ELECTION OF DELEGATES TO THE CONVENTION TO BE SEPT. 6th.

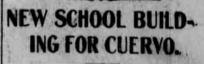

Date of Election Settled By Gov. William J. Mills, Chief Justice-William H. Pope and Secretary Nathan Jaffa.

The commission has set the date of September the 6th for the election of delegates to the constitutional convention and the convening of the constitutional convention will be October the 3.

The delegates have been apporttoned as follows: Bernallio county eight, Chaves lour, Colfax six, Curry two, Dona Ana four, Eddy two, Grant, four Gaubalupe four, Lincoln three, Luna one. Mc-Kinley one, Mora five, Otero three, Quay five, Rio Arriba six, Roosevelt three, Sandoval two, San Jaun two, San Miguel nine, Santa Fe five, Sierra two, Soccorro hve, Taos four, Torrance three, Union four and Valencia three, making a total of one hundred to be elected from the twenty-six counties.

Territorial Secretary Nathan Jaffa has sent to each of the fortysix states in the Union for copies of state constitutions for use by the New Mexico constitutional convention.

Work is now being done on the new annex to the state capitol and will be in readiness when the conventions meets October 3.

SHIKILLIMY PROFILE.

DEER IN A DRUG STORE The bull in a china shop was out-

The clearly cut profile of the rock shown in the accompanying illustra-tion is entirely the work of nature. a drug store. The deer, two years old The profile has been carved by the great artist from a perfectly solid face at least twelve feet high. It is to be seen on Blue hill, just opposite the town of Northumberland, Pa., across the West branch of the Susquehanna river. The hill on which it is located

has just sufficient curvature plainly to outline the profile against the sky thus making it easily recognizable

a drug store. The deer, two years old and weighing about 150 pounds, ran through the principal streets of the city, leaped through a prate-glass window in the store of Ennis' pharmacy, and then through a plate-glass mirror that stood across the main aisle in the store. The animal turned, retraced its steps, and leaped through the same opening in the window through which

it came. Cut and bleeding, the doe crossed Broadway to a place where improvements were being made. It leaped the boards in front, about five feet in height, and fell between the fron girders to the cellar, 12 feet below

Dr. Willet Kidd, assistant chief game protector, had the deer removed to a barn, where it will be kept until it recovers from its injuries, and then will be released. The deer made sad havoc in the drug store.

The deer is presumably the one that escaped death by the Empire States Express across the Hundson, swam the river to Bannerman's island, rested, and then came to the western shore.

TO HOLD MOISTURE SOME DRY FARMING FACTORS

More Harrowing and Less Water

Gives Best Results.

By Keeping Ground Free From Weeds and Making Mulch of Dry Earth Natural Moisture Can Be Conserved.

More harrowing and less water on the land will produce the best results in upland orchards. Thinning the fruit to secure uniformity in size and to prevent over-production, thus assuring crops yearly, is also essential, writes Prof. Cyrus L. Smith, institute lecturer of Eastern Washington, in Colorado Fruit Grower. By keeping the ground free from weds and harrowing once a week during the growadvertisement of a firm who offered ing season, thus making a mulch of the dry surface earth, the natural moisture can be conserved sufficiently rank of the infant's parentage, prices to grow fruit that will command the best markets.

> When the season is a favorable one a great percentage of large apples may be grown with little cultivation, but the grower who neglects to cultivate well every year will often fail to secure marketable fruit during the very seasons when prices are the best. The most successful orchardists are those who give thorough cultivation each and every year.

Last season was the dryest for many years, and yet wherever the cultivation was thorough and intelligent the results were satisfactory. In fact, the size and quality were without exception a fair index of the method and the thoroughness of cultivation. In one orchard 16 years old we secured more than 60 per cent. of fourtier apples of such varieties as Baldwin, Greening, Spitzburg and Ben Davis. This orchard was plowed early in April. The plowing was done deep in the center of the rows, eight to ten inches, and four to five inches close to the trees. The ground immediately around the trees was then dug over with a mattock, then disked crosswise of the plowing twice, then run over with a clod crusher, then harrowed. Afterward it was harrowed every week from May 1 to August 15, altogether making 19 cultivations at an expense of \$6.50 an acre for man and team and two dollars for hand work, or a total of \$8.50 an acre

While this might seem somewhat expensive and intensive, the results more than justified the economy of the continual cultivation, as in another orchard where all the conditions were the same and the cultivation was the same except one disking and three harrowings were omitted, saving \$1.25 in expense, there was a difference of more than \$50 an acre in the value of the fruit. Another orchard of the same age, the same varieties, the same soil, was disked twice and harrowed twice and produced only ten per cent, of marketable fruit,

The soil from October to April be rough and loose to catch should and hold the moisture; from April to October maintain continuously a fine dust mulch over the entire surface. If this is done there will be no weeds. Less than ten per cent. of the or-

Development Depends on Molsture, Suitable Soll, Successful System and Adaptable Crops.

The factors on which the development of dry farming depends are some moisture, suitable soil, a successful system and adapted or adaptable crops. We must have moisture and conserve it; we must have plants and grow them, and it is worse than useless to raise unprofitable crops. Any one of these factors is as indispensable as any other, but perhaps the greatest opportunity for the advancement and success of any kind of farming comes from the science of plant breeding.

There are known limitations to the amount of moisture that may be conserved; there is a fixed number of varieties of farm crops from which to choose at any one time, but it would be difficult to fix in mind, or estimate a limit to our power to adapt crops, or to our ability to create new and desirable farms, says B. C. Baffum in Desert Farmer. What has already been accomplished in plant improvement will be realized quickly, others

will take a long period of time. The story of the changes which have been made in plants through domestication is like a fairy tale. From an annual weed growing on salt sea marshes came our highly developed sugar beet, simply by cultivation and selection. From another weed

one of the common mustards, has come the turnip, radish, rape, kale, kohlrabi, brussels sprouts, cabbage, broccoli, and cauliflower. This illustration is probably the most remarkable one of variation of any single form of plant life. We now have civilized barleys which are as bald as our most strenuous thinkers. We have roses without thorns, fruits without seeds, and even onlons without smell What it has taken centuries to do heretofore we now do in a comparatively short number of years.

It may be said that we have only just begun to breed plants scientifically. Enough has been done to show not only the possibilities, but some of the certainties of plant breeding It is as positive a science as mathe matics.

We have much to do to develop suitable varieties for dry farming. We have already learned something of the value of drought resistance and also of the necessity of securing other qualities which make plants more hardy, more persistent and more productive. That we will be able to overcome certain objectionable fea-

tures in plants is positively certain. POULTRY NOTES.

Hens need green food and plenty of it.

When a hen is in full laying her comb is full and bright red. Appetites must be studied. Fowls

differ in this as much as do human beings. To endeavor to keep a flock on a

single-grain diet will soon breed all sorts of trouble.

Before one attempts to raise chickens in a brooder he should take lessons from the mother hen.

The beginner should spend a year nor any unnecessary loss of moisture. or more in the care of poultry before he can hope to be a learned poultry DANGER SIGNALS.

Sick kidneys give unmistakable signals of distress. Too frequent or scanty urinary passages, backache, headache and dizzy spells tell of disordered kidneys. Neglect of these warnings may prove fatal. Begin using Doan's Kidney Pills. They cure sick kidneys.

Mrs. M. A. Gam-Tells A Story blin, Russellville, - TOP Ark., says: "I was in such bad shape from kidney disease that I gave up hope of my recovery, I could rest neither night or day, the pains in my back nearly driving me

frantic. There were decided dropsical symptoms such as swelling of my feet and ankles and my heart palpitated violently. After doctoring without benefit, I began with Doan's Kidney Pills and when I had used two boxes I was as well as ever."

Remember the name-Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

GETTING RICH RAPIDLY ENOUGH.

"He doesn't need to. He owns summer resort hotel."

SKIN HUMOR 25 YEARS

"Cuticura did wonders for me. For twenty-five years 1 suffered agony from a terrible humor, completely covering my head, neck and shoulders, so even to my wife, I became an object of dread. At large expense I consulted the most able doctors far and near. Their treatment was of no avail, nor was that of the — Hospital, during six months' efforts. I suffered on and concluded there was no help for me this side of the grave. Then I heard of some one who had been cured by Cuticura Remedies and thought that a trial could do no harm. In a surprisingly short time I was com-pletely cured. S. P. Keyes, 147 Congress St., Boston, Mass., Oct. 12, '09."

Face Covered with Pimples "I congratulate Cutlcura upon my speedy recovery from pimples which covered my face. I used Cuticura Soap, Ointment and Resolvent for ten days and my face cleared and I am perfectly well. I had tried doctors for several months but got no results. Wm. J. Sadlier, 1614 Susquehanna Ave., Phila-delphia, May 1, 1909."

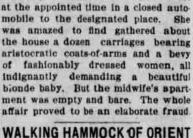

Fido's Exercise. "Justin." said Mrs. Wyss. "Yes." said Mr. Wyss. "Will you speak a kind word to Fido

Among the Bedouins of the Holy Land and other parts of the orient, is to be seen occasionally a remarkable hammock-like arrangement hanging on supports that rest on a camel's back. The contrivance is so large that two, or three women and children can ride in it at a time.

HEART ON THE WRONG SIDE

A remarkable natural phenomenon revealed at Sienna, in Italy, lately chards are as well cultivated as they raiser.

Giant's face, the natives of the locality always refer to it as the Shikillimy profile, the name being that of an Indian chief who once commanded a tribe in this section of the state. The profile aidracts hundreds of visitors every year.

A REAL TREASURE HOUSE the battle, which in reality was a ring-

Mrs. J. W. Madden, who lived over a grocery store, run on her behalf by her foster son, Ed Halley, died recently at Memphis. She was an invalid and had not left her room in 17 years, and mystery surrounded the whereabouts of her fortune, consisting of rentals and other dividends from considerable holdings, as she didn't believe in banks. Halley engaged a friend to assist him in the treasure hunt. They discovered \$30,000 in gold and silver under the carpet and behind old pictures the urst day. Policemen were used to guard the premises, and the final day's hunt ended in \$184,000 in all being deposited in the savings bank. Halley and his friend have booked for a trip round the world to celebrate the discovery of the domestic gold mine.

SWALLOWS HANDFUL OF PINS

Mrs. Frederick B. Malkin, prominent socially in South Norwalk, Conn., died in agony as the result of having swallowed a handful of pins. Mrs. Maikin bad been acting strangely for several weeks. Not until she was taken with spasms did it become known she had swallowed the pins. She writhed in agony for six hours and the physicians were unable to relieve her suffering. She was thirty years old, and left a husband and a little daughter. Coroner H. H. Huntington was called in the case, and an autopsy was performed. While there was no doubt the pins caused death, the doctors were eager to ascertain actual facts and data, as the case is a most unusual one. Although not suspected previously, it is now thought Mrs Malkin was unbalanced mentally.

FINDS A WHITE RATTLESNAKE

Dr. S. Maddox of Monroe county, Missouri, while in his field watching his sons plow, found a white rattlesnake with seven rattles. This is the first white rattlesnake ever found in that section

a rattler and a blacksnake

The rattler was coiled and the black reptile sped around the polsonous snake in a circle, steadily increasing its speed. The rattlesnake turned its head so fast to keep track of its enemy that it broke its neck and the blacksnake emerged triumphant from liver on the left.

around-a-rosy marathon.

Schermerhorn catches blacksnakes in their dens with his hands. He has 15 large, lively ones in a box on his back porch which he handles without gloves. Two of the pet snakes wintered in his cellar.

the case is most exceptional, there is no reason why he should not be a long liver, as the heart is quite normal in its action. 'Tacamoni is to be studied by a commission of physiological experts.

THROUGH EUROPE PENNILESS HIGH PRICE FOR HUMAN SKIN

Metallic and Amphibious

Mr. Moisant, an American resident in Paris, has constructed a nove

acroptane in which no wood or canvas is used. The wings are riade of thin aluminum and the lower parts are of steel. The motor and the pliot's

seat are placed in a car built to float on water, with two flat stabilizers, one

on each side. Mr. Moisant has already made some short flights in his ma-

In Vancouver, Wash., human skin, if good and healthy, is valued at er, a Chicago steeplejack, named Ed- \$1.66 2-3 cents a square inch, or \$5.00 wards, has now won a \$5,000 wager by for three square inches for grafting traveling on foot through Europe purposes. A surgeon of that place rewithout money or a passport. He has cently advertised for 500 square just reached Antwerp, after a 14 inches to patch up a man who was months' journey through France, Italy, badly burned. He offered the price quoted and had plenty of replies.

When the soil inclines to run together when wet and hake hard when it lacks humus, if barnyard manure is grown. available it is the best and readlest

means of supplying the humus or organic matter to the soil. The best method of applying this is by top dressing during the winter season. If the manure is not available use a cover crop, preferably vetch and winter wheat When this is done the spring plowing can safely be delayed

until the first week in May, but not later unless it should be a cold, wet season. Turn under the cover crop good and deep and immediately follow with a disk twice or three times, then harrow continuously every week until August 15.

When a cover crop is to be used,

seed it at the last cultivation as near to the middle of August as practicable. To secure fruit uniform in size, to

prevent overbearing and to obtain annual crops, it is necessary to thin the

fruit radically. It is better to hire their own fruit as it ought to be done. If the pruning has been properly done and the fruit spurs are properly distributed over the entire tree, then thinned so the apples will not touch each other, there will be as many left as the tree ought to carry. The

fruit will be larger, better matured, and much more uniform than when allowed to grow in clusters.

success of Dry Farming. The ultimate success of dry farming depends as much on adapting crop plants to dry farm environments as it does to any other factor. The fact that dry farming has succeeded as well as it has with only such crops as have been available, is one of the greatest arguments for future greater

success, when we shall have had a few years in which to adapt our own varieties to the climate and soil of the west.

Wheat In Germany

Germany, on her soil, thin by nature, produced last year 29 bushels of winter wheat to the acre; while her spring wheat went a little above 35 able. Top dressing with nitrate of bushels. Oats yielded 59 bushels, potatoes '294. mon. Try it on the early crop.

methods of feeding and caring as had one bit of exercise today."there are localities where turkeys are Scraps.

For stamina in the offspring, and especially in market poultry culture it is best to introduce new blood every year or two.

Probably in no line of general or special farming is the working equivalent so poor as in the average handling of poultry.

No matter how small the birds may be, they should have access to some kind of grit. They will begin to pick at it after they are a day old.

There is nothing which hinders the growth of the poults more than parasites, which increase very rapidly when the poults are confined to small атеая.

One of the most difficult propositions in feeding young chicks is to know how to place the feed before them so they can partake of it with-

out soiling it.

In buying stock either pullets or yearling hens should be selected. some one to do this by the day or Where it is intended to early incubate hour. Few men have the time to thin the eggs yearling hens would be better than pullets.

Old and young chickens to be sold for market purposes will bring much more if they are confined in close quarters for a week or more and fed heavily during the time.

Equipment for properly caring for chicks pays in a very large way. This may consist of brooders, coops, drinking vessels, chick feeding coops and numerous other things for the best welfare of the young of the flock.

With good equipment poultry keeping may be made a good success.

Rotten Manure.

Farmers often lack the proper amount of rotten manure for melons and cucumbers. By stacking several loads a year in advance of planting there would be no trouble from this source. Cucurbits planted in rather thin soils are greatly benefited by the use of rotten manure applied in the hill or furrow.

Nitrogen for Cabbage. Nitrogen is by far the most impor-

SNOUT BEETLE PEST DAMAGES YOUNG FRUIT

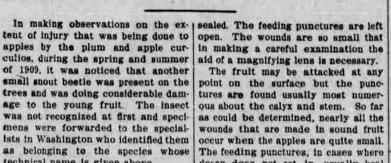

Accidentally Discovered While Observations Were Being Made for Plum and Apple Curculios-To Eradicate.

apples by the plum and apple curculios, during the spring and summer of 1909, it was noticed that another small shout beetle was present on the trees and was doing considerable damage to the young fruit. The insect was not recognized at first and specimens were forwarded to the specialists in Washington who identified them as belonging to the species whose technical name is given above.

The species does not appear to have attracted attention previously as an enemy of apples but according to observations made by the writer the habit of breeding in this fruit seems so well fixed that the common name "apple weevil" is suggested as being suitable

The first instance that came under our notice, in which apples were attacked by this insect, was in June, 1907, when Mr. W. E. Rumsey saw one of the beetles lay its egg in an apple growing on the Experiment Station farm at Morgantown. In the spring of 1909 Mr. Rumsey also saw numerous punctures in young apples in Berkeley county which he attributed to this species. At French Creek, in Upshur county, the beetles were abundant on apple trees during the past summer (1909), and in some cases almost every fruit on unsprayed trees showed the punctures of the insect.

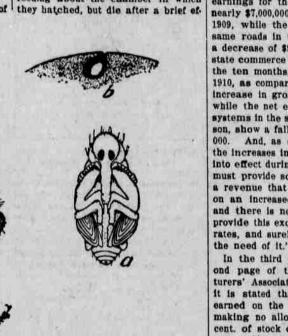

.

decay does not set in, usually heal over so that they show only as minute scars in the ripe fruit. The same is true of the egg punctures where the eggs fail to hatch or where the larvae die soon after beginning to feed, as is often the case. The wounds made by the weevils are sometimes found and enlarged by plum curcullos and possibly by other insects that feed on The wounds also form cenapples.

ters for the spread of decay. The larvae that hatch from the eggs feed on the fruit, forming tortuous tunnels through the flesh, or, more often, make large and irregularly shaped feeding chambers about the core. The excavations are filled with dark-colored, granular excrement scarcely any of which is cast to the surface of the fruit. The larvae are not able to reach full growth within apples that hang to the branch and continue to grow vigorously. They will live for a few days in such fruit, feeding about the chamber in which

The beetles make two kinds of they hatched, but die after a brief ef-

DAILY NEWS EDITORIAL ON FREIGHT RATE ADVANCES

(From Chicago Daily News.) Mr. Griffin Replies.

I desire to call attention to an editorial printed in The Daily News, May 21, headed "Back Fire on the Shippers," in which you make the following state ments: First, that my representation of the case is not candid; second, that what I did have to say was based upon the action of the shippers' conference, and, third, that I had no right to pose as a business man having interests in common with the shippers.

The circulation for signatures of a statement relating to freight rates was. as far as I was concerned, confined to fellow members of the Railway Business association, and no reference was made to the shippers' conference. I personally attended this conference and have no criticism to make on anything that was done there and none was made or intended by me, but what I "deprecated" was contained in an arturers' Association, dated May 7, and, unfair statements contained in the circular of May 7 mentioned above, and | ished product. in doing so I was "candid." I said that the statement "that railroads are rapidly increasing their net earnings" was not true and as to the correctness

of my statement I beg to refer to the following: The latest interstate-commerce commission reports show that during the month of March eleven systems, representing every railroad north and west oh a line drawn through Chicago and St. Louis, show an increase in gross earnings for the month of March, of nearly \$7,000,000 compared with March, 1909, while the net earnings for the same roads in the same period show a decrease of \$965,000; and the interstate commerce commission figures for the ten months, July to March 31, in 1910, as compared with 1909, show an increase in gross of over \$50,000,000, while the net earnings of these same systems in the same period of comparison, show a falling off of over \$3,500,-000. And, as comparatively little the increases in wages had even gone into effect during March, the railroads must provide some means to increase a revenue that is already decreasing on an increased amount of business, and there is no way for railroads to provide this except by increasing their rates, and surely there is "reason for

In the third paragraph on the second page of this Illinois Manufacturers' Association circular of May 7 it is stated that 7.99 per cent. was earned on the dividend-paying stock. making no allowance for the 34 per cent. of stock on which no dividends need, if he is receiving increased were paid. I might, with equal propriety, make the statement that there was no dividend paid on the non-divi-

BOYS TAKE A BACK SEAT

Spelling Contests Held in New Orleans

Prove Girls Superior to Their Brothers.

The result of the spelling contests in the New Orleans public schools again demonstrates the superior proficiency of the girls, practically all of the victors being members of the gentler sex. Last year the same thing was true and the matter was quite generally commented on in the press and at gatherings where educational subjects were discussed. So far as our information goes there have been no contests to determine the pupils in other branches of study, but it would be interesting to know if this feminine superiority is found to exist in all studies, or if they are confined only to particular branches. Doubtless this result is due in part to the fact that the female mind ripens at an earlier age than is the case with the masculine mind, although there is little doubt that the feminine intellect along certain lines is more acute than the masculine, which would seen. to justify the conclusion that certain branches of study are more readily mastered by girls and women. In view of the growing number of young women that are going into positions as stenographers, typewritists and other positions requiring an accurate knowledge of spelling, this demonstrated proficiency is most gratifying. The public school administration is to be commended upon the efforts it has made to improve the spelling of the public school pupils and the triumphant girls to be congratulated upon their easy victory over the boys.

T. A. GRIFFIN REPLIES TO dend paying stock. For a clearer deffnition, the average earnings should be based upon the entire stock, and not upon the best paying portion of it, unless there is some reason why the \$2,500,000,000 representing the 34 per cent should not have received any dividends at all.

> In the final paragraph of the editorial it is stated that I should not be allowed to pose as a business man, having no interest in common with the shippers." Inasmuch as my concern shipped an average of 350,000 tons of finished product during 1996 and 1907, and we were obliged to receive more than 350,000 tons of iron to furnish this, plus enormous quantities of coke, coal and other supplies, I can safely claim to have shipped in and out 750,600 tons a year, and as there are no railroads who can afford to haul this material, or any part of it, without having a revenue from it, an increase of 10 cents a ton on my hauling charge

would amount to \$75,000 and, therefore, I have "business" interests in common with other shippers." The 350,000 tons of finished product shipped repreticle sent out by the Illinois Manufac- sented in the neighborhood of \$10,000,-000. This \$10,000,000 represented mostas a member of that Association, I ly labor, with the exception of the personally wrote a letter to each of its cost of the ore and coal in the mines. individual members, dated May 17. In All the balance was made up of wages this I referred to the misleading and and profit on the different conditions of the raw material until it was fin-

> My Illinois plants produced 60 per cent of this amount, or \$6,000,000 a year. For three years our Chicago plants have not run more than half capacity. Therefore, there was \$3,000,-000 a year less in distribution because

> of a corresponding shrinkage in sales. As most of our iron and coal comes from Illinois, this \$3,000,000 a year was not distributed in Chicago, as would have been the case had we worked on the same output that we did in 1906 and 1907. And a great deal of that \$3.000,000 which was not paid was taken out of the business firms situated in or near Chicago by the nonpurchases from their varied business on the part of the community that would have received the \$3,000,000 a year for three years. That is the reason why I have a right, as a business man, to deprecate any unfair or uncalled-for obstacles that are placed in the way of my business and the hundred other varieties of business in this country that are affected by the money put into circulation by the railroads. When it is further considered that my business constitutes but 10 per cent of the cost of a car and that there were nine other units similarly affected, most of which would have been

tributary to Chicago, anyone can see how important it is to his individual interests that the railroad companies should have ample funds to make these improvements and purchases, and will realize how comparatively easy it will be to stand a reasonable advance on the freight for any material he will orders. MEYER BOOSTS THE NAVY

"In time of peace prepare for war."

This old axiom seems to be the basis of oper ations in the navy department of the United States these days under the direction of Secre tary George von Lengerke Meyer, who has been reorganizing the navy to bring about better efficlency and at the same time save money.

Of course Mr. Meyer would take all the dreadnaughts and other fighting craft congress would give him, but in recent days he has shown greater interest in making the best of what he

Virtual reorganization has been accomplished by Secretary Meyer in the year in which he has held the portfolio. He has brought about a saving of money in different directions, it is said, and many of the changes are the result, direct or

indirect, of suggestions offered at his request by officers in all parts of the naval service

Economy in the use of coal has been brought about by systematic firing. economy of steam, replacing defective joints and journals and stopping leaky valves. On the Montana a saving of fifteen tons of coal daily is due to systematic firing. With reference to oil the saving has been as great. On the battleship Georgia improved evaporators have reduced the cost of making fresh water 40 per cent.

Secretary Meyer's reoganization plans include systematic overhauling of the vessels at the shipyards after each cruise. This permits the continu-ous employment of expert machinists, many of whom formerly would be dismissed after a piece of work was done and not be ready to return when needed again. A saving of thousands of dollars in repair work has been effected by having repair shops on shipboard.

The establishment of a school of marine engineering at Annapolis is another means whereby Secretary Meyer hopes to train for special work engineer officers who give promise of being of special value in any part of his reorganization plan.

BOOM HOOSIER GOVERNOR

ties will be holding their national conventions and nominating presidential candidates, but this does not keep the politicians from expressing their views concerning the prospective standard

As in former years, various states will have the interests of their own statesmen at heart when convention time comes in 1912. From present appearances Indiana will be among these at the Democratic convention and the delegates from the Hoosier state probably will go to the great meeting with the intention of bringing about the nomination of their governor, Thomas R. Marshall.

Thomas Taggart, national committeeman from Indiana, was in Washington several days ago and

n an interview said: "Indiana is for Marshall for president. Mr. Bryan has lots of friends in Indiana, but the Democrats of our state are for our gov-ernor for the nomination.

Governor Marshall was elected in 1908 and took office in January, 1909. His term does not expire until January, 1913. Indiana has always been the center of hot political battles in both parties and frequently has been placed in the doubtful list in presidential campaigns. Just at present the Republicans are having a hard fight for supremacy in the contest between insurgents and stand-patters. The Democrats seem to be working in harmony for the election of John W. Kern as senator to succeed Beveridge.

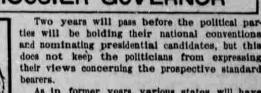

Governor Marshall is a man of pleasing personality and has shown in handling important matters that have come before him that he has ability. Presidential candidates, however, have not always been chosen because of their ability and pleasing manners, but geographical conditions have frequently played a more important part. The leaders may think when the time comes for choosing that New York or Ohio would be better for selecting a presidential candidate and it must be said in all fairness that both of those states have men in the Democratic ranks who may be considered good presidential timber.

Midas affected not to be uneasy. "Just wait till the boys begin to touch me!" quoth he, displaying an acquaintance with economic tendencles far in advance of his age .-- Puck.

Truly Wonderful Climate.

Hyperbole Gassaway went from here to a little town in southern California for his health. In two weeks he wrote home that he felt ten years younger. Some days later he wrote again that he felt 20 years younger. Then his family heard no more from him. They telegraphed the mayor of the Cali-fornia town for information about their Hyperbole Gassawuy and got after a month's residence here, died

from cholers infantum."

Of course in an empire there are lots of poeple who are in bad on general principles and there have been many persons who have been persona non grata to the king or queen.

It is the Right Honorable Winston Leonard Spencer Churchill, home secretary in the British cabinet, who is the original member of his majesty's "In Bad" club. Mr. Churchill knows how Francis Burton Harrison, member of congress from New York, must feel. Just a few days before Mr. Churchill roused the ire of the new king Mr. Harrison was told that he wasn't wanted at the White House. Whether they have exchanged cablegrams of condolence has not been made public.

George V. held a reception of the cabinet ministers at Mariborough house and discussed the political situation.

After hearing Mr. Churchill's views the king told him his opinion about the outstanding controversies.

"I do not agree with your majesty," said Churchill. "Leave my presence immediately," said King George, and Churchill, abashed and crestfallen, slunk dejectedly away.

It was because he did not agree with President Taft that Mr. Harrison was barred from seeing the president, so the cases are somewhat similar.

Mr. Churchill formerly held the position of president of the board of trade. He is a son of the late Lord Randolph Churchill, his mother (daughter of the late Leonard Jerome of New York) being now Mrs. George Cornwallis-West, she having married the latter upon the death of Lord Randolph Churchill.

GREAT BANK'S PRESIDENT

From plow boy in lows cornfields to president of the second largest bank in the United States is a record of which George M. Reynolds, head of the recently consolidated Continental and Commercial National banks of Chicago, is justly proud.

Mr. Reynolds is a man who never stepped out of the beaten track, never went outside of his business, never stopped working and never suffered a reverse. He has never lost a day from sickness, he has never taken a vacation that did not have business on the side, he does not drink, he does not smoke, he does not play bridge, he does not play golf, he has no favorite author, he has no hobby but banking, he has no country residence, he does not even take exercise. He works nine hours a day. This is the only

inread that insidious luxury has made upon the habits of a busy life. He used to work eleven when he first came to Chicago in 1897 to be cashier of the Continental National bank.

'Make your business your pleasure and marry early. These are my rules," said Mr. Reynolds. "I married at nineteen a girl in the little country town where I was cashier of the bank. I guess I have the banker's temperament, because I have always found my greatest pleasure in my business. I am a farmer's boy. I passed my boyhood in the fields of Iowa, where I was born just after the war, near the little town of Panora. I spent my summers

"They gave me my health and strength. I think I have had the grippe twice since I have lived in Chicago, but I have never had anything like a real sickness. I never paid a doctor a cent in my life for myself.

secretary of agriculture last summer, which showed that the areas excluded are not needed for forest or watermbed protection.

The lands excluded from the Gunmison comprise several strips from one-half mile to one mile in width, located along the exterior boundaries of the western portion of the forest and embracing particularly lands which have agricultural possibilities. The most extensive and important of the changes affects lands lying along the western boundary south of the north fork of the Gunnison river, and along Minnesota and Reynolds creeks. Also a few sections have been eliminated along Smith's fork and Crystal creek.

The lands excluded from the Co chetops are rolling foothills and level flats along the exterior boundaries of the southeastern portion of the forest in three different places.

The lands excluded from the Uncompanyre are located in the south eastern corner of the old Uncompan gre forest in San Miguel county and comprise the Iron Springs mesa in townships 44, 45 and 46 north, range 10 and 11 west, New Mexico principal meridian. The territory contains no merchantable timber of value and is not considered of importance from the standpoint of forest conservation. Of this area, 23,560 acres has already been alienated, through homestead and other entries.

The unappropriated portions of the area eliminated from the three nacional forests by these proclamations will be restored to settlement and entry after having been advertised in the local papers by the secretary of the interior

AND HE FALLS FOUR STORIES TO DEATH.

New York .- Finding a burglar in her bedroom at 296 Delancey street, Mrs. Dora Gieteman attacked him. He fled to the kitchen, the woman following. Then he broke for the fire es cape, and Mrs. Gleteman grabbed him by the collar. She beat him over the head with a heavy iron cuspidor.

The thie's only thought seemed to be escape. He backed toward a window. Mrs. Gieteman seized a rolling pin and dealt him a sounding blow in the face.

Over a low window sill the man toppled backward, stunned. He fell four stories and was killed. The man was Louis Gratch,

painter Gratch entered the house through

Berkenholtz, a boarder. To and his wife were asleep, he passed

Gratch was searching - Gleteman's trousers when Mrs. Gleteman awoke and screamed. She leaped out of bed and seized the man, and he at once found her a powerful antagonist. Enraged more than frightened, Mrs. Gleteman pursued the burglar into the kitchen. There she selzed the cuspidor and began to belabor him over the head and shoulders.

Berkenholtz had been sleeping. Mrs. Gieteman followed and seized his collar. Miss Berkenholtz and her brother had fied into Gieteman's room and were trying to awaken him.

NEW MEXICO EVENTS RICHARD WETHERILL KILLED.

LATE

Altercation With Navajos Results Fatally.

Farmington.-Charged with stealing and branding cattle belonging to the Navajo Indians and following an altercation with a number of the red men during which he insulted them, Richard Wetherill, a well-known ranchman and trader, was killed on Wednesday of last week near Blake's trading post, fifty miles south of here. Wetherill and an Indian trader named Finn, who had been at Pueblo Bonito, went to the Indian camp. where they got into an altercation over cattle which the Indians claimed the traders had stolen and branded.

Finn, it is alleged, hit a Navajo over the head with a revolver, inflicting serious injury, after which the traders started back to the Chico canon

The injured Navajo's squaw notified two other Indians, who pursued the traders, and, overtaking them, engaged in an argument, during which Wetherill, it is asserted, took a rifle from a Navajo, broke it over a stone and then opened fire on the other Indians. The only Navajo still armed returned the fire and killed Wetherill. Finn and the Navajo who did the shooting rode seventy miles to the Ship Rock agency and there the Navalo surrendered.

Wetherill, it is said, had been in bad repute with the Indians for the last five years. They accused him of running off their cattle and other stock. Wetherill came to New Mexico with the Putnam Exploration Company from New York ten years ago.

Sues for Ten Years' Salary.

Santa Fe .-- Joseph B. Mayo, one of the best known mining men of this vicinity, has brought suit in the District Court for \$31,120 salary against the Old Reliable Gold Mining Company of San Pedro, southern Santa Fe county, his claim being \$250 a month since January 1, 1900, to May 15, 1910.

On Lookout for Dynamitards.

Married Friends.

gether in the serenity of natural com-

radeship without continuous rasp and jar. They must possess toward each other the plain and elemental qualities of confidence, loyalty and tender ness; they must hold the same views concerning the meaning of life; each must desire nothing so much as the welfare of the other; neither can have aught which is not at the disposal of the other. Love there must be, indeed, but not love alone, for love is or the loved. There is, I believe, an ishable by death. Italian proverb, "Love is a dagger in the heart." This could never be said of friendship. The very word

fail of amity and dwell in hell because they are not first of all friends Friendship is the warp and woof of human oneness; love is the dye and pattern which make the fabric spiendid.-Exchange.

Summer Millinery.

Lightness (in weight) is a characteristic of all the summer millinery, how ever massive an appearance it may present to the eye. The straws are all in large braid effects and the majority are given a dull satin finish. They crumble under the slightest touch, of course, but while they last they are lovely, especially in the delicate violet and prune shades. Everywhere, too, are seen quantities of wheat sheafs dyed in impossible colors, but spraying out effectively in the way in which much of the summer trimming is arranged. It is not un common to see a mound of glided wheat rising ten inches above a hat brim, or extending out sidewise to a relatively enormous distance.--Harp er's Bazar.

Santa Fe .-- While excavating in the workmen found a human skeleton for a century or more. A hole in the The body of the burglar was found forehead suggested that the man had come to his death by a bullet wound. The house is only a stone's throw from the Spanish fort, La Garita, and was at one time used as a saloon. It is I am persuaded that friendship is thought that during a drunken brawl

the basis of true marriage-the man a soldier may have been killed and and woman must be able to get on to- that his body was hurriedly interred unter the floor of the saloon.

Trial of Alleged Train Robber.

Alamogordo.-A preliminary hearing was given M. R. Smith Saturday before United States Commissioner M. Parker here. Smith is accused of the sensational train holdup at Carrizozo recently. A number of witnesses from Carrizozo were present. The porter, whom the robber forced to accompany him in holding up the passengers said he would identify Smith of flery essence and often falls to re- as the man and so do two passengers. sult in happiness either for the lover In New Mexico train robbery is pun-

STRUCK BY A BASEBALL AND TURNED INTO THIEF.

HIS MOTHER TELLS STORY

Broken Hearted Parent Explains How Once Thoroughly Honest Youngster Became Criminal After Injury to His Head.

Somerville, N. J .-- A Jekyll-and-Hyde at seventeen years, through no fault of his own, Willie Miller was taken recently from the county jail in Somerville to the state insane asylum at Trenton, and sorrow was great among the Raritan dwellers, who remembered him as a happy, honest boy before a blow transformed him into a thief. He has a dual personality, it seems clear.

Recently he was caught twice steal-ing, and that was the first knowledge his neighbors received of the ama-zing change in his nature due to an injury at baseball in a Y. M. C. A. camp in Mexico. A commission of three physicians decided Friday that he was insane and that the asylum was the best place for him.

William Miller is the son of Mrs. Joseph Miller of Raritan, a widow. Her oldest son manages a candy fac-tory in Los Angeles, Cal. Another son and daughter live with the mother. The father is eminently respectable. "My older son had gone to Los

Angeles and was successful out there," said Mrs. Miller. "Willie wanted to go, and two years ago he went. He was as bright as a dollar when he

went away, laughing and telling me what great things he was going to do. "They brought him home to me a few months ago a mental wreck. The most I could get him to tell me was that something had happened to him when he was camping out. Afterward I learned that he had gone into camp with a party of Y. M. C. A. young men in Mexico among the mountains. There was some hazing, but I don't think any one would injure him at that. I've heard he was playing ball one day and that a ball hit him on the side of the head. He fell to the ground and was unconscious for a long time.

"Nothing was thought of it at the time, but after awhile he grew ill and my elder son sent him back to us.

"He would lie for days on the couch; taking no interest in anything. We tried to arouse his mind by reading the papers to him. Sometimes be would brighten a little, but not for long. He was just like a baby, a great big boy, taller than I, with the desires and mind of a baby. A doctor

.

RE Broke Open the Door of a Five-and

Ten-Cent Store.

who examined him asked me, 'Has this boy ever been injured in the head? Has he been hurt in any way recently?'

"I did not then know about the camping out and I could not tell. The doctor said it seemed to him that an injury to the brain had turned Willie back for about 15 years. He wanted to be a soldier. Then he wanted to go into the navy. I have a mother-inlaw in New York, and we thought to change Willie's mind by leting him go up to the city. He went. A few days afterward he started home. At Elizabeth he missed the last train and started to walk.

"At two o'clock the next morning he walked into the ticket office of Roselle railway station when the agent was out for a minute. Willie was picking up tickets by the hand-ful when the agent returned. My boy made no attempt to get away. The next day in jail he would not believe it when told he had tried to rob the station. When they finally convinced him his mortification was dreadful. He could remember nothing. They believed his story and sent him home. Then he broke open the door of a fiveand-ten-cent store in Somerville, not minding the dozens of persons who stood about and watched him, and had started to rob the money drawer with people looking on from the front. Some one went in and took hold of him. He didn't resist, and seemed to be in a dass. I'm sure the blow from the ball affected his brain."

A man is sometimes judged by the company he keeps, when it is really his wife's.

PRENCH SUBM PLUVIOSA

Paris .- There is much criticism of the administration of the French navy since the recent disaster in which the submarine Pluviose was lost, because France has not followed the example of Germany in building a vessel especially designed for the raising of submarines that are sunk by accident. The Pluvlose was struck by the channel steamer Pas de Calais and her officers and crew, numbering 27 were lost.

RATS CARRY PLAG

Foes to Public Health.

Bubonic Pestilence Invariably Preceded by an Epidemic Among Hated Scavengers-Book by Government Tells of Fight.

Washington .- The most complete work ever issued on rodents has been published by the United States government in its crusade to prevent an epidemic of the deadly bubonic plague in this country.

From the time of its birth, through all its wanderings, in all its haunts, whether on sea or land, in sickness and in health, Uncle Sam traces the rodent and brands him as "plague infected" and a constant danger to bealth

"Ancient writing abound in allusions to pestilences and their connection with epizootics among rats and mice," declares Walter Wyman, surgeon general of the public health and marine corps service, in the introduction.

"In the Book of Samuel there is a reference to a pestilence having relation to mice, and that it might be stayed the Philistines made offerings of golden images of the mice that marred the land."

"The Rat and Its Relation to the Public Health," is the title of the government publication.

The co-operation of foreign governecured to

"Hobo" Bonds Protect City

Reservoir Line in East Yonkers. New York.

Yonkers, N. Y .- Novel bonds, aggregating \$10,000 in value, have been filed with Mayor Lennon by two of the construction companies in charge of the New York reservoir work in East Yonkers. The bonds are legally known as "hobo bonds" and are issued as a result of a clause inserted in the contract for the work, drawn up by the New York city authorities to protect the cities and villages where New York reservoir work is performed. The "hobo bonds" are of recent orand their work is to protect cities and towns from any liability as to the care of paupers, hoboes or ne'er-dowells, who are imported to reservoir jobs by contractors. For instance if a laborer employed on the New York reservoir, to be constructed in East

Girls Imitate the Men

Loss of Charm in Modern Girl is Laid to try and imitate men as far as posto Indulgence in Vigorous Outdoor Sports-Training by Male Instructors Blamed.

London .- The change that has come over the modern English girl in remarkable. Her steadily growing "mannishness" is coming in for more criticism than ever. Her education and early training by male instructors is severely condemned by those who profess to be deeply concerned by the change for the worse that is coming over her. It is noted that she is becoming less refined; that she is fast tosing all her charm of femininty; that she is becoming too masculine, not only in her manner, but in her gait and motion in her outdoor pastimes.

Not so far back as a generation ago. the idea of the English girl was something like the following: "Neck of tily, cheeks of roses and eyes of heaven; hair of sunny auburn, whose tiny tendrils dance with the slightest motion; a face nearer round than oval. but irradiated by the unsetting sun of a kind nature; a figure meek and graceful, wreathed in innocent muslin, and perpetually undulating and bending into lines of beauty."

"A girl of that type," writes a grieving matron, "is seldom to be met with nowadays. She is a rara avis only to be seen in country districts and out of the way places, far removed from the hundred and one blighting ences and attractions of town and city life. These certainly tend in the support you. At all events, get mardirection of the unmaking of the typical old English girl.

"Our schools today are in a large who is multiplying on every hand at an astonishing rate. You come across class of over 80 students of Case them by the dozen. Mannishness is School of Applied Science, recently

trend of other fashions and so it follows that those now provided for upto-date wearers are dashing in the extreme. So fine are the materials of bathing suits, so dazzling their colors, that it seems difficult to realize that such fabrics are really to be consigned to the mercy of the waves. Those who understand the vagaries and tricks of fashion are not disquieted. It is long since the good dame brought her tints and textures down to such a fine point that the bathing suit that will not withstand at least one season's wear is worthless indeed. The salt water guarantee may be relied on for silk as well as for mohair and fiannel, and, as a rule, the finer the material the longer

it outlasts the sousing. Mohair is still the favorite material for women who have no ambition to be conspicuous, but to be genuinely up-to-date the dark color is piped with a flashing one-red, yellow or of a brilliant apple green, with dark blue-with the buttons of jet and of the most decorative sort. Silk suits and those of novelty mohair suitings mixed with silk run largely to plaids and checks, a small black and white check in these, or a pale blue on the sailor collar and black and white dot, responding handcuffs. The skirt would look best if it somely to trimmings of plain silk. Upon white mohair black will be used with excellent effect.

For the general buyer, the girl or matron who does not prefer or cannot afford anything more elaborate, there blue or black mohair and in fiannel, of material 24 inches wide will be reare the usual ready made suits in these with the conventional white quired. braid, sailor collar, belt and cuffs, but all are invariably smarter in style than the shop suits formerly seen. In almost every case tights or bloomers are sold with the suit, and not infrequently these needed details are cunningly attached to the outer gar-

ment. For tennis wear a plain gored skirt and modified sailor blouse afford a combination much liked by girls who wish to preserve a trim look in the courts but a short plaited skirt topped by a loose mariner's shirt is a get-up quite permissible and one much liked by the younger girls. Con-cerning the shirts, one of which is pictured herewith, they may be made of a coarse yellow drilling and worn over a skirt in chantecler red serge. The mariner's shirt for misses is separate bags for each pair.

EXPERIENCE WITH BIG SNAKE IN A MUSEUM. Chicago .- James Wood, an "ossified man," is near death at St. Luke's hospital, the result of a shock after a thrilling experience with a ten-fcot black python. Five physicians, attracted by the study offered in the

strange patient, are at his bedside. A strange feeling of fear and horror came over "Ossified Jim," as he is known as he lay on a rude bed in a State street museum, It was after midnight and the place was in darkness

OF A MONSTER PYTHON

The snake, which had been allowed to escape from its cage by careless attendants, had crawled about the

"Apparently Ready to Crush Out My Life."

room and finally worked its way to the bed on which lay the ossified man The man's screams brought a policeman to the rescue just as the snake was about to wrap itself about the victim's neck. The man has been ossified in his limbs for years, both legs and arms being stiff and helpless. He was unable to fight off the reptile. He was literally dying from fright when rescued

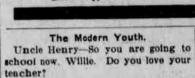

It is the shock from which he is now suffering.

"A death-like quiet settled over the deserted place," began "Jim," recalling the experience. "I was terrorstricken, for no apparent reason. I closed my eyes to shut out some imag-

inary terror. Then I reopened them almost immediately and raised my head. My eyes met the fixed gaze of the serpent.

"With wide-opened mouth, its tongue of fire, it crawled slowly over my lifeless legs, wrapping its body about me apparently ready to crush out my life. But I felt nothing only the spell of the serpent's eyes. I lay there hypnotized by the reptile. That pair of snake eyes that glistened in the darkness and held me in their power I shall never forget. I could no

more shift my gaze than I could rescue myself fro

Not Sisters

Now and again you see two women pass-ing down the street who look like sisters. You are astonished to learn that they are mother and daughter, and you realize that a woman at forty or forty-five ought to be at her finest and fairest. Why isn't it so? The general health of woman is so in-timately associated with the local health of the essentially feminine organs that there can be no red checks and round form where there is female weakness.

For Slippers.

It is comparatively lately that the slipper case of chintz has been made to fit the slipper. Heretofore the closet door seems to have been the final aim and object of the cutter. The pieces of applied chintz that

hold the slipper are now made toe shaped, so that each dainty slipper fits perfectly into its own socket and is held in place. When all is said and done, the hanging case that accommodates a full line of shoes and another case for the daintier pumps and slippers will prove more useful than

DAISY FLY KILLER

HEUMATIS

How we dislike the dentist who spares no pains.

Practical suggestions for really comfortable and dainty head cushions for armchairs are always useful, and the kind of cushion shown in our sketch will not slip out o' place, and is simfailure. ple to make. It consists of two narrow cushions joined together in the center, the one hanging in front of the chair and the other at the back, so that the weight of the two cushions balance,

and keep each other in place. This scheme is clearly illustrated by the lower sketch, which shows the cushions in porition on the back of the

The material in which the cushions are made is, of course, a matter of choice, and the dimensions given in the upper diagram, though useful suggestion as to size, need not be aaaered to as in a measure the shape and size of the cushion will be governed by the shape of the back of the chair over which they are to haug, but at least twelve incues of material should be allowed between the two cushions in the center if for a padded chair, and they may be finished off at either side with a ball fringe and some pretty floral design might be worked upon

certain death.

"Surely I was dying I thought. 1 measured the distance the serpent must crawl till it would reach my face. It was less than four feet. It had lifted its tail from the floor then. Its next move, I thought, would be the beginning of the end. I imagined everything. I remembered every event of note in my career. Everything flashed through my brain with lightning rapidity.

"I saw strangers packing my body into a wooden box. Stamped on all sides was this address: 'Smithsonian Institution, Washington, D. C.' And the printed words: 'Handle with care!' I wondered if the scientists would welcome my body.

There is nothing, for instance, in announcing you have been invited to a "I imagined they found more to study in my body than they did in that of certain luncheon or dinner, yet when Jonathan Bass, the oasilied man bethat announcement makes another woman realize she is a fill up, far bet- sfore me. I cried out, and-well, a policeman broke in and rescued me. her honor. Tell of this entertaining Pretty narrow escape? Oh! the snake to a friend who feels she should do is harmless, but I didn't know it likewise, but is prevented by povertyit is one of the things far better left then.'

Wood is 50 years old, and his home is in Vinton, Iowa. Rheumatism, he thinks, caused him to become ossified. The joints grew together. He became helpless 12 years ago, his body being "dead" from just below the heart to his toes.

A New Evening Cloak.

Of the many Chantecler garments one of the most useful and least startling is an evening clock that falls almost to hem of frock, with capelike revers and ragian sleeves. The chief feature of the cloak is

that it is reversible; it is made of two shades of fine faced cloth. It can be utilized with darker side out for motoring.

The circular deep revers are of the light tone when the dark side of coat is worn, and is turned, dark side out, for the light cloak. There is no trimming of any kind on most of these models, though some have an irregular border made of inch-wide detached strips of light cloth on dark, and vice

VOTEL These are cut about six inches long. with slanting ends, and are arranged in two rows, a strip on second row op-posite space between strips on outer YOW.

Women who have suffered from this trouble have found prompt relief and cure in the use of Dr.

Pierce's Favorite Prescription. It gives vigor and vitality to the organs of womanhood. It clears the complexion, brightens eyes and reddens the cheeks.

No alcohol, or habit-forming drugs is contained in "Favorite Prescription," Any sick woman may consult Dr. Pierce by letter, free. Every letter is held as sacredly confidential, and answered in a plain envelope. Address a World's Dispensary Medical Association, Dr. R.V. Pierce, Pres., Buffalo, N.Y.

Think of Last Summer-

You can remember days when the heat inside your kitchen was so great you could hardly bear it. With the right stove you would have made a better hostess. Save your health. Don't put up with the drudgery of a coal range. You can have a clean, cool, pleasant kitchen. The

> New Perfection **Oil Cook-stove**

does away with all drudgery of cooking. Why should you be a cooking. Why should you be a slave to a coal range when you can have an Oil Cook-Stove that is cheaper than coal, cleaner than coal, doesn't "smell," doesn't smoke, lights instantly, can be put out instantly, leaves no ashes, and detsn't heat the kitches. With one of these stoves you can boil, bake or roast the most elaborate dinner. You can change from a slow to a quick fire, or the other way about, by simply turning a wick. Apply a match, and in-stantly the heat from an intense blue flame shoots upward through the tar-quoise - blue ename! chimneys to the bottom of pot, kettle or oven -- but no-where else. The stove has every conve-nience that can be thought of : Cabinet Top with shelf for keeping food and dishes hot, drop shelves to hold coffee or tespots, towel rack; in fact every convenience possible.

The nickel finish, with the bright blue be chimneys, makes the stove ornament of attractive.

3-burner stoves can be had with or Cabinet. ith 1,2 and 3 burners ; the 2 and 3
