great way to provide a finished look to a cement tile installation. Create a “rug” effect by enclosing a field pattern within a border, edged by solid-color tiles.

Hexagonal Shaped Tile

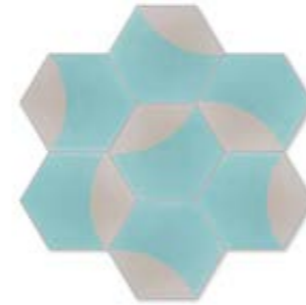

Hexagonal tiles add a whole new geometric element to your tiled surface. Some patterns are a natural fit within a hexagon. Single-color hexagons can also produce their own wonderful pattern, especially when mixing harmonizing colors.

Shapes

Cement tile is a medium with almost infinite versatility. Almost any idea that can repeat in one or a few basic shapes can be replicated in cement tiles. Arabesque or “Moroccan Lantern” shapes, fishscales, and octagons with keys are just a few of the more common shapes.

South Beach Color Palette

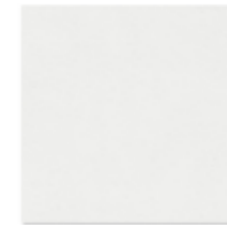

The blending of cement, aggregate, and mineral pigments makes for one of the most beautiful finishes available in tile. The whole process of mixing and hand-pouring the pigment layer creates a rich appearance, with natural variation.
