STRENGTH CAPABILITY TECHNOLOGY LUXURY

### THE STRONGEST RAM 1500 EVER

**All-new Ram 1500:** 98 percent of the steel used in the frame is high-strength steel, as is 38 percent of the steel used in the cab and box. The result is a reduction in weight without the sacrifice of durability and toughness Ram truck drivers depend on. Aluminum is used in the hood and tailgate to further reduce weight while maintaining structural integrity.

### HARDCORE CAPABILITY

The all-new 2019 Ram 1500 was built to pull heavy loads, haul supplies over gravel roads and plow through the elements. Count on it to haul up to 2,300 lb\* max payload or tow up to 12,750 lb<sup>1</sup> which is best-in-class<sup>1</sup> V8 towing with complete confidence. The Pentastar<sup>®</sup> V6 and the available HEMI<sup>™</sup> V8 offer eTorque technology to help improve both performance and fuel efficiency. Opt for the Ram Rebel<sup>®</sup> or the available Off-Road Group for next-level off-road performance. The available class-exclusive<sup>2</sup> Active-Level<sup>™</sup> Four-Corner Air Suspension offers automatic load leveling to help improve stability and maintain exceptional drive quality.

# TECHNOLOGY & COMFORT

## TECHNOLOGY AT THE TOUCH OF YOUR FINGER

Truck owners demand the best technology and the all-new Ram 1500 delivers, including SiriusXM® with 360L, the most amazing listener experience ever, the class-exclusive¹ available 12-inch touchscreen media center, and the most powerful audio system in its segment¹ from Harman Kardon®—with a 900-watt amplifier and 19 speakers.

## LUXURY DEFINED BY COMFORT, SPACE AND SILENCE

Luxury means having a quiet, smooth and supremely comfortable ride. All-new Ram 1500 achieves it with a class-exclusive¹ multilink coil spring rear suspension, a new Crew Cab that adds 4 inches to the interior length and provides both best-in-class² rear leg room and available class-exclusive³ reclining rear seats—all topped off with best-in-class¹ interior background noise dampening.

REFINEMENT ON EVERY LEVEL. OPT FOR THE BRILLIANCE OF YEAR-ROUND COMFORT WITH AVAILABLE FRONT HEATED AND VENTILATED SEATS.

## THE 5.7L HEMI® V8 395HP 410LB-FT

AVAILABLE WITH eTORQUE TECHNOLOGY  
And a supplemental 130 lb-ft eTorque

### THE TECHNOLOGY OF eTORQUE

The Ram Brand is known for technological leadership, and the addition of eTorque proves it. This mild hybrid system incorporates a number of technologies with the 3.6L Pentastar® V6 or the 5.7L HEMI V8, including regenerative braking, Stop/Start capability, a 48-volt lithium-ion battery pack and an on-board 12kw motor/generator. The electric motor serves to provide more supplemental power during acceleration and passing. Stop/Start helps improve fuel efficiency with seamless engine on/off operation, while regenerative braking recovers and converts energy during braking.

### THE ADVANTAGES OF eTORQUE

The incorporation of available eTorque and its components offers significant advantages across the board. The electric motor enables longer 4-cylinder operation of the HEMI V8 Multi-Displacement System (MDS)/Fuel Saver Technology for additional fuel-efficiency benefits. Stop/Start capability also contributes to improved fuel efficiency, by up to 3.3 percent. Regenerative braking utilizes the on-board electric motor as a generator, converting energy to recharge the battery system. The Stop/Start System is completely transparent, and a dash-mounted system-disable switch lets the driver turn it off if desired.

# THE LEGEND EVOLVES INTRODUCING eTORQUE TECHNOLOGY

### THE TORQUEFLITE® 8-SPEED TRANSMISSION

Two exceptional 8-speed automatic transmissions help churn out the power in the all-new 2019 Ram 1500. New for Ram 1500, powered by the Pentastar V6, is the 850RE transmission; torque capacity is rated at 369 lb-ft. 2019 Ram 1500 models employing the legendary 5.7L HEMI V8 utilize the new TorqueFlite BHP75 transmission, with a torque capacity of 545 lb-ft.

Characteristics of both components point to resilient strength. Among them: fully electronic performance. On-the-fly shift map changing. More than 40 individual maps to address performance, drivability and fuel efficiency. Wide ratio spreads to help improve fuel efficiency with reduced RPM—which help reduce emissions by nearly 11 percent.

#### BEST-IN-CLASS WHERE IT COUNTS

The better the air management, the more efficient the pickup—and Ram 1500 rules. The class-exclusive<sup>®</sup> Active Front Air Dam, a new roofline that better directs airflow and a new aluminum tailgate with spoiler work together to deliver best-in-class<sup>®</sup> aerodynamics.

# ALL-AROUND EFFICIENCY

**ACTIVE GRILLE SHUTTERS** Standard on all models, Active Grille Shutters instantly adapt to speed, load and engine needs to provide the ideal engine cooling—while simultaneously reducing aerodynamic drag.

**NEW ROOF SHAPE** An all-new exterior design starts with a longer Crew Cab wheelbase, muscular fenders and a revised roofline that better directs airflow back to the rear spoiler. The larger aero roof makes way for the all-new available dual-pane sunroof.

**NEW TAILGATE DESIGN** An all-new aluminum tailgate with integrated spoiler not only makes Ram 1500 more aerodynamic, but also gives it a seamless, unbreakable appearance. The new available "Tailgate-ajar" notification system alerts you if the tailgate is not completely closed. Opening the tailgate is also easier thanks to available dampening and key fob control.

**ACTIVE AIR DAM** This class-exclusive<sup>®</sup> asset automatically deploys at 30 mph to reduce the amount of aerodynamic drag, which simultaneously improves handling while contributing to reduced fuel consumption.

# SAFETY WHERE IT MATTERS MOST: ALL AROUND YOU

## OVER 100 AVAILABLE SAFETY & SECURITY FEATURES

**AVAILABLE LANESENSE® LANE DEPARTURE WARNING (LDW)†** Ram 1500 can read the road. Mounted on the external sideview mirrors, cameras can identify road lines, determine where the vehicle is and monitor motion. Should movement onto either line occur without use of the turn indicator, the system will warn the driver and apply torque to the steering wheel to correct the movement. If no action corrects the drift, the system will even automatically align the vehicle back into its correct lane position.

**NEW ADAPTIVE CRUISE CONTROL (ACC) WITH STOP AND GO‡** Think cruise control that's smarter than ever. When the lanes ahead are clear, this available system maintains the set speed of travel. When traffic slows, it will automatically adjust to a safe distance selected by the driver. And, while most ACC‡ systems operate only down to 20 mph, our system operates down to 0 mph, virtually stopping the vehicle—then reengaging back to safe-range speeds as traffic begins to move again. (Note that the system does not perform "panic stops" at speed.)

**FORWARD COLLISION WARNING (FCW) PLUS‡** This available asset incorporates Grade Braking to control the transmission and automatically downshifts to maintain selected speed and distance. The system operates independent of the ACC‡ system, notifies the driver if the vehicle is too close to a preceding vehicle, uses audible/visual warnings and will brake the vehicle to 0 mph if the driver does not respond.

**AVAILABLE REAR CROSS-PATH DETECTION†** When in Reverse and vehicles and/or other objects are in perpendicular relationships to your Ram pickup, dual wide-band radar sensors let you know, using illuminated icons in the outside mirrors and driver-selected chimes.

**BLIND SPOT MONITORING (BSM)™ WITH TRAILER DETECTION†** This available asset monitors the "blind spots" on each side of the vehicle, utilizing sensors in each of the side mirrors. The system provides audible chimes and/or visual icons, informing the driver when changing lanes, passing others or being passed. Trailer Detection† automatically senses and accounts for the length of the trailer.

**AVAILABLE: THE NEW 360° SURROUND-VIEW CAMERA†** Depending on the model and the options and packages selected, you can bring 360-degree awareness to the drive. Credit the smart combination of strategically positioned sensors that work with cameras mounted in the grille, side mirrors and rear.

**AVAILABLE PARK ASSIST†** Ever-more sophisticated sensors give all-new Ram 1500 superb capability. Available and new for 2019: Parallel and Perpendicular Park Assist† welcome additions to the ParkSense® Front and Rear Park Assist† platforms.

**THE LARGEST STANDARD BRAKES IN THE SEGMENT†** Confident stopping power comes from a new brake system. The new brakes have the largest standard rotors in the segment†, measuring nearly 15 inches in diameter fore and aft, sharply reducing 60-0 mph stopping distances and improving performance.

**AVAILABLE SMARTBEAM HEADLAMPS†** This advanced system provides the maximum amount of light possible, automatically switching headlamps from high- to low-beam when oncoming headlamps or forward light is sensed, or when taillamps are detected in front of the vehicle.
