PAR – Position Authorization Request Form

- Requests to Classify New Positions, Refill Positions, Reclassify Vacant Positions, Temporary Services and FastTrack requests all feed into the Taleo system from the forms application called [PAR – Position Authorization Request](#).
- After the form is submitted in PAR, the Workflow Approval Process (WAM) triggers and the departments WAM approvers must approve or return the request. (Form entry process varies by location)
- The system feeds the approved forms into Taleo multiple times a day.
- Recruitment Services then prepares the requisition (positions) for posting to the career site based on the instructions provided by the department in the PAR system.

Candidate Selection Workflow

As a Hiring Manager, your role is to record the [steps and statuses](#) of the individuals you review in the process of filling a new position or refilling a position.

Taleo’s Candidate Selection Workflow is a stepped methodology where job applicants are selected as a candidate and proceed through the various steps toward being hired for the position, or for disposition of candidates who are no longer being considered. The process of moving a candidate through the Workflow is defined by the Workflow steps* and the candidate’s status** at each step. This is the point where either a candidate is moved forward to the next step, or it is determined that they will not be selected and the reason why.

UAB Candidate Selection Hiring Manager Workflow

STEP: HM SCREEN		STEP: HM INTERVIEW		
S T A T U S E S	To Be Reviewed	Default status — when you receive the candidate from the Recruiter, the candidate will be in the status of to be reviewed. ***Step:** A candidate’s progression within the Workflow is identified by its current step. Candidate status starts at the first status level in each step. **Status is changed based on what actions are taken with the candidate while they are in this step. There is a built-in hierarchy of available statuses within each step.**

****Status:** The status of a candidate reflects the detail of where they are currently within the step. There is a defined hierarchy of statuses within each step. Movement through the available statuses is caused by completing intermediary status requirements, which causes a move to the next status, until the completion status is reached (completion statuses are marked with an "*" in the status drop-down menu). Once the completion status has been reached, the candidate moves to the next step, or is not selected or candidate withdrew. Candidates can be determined not selected or candidate withdrew at any time during any step or status. When a candidate is not selected or chooses to withdraw, disposition of the candidate should take place. The step would stay the same, the status would be changed to not selected or candidate withdrew. This way the candidate history is retained and can be easily viewed for future candidate searches.

New Candidates for Hiring Manager’s Review

- If an applicant meets the qualifications listed in the job description, the Recruiter will change the step and status to **HM* Screen/To Be Reviewed**.
- For each candidate changed to HM Screen/To Be Reviewed, the Hiring Manager and Hiring Manager Assistant listed on the requisition (entered by department in PAR form) will automatically receive the notification below.

*HM = Hiring Manager
