The Big Picture: Two Transformational Trends

Pressure to
deliver high-
value care

The digitization of
the U.S.
healthcare system

*The Dominant Issue
Today*

*Prediction: The Dominant
Issue in 2025*

Richard Baron on the Trauma of Computerizing His Philadelphia Office Practice

*“The staff came to work
one day and nobody knew
how to do their job.”*

The Demise of Radiology Rounds

*“The man who ruined radiology”
– Paul Chang’s dad*

Digital Radiology as the Canary in the Coal Mine

- The digitization of the thing creates the opportunity for infinite distribution (at no cost)
- Social relationships and communication patterns that previously depended on gathering around the thing will wither
- Power relationships mediated by who controls the thing will be renegotiated
- What happens when the thing isn't the film, it's the medical record...

2014 Advertisement For AZ ER Job

Arizona General Hospital will be coming to The Grand Canyon State later this year!! Located in Laveen, Arizona, AGH is a 40,000 square-foot boutique general hospital.

Services offered include:

- Emergency Room
- Radiology Suite inc. CT, X-Ray, and Fluoroscopy
- Two State-Of-The-Art Operating Rooms
- Outpatient Surgery
- 16 Inpatient Rooms
- **NO ELECTRONIC MEDICAL RECORD**

What Went Wrong?

- Adaptive vs. technical change
- Connecting the parts
- The digital squeeze on physicians
- The Productivity Paradox

Health IT: The Mother of all Adaptive Problems

“... problems that require people themselves to change. In adaptive problems, the people are the problem and the people are the solution. And leadership then is about mobilizing and engaging the people with the problem rather than trying to anesthetize them so that you can just go off and solve it on your own.”

– Ronald Heifetz, Kennedy School of Government

The Four Stages of Health IT

1. Digitizing the record

2. Connecting the parts

- a. Enterprise system to enterprise system
- b. Third-party apps to enterprise systems
- c. Patient-facing systems to enterprise systems, and to one another

3. Gleaning meaningful insights from the data

4. Converting these insights into action that improves value

*“You can see the computer age everywhere
but in the productivity statistics.”*

-- Nobel Prize winning economist Robert Solow, 1986

The Two Keys for Unlocking the Productivity Paradox

Improvements
in the
technology

Reimagining
the work
itself

What Do We Need to Do?

- Connect the digital pieces
- Learn to use our data for improvement, build decision support
- Build skills, culture, governance to reimagine the work
 - As much about teamwork, QI, systems as IT
 - Need new workflows, personnel, leadership
 - Need to optimize after initial training/Go Live
- Retain sense of optimism: it'll get better
