\*BayStar is not intended for high speed or performance type boats.

BayStar kits include everything needed for an install. The cylinder utilizes the factory drag link for simplified installation.

**3 Easy Steps to order your BayStar system:**

- 1) Check helm dimensions: Standard 5" helm requires 3" hole in dash
- 2) Check cylinder dimensions: Is the splashwell wide enough?  
Requires 32" splashwell width. 4½ Steering wheel turns, stop to stop.  
Provides full engine stop movement.
- 3) Is there enough room in the splashwell for full engine tilt?

Find the dimension of your splashwell. Check them against the minimum splashwell dimension for full engine tilt for your engine and cylinder.

**Panther XPS Power Steering System**

This hybrid steering system combines the durability and dependability of cable steering with the ease of automobile-like power steering. It eliminates the effect of prop torque, allowing for easy maneuvering in tight quarters as well as safe and controlled turns at high speeds.

The Panther XPS System gradually reverts to cable steering in case of failure, you are never without steering!

- Includes 2 quarts of specially formulated, fully synthetic hydraulic fluid.

For optimal performance, the Panther XPS System should be installed on outboard motors from 75 to 250 HP that are equipped with a "feedback" style helm and single cable steering. Installations may be done on boats with a "no-feedback" style helm as well, however the benefits of the Panther XPS Power Steering will be slightly diminished.
