**SUBJECT: PROMOTION AND RETENTION RATES FOR BROWARD COUNTY
PUBLIC SCHOOLS, 2007-08, 2008-09, AND 2009-10**

Research Services staff calculated promotion and retention rates for Broward County Public Schools for 2007-08 through 2009-10. Trends in student progression over the past three years were ascertained only for students at the elementary and middle school grade levels. Changes during the 2008-09 school year to Student Progression Policy 6000.1 modified the promotion criteria for students at the high school level. As a result of this policy change, a direct comparison of high school promotion rates for 2008-09 and 2009-10 with previous years would be inappropriate and will not be discussed in this brief. However, a comparison of high school promotion rates between 2008-09 and 2009-10 would be appropriate. The attached Research Brief presents promotion data disaggregated by grade level, demographic group, and student performance criteria. Major findings include the following.

- At the elementary and middle school grade levels and subgroups, Districtwide promotion rates were stable across the three years of the study, registering slight increases for those grade levels and across virtually all groups.
- Fifth grade students registered the highest promotion rates for the 2009-10 school year.
- Analyzing promotion by race within gender, third grade Black male students evidenced the lowest promotion rates for the 2009-10 school year.
- In 2009-10, 64.3% of promoted students scored at or above proficiency on the Florida Comprehensive Assessment Test—Sunshine State Standards (FCAT-SSS) Reading subtest.
- In 2009-10, 73.0% of promoted students scored at or above proficiency on the FCAT-SSS Mathematics subtest.
- In 2009-10, 44.0% of promoted students scored at or above proficiency on the FCAT-SSS Science subtest.
- The innovation zones with the largest retention rates were Boyd Anderson ($n=831$, 9.6%), Dillard ($n=315$, 4.4%), Deerfield Beach ($n=241$, 4.1%), Hallandale ($n=172$, 3.6%), and Stranahan ($n=144$, 3.3%).

The brief outlines the following next steps.

Step 1 – Review School-by-School Promotion/Retention Rates

District staff are encouraged to identify schools that registered low promotion rates and communicate with school staff regarding follow up. School staff should identify student groups within each grade level that registered low promotion rates, and identify and provide the additional assistance these students need to meet promotion criteria. Because the District's current high school promotion policy is based upon students' time enrolled in high school, rather than credits earned, the area director and the principal will review the circumstances that resulted in less than 99.0% promotion rate.

Step 2 – Review Achievement Data for Low Performing Students

School staff are encouraged to download and examine student-level FCAT performance reports that are available in the Data Warehouse (DWH) Reports Folder, to determine whether interventions for students who were low performing (Achievement Level 1 or 2) two years ago, and who were promoted, have been effective in improving student achievement.

Step 3 – Future Analysis and Reports

Policy changes to ninth, tenth, and eleventh grade promotion criteria have impacted high school promotion rates. School staff are encouraged to conduct additional research to ensure that these students are on the correct path toward graduation. Real-time data on a students progress toward graduation can be accessed through the DWH School Reports Menu in the Guidance folder (GUII004 - Graduation Requirements).

Questions or comments concerning these analyses should be addressed to **Dr. Maria Ligas, Research Specialist, Research Services at 754-321-2500.** This brief may also be accessed via the Research Services Web site (http://www.broward.k12.fl.us/research_evaluation/Releases.htm).

Report from the Office of the Superintendent

November 2010

Promotion and Retention Rates for Broward County Public Schools, 2007-08, 2008-09, and 2009-10

Promotion and retention rates for Broward County Public Schools (BCPS) for 2007-08 through 2009-10 were examined to determine trends in student progression. The District's Student Progression Plan (Policy 6000.1) indicates that a student's progress is to be based upon **classroom work, observations, tests, District and State assessments, and other relevant information** (The School Board of Broward County, Florida, 2009). **The policy specifically indicates that no single assessment is the sole determiner of promotion.** Promotion criteria related to assessments and credits earned are summarized in Table 1 for each grade level. Promotion is awarded when students meet either criteria 1 or criteria 2, along with other provisions. Note that performance on the Florida Comprehensive Assessment Test (FCAT) is one of the factors for promotion at the elementary and middle school levels. At the high school level, FCAT is a factor for graduation only. Policy 6000.1 also delineates criteria for good-cause promotion and for students with disabilities (SWD) and English language learners (ELL).

Policy Changes

Changes to District Policy 6000.1 have historically had the greatest impact on promotion and retention rates. Several policy changes occurred during the 2008-09 school year which, in turn, affected the promotion and retention rates of students in BCPS. The most significant policy change affected promotion in high school. Specifically, high school student grade status is determined by time enrolled in high school rather than credits earned, as required by previous versions of Policy 6000.1. That is, if a student completes one year of enrollment, designated as a ninth grade student, then the following year that student will be designated as a tenth grade student, regardless of the number of credits earned during that year. As a result of this policy change, a direct comparison of high school promotion rates for 2008-09 and 2009-10 with previous years would be inappropriate and will not be discussed in this brief.

Table 1

Policy 6000.1: Promotion Criteria by Grade Level, 2009-10

Grade	Criteria 1	Criteria 2
1 2	For 2008-09, students must score at or above the 30 th percentile on the current version of the Stanford Achievement Test. Starting in 2009-10, students must score 70% or greater on the District-Developed Assessment that aligns with the Next Generation Standards in reading comprehension.	For 2008-09, students must score at or above the 30 th percentile on the Stanford Diagnostic Test in reading comprehension. Starting in 2009-10, students must score at or above the proficiency level that aligns with the District-Developed Assessment proficiency level on the Stanford Diagnostic Test in reading comprehension.
3	Students must score at or above Achievement Level 2 on the FCAT-SSS Reading subtest.	Students must score at or above the proficiency level on a District-Approved Assessment, as allowed by the state.
4 5	Students must score at or above Achievement Level 2 on the FCAT-SSS Reading and Mathematics subtests.	Students must score at or above the proficient level on a District-Approved Assessment.
6,7,8	Students must pass a minimum of 4 subjects.	
9	Following completion of one year designated as a 9 th grader, the student will be designated a 10 th grader.	
10	Following completion of one year designated as a 10 th grader, the student will be designated as an 11 th grader.	
11	Following completion of one year as an 11 th grader, the student will be designated as a 12 th grader.	

Method

Participants

Promotion rates representing progression from the 2009-10 to the 2010-11 school year were calculated for all students who were enrolled in the District for the 2009-10 school year, and were also enrolled by the 20th day of the 2010-11 school year. Twelfth grade students and students who were not enrolled in both school years were excluded.

Promotion and retention rates

To calculate a promotion rate, each student's grade level during the 2009-10 school year was compared to their current grade level in the 2010-11 school year as of the 20th day. Students who registered an increase in grade level from 2009-10 to 2010-11 were identified as having been promoted. All other students in the data set were identified as having been retained. Promotion rates were computed by dividing the number of promoted students by the total number of students with enrollment records in both school years. Retention rates were calculated in the same way. Promotion and retention analyses for the 2007-08 and 2008-09 school years utilized the same strategy.

Data

This brief presents Districtwide promotion and retention data disaggregated by year, grade, school level (elementary, middle, and high schools, centers, and charters), ethnicity, gender, and special populations, including free and/or reduced-price lunch (FRL) students, students with disabilities (SWD), and English language learners (ELL). Summary data related to FCAT performance in reading, mathematics, and science are also reported for promoted and retained students in grades 3 through 10. Additionally, credits earned data for 9th, 10th, and 11th grade students were used to examine the progress of high school students toward the 24 credit requirement for graduation. Differences larger than three percentage points will be discussed.

Appendices A through E present school-level summaries of promotion rates for the 2009-10 school year, disaggregated by grade level, ethnicity for the District’s three largest student subgroups (Black, Hispanic, and White), gender, and special populations. Promotion data are presented for the three District Areas (North, Central, and South) in Appendices A through C, respectively, while promotion data for District charter schools is presented in Appendix D. In order to identify schools and student groups within each grade level that registered low promotion rates, groups with promotion rates more than two standard deviations below the mean within their grade level (elementary, middle, high, and charter schools) are highlighted. Similarly, Appendices E through H present school-level retention rates using the same format. Schools with retention rates greater than or equal to two standard deviations above the mean within their grade level are highlighted. Subgroups that contained less than 30 students were removed from the z-score analysis, in order to remove rates that may be outliers; therefore, highlighting for those subgroups was not indicated. Note that, because this analysis compares rates within grade levels, the criteria that distinguish high and low promotion and retention rates vary across grade levels. Although summary data are reported for centers, analyses were not performed to identify high and low rates at centers, due to high variability in promotion and retention data for these centers. To maintain the privacy rights of students, frequency data are not displayed for any grade level at any school or center where the enrollment was fewer than 10 students, which is in accordance with policy guidance from the Florida Department of Education.

Results

Table 2 displays the District’s promotion rates (including centers and charters) by grade level for the past three school years. The rightmost column shows the difference in promotion rates from the 2007-08 through the 2009-10 school years. Note that a direct comparison of high school promotion rates for 2008-09 and 2009-10 would be appropriate; however, comparisons with 2007-08 would be inappropriate.

Table 2

District (including centers and charters) Promotion Rates by Grade, 2007-08 to 2009-10

Grade	2007-08			2008-09			2009-10			Prom. Diff. (% pts.)
	<i>N</i>	Promoted		<i>N</i>	Promoted		<i>N</i>	Promoted

11	17,091	15,981	93.5	17,081	16,593	97.1*	17,868	17,308	96.9*	N/A
Total	203,215	193,589	95.3	202,227	196,244	97.0*	201,695	196,233	97.3*	2.0

* This figure reflects the latest changes in student progression policy at the high school level; and a direct comparison of high school promotion rates for 2008-09 and 2009-10 with 2007-08 would be inappropriate.

Despite policy changes, Districtwide promotion rates remained relatively stable across the three years of the study. Aside from major increases in grades nine, ten, and eleven, due to policy changes, the largest increases were seen in grades one (1.2%) and six (1.2%). Promotion rates for the 2009-10 school year ranged from 93.6% in third grade to 99.3% in fifth grade. In each of the three years examined, fifth grade registered the highest promotion rates (range 99.1% to 99.3%), while third grade registered the lowest promotion rates (range 93.0% to 93.8%). On the whole, the District registered a 2.0% increase from 95.3% in 2007-08 to 97.3% in the 2009-10 school year. However, this figure is inflated, as it reflects the latest changes in student progression policy at the high school level. **Further review of high school promotion rates, excluding charter schools and centers, reveal promotion rates much closer to 100% (falling in line with the new policy change), with ninth grade at 99.7%, tenth grade at 99.5%, and eleventh grade at 99.4%.** Figure 1 presents the same data as Table 2 in graphic form.

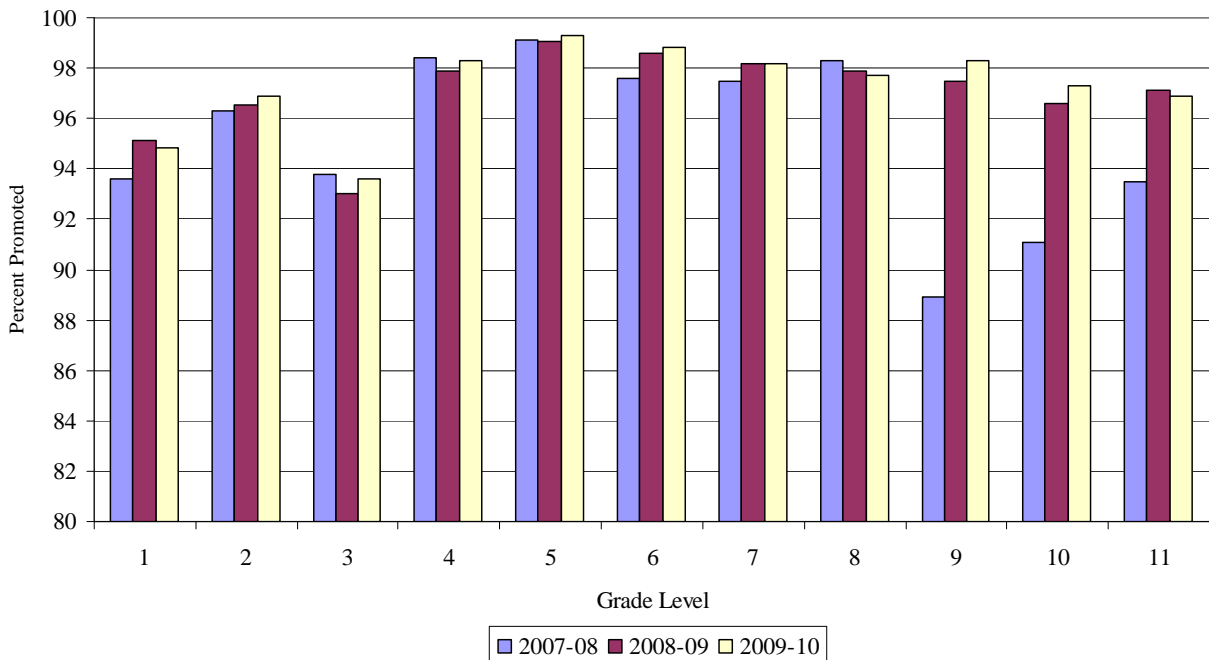

Figure 1. District (including centers and charters) promotion rates by grade, 2007-08 through 2009-10.

As previously indicated, policy changes to ninth, tenth, and eleventh grade promotion criteria have impacted high school promotion rates. The following table compares promotion rates for high school level students in 2007-08 with the percentage of standard diploma seeking students in 2008-09 and 2009-10, who would have qualified for promotion by credits, according to the District’s previous version(s) of Policy 6000.1. That is, the requirements for promotion in prior years were 5 credits in ninth grade, 11 credits in tenth grade, and 17 credits in eleventh grade (*Promotion and Retention Rates for Broward County Public Schools, 2005-06, 2006-07, and 2007-08, Research Brief #132*).

Table 3
Comparison of Promotion Rates Based on Previous Credit Criteria

Grade	2007-08			2008-09			2009-10		
	N	Promoted		N	Qualify for Promotion by Credits		N	Qualify for Promotion by Credits	
		n	%		n	%		n	%
9	19,638	17,466	88.9	18,686	16,605	88.9	19,044	16,577	87.0
10	18,320	16,687	91.1	18,060	16,241	89.9	18,199	15,502	85.2
11	17,091	15,981	93.5	16,714	15,566	93.1	17,830	15,605	87.5

Table 3 shows that the percentage of students qualifying for promotion by credits, according to previous version(s) of Policy 6000.1, has decreased 1.9, 5.9, and 6 percentage points respectively for 9th, 10th, and 11th grade students from 2007-08 to 2009-10.

Figure 2 presents Districtwide (including centers and charters) promotion rates, disaggregated by ethnicity, for the three years of the study. Promotion rates have remained stable for each ethnic group across the three years, with the largest increases evidenced for Black students (3.3 percentage points), Native American students (2.1 percentage points), and Hispanic students (1.7 percentage points). In 2009-10, promotion rates ranged from 99.0% for Asian students to 95.8% for Black students.

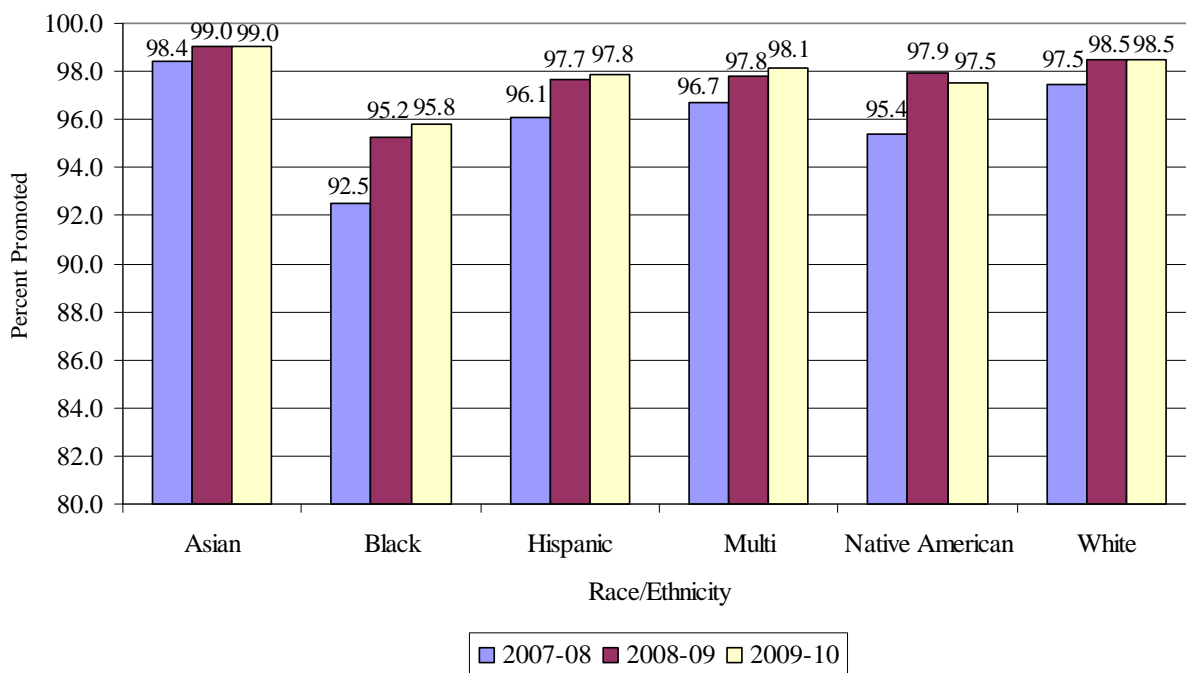

Figure 2. District promotion rates by race/ethnicity, 2007-08 through 2009-10.

Figure 3 presents Districtwide promotion rates, disaggregated by gender and by special populations, from 2007-08 through 2009-10. Gender data indicate a stable promotion rate for both female and male students, with increases of 1.6 and 2.5 percentage points respectively, occurring primarily in the 2008-09 school year. Similarly, promotion rates for free and/or reduced-price lunch (FRL) students, students with disabilities (SWD), and English language

learners (ELL) showed increases of 2.9 to 3.7 percentage points, with most of the increases occurring from the 2007-08 to the 2008-09 school year.

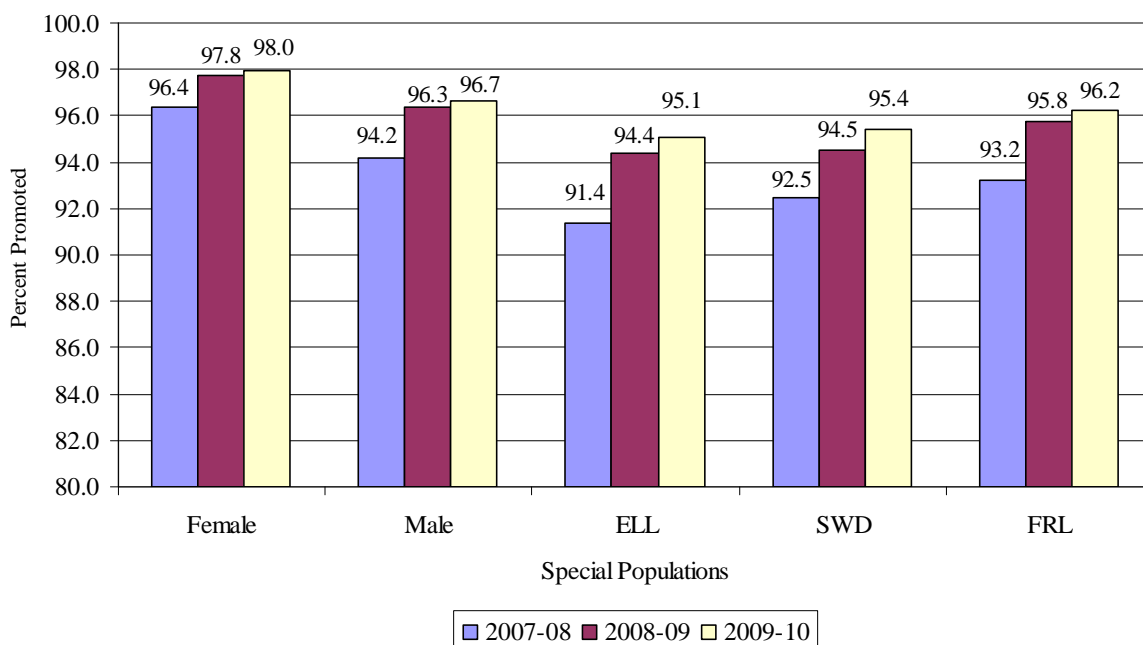

Figure 3. District promotion rates by special populations, 2007-08 through 2009-10.

Table 4 lists promotion rates by grade level for Black, Hispanic, and White students within gender for the 2009-10 school year. Table 5 presents the same data listing retention rates. The results from Table 4 show female students evidenced higher promotion rates than male students for most grade levels and race/ethnicities, with the exception of White students in 5th grade. The highest promotion rates were evidenced by Hispanic (99.6%) and White (99.8%) females in 6th grade and White (99.6%) male students in 5th grade. The lowest promotion rates were evidenced by 3rd grade Black male (88.1%) students.

Table 4

Promotion Rates by Grade Level and Race within Gender, 2009-10

Grade Level	Black		Hispanic		White	
	Female	Male	Female	Male	Female	Male
1	95.2	90.6	96.1	94.8	97.7	95.3
2	96.6	94.4	97.9	96.3	98.8	98.4
3	91.2	88.1	96.0	94.6	97.7	96.9
4	97.9	96.7	99.1	98.7	99.0	99.0
5	99.3	98.7	99.4	99.4	99.3	99.6
6	99.3	97.0	99.6	98.7	99.8	99.0
7	98.8	96.6	99.2	97.5	99.2	98.0
8	97.6	96.5	98.8	97.3	98.4	97.9
9	97.5	96.0	99.4	98.5	99.5	99.5
10	96.2	94.5	98.4	98.0	98.7	98.4
11	96.2	93.6	98.0	96.9	98.8	98.4

Table 5
Retention Rates by Grade Level and Race within Gender, 2009-10

Grade Level	Black		Hispanic		White	
	Female	Male	Female	Male	Female	Male
1	4.8	9.4	3.9	5.2	2.3	4.7
2	3.4	5.6	2.1	3.7	1.2	1.6
3	8.8	11.9	4.0	5.4	2.3	3.1
4	2.1	3.3	0.9	1.3	1.0	1.0
5	0.7	1.3	0.6	0.6	0.7	0.4
6	0.7	3.0	0.4	1.3	0.2	1.0
7	1.2	3.4	0.8	2.5	0.8	2.0
8	2.4	3.5	1.2	2.7	1.6	2.1
9	2.5	4.0	0.6	1.5	0.5	0.5
10	3.8	5.5	1.6	2.0	1.3	1.6
11	3.8	6.4	2.0	3.1	1.2	1.6

Tables 6 through 10 (pages 9-13) summarize promotion data, disaggregated by school levels for elementary, middle, high, centers, and charters, respectively. In each table, promotion data are further disaggregated by ethnicity, gender, special populations (i.e., FRL, SWD, ELL) status, and school year.

Rates for all the demographic subgroups seem to be stable for elementary, middle, and charter school levels. At the high school level (Table 8), the high rates observed in 2008-09 and 2009-10 for all subgroups should be attributed to the latest change in student progression policy.

In regard to ethnicity, among the District's three largest ethnic groups, across elementary and middle school levels, the trend shows that Black students' rate of increase in promotion rates was higher than the rate of increase for Hispanic and White students. In many cases the differences are small but the gaps are being narrowed. Specifically, across the three years of the study, the White/Black ethnic gap was reduced from 1.7 in 2007-08 to 0.8 in 2009-10 at the middle school level. Decreases in White/Black promotion gaps were also seen at the elementary level (gaps decreased from 4.2 in 2007-08 to 3.5 in 2009-10). Similarly, across the three years, the White/Hispanic ethnic gap was less than three percentage points for elementary, middle, and charter schools across virtually all years. The White/Hispanic gap was closed at the charter school level in 2009-10.

In regard to gender, across all years, female students registered higher promotion rates at elementary, middle, and charter schools, with the gender gap remaining fairly stable. The gender gap in 2009-10 was small, less than two percentage points for elementary, middle, and charter schools. At centers, the gender gap is reversed, with male students at centers being promoted at higher rates than female students across all three years (Table 9). It is important to note that the data for charters (Table 8) and centers (Table 9) are aggregated across all grade levels.

In regard to special populations, at elementary and middle schools, promotion rates were similar across ELL, SWD, and FRL subgroups. The SWD and FRL subgroups showed slight increases across all years for middle schools (1.7 and 1.1, respectively). In comparing promotion rates between ELL versus non-ELL, SWD versus non-SWD, and FRL versus non-FRL, the promotion rate gaps in these subgroups were largest at the elementary school level. Also, at the elementary, middle, high, and charter school levels, promotion rates for the special populations were all slightly lower than their peers who were not identified under those special populations.

At District elementary (Table 6) and middle (Table 7) schools, as well as at charter schools (Table 10), virtually all groups registered stable promotion rates across the three school years. In small populations, however, minor changes in numbers over the years have a relatively large impact on rates. More variability was registered across the years at District centers (Table 9), where the student enrollment was less stable and the population was smaller.

Table 6
Promotion Demographics for Elementary Schools, 2007-08, 2008-09 and 2009-10

As previously indicated, Policy 6000.1 stipulates that a student’s progress is based upon **classroom work, observations, tests, District and State assessments, and other relevant information** (The School Board of Broward County, Florida, 2009). **Consequently, no single assessment is the sole determiner of promotion.** Note that performance on the FCAT is only one of the factors for promotion at the elementary level. Recall, also, that decisions related to promotion for third grade students are influenced only by FCAT-SSS reading performance, while promotion in grades 4 and 5 considers both, reading and mathematics. The relationship between progression and performance on the 2009-10 FCAT-SSS Reading, Mathematics, and Science subtests for retained and promoted students in grades 3 through 10, is reflected in Tables 11, 12, and 13, respectively. Only students who took the 2009-10 FCAT-SSS subtests are represented in these analyses.

Total	Retained	2,771	2,146	77.4	412	14.9	213	7.7
	Promoted	140,243	22,438	16.0	27,673	19.7	90,132	64.3

Across all grades in 2009-10, 64.3% of promoted students scored at or above proficiency on the Florida Comprehensive Assessment Test—Sunshine State Standards (FCAT-SSS) Reading subtest. At the elementary level, FCAT-SSS Reading Subtest scores indicate that close to three-quarters of all promoted students scored at proficiency (i.e., Level 3 or above). The percentage was highest for third grade students (77.3%), followed by fourth grade (73.9%) and fifth grade (71.0%) students. The percentage of retained elementary students who scored at proficiency on the FCAT-SSS Reading subtest was largest in fifth grade (7.7%), followed by fourth grade (7.5%), and third grade (0.5%), respectively.

At the middle school level, approximately two-thirds of all promoted students scored at proficiency in reading. For these students, the percentage was highest for sixth (69.9%) and seventh (69.8%) grade students, and lowest for eighth grade students (61.0%). The percentage of retained middle school students, who scored at proficiency on the FCAT-SSS Reading subtest across the middle school grades, ranged from 14.1% to 23.8%. Recall that promotion criteria at the middle school level are based upon passing four subjects, and no longer include an FCAT component.

At the high school level, 49.6% of all promoted ninth grade students scored at proficiency on the FCAT-SSS Reading subtest, and 41.2% of all promoted tenth grade students scored at proficiency. The percentages of retained high school students who scored at proficiency were 7.6% and 4.5% for ninth and tenth grades, respectively. Recall from Table 1 that promotion criteria at the high school level are based solely upon the enrollment the previous year, and include no FCAT component.

Table 12

Total	Retained	2,741	1,381	50.4	757	27.6	603	22.0
	Promoted	140,157	15,074	10.8	22,822	16.3	102,261	73.0

Across all grades in 2009-10, 73.0% of promoted students scored at or above proficiency on the FCAT-SSS Mathematics subtest. At the elementary level, FCAT-SSS Mathematics subtest scores indicate that more than three-quarters of all promoted students scored at proficiency (i.e., Level 3 or above). The percentage was highest for third grade students (84.1%), followed by fourth (77.6%) and fifth grade (69.3%) students, respectively. The percentage of retained elementary students who scored at proficiency on the FCAT-SSS Mathematics subtest was

largest in third grade (28.6%), followed by fourth grade (10.7%), and fifth grade (3.3%), respectively.

At the middle school level, approximately two-thirds of all promoted students scored at proficiency in mathematics. For these students, the percentage was highest for eighth grade (72.7%), followed by seventh grade (66.7%) and sixth grade (65.0%), respectively. The percentage of retained middle school students who scored at proficiency on the FCAT-SSS Mathematics subtest increased across grade levels from 8.5% for sixth grade to 12.7% for seventh grade, and 26.7% for eighth grade.

At the high school level, nearly three-quarters of all promoted students scored at proficiency in mathematics. The percentages were similar for ninth (73.2%) and tenth grade students (75.5%). The percentage of retained high school students who scored at proficiency on the FCAT-SSS Mathematics subtest was 17.8% for the ninth and 28.3% for tenth grade students.

Table 13

FCAT-SSS Science 2009-10 Retained and Promoted Students in Grades 3 through 10

Grade Level		FCAT-SSS Science Achievement Level 2009-10						
		N	1		2		3 and Above	
			n	%	n	%	n	%
5	Retained	91	73	80.2	16	17.6	2	2.2
	Promoted	17,133	3,191	18.6	5,690	33.2	8,252	48.2
8	Retained	283	176	62.2	79	27.9	28	9.9
	Promoted	17,050	3,964	23.2	5,328	31.2	7,758	45.5
11	Retained	191	131	68.6	45	23.6	15	7.9
	Promoted	16,096	4,413	27.4	5,587	34.7	6,096	37.9
Total	Retained	565	380	67.3	140	24.8	45	8.0
	Promoted	50,279	11,568	23.0	16,605	33.0	22,106	44.0

Less than half of all promoted students scored at proficiency in science. For these students, the percentage was highest for fifth grade (48.2%), followed by eighth grade (45.5%) and eleventh grade (37.9%), respectively. The percentage of retained students who scored at proficiency on the FCAT-SSS Science subtest was highest in eighth grade (9.9%), followed by eleventh grade (7.9%) and fifth grade (2.2%), respectively.

Table 14 lists promotion and retention rates by innovation zone for students in grades 1 through 11 in the 2009-10 school year. The table is sorted in descending order by retention rate to show the innovation zones with the highest retention rates. The innovation zones with the largest retention rates were Boyd Anderson ($n=831$, 9.6%), Dillard ($n=315$, 4.4%), Deerfield Beach ($n=241$, 4.1%), Hallandale ($n=172$, 3.6%), and Stranahan ($n=144$, 3.3%). It is important to note that although the Stranahan Zone ranks as the fifth highest innovation zone, in terms of retention rate, it was only the 12th highest out of 28 innovation zones, in terms of the number (n) of retained students.

Table 14
Promotion and Retention by Innovation Zone, 2009-10

Innovation Zone	Total	Promotion		Retention	
	<i>N</i>	<i>n</i>	%	<i>n</i>	%
Boyd Anderson Zone	8,687	7,856	90.4	831	9.6
Dillard Zone	7,109	6,794	95.6	315	4.4

Cooper City Zone	4,914	4,868	99.1	46	0.9
Nova Zone	4,405	4,370	99.2	35	0.8
Cypress Bay Zone	11,775	11,687	99.3	88	0.7
West Broward Zone	5,657	5,623	99.4	34	0.6

Note. Innovation zones with the highest number (*n*) of retained students are in **bold**.

School-level summaries of promotion rates for the 2009-10 school year are presented in Appendices A through D. In each, data are disaggregated by grade level and demographic group. Additionally, Appendices E through H disaggregate data further by race within gender for the three largest race/ethnicity groups (Black, Hispanic, and White students). The promotion and retention data are summarized in separate tables by area, as indicated below.

- Appendix A: North Area Promotion Rates
- Appendix B: Central Area Promotion Rates
- Appendix C: South Area Promotion Rates
- Appendix D: Charter School Promotion Rates
- Appendix E: North Area Promotion Rates Race within Gender
- Appendix F: Central Area Promotion Rates Race within Gender
- Appendix G: South Area Promotion Rates Race within Gender
- Appendix H: Charter School Promotion Rates Race within Gender

Discussion

The present study represents a comprehensive investigation of promotion and retention rates in BCPS from 2007-08 through 2009-10. The following is a summary of the results.

- Across all grades (except for grades 9 to 11) and subgroups, Districtwide promotion rates were relatively stable across the three years of the study, registering increases at all grade levels and across virtually all groups.
- Across all grades tested in 2009-10, 64.3% of promoted students scored at or above proficiency on the Florida Comprehensive Assessment Test—Sunshine State Standards (FCAT-SSS) Reading subtest.
- Across all grades tested in 2009-10, 73.0% of promoted students scored at or above proficiency on the FCAT-SSS Mathematics subtest.
- Across all grades tested in 2009-10, 44.0% of promoted students scored at or above proficiency on the FCAT-SSS Science subtest.
- The innovation zones with the largest retentions rates were Boyd Anderson ($n=831$, 9.6%), Dillard ($n=315$, 4.4%), Deerfield Beach ($n=241$, 4.1%), Hallandale ($n=172$, 3.6%), and Stranahan ($n=144$, 3.3%).
- Across the three years examined:
 - Fifth grade registered the highest promotion rates (range 99.1% to 99.3%).
 - Asian students registered the highest promotion rates (range 98.4% to 99.0%), while Black students registered the lowest rates (92.5% to 95.8%).
 - In elementary, middle, and charter schools, female students registered higher promotion rates than male students. The only exception was at District centers, where male students registered higher promotion rates than female students across two of the three years.
 - In elementary and middle schools, students in special populations (i.e., ELL, SWD, and FRL) registered slight increases from 2007-08 to 2009-10 for each of the special populations.

Next Steps

Step 1 – Review School by School Promotion/Retention Rates

Appendices A through H identify schools and student groups within each grade level that registered low promotion rates. For elementary, middle, and charter schools, groups with promotion rates more than two standard deviations below the mean, for a given grade level, are highlighted. High school promotion rates under 99% are highlighted. Subgroups that include fewer than 30 students were omitted from the z -score analysis in order to guard against outliers; therefore, highlighting for those subgroups was not performed. Center data are not highlighted, due to high variability in the data at that level. Because analyses were conducted within grade level, criteria for standard deviation ranges vary across grade levels.

District staff are encouraged to identify schools that registered low promotion rates and communicate with school staff regarding follow-up. School staff should identify student groups within each grade level that registered low promotion rates, and identify and provide the additional assistance these students need to meet promotion criteria.

Eleven out of 33 high schools registered promotion rates less than 99.0% in 9th, 10th, or 11th grades. Because the District's current high school promotion policy is based upon students' time enrolled in high school rather than credits earned, the area director and the principal will review the circumstances that resulted in less than 99.0% promotion rate.

Step 2 – Review Achievement Data for Low Performing Students

School staff are encouraged to download and examine student-level FCAT performance reports that are available in the DWH Reports Folder to determine whether interventions for students who were low performing (Achievement Level 1 or 2) two years ago, and who were promoted, have been effective in improving student achievement. In particular, the four-year FCAT strand report can be used to identify low performing students, as well as their specific strand deficiencies on the FCAT-SSS Reading and Mathematics subtests.

Step 3 – Future Analysis and Reports

Policy changes to ninth, tenth, and eleventh grade promotion criteria have impacted high school promotion rates. School staff are encouraged to conduct additional research to ensure that these students are on the correct path toward graduation. Real-time listings of students' credits earned and attempted, as well as other graduation requirements can be accessed through the DWH School Reports Menu in the Guidance folder (GUII004 - Graduation Requirements). Additionally, recent research from the Consortium on Chicago School Research (CCSR), which examined ninth grade student performance, pointed to the ninth grade as the focal point for success in high school. This study identified ninth grade course attendance, course failures, and grade point average as factors that contribute the most to a student graduating on time (within four years). The report can be found at the CCSR Web site (http://ccsr.uchicago.edu/content/publications.php?pub_id=116).
