# TABLES OF ORGANIZATION UNITED STATES ARMY

1917

WASHINGTON  
GOVERNMENT PRINTING OFFICE  
1917

WAR DEPARTMENT  
DOCUMENT NO. 571  
OFFICE OF THE ADJUTANT GENERAL

WAR DEPARTMENT,  
WASHINGTON, *May 3, 1917.*

The following Tables of Organization, approved by the Secretary of War, include the typical Infantry and Cavalry divisions authorized under the national defense act approved June 3, 1916, with the detailed tables of the component units. Departures from the prescribed organization will be authorized by the War Department only.

The bases on which the tables have been prepared are, as regards supply, the same as those prescribed in Tables of Organization, 1914. Rifle ammunition with troops and combat trains has been fixed at 220 rounds per rifle for all rifles in the division, with an equal amount in the divisional ammunition train. The machine-gun ammunition with troops is duplicated in the ammunition train.

The bases for the artillery-ammunition supply are 464 rounds per 3-inch gun and 432 rounds per 3.8-inch howitzer with the divisional artillery.

Alternative animal and motor drawn transport is provided for the divisional trains, and these will be organized according to the special circumstances in each case.

The allotment of personnel and transport from Headquarters and Supply companies for detached organizations is shown in *italics* in the corresponding columns, and these allotments will always be made when an organization is detached.

The letter *h* placed at the upper right hand of any number in the tables indicates "mounted on a horse"; if the letter is preceded by a numeral, the latter indicates the number of men of that grade who are so mounted. In like manner, the letter *m* indicates "mounted on a mule."

These tables will be used as a basis for the equipment manuals of the several arms, and the latter will be made to conform thereto.

BY ORDER OF THE SECRETARY OF WAR:

H. L. SCOTT,  
*Major General, Chief of Staff.*

OFFICIAL:

H. P. McCAIN,  
*The Adjutant General.*
