Product Overview

Regardless of your industry: Metal processing, automotive, shipbuilding, painting, chemicals, maintenance, utilities or waste disposal – to name a few, the requirement is the same: Working safely even under the most challenging conditions. Dräger Safety respiratory protection helps you to get your job done – safely.

Dräger PARAT®

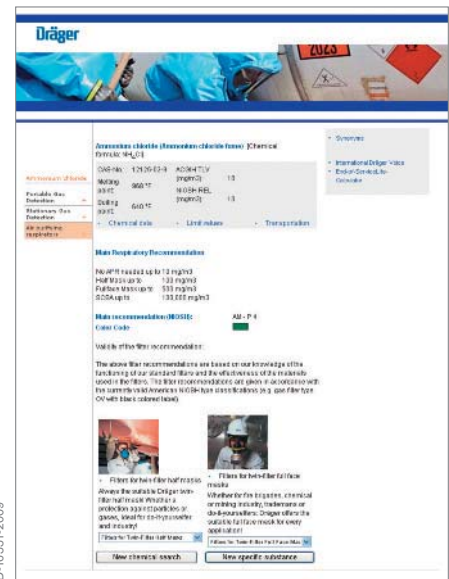

We have something against danger at the working place.

When something is in the air – regardless of dusts, gases or vapors – the use of high-quality respiratory protection is essential.

When it comes to selecting the right respiratory protection there are some important factors to consider: knowledge of the existing contaminants and the application requirements along with the limitations of use and the protection levels each respirator offers. Sound complicated? You are not alone, Dräger has the right tools to support you and will help you every step of the way.

Our Dräger VOICE 5.0 database of hazardous substances supports you in selecting the optimal mask-filter combination for your application. You can find it in the internet under www.draeger.com/voice or on an easy to use CD-ROM.

For a quick and easy orientation the following pages give you a short overview on the Dräger X-plore product family, selected industrial applications, and the appropriate respiratory protection for your job.

D-16551-2009

D-1688-2009

D-17689-2010

Professional respiratory protection since 1889.

Regardless of your industrial application, whether it be painting, welding, carpentry, metal processing or chemical handling, your safety is Dräger's prime objective. Even under the harshest conditions, with Dräger you will find a system solution that meets your needs.

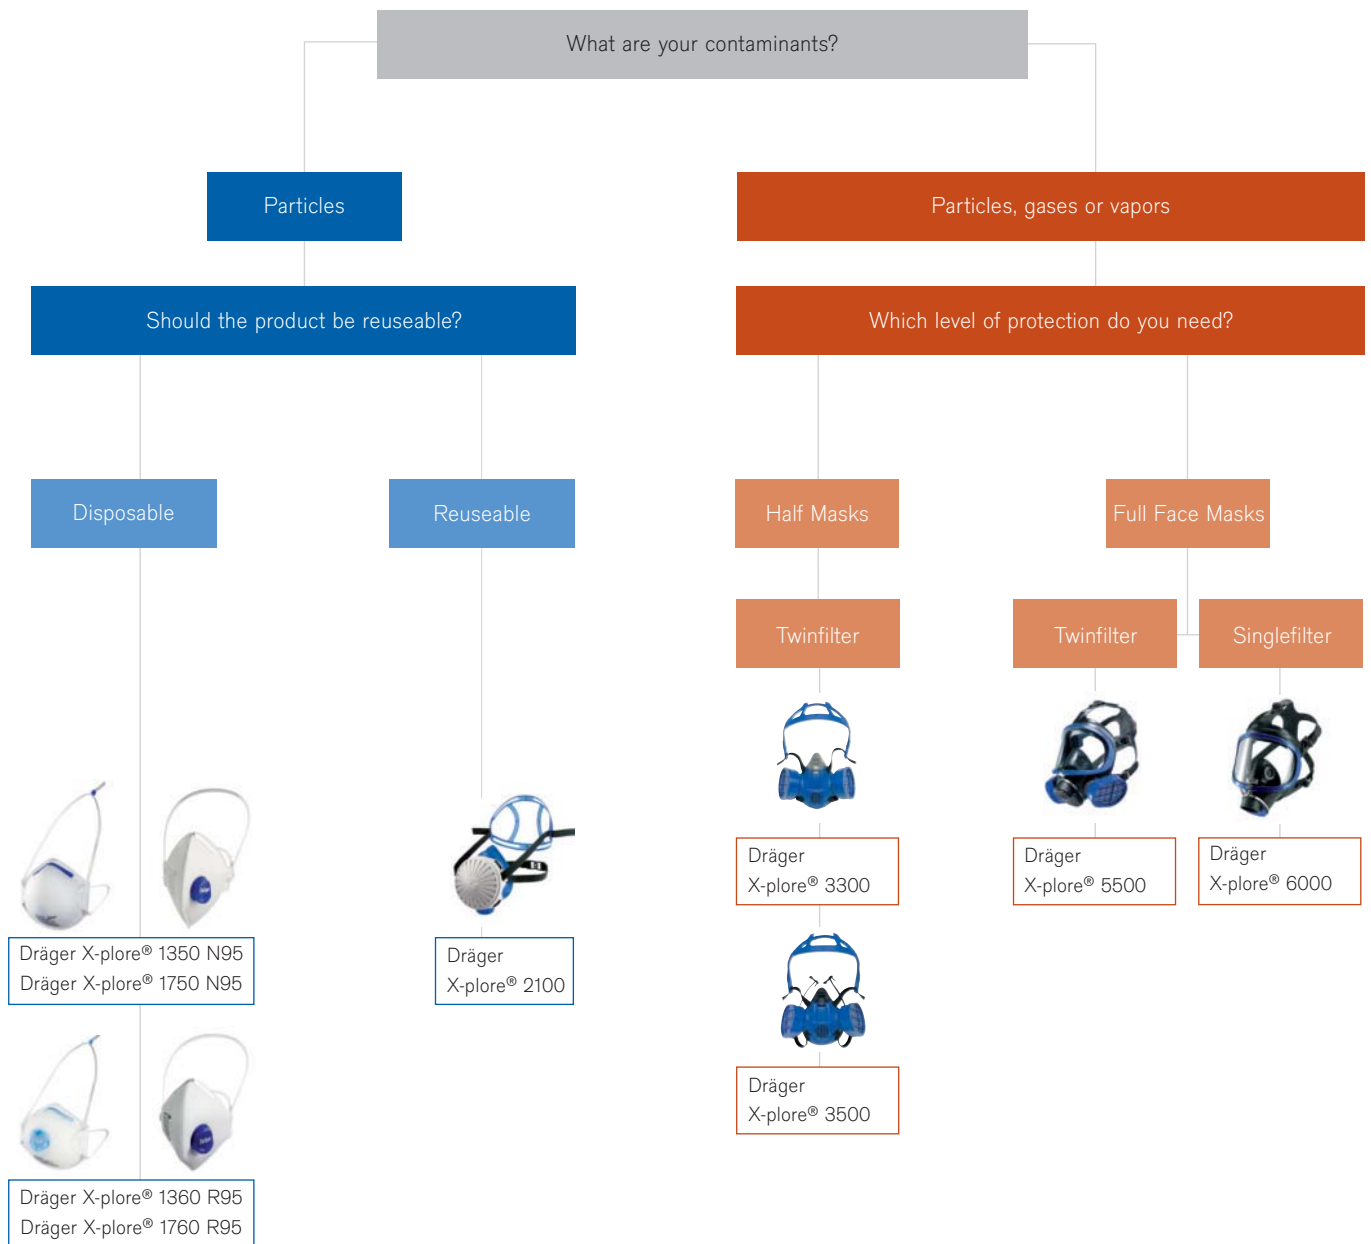

For more than 100 years Dräger products have helped keep people breathing safely. The Dräger X-plore range of respiratory protection products offers a complete selection of products and system solutions – tailored to meet your needs.

The ideal combination of comfort, easy handling and user safety is ensured by new materials, a modern and practical design, together with the experience of numerous engineers' world-wide and intensive dialogue with our customers.

This all adds up to offering solutions which meet your expectations.

The Dräger X-plore® Product Family.

The ideal combination: safety and comfort

Dräger X-plore® 1300

The new Dräger X-plore® 1300 — developed on the basis of several years of intensive market experience by analyzing customer requirements and market demands — sets new standards on comfort levels for particulate respirators. The result: an extremely comfortable, pre-formed dust mask for protection against solid and liquid particles. Its efficient CoolSAFE™ filter material and ergonomic design make the Dräger X-plore® 1300 a disposable dust mask with superior comfort, safety and user acceptance.

CoolSAFE™ filter material

Performance that makes a difference: CoolSAFE™ filter material produced from high-performance filter media combines low breathing resistance and high filter performance in one mask.

Flexible nose clip

Ensures a great fit in the most critical area.

Nose seal

Secure sealing in the most critical area: all face pieces are equipped with special nose seal. It is sweat-absorbing, comfortable and most importantly ensures an effective seal around the nose.

Formed mask body:

Proven, ergonomic, stable

The special design and shape of the mask body offers a comfortable and secure fit to a wide variety of faces. The interior volume ensures wearing comfort along with easy communication. Additionally, the mask body is specially reinforced and keeps its form, springing back into its original shape, even when crushed. A stable, robust, and comfortable fit over long periods of time.

VarioFLEX™ head harness with EasyStop

Easy to don/doff and adjust with a pressure-free fit: This continuous loop head harness is constructed from a robust, tear-proof textile strap. In contrast to other face pieces, no clips are required — preventing uncomfortable pressure and allergic reactions. The head harness can be donned/doffed easily and quickly, and without hair entanglement. Thanks to EasyStop, the head harness can easily be adjusted to fit various head sizes while sitting comfortably and safely.

CoolMAX™ exhalation valve (optional)

Breathe easy and comfortably with extremely low breathing resistance. The exhalation valve releases humid and warm air, preventing heat build-up inside the mask, allowing you to stay cool while working hard.

Hypoallergenic inner layer

Comfortable to wear: the hypoallergenic inner layer is easy on your skin and gives the user added comfort even when used for longer periods of time.

Color coding

The nose clip and valve are differently colored to quickly identify the protection class: dark blue for N95 and light blue for R95

D-5190-2010

Your benefits:

- High level of wearer comfort through ergonomic shape and advanced filter media.
- Safety according to your needs: A color coded selection of protection levels and design variations, makes it easy to distinguish between protection classes.
- Ergonomic design allows the mask to fit well with safety glasses and goggles. A special seal in the area of the nose helps prevent fogging.
- Versions with an integrated Odor Control layer keep nuisance OV odors below permissible exposure limit out.
- Integrated strap tension adjuster to allow the wearer to fine tune the mask to the proper comfort.
- A sure fit, for the most demanding conditions - Available in two different sizes S/M and M/L.
X-plore 1350 N95 also available in extra small size, specifically for smaller faces.

¹⁾ Additional carbon layer against nuisance odors below the permissible exposure limit (PEL)

Breathe cool, stay safe

Dräger X-plore® 1700

Dräger X-plore® 1700 is the new generation of filtering face piece respirators. With its CoolSAFE™ filter material it offers effective protection against fine dust, as well as solid and liquid particles for use in applications with exposure to dusts, e.g. in industry, mining and specialized trades. It's a user-friendly mask with easy handling and a high degree of wearing comfort. The Dräger X-plore® 1700 series is available in the protection classes N95 and R95 which are optionally available with the CoolMAX™ exhalation valve for additional comfort. An odor control version containing activated carbon layer is ideal for users which battle with unpleasant nuisance odors below the permissible exposure limit. All versions are NIOSH approved.

CoolSAFE™ filter material
Performance that makes a difference: CoolSAFE filter material produced from high-performance filter media ideally combines low breathing resistance and high filter performance in one mask.

Hygienic individual packaging
Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

Flexible nose clip
Ensures a great fit, in the most critical area.

VarioFLEX™ head harness
This continuous loop head harness is constructed from a stable, elastic, textile strap which is easy to don and doff while sitting comfortably with minimal pressure. The soft, tear-proof elastic easily stretched to fit various sizes of head and prevents hair entanglement.

Soft inner layer
Comfortable to wear: the inner material layer is not only soft and hypo-allergenic, but also repels moisture thanks to its hydrophobic properties, keeping breathing resistance constantly low, when used for long periods of time.

CoolMAX™ exhalation valve (optional)
Breathe easy and comfortably: thanks to an extremely low breathing resistance. Additionally, the specially engineered CoolMAX exhalation valve releases humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.

Folded form
All Dräger X-plore 1700s are flat-folded, saving space and making them easier to transport.

ST: 86602-2007

Your benefits:

- Low breathing resistance with high filtering performance.
- CoolSAFE™ filter material prevents the inhalation of small particles and protects against high levels of exposure to dust.
- Easy to don and doff, straightforward operation.
- Comfortable to wear thanks to soft, hypoallergenic material.
- CoolMAX™ exhalation valve for easy breathing and reduced heat build-up in the mask.
- Adjusts well to fit the face, resulting in less leakage.
- Flat-folded and individually packed: saves space, easy to transport, hygienic and clean.
- Greater overall comfort for the user, even when used for long periods.

The reusable alternative to disposable dust masks

Dräger X-plore® 2100

Frequent work in a dusty environment requires reliable respiratory protection. The Dräger X-plore® 2100 is your reusable alternative to disposable dust masks. The replaceable filters save costs, making the Dräger X-plore® 2100 the ideal combination of safety and economic efficiency.

Ergonomic, non-slip head harness

The ergonomic head harness combines stability with anti-slip features, making donning & doffing the mask quick and easy.

Comfortable mask body

The ergonomically designed mask body offers a great sealing surface. The choice of two high-quality materials – EPDM or silicone – along with two sizes for the silicone mask ensure a great fit.

Dräger replaceable filters

The large surface area of the replaceable filters ensure long-lasting filter capacity and low breathing resistance. Filter change out is simple and cost effective.

The drop-down harness system

Stay protected:
The drop-down system allows you to remove the mask without removing a hard hat or faceshield. By simply opening the neck clips the respirator slides down from your face and sits close to your body, protected from dirt and dust.

Easy-breathing exhalation valve
The exhalation valve leads the exhaled air directly downwards out of the mask, keeping you comfortable inside the mask.

ST-1762-2005

Your benefits:

- Major cost savings – long-life filters can be easily exchanged.
- Ergonomic non-slip head harness.
- High filter efficiency and long service life due to large surface area of Dräger replaceable filters.
- Excellent sealing surface through ergonomic design.
- Long service life – easy to maintain with quick and easy assembly and disassembly. Can be cleaned in designated washing machines at maximum temperature of 60 °C.

A new dimension when it comes to comfort and handling

The Dräger X-plore® Twinfilter masks

Developed in close cooperation with industrial users worldwide the Dräger X-plore® Twinfilter product range sets a new benchmark in comfort and handling. The Dräger X-plore® Twinfilter range ideally combines safe and easy handling with wearable comfort. Newly developed materials and a modern practical design ensure the highest level of user acceptance. The harness' innovative X-structure provides optimum weight distribution, creating a safe, even seal all round without pressure points – comfort guaranteed. See for yourself and experience a new dimension in comfort and safety in respiratory protection.

ST-957-2008

Dräger X-plore® 3300 – the low-maintenance half mask. The right choice for all those who require inexpensive and comfortable respiratory protection.

ST-5470-2007

Dräger X-plore® 3500 – the half mask for demanding and continuous operations. Specially equipped with the comfortable "DrägerFlex" material.

ST-947-2008

Dräger X-plore® 5500 – the ideal full face mask for those who require additional protection – the solution for comprehensive respiratory and eye protection.

D-5192-2009

Dräger X-plore® 3000

Dräger “FlexiFit” head harness

The new smooth material ensures excellent fit to your head without hair entanglement. You won't notice it under your hard hat.

Flexible nose sealing strip

The special design of the nose sealing strip ensures leak free sealing and an optimal fit with safety glasses.

Innovative X-guided strap system

Cross over straps ensure an even weight distribution – giving you ultimate comfort without pressure.

Compact, low profile design

The swept-back position of the filters guarantees a wide field of vision free from obstruction and ensures optimal fit for use under protective visors. Three sizes (S, M, L) ensure a perfect fit for every type of face.

ST-661-2002

New “DrägerFlex” material

Specially developed for the Dräger X-plore 3500 mask body “DrägerFlex” combines hypoallergenic properties with excellent chemical resistance. (Dräger X-plore 3500).

“Drop Down” strap system

Allows you to remove the mask without removing a hard hat or faceshield: By simply opening the neck clips the respirator slides down from your face and sits close to your body, protected from dirt and grime. (Dräger X-plore 3500 only).

Safe and easy bayonet connection

A unique two-point bayonet connector attaches both filters to the mask using the same technique. Filters only go in one way – so you can't get it wrong. Place the filter in the connection and turn a 1/4 turn downwards. The filter gently clicks into place.

Our solution for your applications

Dräger X-plore® 5500 for safe breathing and clear vision

Comprehensive respiratory and eye protection make the Dräger X-plore® 5500 full face mask the right solution for environments in which respiratory protection coupled with eye protection is required.

Double-layered face seal

The highest protection factor through its triple sealing action ensures a great seal for every type of face.

Large visor

Excellent field of vision without distortion plus a high level of chemical, thermal and mechanical resistance. The triplex visor is extremely scratch-resistant with high chemical resistance.

Safe and easy bayonet connection

A unique two-point bayonet connector attaches both filters to the mask using the same technique. Filters only go in one way – so you can't get it wrong. Place the filter in the connection and turn a 1/4 turn downwards. The filter gently clicks into place.

ST-944-2008

5-point head harness

The harness allows quick and easy donning and doffing of the mask without hair entanglement.

Universal size

The universal size ensures an almost perfect fit for all face sizes – keeps storage and spare parts handling simple.

Compact, low profile design

The swept-back position of the filters guarantees the user's field of vision is free from obstruction.

Full action, full protection

The Dräger X-plore® 6000 full face masks

After decades of use, Dräger full face masks have become the known standard for quality, reliability and comfort. These full face masks are the successors to the Panorama Nova standard threaded masks – redesigned and improved with fresh colors and an integrated bar code.

Double-layered face seal

The highest protection factor through its triple sealing action ensures a safe seal for every type of face – in one universal size. The mask body is available in two materials: EPDM and silicone.

Large visor

Excellent field of vision without distortion. Different materials offer high resistance to chemicals, heat and mechanical stress guaranteeing a long service life.

Highly compatible standard Rd40 thread connection

Easy to service and widely compatible standard thread connection, these masks fit to Rd40 threaded filters.

5-point head harness

Quick and easy donning and doffing is guaranteed. The roller buckles and wide flaps ensure comfortable handling without hair entanglement.

Integrated barcode

A barcode inside the mask makes checking inventories and carrying out maintenance easy.

Your benefits:

- A wide range of masks to meet your individual needs.
- Ease of use ensures high user safety and comfort.
- Robust and easy to service: highly economical.
- A full line of accessories and spare parts.
- One universal size makes logistics and storage easy.
- Barcode helps you to better monitor and manage your masks.
- Stainless steel speech diaphragm for excellent communication (Dräger X-plore 6500).

Compatibility with diversity

The Dräger X-plore® Rd40 filter portfolio

Being in chemical industry, automobile industry, shipbuilding, metal processing industry, utility industry or waste disposal – for decades Dräger respiratory protection filters have been synonymous with safety worldwide. They filter out hazardous substances effectively and inexpensively.

The Dräger X-plore Rd40 range of filters with standard-thread connection according to NIOSH standard and EN 148-1 offers optimum protection against almost all hazardous substances.

The filters are ideal in terms of breathing resistance, size and performance and fit all half and full face masks with an Rd40 connection.

Our range of filters:

EN FILTER COLOR CODE

Color Code	Filter Type	Main Application Range
Brown 	AX	Gases and vapours of organic compounds. Boiling point ≤ 65 °C
Brown 	A	Gases and vapours of organic compounds. Boiling point > 65 °C
Gray 	B	Inorganic gases and vapours e.g. chlorine, hydrogen sulphide, hydrocyanic acid
Yellow 	E	Sulphur dioxide, hydrogen chloride
Green 	K	Ammonia
Black 	CO	Carbon monoxide
Red 	Hg	Mercury vapour
Blue 	NO	Nitrous gases including nitrogen monoxide
Orange 	Reaktor	Radioactive iodine including radioactive iodomethane

When danger is lurking

Dräger PARAT® Filtering escape devices (not NIOSH approved)

The industrial filtering escape devices Dräger PARAT® 3100, Dräger PARAT® 3200 and Dräger PARAT® 4500 along with the fire escape hood Dräger PARAT® C all have a vital task: to protect people when escaping from hazards into a safe environment.

Despite extensive precautions, accidents still happen – and dangerous gases can break out into concentrations that are dangerous to life and health. The Dräger

PARAT filtering escape devices and hoods combine compactness and sturdy design with easy handling. These handy and efficient devices are designed for

a 15-minute escape period and offer the best possible protection in hazardous situations and thus considerably enhance your chance to make a safe escape.

Dräger PARAT® 4500

Dräger PARAT® 3100 and 3200

(according to DIN 58647-7 - not NIOSH approved)

- The Dräger PARAT 3100 half mask with quick release opening.
- Safe and easy donning even for inexperienced users.
- The Dräger PARAT 3200 mouthpiece has a nose clip for lowest possible leakage and easy use for bearded wearers.
- ABEK filter for protection against numerous toxic gases and vapors.
- Sturdy, handy packaging – for a long service life.
- Transparent cover with flexible clip – can be carried close to the body – e.g. on your belt.

Dräger PARAT® 4500

(according to DIN 58647-7 - not NIOSH approved)

- The universal hood in an orange signal colour can be easily used by people wearing spectacles and beards.
- The large anti-fog coated visor ensures an excellent field of vision on the escape route.
- The combination filter ABEK P15 filters out harmful organic and inorganic gases and particles.
- Optionally PARAT 4500 is available in an extra robust casing – ideal for use in underground areas.

ST-2488-2005

Dräger PARAT® C

With the Dräger PARAT® C fire escape hood people who are caught in a fire can clearly enhance their chances of escaping to safety. People can rescue themselves by using the Dräger PARAT® C – and fire services can use the Dräger PARAT® C to rescue others which may be stranded. The use of Dräger PARAT® C in public buildings has proven itself time and time again.

Your benefits:

- The universal-sized hood in an orange signal color has a flexible collar
- The large anti-fog coated visor provides a wide field of vision during escape.
- The high-performance combination filter CO-P2 filters out dangerous gases and carbon monoxide.

Protection that goes beyond your mask

Dräger is synonymous with professional respiratory protection world-wide. We not only offer a complete range of compatible air purifying respiratory protection products but are your partner when it comes to questions regarding occupational safety and health.

Dräger is always the right partner – not only when it comes to masks, filters, compressed airline systems, self-contained breathing apparatuses and escape devices, but also a world-wide sales and service network – Dräger is able to offer you the most extensive support available.

This includes support in service, maintenance, repair and cleaning of the Dräger products as well as the speedy supply of spare parts – no matter where you are. In addition, the Dräger Safety Academy offers an extensive training program. Competent advice for the correct use of filters or for the selection of a suitable respiratory protection is certainly also part of our comprehensive service portfolio.

Our high demands on quality and service as well as the alignment with the needs of our customers result in durable products for your daily working routine. Pursuant to this our long-term product concepts guarantee reliable fulfilment of demands and spare parts supply in the future.

All this makes Dräger a reliable partner of the industry in every respect. On your request we develop comprehensive safety concepts and solutions far beyond the individual products. This can also include financing solutions, as leasing and financing are a part of our service portfolio. This is a part of our integral service concept.
