## **Flexibility and individualization in times of change**

For the economy, the impact of COVID-19 will be felt for a long time to come. But we learn from the incidents, adapt better to circumstances and are more flexible in dealing with change. The Swiss population recaptured the «outdoors» with joy and the necessary caution. Out of Home rapidly refilled and continues to flourish. So how important it is to adapt to upcoming challenges and seize new opportunities.

Even volatile times make it clear that Out of Home campaigns can be ideally adapted to the current environment. This represents great opportunities for companies and brands to connect with consumers and respond to their current needs in a sympathetic way. APG|SGA supports clients and agencies to reach their target groups even more aptly and relies, *inter alia*, on digital and programmatic advertising. In large cities and train stations, more than 500 screens for programmatic campaigns are already on offer. This allows advertisers to book more flexibly and to spread their marketing messages more precisely and effectively with additional targeting opportunities.

The demand for site-specific, digital and data-driven advertising is increasing significantly. In APG|SGA's wide-ranging analog, digital and mobile portfolio, attractive solutions for successful and innovative outdoor advertising presences are guaranteed. 300 000 digital and analog spaces throughout Switzerland are available in all communication rooms. Our consulting teams will be happy to assist you in the conception, planning and implementation of your Out of Home performance.

**Andy Bürki**

Head of Advertising Market

## Out of Home Media – facts and figures

As the term implies, Out of Home begins where people leave the privacy of their homes and enter the public spaces accessible to everyone. This is where a wide variety of mobility flows intersect our everyday environment. Media installed along these flows can be precisely and flexibly planned with respect to geography, timing and intensity, making it possible to reach differentiated target groups. They are ideal for sales promotion, boosting recognition and building image. Messages presented in public spaces generate tremendous leverage because of their high acceptance and unavoidability: whether along streets, at railway stations, shopping centers and airports, in and on means of transport or in the mountains.

# Appealing communication spaces

## **Streets and squares**

Be it motorized or on foot, with a private vehicle or by public transportation, mobility "happens" mostly on streets. Extensive infrastructure provides the vital connections that the population needs to sustain its growing occupational and leisure mobility. APG|SGA assumes considerable responsibility in planning, designing and implementing the urban landscape. Thanks to the strength of the poster and the integration of new formats, you benefit from this attractive Out of Home advertising environment.

## **Railway stations**

Railway stations are technically and architecturally sophisticated, high-frequency venues, from the stations with integrated shops to smaller stations that link city centers with suburban and rural regions. The user community is multifaceted and includes daily commuters, weekend and vacation travelers with national and international destinations and the regular or occasional passers-by who belong to the local population. Analog and digital APG|SGA communication and advertising assets are intrinsic elements that co-define these places of encounter. With railway station advertising, you can reach attractive, contemporary and trend-conscious target groups.

## **POI/POS**

Shopping centers, other points of sale (POS) and points of interest (POI), parking garages, convention centers and exhibition complexes are spaces that generate particularly strong appeal. They are characterized by a special mobility behavior and are interesting from the point of view of communication because of their privileged locations and extended catchment areas. As a full-service Out of Home provider, APG|SGA covers every facet of this market. Tap into the mobility of your target groups from the doorstep to the point of interest: to promote the clearance sale of your products and services as well as for effective brand communication.

## **Public transport**

Public transportation systems make a crucial contribution to the quality of life in public spaces. The population benefits from their safety, punctuality, dependability, and ecological soundness. As a public service, mass transit guarantees mobility for everyone and is used by target groups such as apprentices, students and teachers that are otherwise difficult to reach. Their long-standing commitment as well as strong affiliations and alliances have made APG|SGA – specialized in mass transit communication – the leading partner in this domain. You can choose from a vast spectrum of attractive advertising modes inside and outside public transport vehicles.

## **Mountains**

Winter exhilaration on skis or snowboards and enjoyable hikes in the summer: pristine natural surroundings magically attract people in search of relaxation and recreation. To preserve this environment, APG|SGA specialists focus their activities on sharing existing infrastructure. Synergy-tapping and often customized advertising formats give you the unique opportunity to present your message in a positive context and to reach highly diverse and very affluent target groups.

## **Airports**

For international metropolitan centers, airports are hubs, links and gateways for business and leisure travelers. Standard and customized formats harmonized with a master concept: APG|SGA products allow you to showcase your brand in the context of major travel flows and deliver lasting impressions to a discerning audience.

## **Formats**

APG|SGA covers all communication spaces with different formats such as posters, screens, megaposters, promotions, special solutions or mobile advertising.

## Our range per communication space

APG|SGA is Switzerland's leading outdoor advertising company, covering all communication spaces with analog or digital Out of Home solutions.

## Billposting by communication goal

Advertising performs a key role in preparing the ground for purchases by raising the awareness and attractiveness of brands, products and services, and generating interest in them.

It also has an activating nature, reminding consumers at the right moment that now is a good time to buy or consume.

Outdoor advertising provides an opportunity to achieve the communication goals of awareness, image and sales in a highly efficient way: an unmissable public presence, precise geographic targeting, large-scale design possibilities and an appropriate choice of format and location are important control factors for the success of advertising campaigns.

Outdoor advertising supports all the key tasks of advertising leading up to the purchase process highly efficiently and offers excellent value for money:

### Awareness

Raise your awareness level quickly and sustainably. 89% of Swiss people go out each day for work, shopping or leisure activities. Along these recurring journeys, they automatically and repeatedly come into contact with our 300,000-plus advertising spaces. This explains the wide and quickly established reach and the high accumulation of contacts that you can achieve with our Out of Home solutions within shortest time.

### Image

Thanks to our high-impact – and sometimes also exclusive – premium offers in public spaces, you are assured of an ideal, high-quality setting for consistent knowledge development and a positive image transfer. Outdoor advertising – whether analog or digital – provides an almost unlimited range of use and design options, and is accepted and perceived positively by the public better than any other medium. This is the basis of successful brand and trust development.

### Sale

Advertise in the vicinity of a POS or POI, and influence purchasing decisions in your favor at the decisive moment.

Outdoor advertising has a great deal of persuasive power, which can be optimized and targeted in terms of time and location. It also has great (and proven) potential to increase sales, putting you ahead of the competition when it comes to activating consumers.

### Research

APG|SGA intensely researches the impact of outdoor advertising in order to provide advertisers with a sound decision basis when planning campaigns.

### By gender and age

High degree of mobility results in unlimited reach: Out of Home messages reach all desired target groups and exclude no-one.

### By day of the week

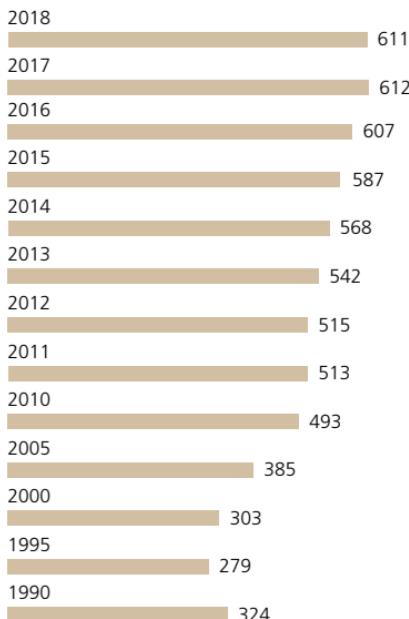

The success of advertising lies in repetition: the Out of Home contacts double in a linear fashion from one day to the next, giving the message a lasting impact.

## Number of passengers conveyed by rail

**Most consumers want to be esteemed and appreciated. This is an essential advertising objective. Out of Home Media are widely accepted by the public and can attain both goals.**

## Media research

### Interaction of visual design and advertising pressure

Impact ( $I$ ) = Message ( $M$ ) + Transport ( $T$ )

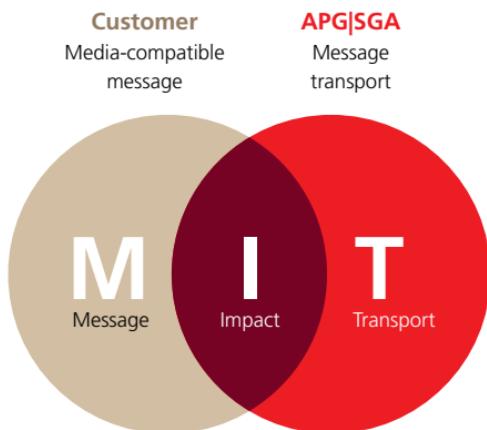

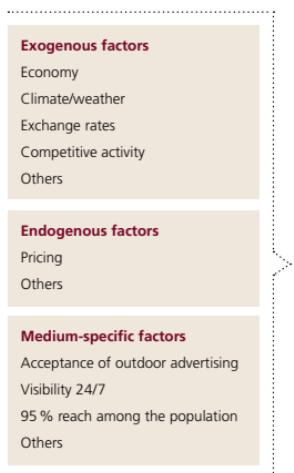

A confrontation with a poster establishes the direct contact between its featured message and the desired target group. To ensure that the message is perceived, it is crucial that it is not only effectively transported, but also quickly understood. An optimal impact arises with the harmonious interplay between the creation and the booked advertising media. As is the case for every advertising measure, the impact of a poster campaign also depends on numerous other factors. They include acceptance and effectiveness of the medium as well as exogenous and endogenous influences.

To be able to provide advertisers with well-founded decision bases when planning campaigns, APG|SGA extensively researches the impact of Out of Home advertising. The main points of interest are:

- choosing the right medium to achieve the advertising objectives
- calculated use of budget for optimum advertising pressure
- the effective design of the advertising medium

All the studies are carried out by independent market research institutes and supported by scientists. The key findings are regularly published online, in publications and as best practice cases.

#### Simplifies purchase decision

#### Inspires additional visits to shopping center vendors

#### Inspires brand product purchases

#### Stimulates the desire to try out new products

■ All

■ 15–30 years

■ 31–45 years

■ 46–55 years

It may be very challenging to find the right media mix. In times of tight marketing budgets and ongoing changes in media consumption habits, there is a growing need for certainty and dependability. With respect to their proven advertising impact, Out of Home Media are one hundred percent reliable.

## Media research

### Unbeatable online activation with outdoor advertising

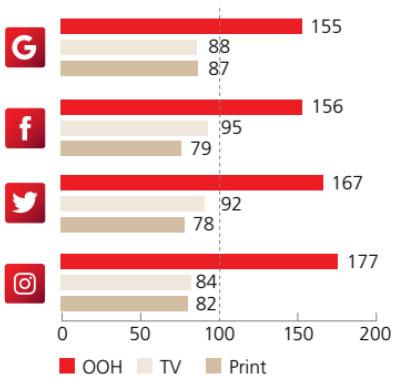

(basis = 1,043 interviews)

Source: INNOFACT AG, Zürich, 2019

The most recent survey of 1,043 Swiss citizens has shown that online activation through outdoor advertising is strongest compared to TV and print.

For example, 39% of respondents said they had used internet search engines in the last 6 months after seeing the corresponding advertisement on a poster or screen. This corresponds to a 1.5 times higher activation rate compared to TV and print.

### Activation index search, Facebook, Twitter and Instagram

OOH contacts trigger significantly more online interactions than TV or print – be it as search, Facebook, Twitter or Instagram interaction.

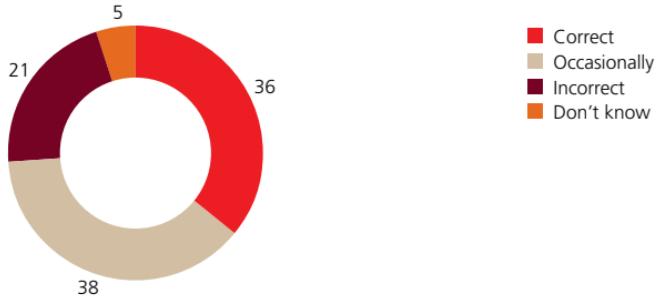

## Transport advertising

### Public transport advertising is seen by everyone

Share in % of persons interviewed

## The target areas in Switzerland

We operate with the regional structures defined by WEMF AG für Werbemedienforschung. The geographical extents and population figures of the various target areas are based on official data obtained from the Federal Statistical Office (FSO).

**26** Greater urban areas

**30** Urban centers

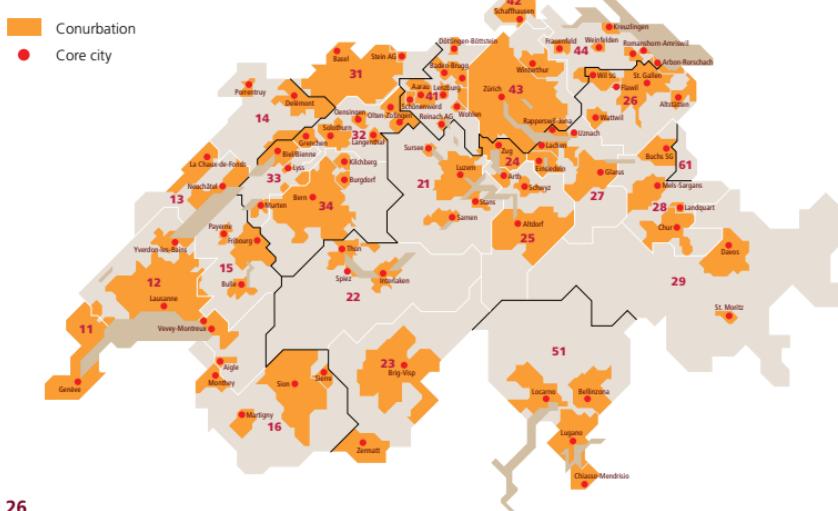

### Current data

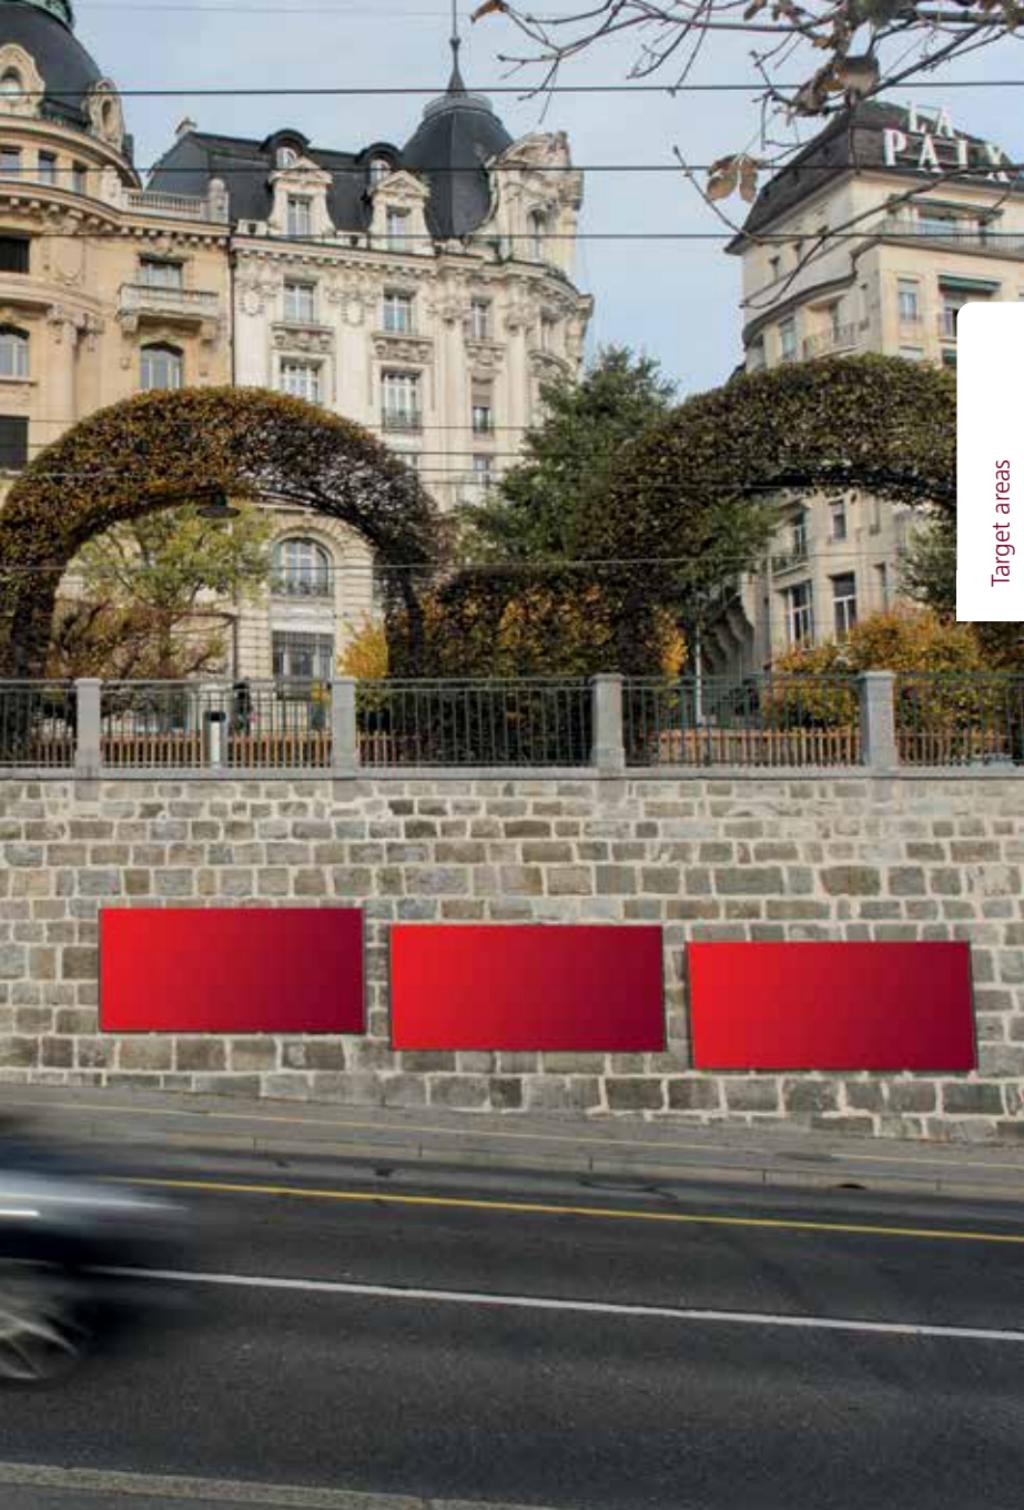

The calculation of our media performance figures is based on the information published by the Swiss Federal Statistical Office (FSO, population status: 31.12.2011, definition conurbations status: 31.12.2014)

## Greater urban areas

Nearly three-fourths of the Swiss population live in greater urban areas. Such areas, also called conurbations, are geographically connected regions that consist of several communities. They are defined by the FSO. Switzerland is composed of 49 conurbations. A conurbation generally consists of a core zone and surrounding suburbs. The remainder of the Swiss population categorized as urban by the FSO lives in 28 core areas outside the conurbations.

## Urban centers

Due to population growth and mobility phenomena, most Swiss cities have evolved beyond their political boundaries in the course of time. This circumstance is factored in by our City products. For us, a city encompasses both the core city and the geographically adjacent conurbation communities that together constitute an entity from the urban, traffic, economic and cultural points of view.

## Network profiles

Networks are packages of selected advertising spaces. They guarantee a wide-reaching coverage from the city center to the conurbation or an exclusive advertising presence at selected locations. The benefits are:

- optimal coverage of area or property
- guaranteed performance values
- selected top locations

On the following pages you will find detailed network profiles in 15 categories:

- 01 Premium Branding
- 02 Cities F200
- 03 Rail Kiosk F200 CH
- 04 Citystar F200L
- 05 Rail Citystar F200L CH
- 06 Agglos F12
- 07 Cities F12
- 08 Rail Rollingstar F12LR CH
- 09 ShoppingCenter Top10
- 10 Cityserie F4
- 11 City & Rail eBoard
- 12 City ePanel
- 13 Rail ePanel
- 14 Shopping ePanel
- 15 Mountain ePanel

For network prices see price list page 88 ff.

Online access to further network profiles:

[www.apsga.ch/networks](http://www.apsga.ch/networks)

### Specials and packages

Along with individual panels and networks we offer attractive packages and specials, such as:

- Profitline: book 1,000 F12 and F200 glued poster panels at favorable terms, as per showing matrix. Street, railway station, and parking/POS sites.
- Carline: 1,300 F12 and F200 glued posters frontal to traffic flow. Target area whole of Switzerland, all Big27 conurbations.
- Expressline: with Expressline, your poster campaign gets nationwide exposure within five working days.

[www.apsga.ch/specials](http://www.apsga.ch/specials)

### Abbreviations

CC	Contact class
CPM	Cost per mille
GRP	Gross rating points (advertising pressure)
OTS	Opportunities to see (contact average)

## 01 Premium Branding > Local

- Lausanne, Place de la Gare: full station square occupancy with premium street panels.
- Zürich, Bahnhofstrasse: exclusive coverage of the Bahnhofstrasse with F200L street panels.

### Format F200L/F4C

Campaign duration	7, 14, 21 days
Posting	Monday
Product category exclusion	Alcohol, politics, tobacco

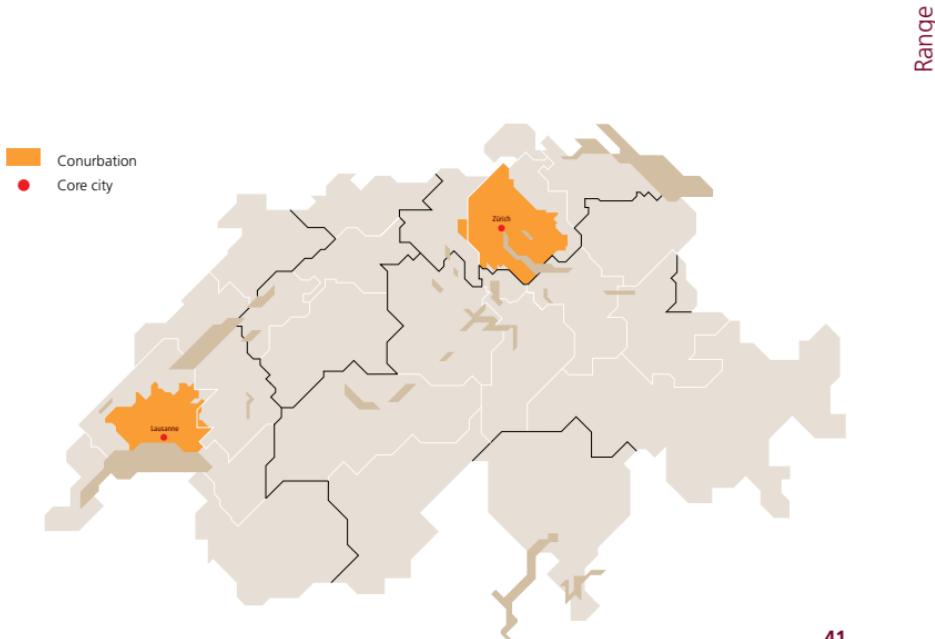

### Performance

(Basis for performance: campaign duration 7 days, contact class 4)

Town	Address / Property	Number of panels	Format	Population 15+	Total aggregate contacts	OTS per person
Lausanne*	Place de la Gare	28	F200L	110 612	4 286 900	58
Lausanne*	Place de la Gare	4	F4C	110 612	–	–
Zürich	Bahnhofstrasse	13	F200L	329 132	1 383 800	12

\* Networks bookable until 8 weeks after booking launch.

Not eligible for discounts (GCD, AVD).

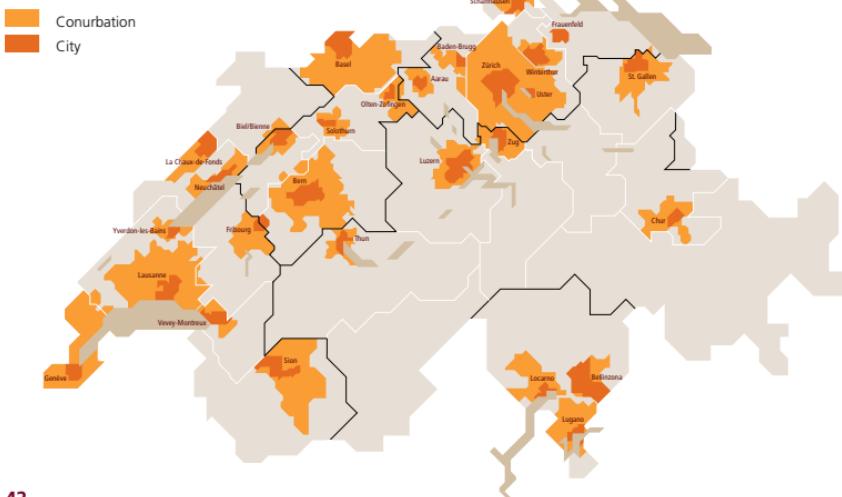

## Network profiles

### 02 Cities F200 > National / Local

Covers the 28 largest cities in Switzerland. Street panels combined with approx. 10% railway station panels.

# The APG|SGA pricing system based on SPR+

## Contact value per advertising space

SPR+ provides transparent contact values – specifically for each individual space. The individual SPR+ contact value is thus the decisive factor in setting the prices for street and railway station panels. To arrive at this value, the number of passages by persons past an advertising space are logged and weighted using the following visibility factors:

- passage angle
- passage speed
- time of day
- clustering (no. of panels per location)
- movement

SPR+ is a national mobility model including footfall for every street section in Switzerland. It takes into account how many people live in Switzerland, who they are, where they live and work, and how many of them are on the road when, where, how long and for what purpose. This mobility data for the Swiss population is correlated with all the panels in Switzerland.

For practicality, APG|SGA has grouped the contact values into six contact categories:

## Contact categories

Weighted panel contacts per week	APG SGA price category	Proportion of total panels offered
>240 000	Prime	2%
160 001–240 000	1	4%
95 001–160 000	2	14%
45 001–95 000	3	36%
20 001–45 000	4	26%
<=20 000	5	18%

## Further factors affecting price determination

In addition to the SPR+ performance rating, three further factors determine the prices for each panel.

**The demand factor** considers the demand situation and distinguishes the 9 largest core cities from the other target areas. In addition, the effective demand per panel is considered in setting the price.

**The format factor** takes into account the size of the advertising panel and distinguishes between the 2m<sup>2</sup> portrait format F200, the 3m<sup>2</sup> wide format F12 and the 7m<sup>2</sup> large format F24.

**The attention factor** reflects the presentation quality of the space and distinguishes between Rollingstar panels, frontlit and backlit panels and conventional poster panels.

## Shopping centers, parking facilities

There are currently no individual SPR+ contact values for panels in shopping centers or parking facilities. The panels available at such locations are evaluated individually on the basis of format, footfall and location characteristics and graded according to object class.

### **The OOH currency: SPR+**

Swiss Poster Research Plus AG is a scientific, impartial and transparent Swiss research institute for Out of Home Media and mobility. It analyses the mobility of the Swiss population and correlates this with individual panels, measuring such things as the number of opportunities to see a panel (contacts), weighted according to visibility. On the basis of the demonstrated contact values it is possible to determine the performance of an Out of Home Media campaign in advance and thus use the advertising budget optimally.

With the launch of the international study "Audience Measurement for Digital Out of Home" the integration of digital railway station and street panels in the SPR+ mobility model was completed in 2019. This allows the performance evaluation of eBoards and ePanels according to the usual standards of SPR+.

The advantages of SPR+ are:

**Comprehensive performance ratings:** SPR+ gives complete performance ratings for Out of Home panels in the whole of Switzerland. In addition, thanks to its inter-agglomeration mobility data, the study also takes into account panel contacts for persons who commute between agglomerations.

**Flexible selection of target areas:** In addition to performance ratings at national level, SPR+ also offers local customers in particular the possibility to individually define target areas, providing for example performance ratings for Out of Home campaigns in freely-selected municipality constellations or in catchment areas and locations where the clients have branches.

**Inter-media comparisons:** Thanks to the consistent weighting of visibility factors, SPR+ gives concrete performance ratings that can be used in strategic inter-media comparisons. Since the integration of SPR+ into the inter-media study MA Strategy Consumer, the proof of poster reach and affinities for specific target groups is possible. Thus, agencies and customers get a realistic image and a useful tool for the inter-media comparison.

Further information on Out of Home performance ratings:

# Discounts for analog and digital products

## Order correctly – save money: benefit from our discounts.

Various order types make it possible for you to optimize your purchase with regard to both quality and price. The different types of discounts cannot be cumulated.<sup>1</sup>

Our prices are calculated as follows:

### Gross price

– Discount (GCD, last-minute, AVD/group discount)

### = Net price

– Agency commission (AC)

+ Services

### = Net/net

+ VAT

### = Amount invoiced

### Agency commission (AC)

Agencies receive a commission of 5% on the net price (see guidelines concerning agency commission).

[www.apgsga.ch/gtc](http://www.apgsga.ch/gtc)

## Graduated campaign discount (GCD)

The GCD is granted for homogeneous product-related campaigns with durations of no more than 10 weeks.

## GCD analog/AC Street, railway station, shopping center, tourism area<sup>1</sup>

Contract value in CHF, gross	GCD in %	Advertising budget in CHF, net	AC in %	Total cost in CHF net/net
2 000 000	46	1 080 000	5	1 026 000
1 200 000	42	696 000	5	661 200
800 000	39	488 000	5	463 600
460 000	28	331 200	5	314 640
250 000	18	205 000	5	194 750
150 000	15	127 500	5	121 125

## GCD digital/AC Street, railway station, shopping center, event

Contract value in CHF, gross	GCD in %	Advertising budget in CHF, net	AC in %	Total cost in CHF net/net
300 000	39	183 000	5	173 850
250 000	33	167 500	5	159 125
200 000	28	144 000	5	136 800
150 000	23	115 500	5	109 725
100 000	18	82 000	5	77 900
50 000	15	42 500	5	40 375
25 000	12	22 000	5	20 900

## GCD digital plus/AC Street, railway station, shopping center, event

Contract value in CHF, gross	GCD in %	Advertising budget in CHF, net	AC in %	Total cost in CHF net/net
250 000	42	145 000	5	137 750
200 000	39	122 000	5	115 900
150 000	33	100 500	5	95 475
100 000	28	72 000	5	68 400
50 000	23	38 500	5	36 575
25 000	18	20 500	5	19 475

The GCD digital plus markdown is granted if a campaign reaches a GCD analog level plus a GCD digital level.

<sup>1</sup> Except Premium Branding and F4

**Last-minute discount**

Selected individual, analog addresses, 20% discount, max. 5 weeks before start of posting.

**Annual volume discount****(AVD/group discount)**

You can benefit from an annual volume or group discount<sup>1</sup>. The amount is calculated on the basis of your total net payments to APG|SGA in the prior year for analog standard F200, F12, F400, F24, and F4 formats plus the digital products City ePanel, City eBoard, Rail ePanel, Rail eBoard, Shopping ePanel, Escalator ePanel and Event ePanel. You can also conclude an agreement based on the expected current-year budget. The discount cannot be cumulated. The recipients are either individual customers (one invoice address) or groups (several invoice addresses).

Advertising budget in CHF, net	AVD in %	AC in %
5 000 000	35	5
3 500 000	30	5
1 400 000	25	5
1 100 000	22.5	5
825 000	20	5
550 000	17.5	5
275 000	15	5
100 000	12.5	5
10 000	10	5

<sup>1</sup> Except Premium Branding, F4, trade shows and exhibitions, annual contracts, seasonal bookings and long-term orders

**Carline and Profitline**

Exposure quality at top terms – our budget line. Product description: page 40.

**Special offers**

Please check our website for special offers and promotions:

[www.apgsga.ch/specials](http://www.apgsga.ch/specials)

**Political billposting**

Flat 25% political discount and 5% agency commission (not combinable with other discounts). Exceptions: Premium Branding and F4.

[www.apgsga.ch/wahlen](http://www.apgsga.ch/wahlen)

**ZEWO discount**

Non-profit institutions/organizations with ZEWO label are granted a discount of 50% (including agency commission) on all bookings. Exceptions: Premium Branding, special offers, F4 products, long-term orders/contracts, locally coordinated products.

**Please note**

Separate terms apply for advertising on megaposters, promotional areas, in and on means of transport, in the mountains, as well as mobile advertising.  
> from page 102 ff.

## Advertising at airports

Your brand appearance in an international environment

Airports are important hubs of international economic metropolises. They are used by both business and leisure travelers. Airport advertising is part of the travel experience of thousands of passengers. This promises strong-contact campaigns for the staging of brands in an attractive and high-quality environment. APG|SGA is the exclusive advertising partner of Zürich airport – the largest and most important airport in Switzerland.

### Zürich airport

Zürich airport is one of the world's leading airports. It receives various awards every year, among other things for its customer friendliness and high quality standards.

[www.flughafen-zuerich.ch](http://www.flughafen-zuerich.ch)

### Attractive target groups

Attractive target groups

Zürich airport offers a top class, international environment for attractive brand positioning within a high-purchasing target group. Hardly anywhere else do you meet business people as often as at the airport. The airport is therefore the perfect place to address decision-makers from all sectors of the economy. Private travelers can also be reached ideally. They are in joyful anticipation of the upcoming holidays and accordingly in a positive mood.

### Premium advertising presence

Exclusive communication worlds inspire passengers and visitors in the high-quality and cosmopolitan environment of Zürich airport. The offer ranges from short-term documentable classic and digital advertising formats, to individual advertising options in special formats at busy locations, to large-format mega-poster spaces and exclusive branding zones.

### Offer

The web tool makes it easy to search for offers and select them by format, target group or airport zone.

[www.apgsga.ch/airport/productfinder](http://www.apgsga.ch/airport/productfinder)

### Airports

Prices | Terms

aymo is Switzerland's most precise mobile targeting. To geographically limit the target group, aymo offers a targeting by means of customizable polygon areas. To an accuracy of one meter it is determined which area is relevant for a campaign. Thus, the scatter loss is minimized and mobile ads can be transmitted effectively along the customer journey.

The polygon technology developed by APG|SGA uses real-time data of leading Swiss apps. Every day, 3.8 million location data points are being processed. 3.6 million app users per month provide maximum reach, accuracy and forecast precision.

## LiveTarget

Decide down to the exact meter where your mobile ads should appear: by defining specific polygons you can address your target group in real time on Swiss apps.

**CPM<sup>1</sup> CHF 57.-**

## EventTarget

Address your audience at a specific event: by defining the exact meter and timeframe, target groups are inspired by the correct message at the right time.

**CPM<sup>1</sup> CHF 67.-**

## GeoTarget

Reach customers in a municipality or region: on the basis of IP data, your mobile ads will appear on high-quality national and international apps and mobile websites.

**CPM<sup>1</sup> CHF 30.-**

## ReTarget

Extend the impact of your mobile ads: app users who spend time at the locations you specify will be registered and can thus be addressed over the long term.

**CPM<sup>1</sup> CHF 67.-**

## ReplayTarget

Reach your target group on the basis of visited locations: your mobile ads are only displayed to app users who were registered at the defined location and during the period of your choice.

**CPM<sup>1</sup> CHF 67.-**

## BillboardTarget

Strengthen poster campaigns with targeted mobile advertising: In addition to the poster sites you booked, your message will also be displayed on the smartphones of passers-by.

**CPM<sup>1</sup> from CHF 57.-**

## Programmatic DOOH campaigns

Now over 500 large-scale digital screens (eBoards and ePanels) at top locations also programmatically bookable at APG|SGA. We combine performance data for our advertising panels from SPR+ with sociodemographic data collected from an ongoing market research panel for target group appeal. Use the technical advantages of a programmatic DOOH campaign and achieve over 770 million impressions per month.

The advantages of programmatic DOOH:

### – Closer to target group

Data-based campaign delivery enables more focused target group appeal

### – Granular control

Precise campaign delivery when and where you want it, taking your desired target group into consideration

### – Short-term planning

New opportunities for short-term, dynamic, tactical campaigns

### – Security

100% viewable, fraud- & bot-free

### – Multichannel

Plan and optimise campaigns across multiple channels using a single platform

### – Reports & optimisation in real time

You can see current campaign KPIs in the DSP at any time

## Our Offer

Current national coverage of more than 500 screens with over 770 million impressions/month.

Make the most of our unique target group data.

Our high quality standards ensure minimum 55-inch screens with full HD resolution.

Effective immediately, innovative advertising spaces such as our branding zones in major Swiss railway stations are also available for programmatic booking. The range is constantly expanding.

### Contact

If you have any questions about programmatic DOOH, please get in touch with your APG|SGA contact or our programmatic-advertising team:  
[programmatic@apgsga.ch](mailto:programmatic@apgsga.ch)

### **Services**

Information on other services can be found on page 118.

# Specifications poster production

To achieve optimum impact, there are a few simple yet important rules to be observed during the production phase.

## Paper requirements

The paper to be used is an important quality attribute in poster production. APG|SGA does not produce its own paper, nor is there any paper certified by APG|SGA. However, the requirements are set out. Different paper is used for the production of wet or backlit posters.

## Wet posters

The wet poster is folded and soaked in water so that it becomes supple for posting and bonds with the adhesive. For this type of processing, the paper must be able to absorb water and must not disintegrate in water (water resistance). Only use Blueback/Chantegris paper to produce wet posters.

For optimum adhesion, the reverse side of the poster must be rough. For full-surface, dark visuals, uncoated paper is preferable, as this prevents cracking in the fold.

Due to the production method used, the paper has a grain, called the machine direction. This machine direction is crucial in poster printing. When the poster is soaked, the paper expands horizontally or vertically by up to 4 cm. Because of this, the machine direction has a major impact on the size of the poster. Printing must be set to grain-long in the machine direction. Otherwise, the quality will be compromised and distortions will occur.

## Wet poster

F4/F12/F200/F24	Blueback/Chantegris paper
	Bright white
	110–120 g/m <sup>2</sup>
	One side coated
	Grain-long
	Wet posters can be modified with add-ons or snipes.

## Backlit posters

Backlit posters are hung in a backlit box and illuminated from behind. Unlike wet posters, the paper should be firmer and absorb as little moisture as possible, to minimize crinkling. For optimum transparency, only use whiteback backlit poster paper, which has a white back.

## Backlit posters

F12L/LR, F200L/LR	Whiteback backlit poster paper
	Reverse side white
	135–150 g/m <sup>2</sup>
	Both sides coated
	Backlit posters cannot be modified with add-ons or snipes.

## Important to know

If you have your posters printed abroad, please bear in mind that different rules may sometimes apply to poster technology, such as dry-gluing processes, different paper, different overlapping, etc.

# Specifications poster production

## Printing technologies

There are three technologies suitable for poster printing:

- Offset printing
- Digital printing
- Screen printing

## Translucent printing for backlit posters

Translucent posters are printed on both sides. This ensures that your visual is equally illuminated during the day (light from front) and at night (light from back). Four colours are printed on the front and just three colours (excluding black) on the back. This creates optimal colour balance.

To achieve the optimum transparent slide effect, the following rules should be observed:

- Only use backlit poster paper
- Single-part production, translucent printing method
- Avoid solid-tone areas, black bars and overprints
- No recycled or coloured paper
- No screen printing on reverse side

## Inks

Inks have a major influence on poster quality:

- The water resistance of the inks is crucial for preventing the posters from breaking when folded and for ensuring that the inks do not bleed during the wet posting process or when exposed to rain.
- Avoid large-area solids and ultra-fine screens, as these prevent the glue from bonding properly.
- Do not use lacquer because this causes the posters to crack when folded or stick together when soaking.

## Overview of poster formats

See page 36.

## Overview of guidelines

Depending on the printing technology used, the data are prepared for printing and transferred to print. The guidelines are shown in the table below.

### F4 (world format)

Digital printing	Offset and screen printing
245 x 350 mm	245 x 350 mm
120 dpi in final format	355 dpi
	34 screen width

### F200 (city format)

Digital printing	Offset printing
245 x 350 mm	245 x 350 mm
120 dpi in final format	355 dpi
	34 screen width

### F200L and F200LR (city format)

Digital printing	Offset printing
245 x 350 mm	245 x 350 mm
Visibility field	Visibility field
239 x 342 mm	239 x 342 mm
120 dpi in final format	355 dpi
	34 screen width

### F12 (wide format)

Digital printing	Offset printing
470 x 224 mm	470 x 224 mm
120 dpi in final format	355 dpi
	34 screen width

### F12L and F12LR (wide format)

Digital printing	Offset printing
470 x 224 mm	470 x 224 mm
Visibility field	Visibility field
462 x 216 mm	462 x 216 mm
120 dpi in final format	355 dpi
	34 screen width

### F24 (large format)

Digital printing	Offset printing
470 x 448 mm	470 x 448 mm
120 dpi in final format	355 dpi
	24 screen width

## Poster design

A poster's impact depends largely on its design. Poster design is guided by the laws of human perception. It is simple and focused and reduces image and text to just a few, memorable signs and characters that even a viewer in a hurry can recognize and retain as relevant.

## Backlit formats

Please note that, with backlit formats, paper size is key to production; however, the visible size must be taken into account in the design.

## Do not use traffic signs

For reasons of traffic safety, the law forbids roadside advertising from containing any traffic signs or directional symbols.

## Delivery

### Delivery dates

For logistical reasons, we need your advertising media to arrive at our logistics center in Wallisellen at least 10 working days before the start of the campaign.

### Delivery note and labels

To ensure that everything goes smoothly, please upload the layout for your posters to our customer portal [www.apgsga.ch/myAPG](http://www.apgsga.ch/myAPG) prior to delivery. This makes it easier to identify the advertising materials and lays the foundation for trouble-free further processing. Once you have uploaded everything, you will be able to access and download a pre-completed delivery note as well as labels for labelling the poster rolls. Access is gained via a link shown on the sales documents, or should be made available to you by your client.

### Delivery address

APG|SGA, Allgemeine Plakatgesellschaft AG  
Logistikcenter  
Hertistrasse 1  
8304 Wallisellen  
T +41 58 220 70 11  
[operations@apgsga.ch](mailto:operations@apgsga.ch)

### Production notes

Find detailed information concerning the production of posters in the poster production brochure: Specifications and delivery at  
[www.apgsga.ch/poster-production](http://www.apgsga.ch/poster-production)

## Specifications spot production

### Advertising media

Digital advertising media allow the following creative implementations:

#### Static

Classic still picture (no animation)

#### Limited animation

Partially animated spot: calm background with animated elements

#### Full-motion video

Fully animated spot

The digital broadcast is soundless.

You will find detailed production guidelines at:

[www.apgsga.ch/digital-production](http://www.apgsga.ch/digital-production)

### Production partner

We recommend working with a specialized production company to create your advertising medium.

### Delivery of digital advertising media

Data can be supplied directly via the APG|SGA online tool. Access is gained via a link shown on the sales documents, or should be made available to you by your client.

Please indicate the client's name, the campaign number and the visual's designation each time you submit digital advertising media. We will respond with a confirmation of receipt and technical suitability of the digital advertising medium.

Upload digital media for ePanel and eBoard quickly and easily:

[www.apgsga.ch/myAPG](http://www.apgsga.ch/myAPG)

#### Production notes

<http://www.apgsga.ch/digital-production>

F1 = Holiday: posting on subsequent day

### Posting

To assure the full 7-, 14-, or 21-day posting durations, all panels are periodically managed – always on the same weekday at about the same time (so-called paced posting). In the 28 largest cities, all standard and backlit posters (F12, F12L, F12LR, F200, F200L and F200LR formats) are posted on Mondays. According to the same paced principle, posting takes place in the

remaining conurbation communities on Tuesdays and Wednesdays. This procedure guarantees strong and optimized advertising impact.

F4 posters and F24 posters are processed Tuesdays through Thursdays. Panels in shopping centers and parking facilities are managed Tuesdays through Thursdays. All these operations are handled according to the paced posting principle.

## **Delivery**

Posters have to be submitted at least 10 work days before posting starts.

Delivery address: page 133

# Focus on sustainability

## Corporate responsibility

APG|SGA aims to foster comprehensive and sustainable values for its partners, customers, shareholders and employees, while making a contribution to the environment and society. Balanced consideration of environmental (planet), social (people) and economic (profit) factors in decision-making processes is regarded as vital for the long-term success of the company.

## Sustainability strategy

The sustainability strategy is based on the triad of people, planet, profit, and both the guidelines of the Global Reporting Initiative (GRI) and the UN's sustainability development goals.

## People

### Attractive employer

APG|SGA is committed to the creation of future-oriented, attractive jobs in a challenging work environment and the promotion of its employees.

### Workplace safety/health protection

APG|SGA promotes a culture of safety at a high level. Preventative measures are used to protect the health of employees.

### Social responsibility

APG|SGA takes its social responsibilities seriously.

## Planet

### Environmental management

APG|SGA sees environmental management as a continuous process in which identification of environmental impact, action planning, management/monitoring and, if necessary, adjustments are integral components.

### Environmental performance

APG|SGA makes an active contribution to environmental protection, consistently reducing its CO<sub>2</sub> emissions to levels below legal regulations.

## Sustainable procurement

APG|SGA sets standards for environmentally and socially responsible production.

## Profit

### Long-term existence of the company

The optimal generation of earnings forms the foundation for the sustainable existence and competitiveness of the company.

### Attractive shareholder policy

APG|SGA aims for attractive returns for shareholders and pays appropriate dividends in line with its business performance.

### Infrastructure and processes

APG|SGA obtains and operates longlasting, high quality infrastructure, such as buildings, facilities and tools.

## Compliance

APG|SGA adheres to all legislation, guidelines and standards. APG|SGA evaluates the effectiveness of internal control systems and guidelines. In the event of misconduct, appropriate measures are taken.

### Global CDP ranking

APG|SGA has been awarded an A- in the climate change ranking by the CDP (Carbon Disclosure Project), making it one of the best well-known listed companies in a national and international comparison of CDP climate scores. This is another improvement on previous years and reflects the efforts made by APG|SGA under its corporate responsibility strategy.

The annual sustainability report is available for download at [www.apsga.ch/sustainability](http://www.apsga.ch/sustainability).
