## THANKSGIVING DINNER MATH PROJECT

Imagine that you are going to plan a Thanksgiving dinner! You are in charge of planning the menu, making a shopping list, comparing two different food store's prices, adjusting a recipe to include a larger amount of people, and finally calculating the total cost per person.

You may brainstorm menu items by referencing store flyers to find out actual costs.

## Requirements:

1. Plan your Thanksgiving menu. Make a list and decide how much of each item you will need to accommodate $\underline{15}$ dinner guests.
2. Prepare a shopping list. Use the flyers, internet grocery store sites, and your parents as reference. (you will need to compare (2) different food store's pricing)
3. Pick a favorite recipe and alter it to accommodate 15 dinner guests. (have a before \& after)
4. Correctly calculate pricing including discount, sales tax and total cost per person
5. Present your findings in a creative way using technology

The project must be presented using a PREZI, google app, Imovie, or other type of technology. If you have any additional ideas, please see me for approval.
Be very creative. You should enhance with pictures.
Remember - this is a math project so I will be looking for all the ways you used math in your presentation. All calculations must be correct!

This project will include 4 components and a presentation (see rubric): The menu, (2) shopping lists which compares two different food store's pricing, (1) recipe that was altered to accommodate 15 dinner guests, and calculations that also include discount, sales tax and finding the total cost per person.

Have fun and happy "shopping"!

DUE: Monday, November 23, 2015

## Planning a Traditional Thanksgiving Menu

The following items are typical Thanksgiving dishes. All serving sizes are estimated recommendations per dinner guest. This list is meant to serve as a guide only. You do not have to include all items in your menu, and you may include items not included in this menu. Your serving sizes may also be different.
$\square$ turkey: $\frac{3}{4}$ pound per person for a whole turkey weighing over 14 poundsstuffing: $\frac{1}{2}$ to $\frac{3}{4}$ cupmashed potatoes: one pound of raw potatoes for every 3 peoplevegetables: $\frac{1}{2}$ cup or 4 ounces for each vegetablegravy: $\frac{1}{4}$ cup per personcranberry jelly/relish: 1 pound for every 5 peoplepie: diameter $=\#$ servings ( an 8 -inch pie would serve 8 people)bread: $1 \frac{1}{2}$ rolls per persongarnish: 4 ounces (pickles, olives, celery, carrot sticks, etc.)salads : (includes vegetable, jello, fruit) $\frac{1}{2}$ cup per personrice or pasta sides: $2 / 3$ cup per personsnacks: 1 cup (popcorn, almonds, chips, candy)

|  |  |  |  |
|  |  |  |  |

## Sample

## Recipe Name: Classic Macaroni \& Cheese

## Original Serving Size: Makes 6 side dish servings

Altered Serving Size: Makes 18 side dish servings
Ingredients
CAMBELL's Condensed Cream of Celery Soup
Milk
Mustard
Pepper
Cooked elbow macaroni
Shredded Cheddar Cheese

Original amount needed

1 can
$3 / 4$ cup
1 tsp
$1 / 8 \mathrm{tsp}$
3 cups
$13 / 4$ cu

Math Computation
Altered amount needed

1 can x 3
$3 / 4 \times 3=9 / 4=2^{1 / 4}$
1 tsp x 3
$1 / 8 \times 3=3 / 8$
3 cups x 3
$7 / 4$ cups x $3=21 / 4$

3 cans
$21 / 4$ cups
3 tsp
3/8 tsp
9 cups
$5^{1 / 4}$ cups

## Computation Worksheet

Calculate the amount needed x cost. Be CAREFUL of the amounts needed!

| Amount Needed <br> (How many items needed for 15 People?) |  |  | Giant Cost |
| :---: | :---: | :---: | :---: |
| Turkey | 18 lbs | \$0.95 per pound | \$ 1.49 per pound |
| Potatoes | 10 lbs | \$2.50 for 5 lbs | 5 lb bag = \$ 3.99 |
| Stuffing | 3-8oz canisters | 12 oz canister \$2.15 | $12 \mathrm{oz} \mathrm{canister} \mathrm{=} \mathrm{\$} 2.19$ |
| String beans | 2-16 oz bags | $12 \mathrm{oz} \mathrm{bag} \mathrm{=} \mathrm{\$} 1.45$ | $12 \mathrm{oz} \mathrm{bag} \mathrm{=} \mathrm{\$} 1.25$ |
| Cream of Mushroom soup | 3-10 3/4 oz cans | 10 3/4 can = \$ 1.49 | $103 / 4$ can = \$ 1.29 |
| French fried onions | 2-6oz cans | $60 z$ can = \$ 3.29 | $60 z$ can = \$ 3.39 |
| Corn | 2-16 oz bags | $12 \mathrm{oz} \mathrm{bag} \mathrm{=} \mathrm{\$ 1.50}$ | 12 oz bag = \$ 1.79 |
| Dinner rolls | 2-12 packs | 12 pack = \$ 3.55 | 12 pack = \$ 3.49 |
| Cranberry sauce | 2-14 oz cans | $14 \mathrm{oz} \mathrm{can}=\$ 0.88$ | $14 \mathrm{oz} \mathrm{can} \mathrm{=} \mathrm{\$} 1.49$ |

| Pumpkin pie | 2 large pies | 1 large pie = \$ 6.69 | 1 large pie = \$ 5.69 |
| :---: | :---: | :---: | :---: |
| Apple Pie | 2 large pies | 1 pie = \$ 3.99 | 1 large pie = \$ 6.29 |
| Cool whip | 2 containers (8oz) | $8 \mathrm{oz}=\$ 1.83$ | $8 \mathrm{oz}=\$ 1.75$ |
| Brownie Mix | 2 boxes | 1 box = \$1.35 | 1 box = \$1.59 |
| Margarine | 2-1 lb boxes | 1 lb box $=\$ 0.99$ | 1 lb box = \$ 1.09 |
| Water | 1 case of 24 | 1 case of 35 is \$4.50 | 3 cases of 35 bottles /\$ 11 |
| Soda | 5-2 liter bottles | 2 L bottle = \$1.50 | 3-2 L bottles for \$ 5 |
| Milk | 2 gallons | \$ 3.61 per gal | \$ 3.61 per gal |
|  |  | Total cost | Total cost |
