Introduction

This manual is intended to assist with downloading and installing Caravan Club 'Points of Interest' (POI) onto your TomTom Satellite Navigation device.

If you require further assistance with the installation of POI files to your device, or any other aspect of it, you should contact TomTom directly - visit <u>http://www.tomtom.com</u> or call **0845 161 0009**.

These instructions will work for all recent TomTom devices including: TomTom GO: 3 series, 5 series, 7 series, 9 series. TomTom Rider, Mobile, One, One XL, "T", Traffic, Cracker, Europe, Navigator and PDA (version 6 and above).

Step 1: Preparation

Checklist

Checklist of software and equipment needed:

- A PC running windows (ideally XP or Vista)
- TomTom device (fully charged or running from mains adapter)
- USB cable for connecting the TomTom to the PC
- Caravan Club POI files

Please note: This method of installing these POI files **does not** use TomTom HOME – it explains how to install the POI files directly to the TomTom device.

Storing the POIs on your PC

To make this installation easier you may wish to create a folder on your PC in a place that is easy to locate – the name of the folder is not important. You will need to locate the POI files during the process explained in this document.

Back-up your device

We suggest that you make a full backup of your TomTom before you commence loading POIs. This is a safety precaution and it means that, should any problems occur whilst you are installing POIs, you can always restore your device from the backup.

Landis Media Ltd has provided the basis of this user manual, and neither Landis Media or The Caravan Club will be liable for any damage or loss of data to any satellite navigation device.

Step 2: Preparing the POI data files

The POI files you require can be downloaded from The Caravan Club website, via the link below:

http://www.caravanclub.co.uk/satnav

You can download POIs for Caravan Club Sites and Caravan Club Certificated Locations. For each, you will need to download two separate files – one .OV2 file (containing the POI data) and one .BMP file (the icon which will appear on your TomTom device). Together, these two files are known as a set.

It is essential that both files in a set are titled the same for the TomTom to automatically load both files together. It will also be easier if both files are downloaded from The Club website to the same place – such as the folder mentioned on the previous page.

You should end up with a folder that looks similar to the one shown below:

Step 3: Loading the POIs

Connecting your device to the PC

Now that you have downloaded the POI sets from The Club website you can start.

Connect the TomTom to the PC using the USB cable and turn it on. If **TomTom HOME** starts you should close it as it won't be used. Click on **Start** then **My Computer**, a screen similar to the one below should appear:

The TomTom device (shown here as the red hands logo) will be the location to which items are copied.

Locate target folder on the TomTom

Now that you have identified the TomTom device you need to locate the map folder – this is where you will store the Caravan Club POIs.

Double click on the TomTom icon to open it and view the contents of the TomTom device. You should see a screen similar to the one shown below:

The map folder is the part of the TomTom that stores all your mapping data and POIs. Names for the map folder vary for each TomTom but the most common ones are shown below:

GB_plus_major_roads_of_WE United_Kingdom_and_Republic_of_Ireland Western_Europe GB_plus_major_roads_of_WE Great_Britain Navigator Map Great_britain_map Great_Britain-Map Great_britain_plus-map Western_Europe-map United_Kingdom_and_Republic_of_Ireland

Please note: The names shown above do not form a comprehensive list. The name of the map folder on your TomTom may differ.

You can confirm that you have the map folder by opening it and checking for two files - CLINE.DAT and POI.DAT. If these are in the folder you have the correct place to store your POIs.

Copying POI files to the TomTom

To copy your POIs make sure you have both the folder containing the downloaded POIs (as explained on Page 4) and the map folder of your TomTom (as explained on the previous page) open. You will need to copy the POIs from one file over to the other.

Firstly, in the folder containing the downloaded POIs, highlight all the files you wish to copy to your TomTom. You can do this by clicking on the bottom corner of the folder and dragging your mouse across until you cover all files or, to select all files, click on 'Edit' at the top of the screen then 'Select all'.

Once highlighted you need to 'Copy' all the files. You can do this by clicking the right mouse button over the highlighted files then selecting copy, or, by clicking on 'Edit' at the top of the screen then selecting 'Copy'.

You now need to 'Paste' the copied files into the TomTom's map folder. To do this go to the map folder and click into it with your right mouse button and select 'Paste'. Alternatively, you can click on 'Edit' at the top of the window showing the map folder and select 'Paste' from there.

Remember each POI "set" has to have both files and will not work properly without one or the other parts.

In the example below you can see the map folder now containing the copied POI files.

Completion

Loading of POIs to your TomTom device is now complete. You can turn off your TomTom device and unplug the USB cable from the TomTom and the PC.

Step 4: Activating the POIs

Before you can use the POIs on your TomTom device you will need to activate them.

From the main menu, selct 'Change preferences'. Now select 'Enable / Disable POIs' or 'Show POIs on map' – the option depends on your model. This will show you a POI list which should appear similar to the image below:

In the image you can see the files 'CClub Rel-1-0-tt' and 'CClubCL Rel-1-0-tt' – these are the files we imported in the steps outlined in this document. Turn your files on or off as you wish and you will now be able to view the selected POIs on your screen.

Please note: This operation will differ slightly on various TomTom devices but the procedure will be relatively similar to that outlined above. For further assistance with this you should consult your user manual or contact TomTom directly.

Summary & Data Updates

If you require further assistance with the installation of POI files to your device, or any other aspect of it, you should contact TomTom directly - visit <u>http://www.tomtom.com</u> or call **0845 161 0009**.

From time to time, The Club will update the POI files available through the website. We recommend that you return periodically to download the latest versions.

Disclaimer

The Caravan Club provides these files in good faith to assist members with navigation. The data provided to create these files was accurate to the best of The Club's knowledge at February 2008, and is representative of the Club sites and Certificated Location network at that time. The Caravan Club reserve the right to update the information contained in the files without notice, the source data being subject to regular changes and additions. The sites included in the information will be updated at the end of each year. The Caravan Club makes no, and expressly disclaims any, warranties, express or implied, regarding the correctness, accuracy, completeness, timeliness, and reliability of the text, graphics, data, links and any other items contained within the information.
