

The Population Health Template: A Roadmap for Successful Health Improvement Initiatives

Michael Kobernick, MD, MS-HSA, MS-PopH

Chief Medical Officer, Ascension-SmartHealth Lecturer, Jefferson College of Population Health

Poll Question #1

Social determinants are an important part of health improvement initiatives.

- 1) Strongly disagree
- 2) Disagree
- 3) Undecided
- 4) Agree
- 5) Strongly agree
- 6) Unsure or not applicable

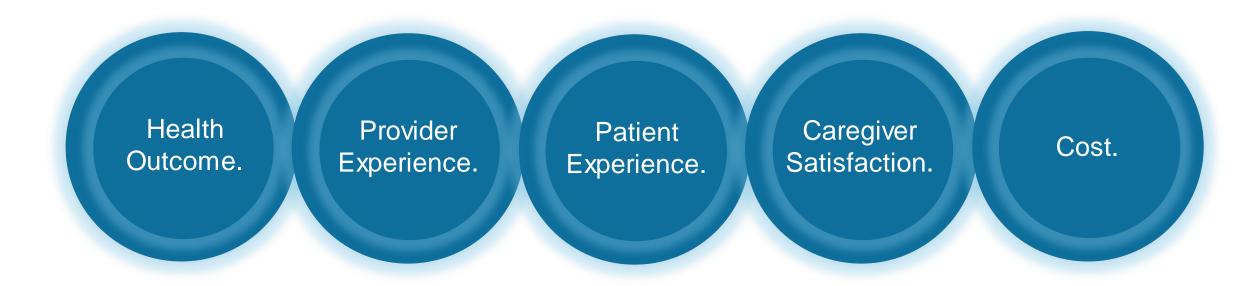

Learning Objectives

- Describe the population health template as a tool designed to assist health systems and population health care organizations to achieve and report on quintuple aim objectives of health improvement initiatives.
- Identify gaps in current health initiatives illustrating the needs for the template's more organized approach.
- Apply the template to health improvement opportunities in group discussion with attention to:
 - 1. Health improvement statement.
 - 2. Population.
 - 3. Applicable social determinants of health.
 - 4. Metrics that demonstrate value.

The population health template was designed to assist health systems and population health care organizations to achieve and report on the quintuple aim objectives:

Nation's largest non-profit health system and world's largest Catholic health system.

2,500 care sites, including 141 hospitals, in 24 states and the District of Columbia.

More than 30 senior care facilities.

36,000 aligned providers.

90,000 employees.

200,000 covered by SmartHealth.

Current Gaps in Population Health Programs

Population health initiatives do not often address social determinants of health.

Health improvement issue is not clearly defined.

Most often deal with broad populations.

Measures of success are not carefully planned.

Do not follow project planning methodology.

Program evaluation is not well organized.

Poll Question #2

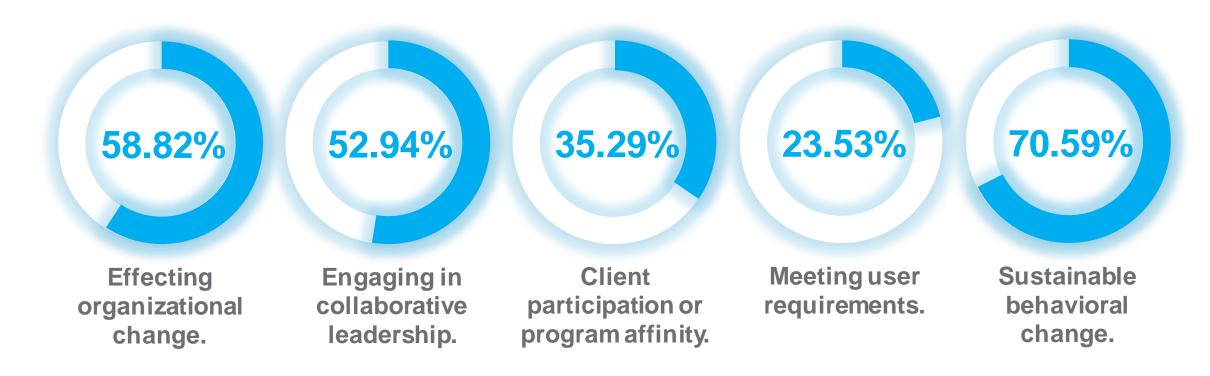

Thinking about common failure points for population health improvement programs, select the areas in which you most frequently observe issues. (Select all that apply.)

- a) Effective organizational change
- b) Engaging in collaborative leadership
- c) Client participation or program affinity
- d) Meeting user requirements
- e) Sustainable behavioral change
- f) Unsure or not applicable

Common Failure Points for Population Health Improvement Programs According to Population Health Experts:

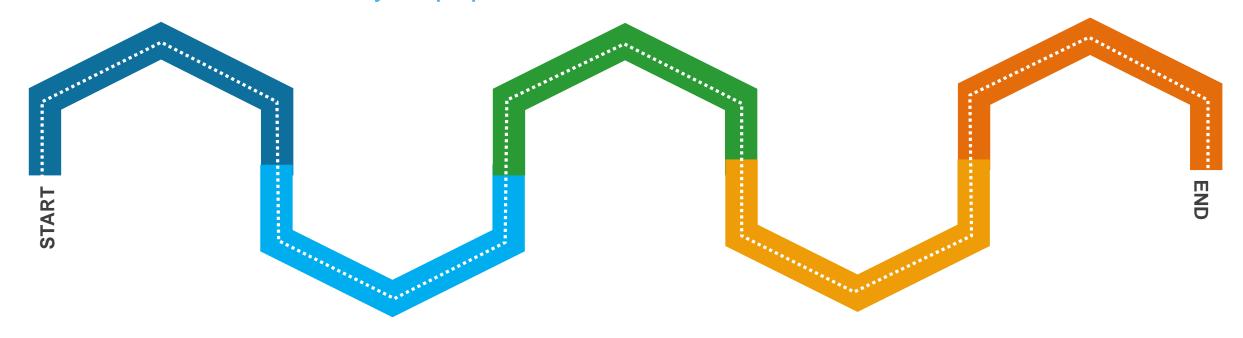

A Tool to Help Close the Gaps and Failure Points: The Population Health Template

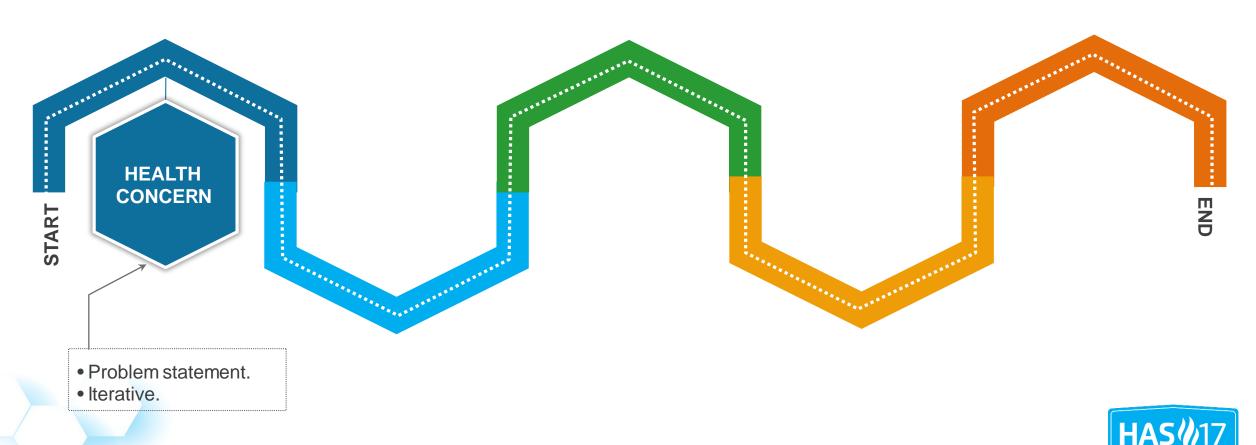

This roadmap creates a standardized population health approach to project planning and execution that may be applied to all types of health improvement initiatives for a variety of populations.

Population Health Roadmap Health Improvement Statement

Population Health Roadmap

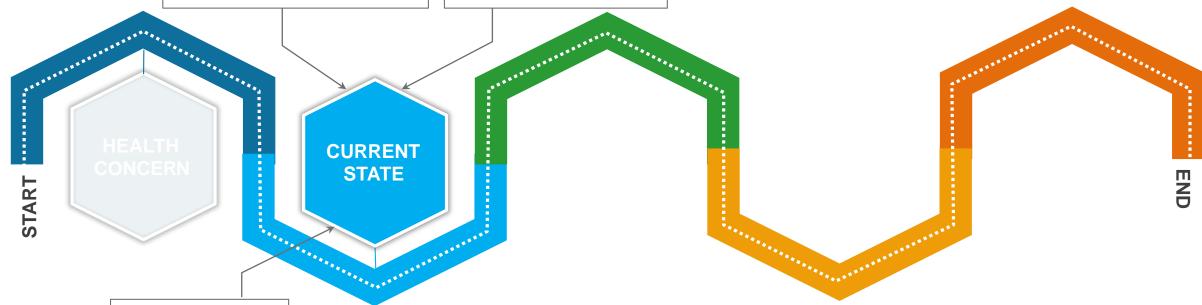

Current State

- Similar initiatives.
- Evidenced-based best practices.
- Patient-generated data.
- Quintuple aim data.
- Conclusions from data.

Quintuple aim metrics:

- Health outcome.
- Provider experience.
- Patient experience.
- Caregiver satisfaction.
- Cost.

- Social determinants.
- Disparities.
- Behavioral health.

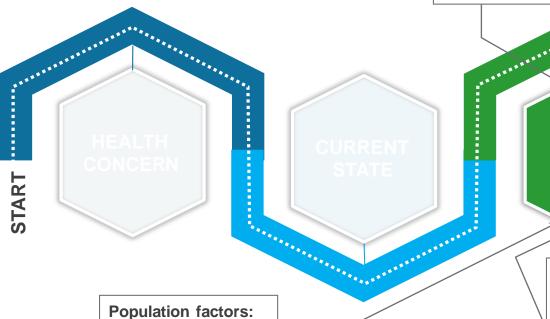

Population Health Roadmap

Future State

Quintuple aim metrics:

- Health outcome.
- Provider experience.
- Patient experience.
- Caregiver satisfaction.
- Cost.

FUTURE STATE

- Gap analysis.
- Initiative description.
- Ultimate outcome.
- SMART goals.
- Key deliverables.
- Behavior change.
- Budget and ROI.

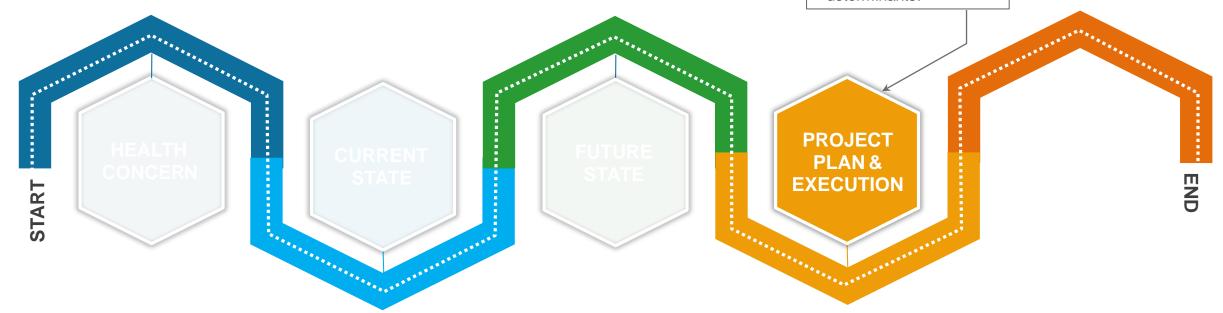

Disparities.

• Social determinants.

Population Health Roadmap Project Plan & Execution

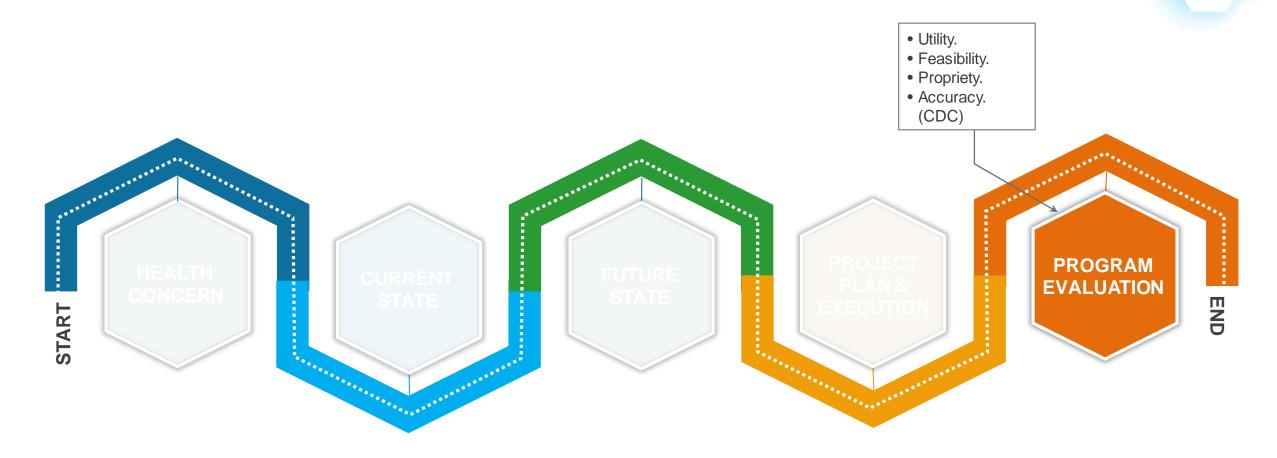

- Project charter.
- Risks/mitigation schedule and task lists.
- Logic model milestones.
- Assessment of change in pre/post social determinants.

Population Health Roadmap Program Evaluation

Population Health Roadmap

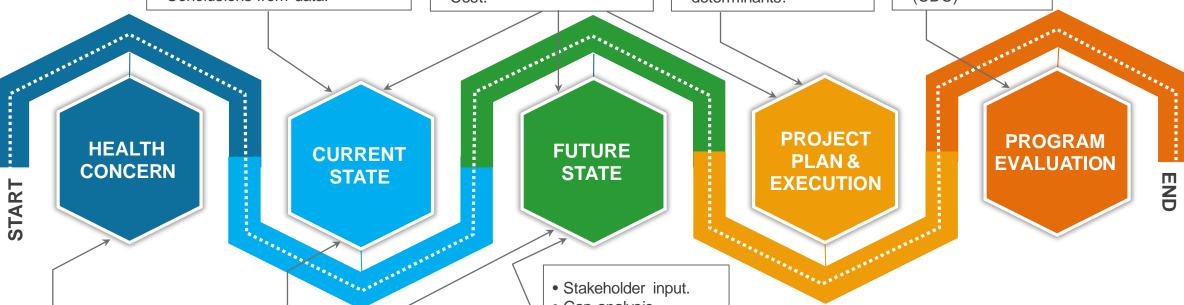

Concept Map

- Literature review.
- Similar initiatives.
- Evidenced-based best practices.
- Patient-generated data.
- Quintuple aim data.
- Conclusions from data.

Quintuple aim metrics:

- · Health outcome.
- Provider experience.
- Patient experience.
- Caregiver satisfaction.
- Cost.

- Project charter.
- Risks/mitigation schedule and task lists.
- Logic model milestones.
- Assessment of change in pre/post social determinants.
- Utility.
- Feasibility.
- Propriety.
- Accuracy. (CDC)

- Problem statement.
- Iterative.

Population factors:

- Social determinants.
- Disparities.
- Behavioral health.

- Gap analysis.
- Initiative description.
- Ultimate outcome.
- SMART goals.
- Key deliverables.
- Behavior change.
- Budget and ROI.

Gap Example: Health Coaching

Vendor was asked to provide specific examples of how they would demonstrate value from coaching. They were given the template and below was their response.

- **Year 1:** Identify a baseline using the Health Assessment (HA) Score for all HA completers. Also, identify coaching goal areas for future outcome improvements.
- Year 2: Collect data to compare with year 1 benchmark data (coaching participant vs. non-coaching participant).

Discussion:

No clear statement of health issue being addressed through coaching, the population being coached, and metrics of value.

Population Health Roadmap

Table Exercise

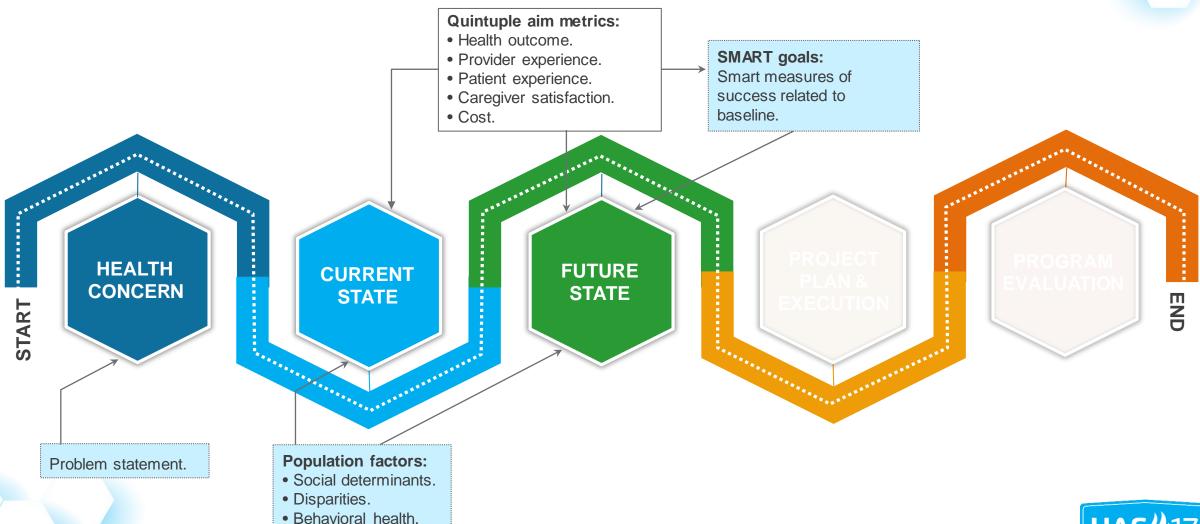

Table Exercise (10 minutes)

Team Exercise Topics for Selection: Health Coaching or Telemedicine

Template Topic	Reference	Team Exercise:
	Succinct Problem	
Health Issue to be	Statement	
Improved Upon		
Current State		
	Social Determinants	
	Disparities	
	Behavioral Health	
Population Factors	factors	
Desired Future State	CAAADT / 'C'	
	SMART (specific,	
	measurable,	
	actionable, realistic, and timed) measures	
	of success compared	
	to baseline	
	to baseline	
SMART Goals		

Health Improvement Topics

Table Exercise

- Health coaching for patients seeking to improve the management of their diabetes.
- **Telemedicine** for urgent care conditions.

Group Report

Key Takeaways and Lessons Learned

Clear articulation of the health issue being addressed, which is missing in most initiatives.

Thorough assessment of the sub-populations in question with attention to the social determinants, disparities, and behavioral issues.

Pre-and post measures of value defined in terms of the quintuple aim and clearly related to the health issue in question.

Future Plans

Develop a workbook and website for health improvement initiative education.

Formalize the educational approach for the population health template.

Develop capstone course for Jefferson College of Population Health.

Thank You
