THE FIAT PANDA

The Fiat Panda blends compact style with innovation in a car that is just 3.7 metres long. And with a model range for every need, you can be sure the Panda is at home in the city, or on (and off) the road.

Together with the Fiat 500, the Panda is the first model from Fiat Chrysler Automobiles to adopt new mild hybrid engine technology for cleaner, more efficient driving.

Both models mark the first steps towards the electrification of the

Fiat brand and precede the launch of the all-new 100% electric Fiat 500, scheduled for launch in early 2021. Click the tab above to jump straight to the Panda Hybrid model pages in this guide.

The Panda's exterior styling brims with Italian style and panache, while the interior combines functionality with strong, thoughtful design. Take the Panda City Cross, whose bold stand-out looks perfectly reflect the car's unique charisma and urban mini-SUV style.

For those wanting even more presence, the Panda Cross 4x4 adds the go-anywhere versatility of four-wheel drive with even more rugged looks, raised ride height and suspension for the biggest challenges.

And wherever you are, the Panda stays connected with the innovative Uconnect™ infotainment system, standard on Lounge trim and upwards, and now enhanced by the Panda Uconnect™ App with Bluetooth® which lets you use your smartphone as an extension of your car.

Adding go-anywhere ability to the Panda's wide range of talents makes for a sensationally practical and appealing package.

With outstanding agility, the Panda 4x4's performance on and off road is enhanced by the addition of the innovative and powerful Fiat TwinAir Turbo engine developing an impressive 85hp. A six-speed manual gearbox makes the most of the available power, giving the Panda 4x4 useful all-weather capability with BIK tax liabilities from just £89 a month.

THE FIAT PANDA HYBRID

Together with the Fiat 500, the Panda is the first model from Fiat Chrysler Automobiles to adopt new mild hybrid engine technology for cleaner, more efficient driving.

Hybrid models are powered by a new three-cylinder 1.0 litre engine from Fiat's renowned FireFly family. Linked to a 12-volt Belt-integrated Starter Generator (BSG), it delivers 70hp and quiet, vibration-free

restarting of the internal combustion engine in Stop&Start mode.

The Panda Hybrid's standard-fit six-speed manual transmission helps reduce CO₂ emissions to as low as 126g/km depending on model, and the system recovers energy from braking and deceleration which is then used to restart the engine in Stop&Start mode and to assist the car during acceleration.

The Panda 1.0 Hybrid is available in City Cross, Trussardi and special Launch Edition trim levels. Launch Edition models offer unique Dew Green paint finish as an option to the exterior and dashboard while the seats are trimmed with innovative Seaqual® Yarn, derived from recycled plastics partially recovered from the ocean for a distinct identity reflecting its 'green' credentials.
