

# The Bible Code The Gate To Heaven Notebook

## By: Tony Jacobs

Copyright 2013, All Rights Reserved

### Introduction

This notebook is jam packed with the essential information of the Bible Code -The Gate to Heaven. These gates when visualized behind the heart, unlock you from limitations, barriers, and veils.

When you go through these gates you will be able to think, perceive, do, feel, and create in ways you never even thought of before.

Imagine that someone has tied you up with an invisible rope. But the rope is an exact scientific way of working with your unconscious, magnetic fields, and other energies connected with the aforementioned. These gates unlock these manipulations that have been downloaded into the earth's magnetic field for thousands of years.

This is the How to Manual of my findings. The scientific and mathematical proofs are also in this book. Do not skip over any information in this book if

you want to be able to go through the one gate to Heaven.

There are seven gates. These seven gates together make 7 points in inter dimensional space. From now on we will not think in multi dimensions. We will think of multiple created realities in a great sea of universes that are created by the one mind of God. Each bubble of reality is at a specific frequency and has a particular creation of its own kind. I call this model the Omniverse.

The Bible Code the Gate to Heaven, points the way to a particular reality we call Heaven. If we are not bound by the laws of the third dimension of space, time, matter, and energy; then we can be where ever we want to be and whenever we want to be in our physical universe.

The locked seven gates have been used in ancient construction, architecture, and ancient rituals for thousands of years. They have become part of the mass consciousness of humanity for us so that we may be able to focus on these things and lock our consciousness into a very limited reality.

Once you understand what these gates are and how they are in your consciousness and have locked you into a very limited reality, which is the only reality you have ever known, then you can start to utilize the cracked codes from the Bible to be set free.

Forward

Thomas Edison and Einstein both said: “ Brain waves when properly focused effect physical matter, and even people’s behavior.”

If brain waves affect physical matter then they can also affect time, space, and energy.

But to understand things better lets go to the example of the double slit experiment in the 1950’s.

The double slit experiment in the 1950’s was a major step forward in the birth of quantum physics.

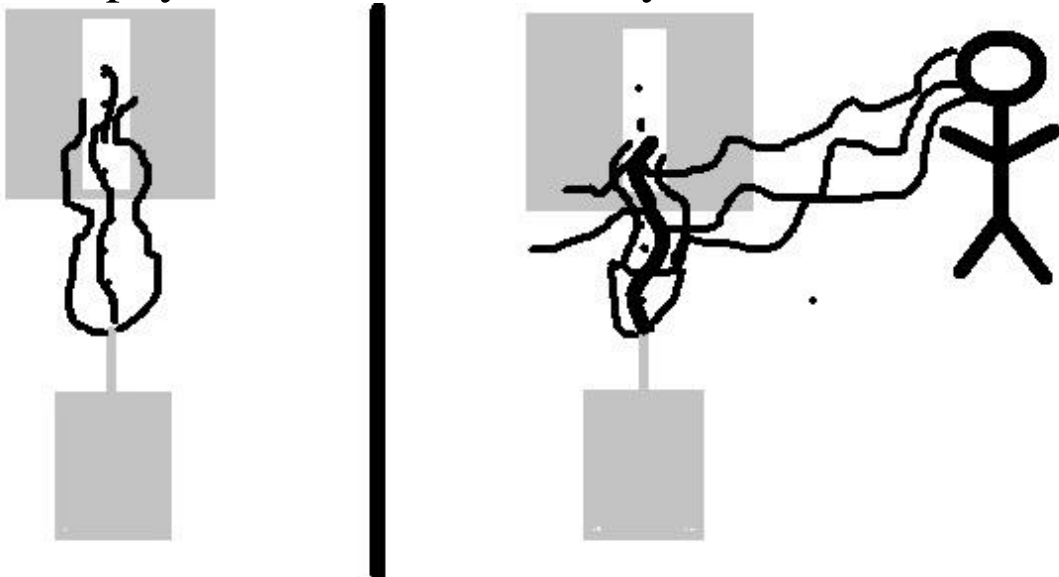

Two electron guns were shooting electrons through two slits. In the back of the slits there was detector paper.

One side the scientists knew existed. The other side the scientists were not observing and did not know existed.

On the side where the scientists were observing the detector paper had dots. On the other side where the scientists did not know about, the detector paper had a huge wave form.

Hence, the wave form particle duality was born.

The scientists' brain waves interlaced with the wave of potential that is an electron. That interlacing of consciousness created a lattice (matrix) of waves interlacing. It is this lattice (matrix) of waves interlacing with each other that is physical matter. We are the ones creating the physical universe. Things are not physical until observed by consciousness.

The Graphic above is a simple representation of what was happening in the double slit experiment. A wave of potential which was energy created by the gun. On one side, the scientist was observing, and his brain waves affecting the experiment.

This graph is a model representation of how physical matter and reality come into being. It is our consciousness observing that brings things into being. The universe is an infinite wave of potential. The

universe is not physical until consciousness awareness observes it.

It is our perceptions, beliefs, values, morals, and ethics that qualifies, shapes, and manipulates things.

The First Gate is Time. The archetype in mass consciousness is the clock and the Sun.

From the time of Sun Dials until now, this time lock has been downloaded into our brains. This time lock has become the dominant time reality. We will now examine how the matrix of time works by simple mathematics that even a 3<sup>rd</sup> grader would understand.

(60 seconds in a minute x 60 minutes in a day x 24 hours in a day = 86400 seconds in a day.)

The Sun is 864000 miles in diameter. This diameter in ancient planetary harmonics is a wave length. This wave length is also a frequency of the speed of light.

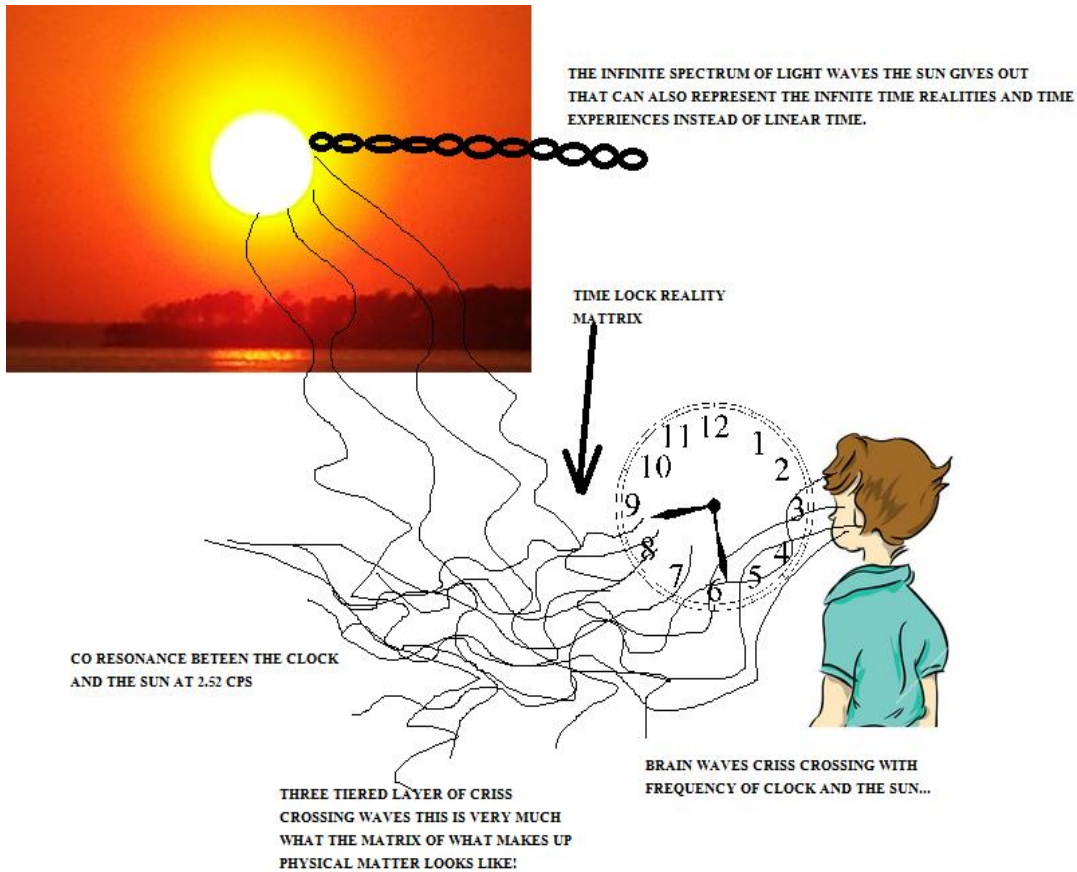

Speed of light                      Diameter of the sun  
(299,792,458 divided by 139,046,976 meters diameter of the sun = 2.156051 cycles per second)

Our brain waves resonate with this frequency through time as we focus on the clock and it was even more so

in ancient times when they used the Sun dial.

What most people have never even thought of is that before the Sun dial time did not exist. There was no consciousness giving things order or a linear existence. All Consciousness was free from observing a set time reality. Consciousness was going to past and future events as we would call it. There was no time. Without consciousness observing and interfacing brain waves with a potential of reality; reality cannot exist.

The picture on the next page illustrates the matrix of time and this model is also a universal model for how the participation of consciousness creates the physical(world).

Thomas Edison and Einstein both said: “Brain waves are just like radio waves and when properly focused can affect physical matter and even other people’s behavior.”

If brain waves can affect physical matter then they can also effect time. Time Travel is possible through the power of the mind. Einstein also said that time, matter, and energy are all the same thing. So if brain waves can affect Matter they can effect Time as well. Much more about this will be covered in this Notebook.

The Moon is a heavy hitter when it comes to a force on this Earth. It affects tides, gravity, magnetic fields and how many negative ions are in the atmosphere.

Gravity is the most powerful force on the planet and the moon effects gravity and in turn affects the tides.

The Moon has a diameter of 216000 miles long.

$36 \times 6 = 216$  and 36 is directly connected to 666 in that if you go  $1+1=2$   $2+2=4$   $3+4=7$   $4+7=11$  all the way up to 36 you end up with the final answer being 666.

Shakespeare is coded esoteric knowledge with very a Christian background. Actually Shakespeare plays quote the Elizabethan Bible thousands of times.

In quoting when romeo is looking at Juliet. “Oh arise fair sun and kill the envious moon who is sick and pale with grief and non but fools do wear her.”

Christ in Hebrew comes out to a gematria number of 888. In gematria each letter in the Hebrew alphabet has a number. Christ written in Hebrew comes out to be 888.

The moon is 216000 miles long. I knew there must be a code to breaking the moon so I plugged many

numbers. I found that 888 holds the key.

(888 divided by 216 = 4.11111111) the ones going on forever; this is an infinite number. Remember in the old days back in the 90's you would dial 411.

Information please! What name or business are you looking for.

There is a reason why in modern human history we know 411 as information. It is because in secret societies and esoteric knowledge circles they knew about this and transmitting information to the brain/mind of humanity.

Remember Thomas Edison said: "Brain waves are just like Radio waves and when properly focused can affect physical matter and even people's behavior."

Now I give more information about the moon. When Nasa brought back moon rocks they did an analysis. Everything the moon consists of on the surface is what you would make a space ship out of on top for the spaceship to be able to withstand blows and bombardments from other space objects. Hard metals and sophisticated metallurgy is what the moon is made out of.

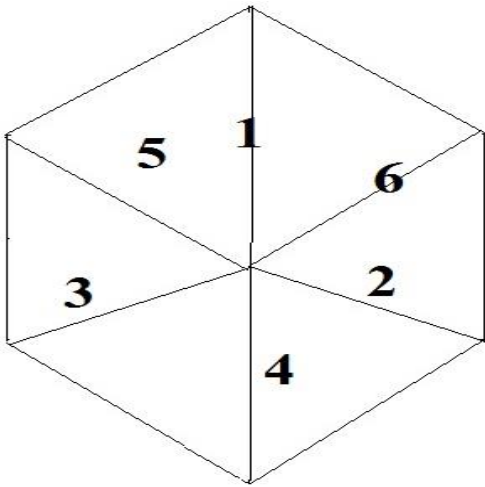

Ding ding! The moon is not natural. The moon is an ancient artificially made whatcha ma call it. I say whatcha ma call it cause we cannot be certain what it is. Except when we do the math with the bible on the moon it shows us it's a giant antenna.

David Ike Author of many books and whistle blower of many secrets of the matrix of earth said: "That the moon is a giant antenna and is transmitting information onto the magnetic grid of the earth from Saturn."

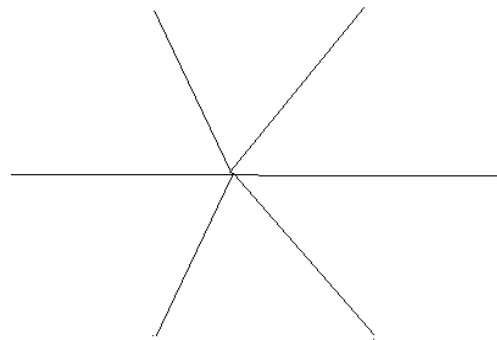

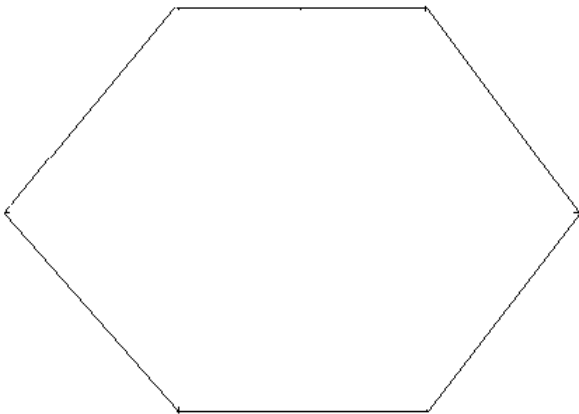

I have also found out that from various sources of ancient and modern data that the Ancients of Earth worshiped Saturn. Saturn has a six sided hexagon on each of its poles. Interesting 666!

So the ancients built architecture, technology, time, society, measure all around Saturn. This type of box 666 3<sup>rd</sup> dimensional consciousness got downloaded into the grid and mass consciousness of humanity a very long time ago.

So a box has six sides.

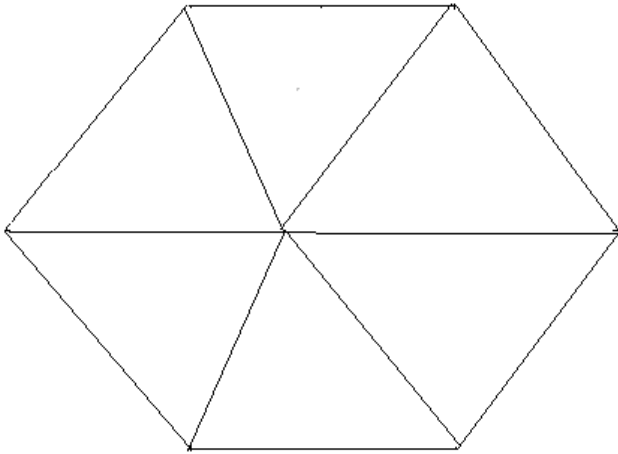

A hexagram has 6 sides or lines

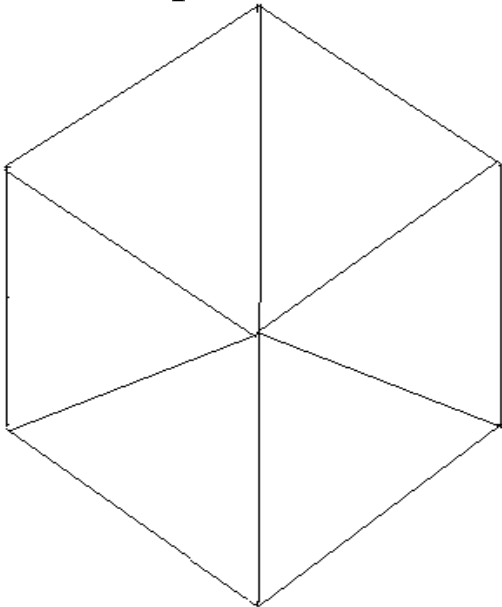

Combine the two sixes of Hexagrams together and you

get a box.

Turn the picture around for a better look.

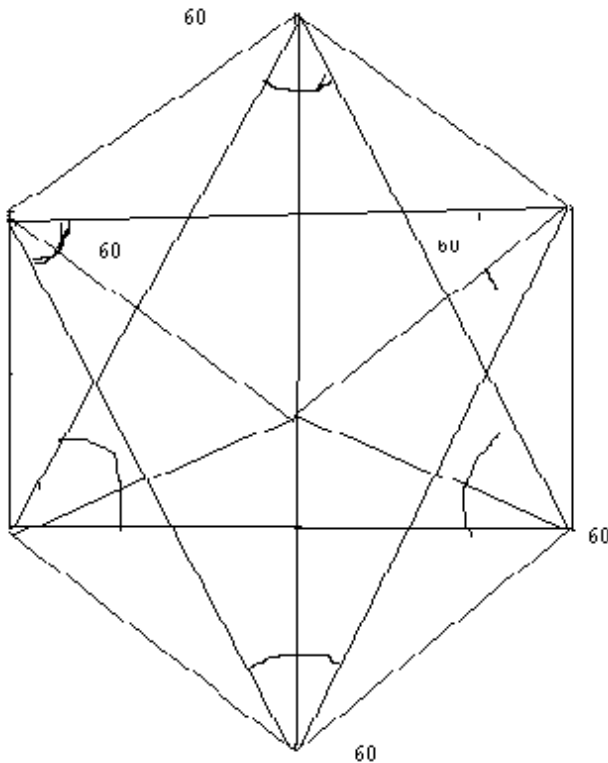

This proves that a box is 666

If a box has all equal lines then only an equilateral triangle will fit perfectly in the box. A triangle with equal lines has 60 degree angles. In numerology the

study of the meanings of number 0 is the creative number.

This is a perfect geometry model of the physical world according to numerology, geometry, and the Kabbalah. In this case they all coincide and agree.

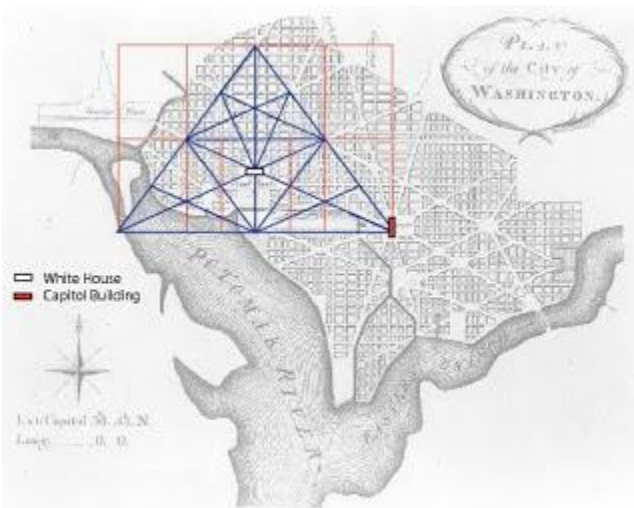

So this very limited reality that has been downloaded into us in a large part by the moon is 666 three score and 6.

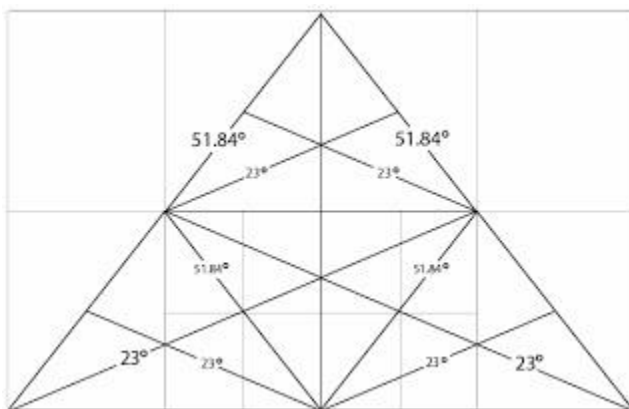

The moon is an antenna of sophisticated waves of energy made by ancient technology on Saturn and on the moon. The ancients worshiped Saturn and there by

created this whole show of limited reality of 666.

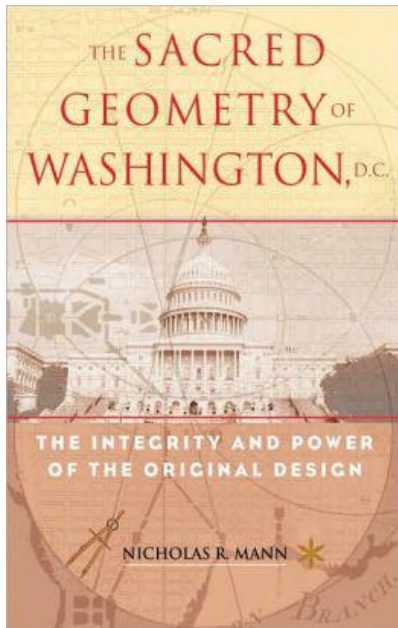

Did you know that they have been doing it in modern day too. Here I give a few examples of architecture that is in sacred geometry and lined up with stars. Washington D.C. is rich with this!

That's right the outlined portion of Washington DC has the geometry matrix of the great pyramid of Egypt.

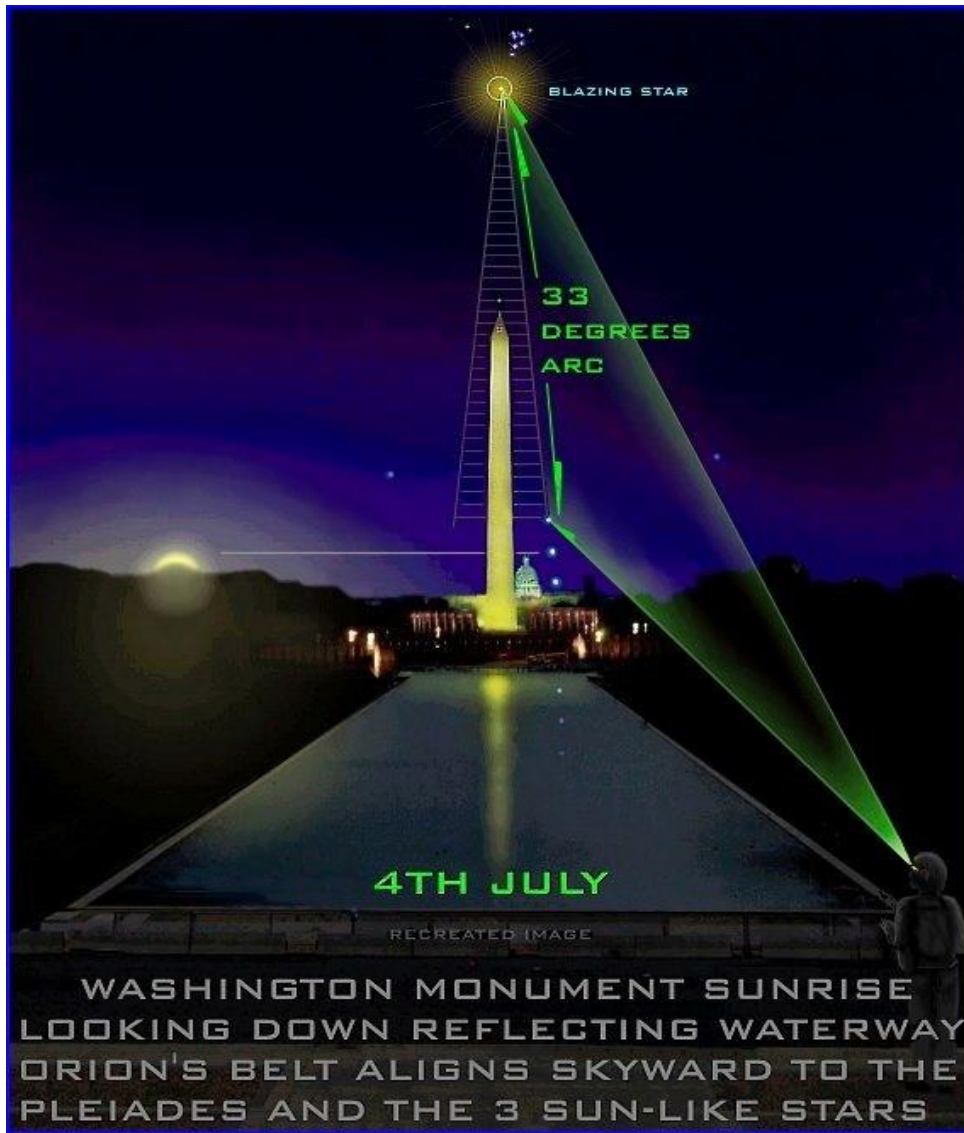

There is an entire book written about the Sacred Geometry of Washington D.C.

The Washington Monument downloads the magnetic field and light of Pleiades star cluster and Orions belt into the magnetic grid. The monument downloads this on earth at 33 degrees spiral of energy of light. For more information read on into the Earth gate. Downloading Washington DC with direct Gate to Heaven energy!

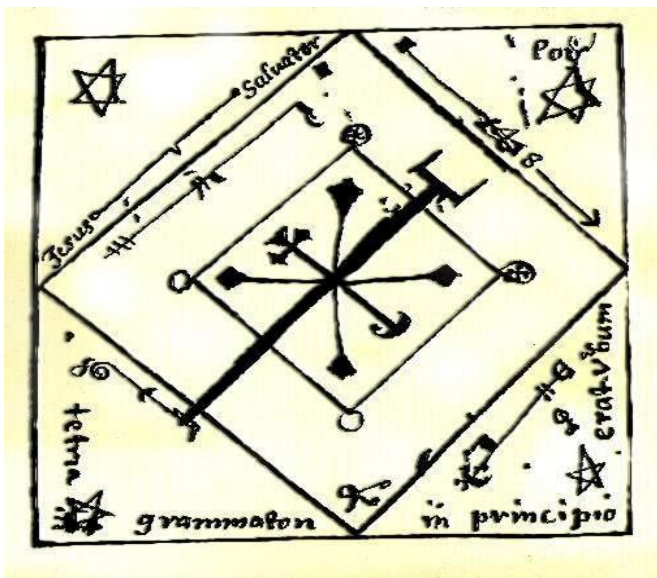

We see part of the ancient Seal of Solomon, The Solomon key, Vatican city and the ancient Lalibela Cross. All symbols of Orion's belt and Pleiades lined up.

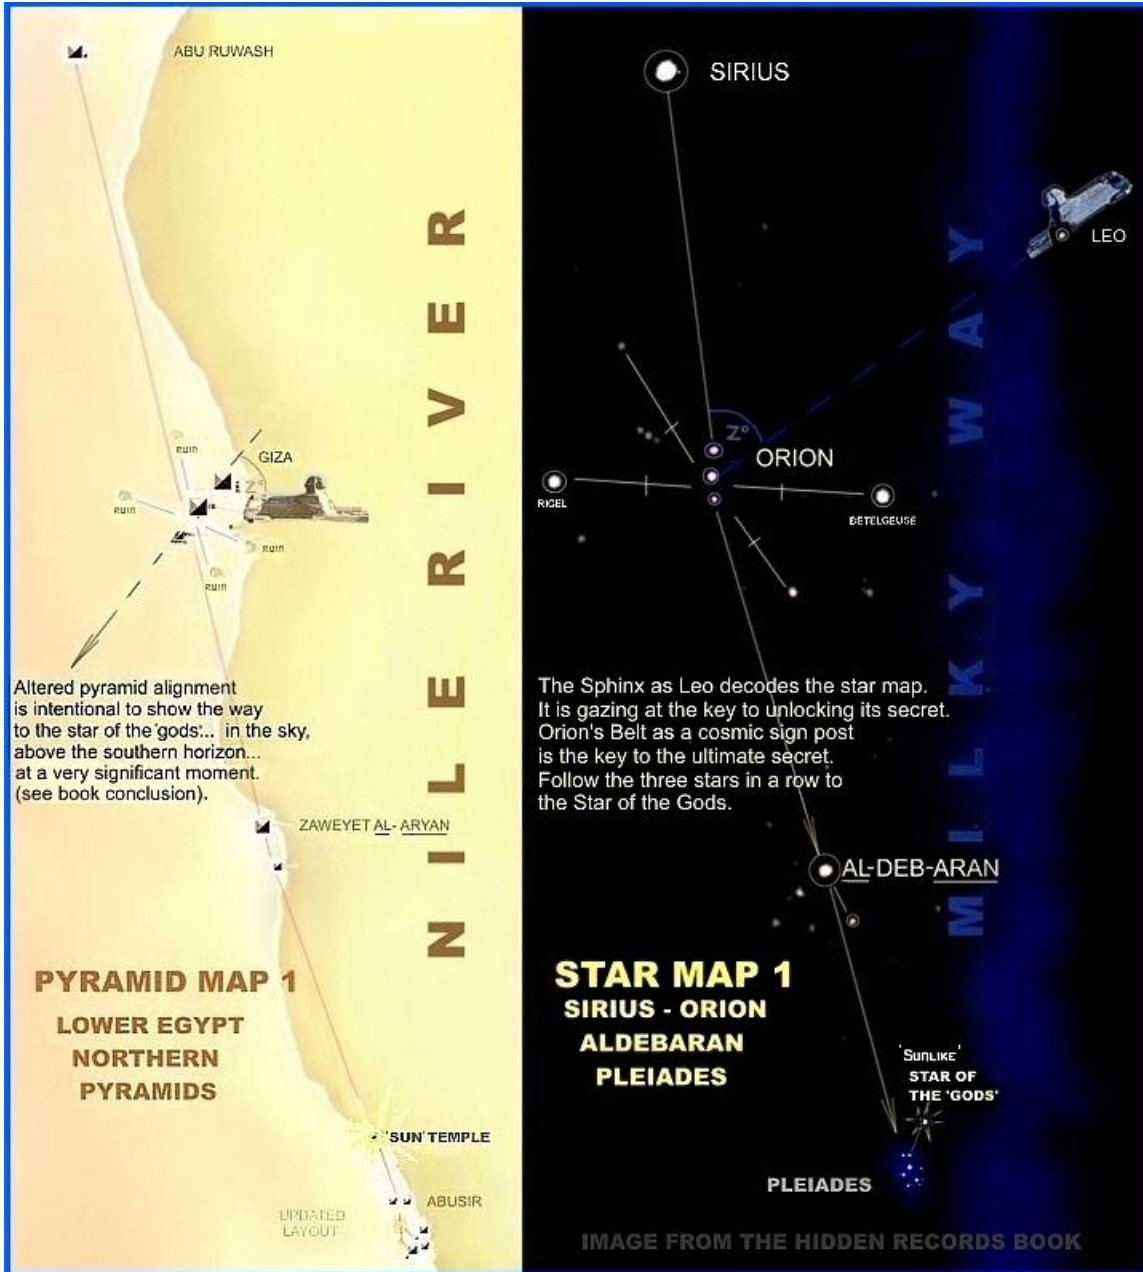

Here is from the ancient script of the seal of Solomon.

Yes The vatican is built as the key to heaven!

Looking at the map of Egypt above you see the alignment of the stars with the Gate to Heaven.

This is a kind secret Technology. The stars, sun, moon, and earth with the architecture download specific patterns, programs, beliefs, thoughts, and core flows

into the magnetic field. These patterns and programs are designed to influence the reality of humanity. This type of technology has remained secret by the architects of this limited reality for a very long time now.

Our brains work upon the energy of electromagnetic impulses. These monuments of stone henge, Washington DC, the Vatican, and the pyramids are major things in human history. These major structures in human history are in the mass consciousness.

These archetypes in mass consciousness have been programmed to download specific programs into the grid. This is definitely programming the unconscious mind of the masses.

So the question is now that we know what do you want to do? Do you want to stay in limited reality you have been fed your whole life? Or do you want to experiment and find out what is possible?

I could show you hundreds of pictures about this but there is not enough space in this book. All the pictures of Stonehenge, monuments and history around the world of the locking gate to heaven are very numerous.

Okay so now some of you are probably buzzing about this and getting very excited. Lets get you grounded more to eternal life reality.

1. If you believe in the Judeo Christian God then you believe God is all powerful, all loving, perfect, and everywhere present.

This means there is a perfect absolute power and love everywhere all the time.

I have gone through these gates myself. These gates remove from your consciousness the downloaded reality from the magnetic grid of the earth. The locks of limitation and suffering are broken. These gates also do so much more. But it is best to experience it for yourself.

What I also mean is that our brains work upon electromagnetic energy called electromagnetic impulses. The gravity field of the earth is much bigger than most of us realize!

Astrology is really the study of magnetic fields of Earth, Sun, planets, and stars; with they affect the brain, and in turn affect human behavior.

The many hundreds of architectures, rituals, and beliefs that have downloaded into the earth to affect humanity, is too numerous for this book.

So in conclusion when going through these gates it like unlocking something inside the complete energy structure and consciousness of your being. You are going to a new place inside and outside of yourself.

So this is from the false God that messed with our Ancient Ancestors who were pure beings and then changed us to slaves. Ie the serpent in the garden with the forbidden fruit of genetic manipulation.

In conclusion I found the “Orion’s Belt and Pleiades syndrome” of the modern, middle age, and ancient history of humanity. I believe that an event happened that was a major part of what influenced humanity in connection to Orion’s Belt. Many people believe anciently that Orion’s Belt is the gate to Heaven. I do not know if this is the truth for certain.

The beings who came from Orion’s Belt might be the false God that messed with our Ancient Ancestors. Our Ancestors were pure beings and then changed us to slaves. Ie the serpent in the garden with the forbidden fruit of genetic manipulation.

Upon reading ancient texts The Gods or God anciently who created humanity genetically designed us to be slaves. This was so we would mine gold for them so they could live thousands of years. They can live thousands of years from making the bread of life and the elixir of life from the gold.

So I have only given gates that will crack the magnetic field downloads and remove them. The codes(gates) are directly from the Bible. The rest is up for the individual to decide.

Another explanation of these gates is: Ancients and modern architects built things on earth with sacred measure, and geometry. The sacred measure geometry is in alignment and resonance with the stars, to influence a very limited reality on earth. This design is to lock us all here into very limited reality.

They used written script with the stone before even building. This programmed the stone to put into the magnetic grid even more what they intended.

The symbols and stars are in the mass consciousness of man as well. So this programs the mass consciousness of humanity is at the archetypal unconscious mind level as well as at the electromagnetic level.

Let us even surmise that when the heart feels that something should be or is; but does not see it in reality; it does exist. The eyes and senses don't experience it; because the magnetic fields to experience it don't exist for that person cause of the matrix that has been built.

That matrix is locking that out of the magnetic fields. Transparent reality archetypes like the sun and the clock keep your consciousness locked out of many things every day. Something you can't see could exist right in front of you that you have never seen before. You are unable to see it at this time cause of where your consciousness is locked into. Your consciousness locked because of the transparent reality archetypes such as the clock.

Hence those who carefully have read up to this point will see the subtle, and yet very powerful influence of this artificial hidden influence in plain site. You will also be amazed at the manipulation upon humanity.

The 7 gates in the bible code unlock you from these influences and open you to more.

The first real gate to start with is Earth. We start at the lowest point and go up.

## Part 1

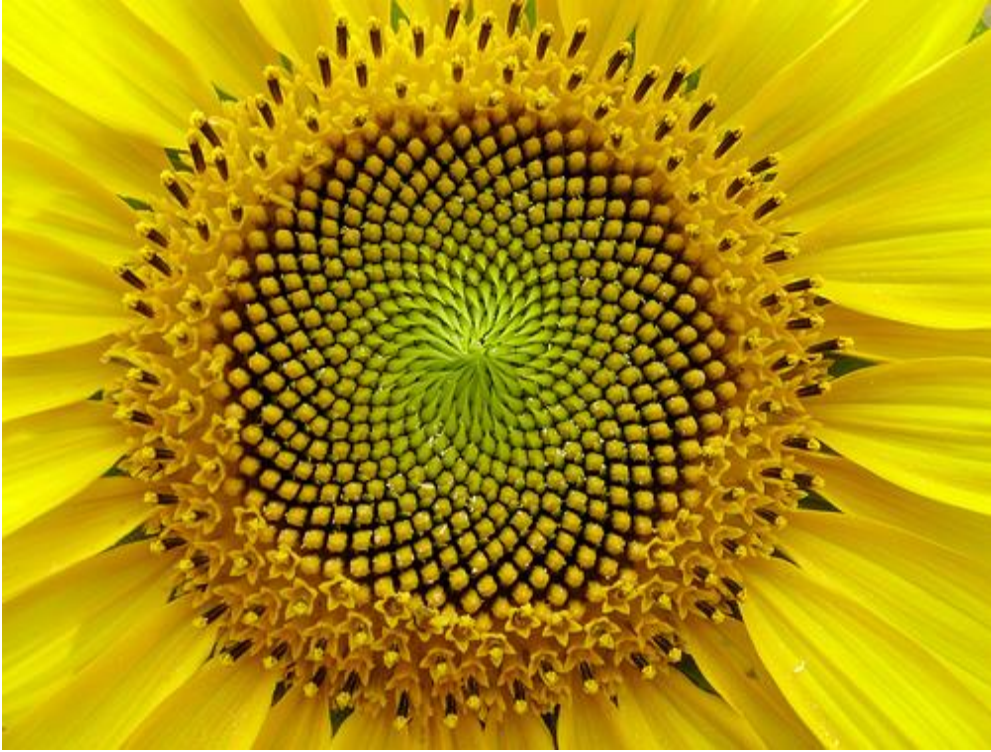

(Average Diameter of the earth is 7926 miles divided by “In Christ shall all be made alive”  $5494 = 144$ )

Check the book “Antigravity and the World Grid by David Hatcher Childress”. In the back of the book it gives numbers and harmonics of the world magnetic grid. Harmonics comes out to 144 with the math that you can do in the back of the book.

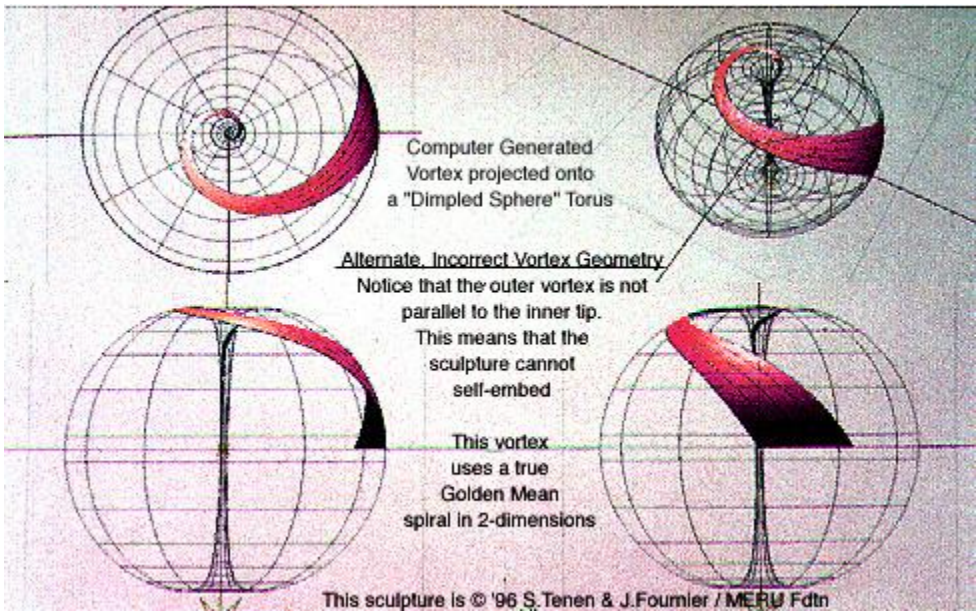

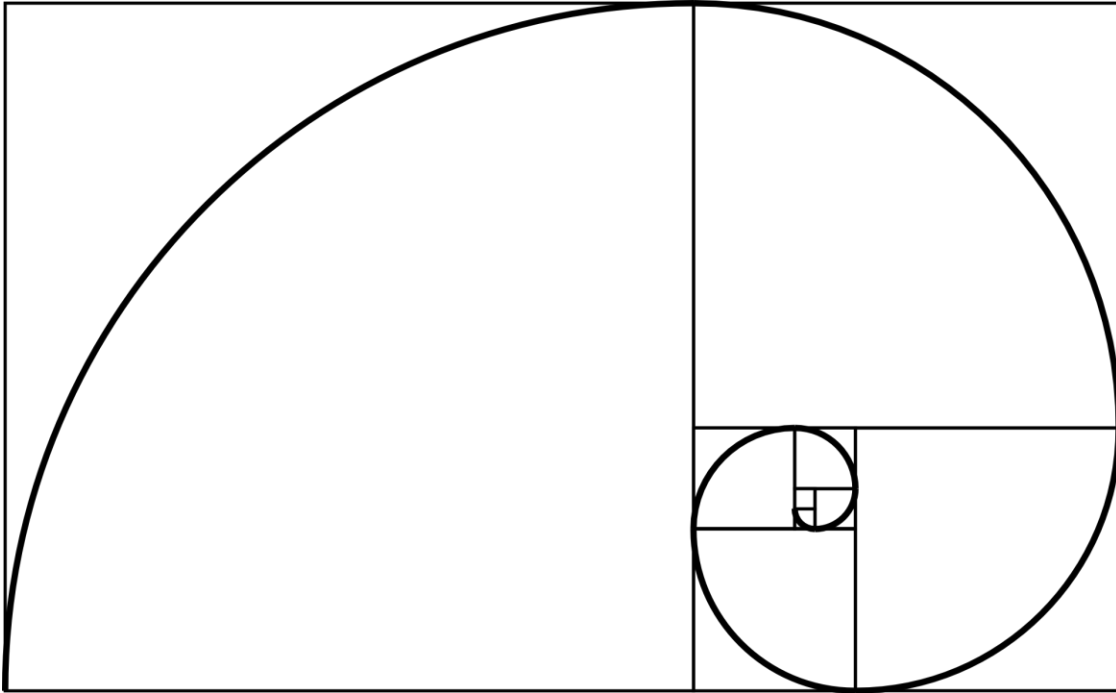

(Average Circumference of the earth is abt 12800 miles divided that by Christ in Hebrew  $888 = 144$ )

In Christ shall all be made alive divided by 888  
( $5494$  divided  $888 = 618$  the golden mean spiral and Fibonacci sequence)

A pyramid emits the 144,000 harmonic. The 144,000 harmonic is thee harmonic of light. The golden mean spiral is the spiral and ratio upon which all living things grow.

So as I studied the numbers in the Bible Code and geometry in relation to the earth. I came up with a full color mathematical, and geometry graphic of the 1<sup>st</sup> gate.

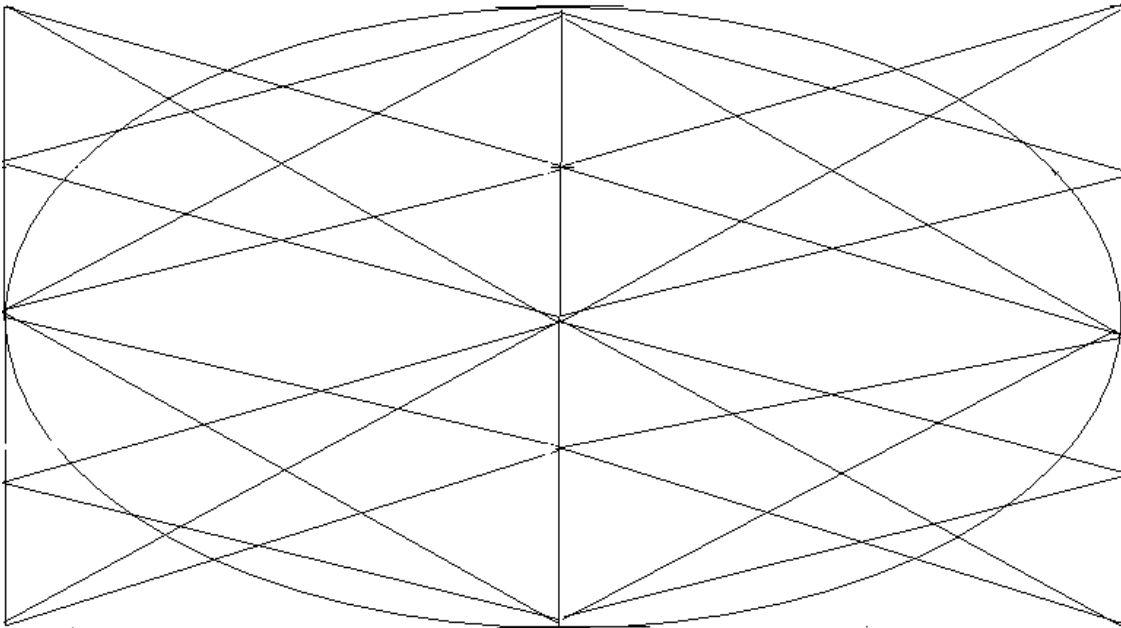

Visualize behind your heart this picture. Then look around you where you are. Visualize where you are right now behind your heart.

Take another look at where you are right now on earth, in your life, in your world. Take a look at the circumstances, events, situations, reality, and world you live in. Own that behind your heart and add the numbers to the visualization 5494 888888 1618 144.

However much as the matrix programs are interlacing

with your consciousness. In other words however much your energy and you are tied to the matrix is the level of need you have for these gates. You can unlace and unweave yourself from these things.

The picture below is a geometry model of the magnetic lines of force on the earth. This model is based on lines that are 5494 long and 888 wide to make pyramidal shapes of the higher magnetic grid of the earth.

5494 = in christ all shall be made alive

888 = christ in hebrew

7926 miles diameter of the earth divided by 5494 = 144

12800 length of pyramid sepheratic structure divided by 888 = 144

Visualize this behind your heart and focus that visualization there for 5 minutes or more. This is the

first gate to moving beyond the illusions of this world and all its created limitations.

Hold these pictures in mind, emotion, and intent; behind your heart. Things will open for you. You will experience things and feel things, and think things; you were never able to before.

Everything is mind, everything is electromagnetic fields and how the brain picks up on them. This makes up our reality.

The picture of the earth together with the numbers creates a left and right brain experience. Visualizing the picture together as a whole with the earth and the numbers creates a whole right and left brain experience. This enables you to move past the matrix programming that has been downloaded into the magnetic field.

Magnetic fields actually hold the potential of infinite possibilities; these programs can be bypassed. It is the architects of the imprisoning matrix through history who have made archetypal buildings. These Buildings include the Pyramids, Stonehenge, the Vatican, and Washington DC. These things are made known in the mass consciousness of man through history.

Since these things are in the mass consciousness and built as a 3D computer program. These programs in the matrix have no power unless our consciousness is crisscrossing with them.

But these programs are part of our unconscious mind programming because these buildings are also archetypes. Our consciousness/energy crisscrossing with these programs of reality are the prime builders of experiencing 3D. They are also the prime builders of linear space, time, matter and energy.

When you unlock your unconscious, subconscious programming from these things then you can focus on the other reality and other possibilities.

Hence you being where you are right now, and living the life that your living right now has to do with programs, patterns, beliefs, perceptions that you have locked onto as a transparent reality. The Bible Codes unlocks you from the prime locks that all humanity has.

Next gate is the Moon gate. The Moon is more complex than all the other gates. It is artificial ancient made huge antenna putting information into the grid.

The Moon gate moves you beyond the illusions of space. The Sun gate moves you beyond the illusions of time.

The moon has a diameter of 216,000 miles long.

(Christ divided by Moon = Matrix Information  
888 divided by 216 = 4.1111111111)

(Moon divided by Christ = infinite number 243  
216 divided 888 = 0.243243243243243243243)

Infinite number from Moon x Matrix information =  
the universal eternal number

(2432432432432432432 x 4.11111111 = 99999999  
999999 is the number of eternity in numerology if you  
times and divide sacred numbers in the bible code by  
99999 you get eternal numbers that go on forever like  
243243243243 or 144144144144144144)

(216 x 4.11111111 = 888)

(288 divided by 216 = 1.33333333333333)

(5494 divided by 1.33333333333333 = 412 almost 411)

So the coded numbers to break the limiting program of the moon look something like this.

99999                      5494    888 1618  
99999  
1.33333333              288    4.1111111  
1.333333

Next is the Sun.

The Sun is time. The Moon is space. 86400 seconds in a day and the Sun's diameter is 864,000 miles long.

(The Son of God in Hebrew if broken down into a number = 2442

2442 divided by pi the ratio of a circle 3.14 = 777

864 divided by 777 = 1111)

(Circumference of the sun is Divided by 2442 = 1111)

So you come up with the graphic below for the Sun and the Moon together as one body to put your consciousness beyond time and space.

Don't worry about visualizing all the numbers or any part of the picture. Just visualize the whole picture as a whole together behind your heart and hold that intent

and focus there for at least 7 minutes.

The Sun and Moon gate picture when focused upon in the heart will take your energy and consciousness beyond space and time.

The Next Gate is Pleiades

It took much searching to find out the codes for Pleiades but it seemed to come together. I found out that in secret esoteric knowledge one of the stars in Pleiades was the wishing star. If you connect your intent directly to it would come true. This has to do with the fact that it has the highest gravity and most dense mass of all the solar systems. So in spiritual sciences the greater potential of gravity sucks the energy of thought into manifestation quicker with this

universe.

So I went to work to find the wishing numbers. It came out that the number to bring things into being. To make intents, prayers, thoughts, wishes come into being is 3840.

I confirmed this number in the kabbalah and from various articles that were specifically on the number. Saying this is the prayer fulfilling number.

Also I did lots of meditation focusing on Pleiades. I knew what the energy felt like when you went through the gate before. I knew from the previous three gates I had already cracked. A number came into my mind. 79012329876544. I played with this number and found that it is 8888888 squared.

This made sense to me, since the universe makes all things in similar form and pattern. But Pleiades is far denser and greater gravity than all other star systems. So the numbers are greater and squared.

(30184036 = 5494 squared, 888 and 5494 are codes in the bible for Christ, and In Christ all shall be made alive, and if you divide the number by each other they equal .618 the golden mean ratio.)

Christ squared  
(888 squared = 78854)

(Christ squared divided by harmonic of light squared  
= part of the prayer number  
78854 divided by 144 squared = 38)

(Light squared divided by prayer number = 796243  
144squared divided by 3840 =796243)

64 spirals of force I ching  
(796243 divided by 64 = 124416 )

(124416 is a sacred measure by which 60 hz AC  
creates a harmonic of 144 squared.)

(144 squared = 20736 = light squared harmonic)

(Sacred measure divided 60 hz AC=lightx2 harmonic)

(1244160 measure divided by 60 hz = 20736  
harmonic)

(864 sun diameter times 144 = 1244160)

(124416 multiplied by 0.2 = 24883.2 the Canonical  
Earth mean, likewise the Canonical Moon  
circumference of 35831808 ÷ 124416 = 288)

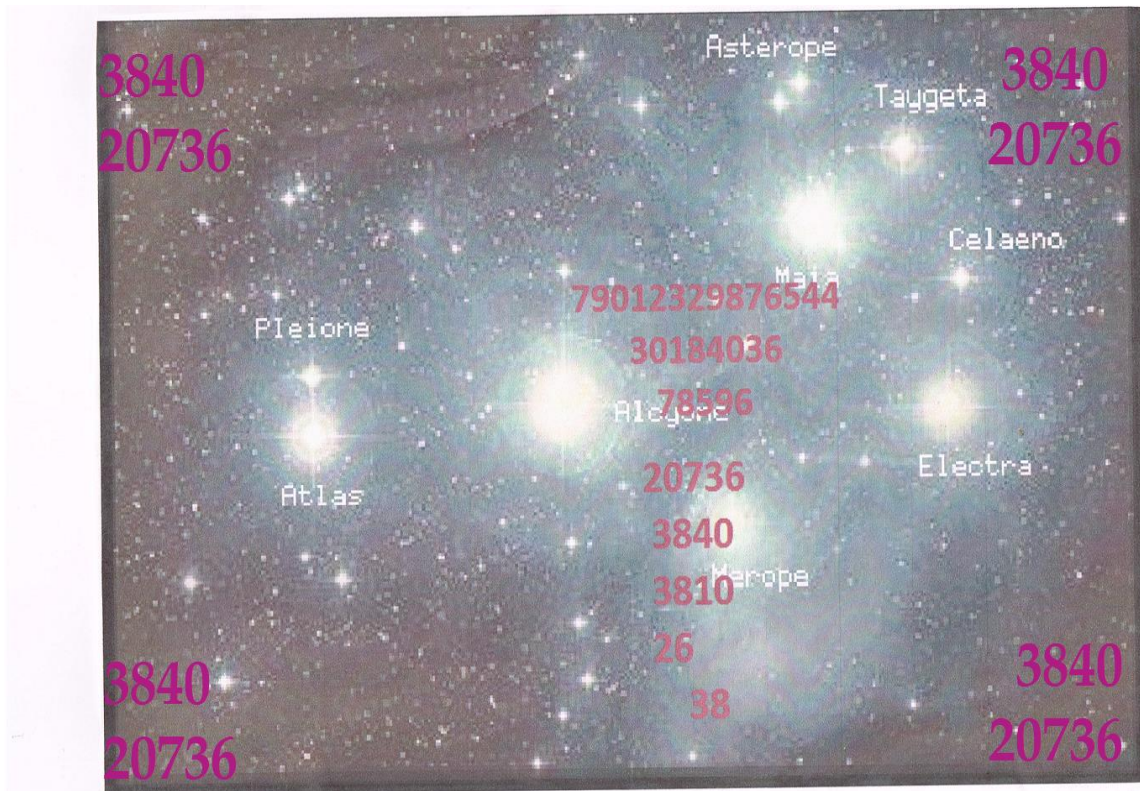

(288 is one of the major moon gate numbers.)

After much thought; I put together two different codes for the Pleiades gate. One code is the heavy gravity code and the other is more for passing through it all to higher dimensions.

I am including both because I feel both are important for different reasons.

This first one is attuning to Pleiades as it is and starting to pass through the gate. The heavy gravity numbers are there.

Visualize this behind the heart for several minutes.

With this version finish passing through the gate.  
 Leaving most of the heavy stuff behind; this version is  
 a step through.

Visualize this picture behind the heart for several minutes.

The picture above completes going through Pleiades.

Orion's Belt seems to be the most imprinted upon mass consciousness. The Land of Kemet known as Egypt is all aligned with Orion's belt. Orion's belt is known as the gate to heaven in legend and in gematria. The phrase "gate to heaven" has numbers that are similar to the numbers of Orion's Belt.

I don't believe any of the legends or the mystical associations. I know that the ancients have aligned their rituals, architecture, temples, and altars with

Orion's belt. They did it in a very specific way as to draw upon its energy. The ancient buildings were made out of granite or specifically made materials that would conduct the energies. These energies are energies such as a magnetic field. These materials were programmed before even building commenced to channel Orion's constellation energy.

I believe either ignorantly or knowingly they were creating a very limited reality with the programs they input into the connection between earth and Orion's belt energy.

After I fully cracked Pleiades I had dreams and visions of Angels and even heard angels singing to me. The Angels gave me three numbers to work with in Orion's Belt.

233 and 417 I checked out what these two numbers mean in gematria.

Number 233 is a message from your angels and the Ascended Masters that they are with you, guiding and assisting you along your Divine life path. They ask you to maintain a positive attitude, positive thoughts and expectations in regards to the direction of your life. Have faith and trust that your present course is the right one for you and is in-line with your soul

mission and life purpose. Stay strong in your convictions and listen to your intuition and inner-wisdom.

In Hebrew gematria words that equal 233 are: first born, remember, elders, cherubim, lights.

In Hebrew gematria words that equal 417 are: good, consent, swear as in to Swear an Oath.

Number 417 is a message that your positive affirmations and prayers have manifested your rewards, dreams and desires. Trust that you are on the right path in your life and accept your blessings with grace and gratitude.

Angel Number 417 encourages you to shine your Divine light and love upon the Earth and all of its inhabitants. Use your personal skills, interests, passions and wisdom for the betterment of yourself and others. The angels are with you to smooth your path so that you are free to shine your light.

I meditated upon these numbers and then asked the angels what other numbers I need to work with. I went through a long list of sacred numbers and the angels directed me to a number I had never seen before. The

number the Angels directed me to was 524288.

This is part of a ratio. 524288 is a ratio of octaves and tuning frequencies for musical notes. This universal ratio of frequency, sound is called The Pythagorean Comma. The two numbers 531441 and 524288 are exactly 7743 apart from each other. I had seen the number 774 all across the board in every part of the gematria of Orion's belt. I knew I was on the right track. I had also seen 446 come up many times too.

Now I had enough numbers together where I saw a definite pattern forming to break the Orion's gate code.

I started plugging numbers of times, divide, and transposing simple equations.

I found another gate in the sun while doing these codes which I will reveal at another time.

“The Bride of Christ” comes out to several different numbers depending on how you do the gematria. It came out with 446 and 774 but if done another way comes out with 136. I remembered seeing this. The pattern was emerging further. “Pineal Portal comes out to be 139 but also has the 446 and 774 too.

(524288 and divided it by 136 = 3855)

This was very close to 3840.

(524288 divided by 3840 equals 136.5333)

(531441 divided by 3840 equals 138.4 close to 139)

So I found the 136 Bride of Christ and 139 Pineal Portal; connections to the other numbers.

I still felt some things were missing; still looking for 417 and 233 connection.

(524288 x 446 = 233.83 )

I needed to know what number made 233

So  $524288/x = 233$

I found x

( $X = 233/524288 = 4444$ )

It is well known in gematria and many circles 4444 is the gematria of the angels.

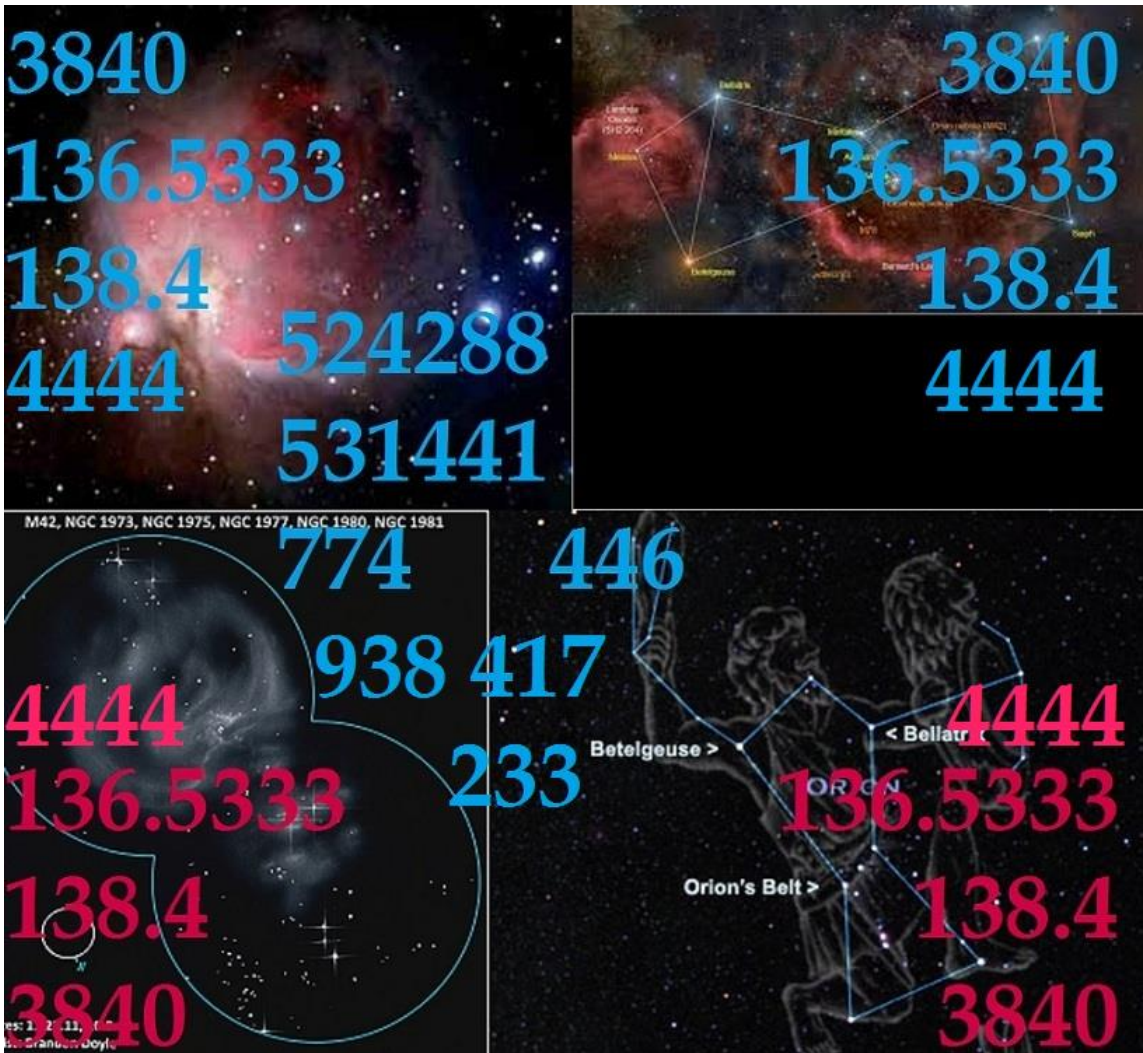

So I found my 233 now I just needed to find 417 connection.

(417 divided by 938 = 4444)

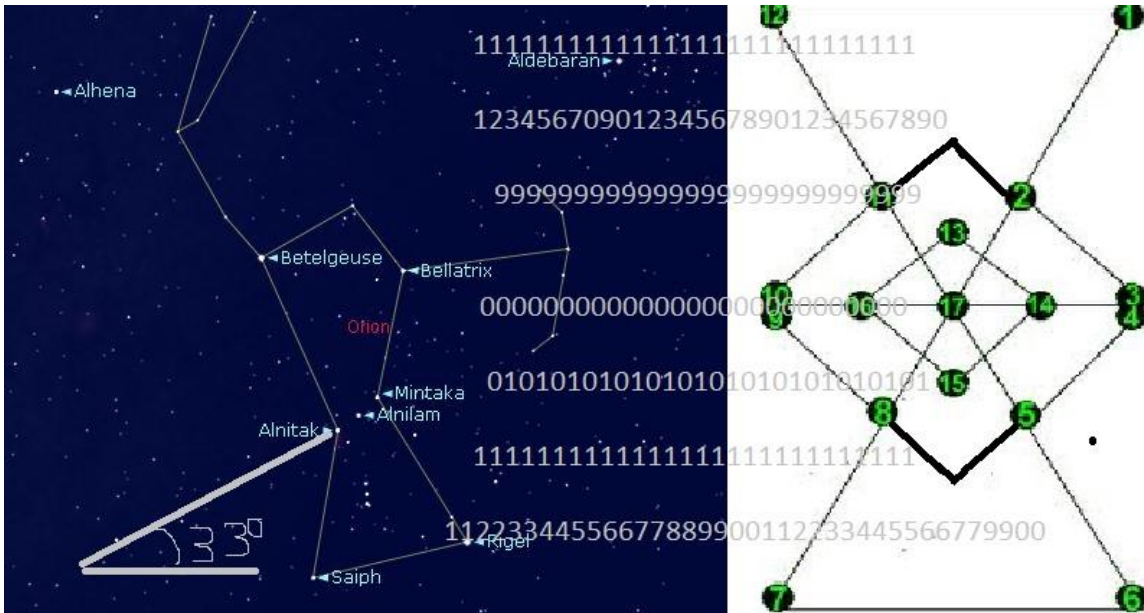

Also the number 94 works too..

Hebrew words phrases = 938 is: gifts, overcome,  
merciful, opens, would defeat all his enemies

From all the math and patterns I put together the  
Orion's Constellation nebula and belt gates.

To Break down Orions Belt at other levels I came up with a binary code for Orion's belt. So here is the second version of Orion's belt.

## Part 3

### The Gate To Heaven Practice

#### Foundational Practice #1

Take anything in your life that you want to change. Visualize the circumstances, events, situations as they are now. Feel it, what is your relationship to it. Do not resist it. You must empathically feel the whole situation as if you are the situation. Own every choice, decision, action, of the thing you want to change; the very thing its self.

Look at how you identify with your self in relation to

the situation, and how you identify with the situation and the world. Own it as if you are God and you created the whole thing.

God has complete power over his creations. Once you are at one with it, completely aware of it, and owning the situation; you can change it.

Practice this exercise in the heart first, Then the mind, and then the gut.

Make sure once you own the thing its self you put forth your intent, energy, will, heart, and mind to change it for the better and watch what happens.

When I say heart, mind, and will I literally mean working with the heart area feeling in the body, the feeling thoughts in the head, and the gut/stomach where the will power is.

Two inches below the belly button, the solar plexus, the heart, and the point between your eyes, these are power centers. Focus on these points when doing the exercise.

This exercise is very important in the gate to heaven practice. Cause these gates are designed to unlock you from limited reality and all limitations. But it will only

do it as much as you can tie your existence to them. To tie your entire existence to these gates and remove all limitations you must own your existence.

For The Earth Gate visualize it first in the heart. Next visualize the Earth gate in the tail bone, knees, and ankles. Pause the video and do this now.

Now look around where you are right now. Visualize the numbers of the gate all around you. Take that visualization behind the heart, tail bone, knees, and ankles.

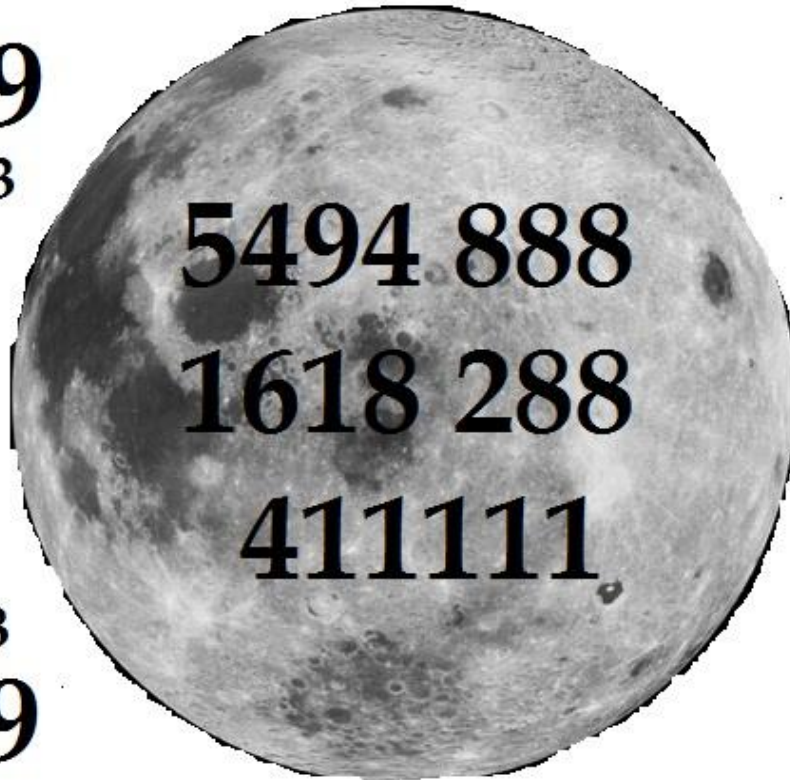

Finally look around you where you are right now.  
Practice the first exercise of owning your existence.  
Put the earth gate over that and let your entire being,  
and existence pass through the gate.

Practice the owning your existence exercise again for  
the heart, tail bone, knees, and ankles. Own your  
existence and over lay the earth gate onto it.

For The Moon Gate visualize it first behind the heart.  
Next visualize the Sun Gate two inches below your  
belly button. Pause the video and do

The Silver Gate's number is Zero.

Visualize the Silver gate behind the heart and own your existence. Feel your self going through the zero point. Where the lines meet and create a plus sign or X in the picture is the zero point.

Visualize the Silver gate Between your eyes, and on the front top of your head. Own your existence and over lay that with the silver gate.

Visualize all the Constellations of the Silver gate crashing into the Sun, Earth, Moon Pleiades, Orions Constellation. All of them including the Silver gate becoming one body.

Golden gate behind the heart on top of head third eye

Visualize the Golden gate behind the heart and own your existence. Feel your self going through the zero point. Where the lines meet and create a plus sign or X in the picture is the zero point.

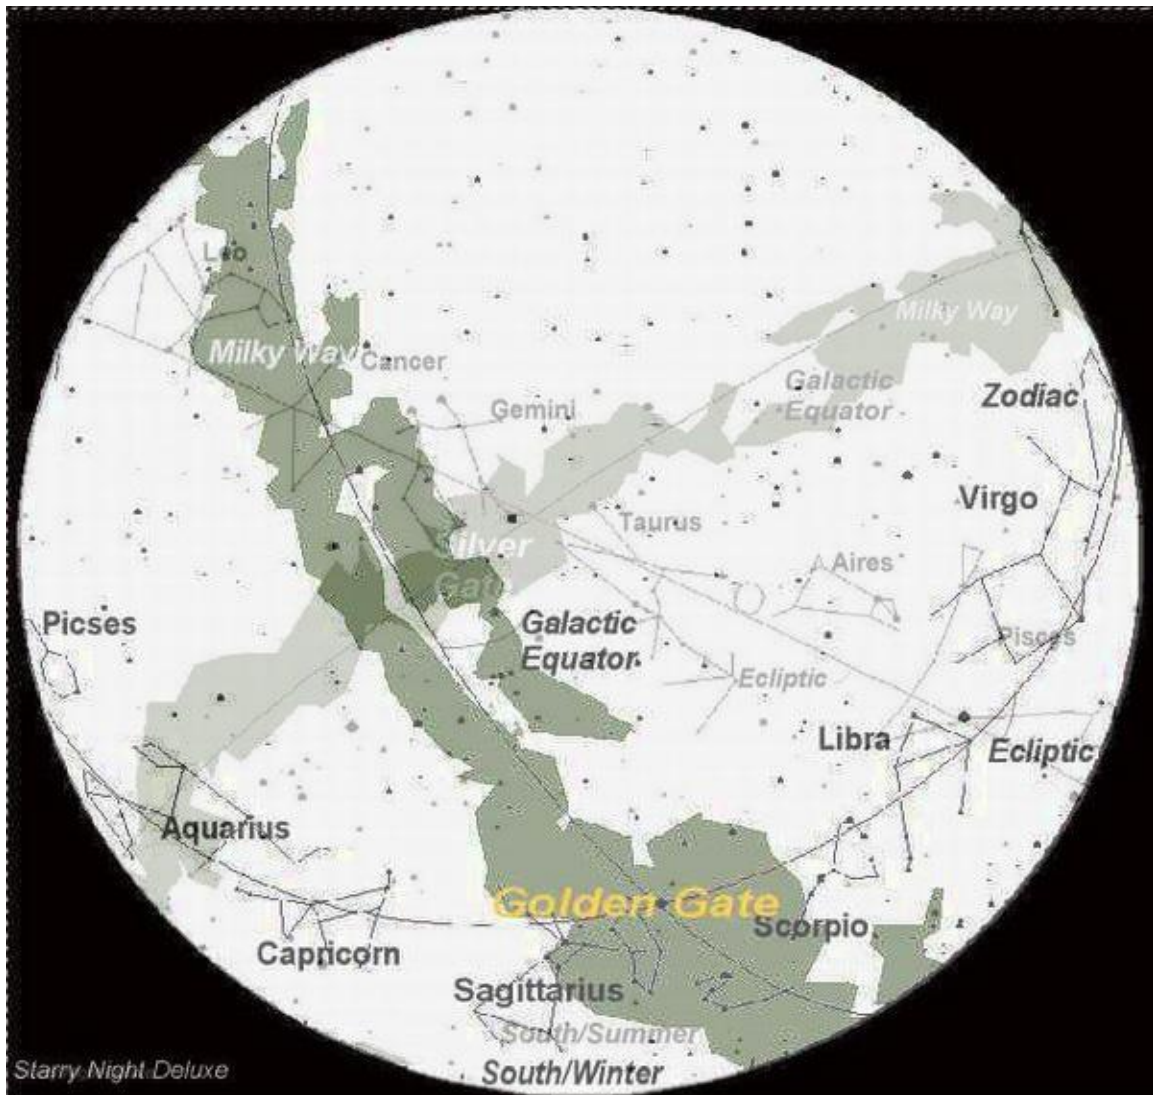

Visualize the Golden gate in the back of the head, and on the back top of your head. Own your existence and over lay that with the Golden Gate. Go through the zero point or where the lines meet together in the picture.

Visualize all the Constellations of the Silver gate

crashing into the Sun, Earth, Moon Pleiades, Orions Constellation. All of them including the Silver gate becoming one body. Put this visualization behind the heart first. Leave it there for as many minutes as you possibly can. Then Put this visualization in the Tail Bone several minutes. Do the same two inches below the belly button, then the solar plexus, heart again, throat, between the two eyes just above the bridge of the nose, top front of head, back front of head, back of the head.

The longer you hold each visualization in each spot of the body the better it is.

Talk about the connections to the thing its self and words, and that when words are broken down into numbers the numbers show their connection to each other to solve the puzzle. The speech and sound of something is to vibration ally reflect its essence. The letters in how it is spelled is connected to that sound. Each letter has a vibration, that vibration is similar in matching the letters number.

All these representational and symbolic systems help the mind to reach the thing its self in experience, consciousness, and learning.
