

THE ART OF MAGNETISM

A person wearing a white lab coat is seen from the side, holding a small white dog. They are standing in a forest with a path covered in fallen leaves. The background is filled with green foliage and bright, out-of-focus light spots (bokeh) that create a dreamy atmosphere. The overall lighting is soft and natural, suggesting a sunny day in a wooded area.

MAGNETISM

The Earth holds in it a natural magnetic attraction.

Like the earth's natural magnetic powers, sometimes there is an unexplainable force drawing you to someone or something. The captivating characteristics are unidentifiable yet irresistible. The captivating allure to someone or something often defies explanation, yet can lead to a journey like one would ever imagine.

ALUMINUM BASE

Magnetism comes in two orientations; horizontal and vertical.

THE ART OF ENGINEERING

It's all in the details.

Engineering is both an art and a science. It blends universal truths of nature with the skills of individuals applying those truths. *This is Magnetism* - a beautifully engineered award arising out of the science of magnetic fields and the art of utilizing them to adorn sleek aluminum. However, since aluminum isn't magnetic, Magnetism also uses a touch of magic in creating an award suited to recognize the most memorable milestones.

THE ART OF ATTRACTION

Where irresistible force meets recognition.

As children, we played with magnets with great fascination. Turning them one direction there was no way to bring them together, yet with just a slight twist it was impossible to keep them apart. It makes us wonder now how many things that seem like obstacles could be overcome when viewed from a different angle. Success comes when these obstacles are overcome and success should be acknowledged in an appropriate, continual manner.
