Introduction

Tax code assignments* can be made in your CS Professional Suite application to associate the balances from specific general ledger accounts for tax reporting, as follows:

Account balances from:	Transfer to:
Accounting CS™ (v.2010.1.0) or higher	UltraTax CS® (v.09.5 or higher) Lacerte® ProSystem fx® ProSeries®
Workpapers CS™ (v.2012.1.0 or higher)	UltraTax CS (v.11.5 or higher) Lacerte ProSystem fx ProSeries
Engagement CS® in Creative Solutions Accounting™ (CSA)	UltraTax CS GoSystem® Tax RS Lacerte ProSystem fx ProSeries

* For Engagement CS and UltraTax CS, the actual tax code assignments can be made either in the accounting software or in the tax software.

The tax code assignments that you make during Chart of Accounts setup enable your tax software to carry the general ledger balances to the proper lines on the appropriate tax forms.

This document lists the tax codes plus the latest form and input screen references for tax processing with UltraTax CS. Tax codes that have been added for 2019 are marked **NEW** (in the Tax Code column next to the number).

Additional information

- The options that are available in the drop-down list for the **Tax Code** field in the Setup > Chart of Accounts screen are based on the client's entity type (as specified in Accounting CS or Workpapers CS on the Accounting Information tab of the Setup > Clients screen; or in Engagement CS on the Trial Balance tab of either the File > Client Properties dialog or the File > New Client dialog.)
- You do **not** need to update existing tax code assignments in response to tax form changes from year to year because UltraTax CS or GoSystem Tax RS can handle such changes automatically.
- Accounting CS and Workpapers CS also enable users to create custom tax codes. For details, search on **Custom tax codes** from the search field in your application.
- For additional details, search on **Tax codes** from the search field in your application.
