

Tecstrut Channel Suspension & Framing System

- Complies with HVCA specification DW144.
- Manufactured from corrosion resistant materials.
- Channels produced in accordance with BS EN 10162: 2003
- System complies with BS6946 (1988).
- Comprehensive range of components & accessories.
- Ex-stock availability throughout the U.K.

Description

The Lindab channel suspension and framing system is designed to provide an effective yet economical solution to today's framing and support requirements. High quality materials are used throughout and the system complies with relevant industry standards including:-

BS EN 10162: 2003 - All channels in the Tecstrut system are manufactured to comply with the tolerances detailed in this standard.

BS 6946: 1988 - The data provided takes into account the requirements of this standard for testing of channel, fittings and channel nuts.

BS EN ISO 1461: 1999 - Where appropriate fittings and bracketry are post hot dip galvanised to this standard.

BS EN 10327: 2004 - Channels are manufactured from pre-galvanised steel to this specification.

Channel Slotting - 1.6mm sections

Channel Slotting - 2.5mm sections

Channel Options

In addition to the channel sections shown opposite a multiple channel sections is available. This comprises two channels welded 'back to back'

TSP-442D - 41mm x 41mm x 2.5mm x 2

Multiple channel sections are produced by spot welding together two individual pre-galvanised channels at 150mm centres. Welds are then protected by the application of corrosion inhibiting paint.

Channels

Channel Slide Nuts

Tecstrut channel slide nuts and springs are self aligning and are specially manufactured to complement the range of Tecstrut channels. The slide nut can be moved along the channel for ease of alignment whilst the springs tension the nut against the internal channel lips to facilitate installation. In addition to the shape of the slide nuts prevents turning inside the channel eliminating the need to grip the nut whilst inserting bolts or threaded rod.

Nuts are available threaded M6, M8, M10 and M12, all zinc plated.

TSSN-L Long spring

TSSN-S Short spring

TSSN No spring

Springs are also available separately.

Top Plates

Ribbed rectangular washers designed to fit over the slotted channel.

Manufactured from 2.5mm corrosion resistant galvanised mild steel. 11mm diameter hole.

Wedge Nuts

Manufactured from steel, zinc plated.

For suspending services from profiled steel shuttered decking. Available to suit 6, 8, 10 and 12mm threaded rod.

No Drill Anchors

Available for M6, M8, M10 and M12 threadings. Manufactured from steel, zinc plated.

Threaded Rod

Threaded rod is manufactured from mild steel, zinc plated. Supplied in 3 metre lengths and available in M6, M8, M10 and M12 sizes.

Hexagonal Studding Connectors

Connectors are available to reduce wastage to a minimum.

Hexagonal Head Set Screws

Zinc Plated. M6 x 20, 25, 30, 35, 40mm.
M8 x 20, 25, 30, 35, 40mm.
M10 x 20, 25, 30, 35, 40mm.
M12 x 20, 25, 30, 35, 40mm.

Hexagonal Full Nut (8.8HT)

Zinc Plated. M6, M8, M10, M12.

Washers

Lock Washers and Flat Washers, M6, M8, M10, M12
Penny Washers M6, M8, M10 x 30mm od.
All zinc plated.

Cone Pointed Set Screws

Zinc Plated. M10 x 40mm.

Roofing Nuts and Bolts

Zinc Plated. M6 x 20, M6 x 40, M8 x 25.

Tecstrut Fittings

All fittings are generally manufactured from 6mm thick steel strip and hot dip galvanised to BSENISO1461:1999 unless otherwise indicated. Standard hole diameter 14mm. **NOTE:** All weights and dimensions approximate.

Tecstrut Fittings

TS26 Weight 0.36 kg

Angles available 30°, 45°, 60°

TS29 Weight 0.23 kg

Angles available 30°, 45°, 60°

TS31 Weight 0.30 kg

TS33 Weight 0.75 kg

8mm thick

TS44
Note: Cone pointed screw not included.

Weight 0.26 kg

TS45/41
TS45/21
Note: Maximum loading 220kg. Cone pointed screw not included.

Weight 0.50 kg

TS48 Weight 0.12 kg

FLANGE CLAMPS

Available for M8, M10 and M12

Malleable iron, zinc plated

Please specify clearance hole required.

TS90

PURLIN CLIPS

Mild steel, zinc plated

Clearance hole allows for M10

TS91

BASE PLATES 5mm thick 14mm Ø Base Holes

TS37 Weight 1.15 kg

TS38 Weight 0.50 kg

TS39 Weight 0.56 kg

CANTILEVER ARMS, UNIVERSAL
Back Plate 8mm thick

TS40/300 – 300mm
TS40/450 – 450mm
TS40/600 – 600mm

CANTILEVER ARMS, LUGGED
Back Plate 8mm thick

Minimum length mm
TS70/300 – 300mm
TS70/450 – 450mm
TS70/600 – 600mm

PVC CHANNEL END CAPS

Section Properties

Section Reference	Weight kg/m	Moment of Inertia x/y in centroid (cm ⁴)		Area of cross section (cm ²)	Main axis angle x axis in centroid (deg)
		x	y		
TSS-421	1.10	0.769	3.236	1.347	90.00
TSS-441	1.57	4.366	5.452	1.914	90.00
TSS/TSP-422	1.86	1.024	4.729	2.074	90.00
TSS/TSP-442	2.65	6.363	8.307	3.035	90.00

Notes:

- The above data is based upon plain sections throughout. Where slotted channels are used multiply load from table by 0.8.
- Data is based upon uniformly distributed loads. If the load is concentrated at the centre of a span multiply load from table by 0.5 and deflection by 0.8.
- Stress 182N/mm².** Recommended when deflection is not critical, especially on longer spans.
- Deflection 1/180 of span.** Recommended when deflection should be limited.
- Deflection 1/360 of span.** Recommended when deflection needs to be imperceptible.
- Channel Nut Loads**
resistance to slip (2.5mm channels) - 16.5 KN maximum.
Pull-out strength (2.5mm channels) - 24.7KN maximum. (Bolt size M10.
Torque 70Nm).

N.B. The above data is calculated, not tested.

Spring Steel Fasteners Beam Clip Threaded Rod Hanger

Z Purlin Threaded Rod Hanger

Part no.	Flange	Rod thread	S.Load
ZP6MT	2.5mm	M6	45kg
ZP8MT	2.5mm	M8	45kg
ZP10MT	2.5mm	M10	45kg

Allows perpendicular suspension for a variety of support systems.

Beam Clip Strap Hanger

Part no.	Flange	Strap	S.Load
SH125	2-4mm	25mm	72kg
SH250	5-9mm	25mm	90kg
SH500	10-16mm	25mm	90kg

Right Angle Strap Hanger

Part no.	Flange	Strap	S.Load
SHR125	2-4mm	25mm	72kg
SHR250	5-9mm	25mm	90kg
SHR500	10-16mm	25mm	90kg

Pre-assembled strap hanger and horizontal beam clip for up to 25mm strap, for either parallel or right angle installation.

Straight and Right Angle Strap Hanger

Part no.		Strap	S.Load
RHS-SH	M6	25mm	90kg
Right Angle Strap Hanger			
RHA-SH	M6	25mm	90kg

Easily mounted to wood, metal or concrete structural members with screws, bolts etc.

Notes:

- Fasteners are protected by a zinc rich finish which incorporates an organic resin coating providing an excellent barrier to moisture and heat. Fixings are coated to a thickness of 10-12 microns to BS7371, Parts 1, 2 and 11:1981.
- Static loads given are based on tests up to x3 values listed.

Slotted Support Banding

Manufactured from corrosion resistant galvanised mild steel strip 0.9mm thick, and supplied in 30 metre coils. The elongated holes are punched at 30mm pitch to simplify alignment and fixing. Complies with the requirements of DW144.

Split Rings

Manufactured from mild steel flat bar, drilled for clamping and zinc plated for a corrosion resistant finish.

Flexible Duct Insulating Strip

A highly versatile insulation system manufactured from high density phenolic foam which provides a new and improved solution to the requirement for structural insulation where ducts and pipes are supported. Fire resistant - Class 'O' rating.

Note: Also available for rectangular ducting. Please ask for our detailed literature for further information.

Threaded Rod

Threaded rod is manufactured from mild steel, zinc plated. Supplied in 3 metre lengths and available in M6, M8, M10 and M12 sizes. Studding connectors are also available to reduce wastage to a minimum.
