

The Society of Thoracic Surgeons General Thoracic Surgery Database Analyzed Procedure Data Collection Form Version 2.41

©2018 The Society of Thoracic Surgeons

Revised 5/5/2020

- An Analyzed Procedure Data Collection Form (DCF) is **required for all suspected or diagnosed Lung and Esophageal Cancer Resections** and one should be initiated every time the patient enters the operating room. These cases are risk adjusted and are included in the Data Analysis Reports.
- Fields that appear underlined and in blue are required for analyzed procedure record inclusion. If any of these fields are missing data, the entire record will be excluded from analysis.
- Completion of the **Thymus/Mediastinal Mass, Tracheal Resection and Hiatal Hernia/GERD** sections is **optional** for analyzed procedures.
- Procedures highlighted below, if performed as isolated procedures or with only other highlighted procedures, are not collected unless the Surgeon Participant chooses to track them. If collected, use the Non-analyzed Procedure DCF.
- Highlighted procedures done in conjunction with major procedures should be included on this Analyzed Procedure DCF.

Pathologic Staging			
<input type="checkbox"/> Stage I <i>Grossly and microscopically encapsulated. Also called a noninvasive thymoma. That is, it has not spread beyond the thymus.</i>	<input type="checkbox"/> Stage II <i>The thymoma invades beyond the capsule (outer boundary of the thymus) and into the nearby fatty tissue or to the pleura (outer covering of the lung). Sometimes divided into:</i>	<input type="checkbox"/> Stage IIa <i>Microscopic transcapsular invasion</i>	<input type="checkbox"/> Stage IIb <i>Macroscopic capsular invasion</i>
<input type="checkbox"/> Stage III <i>Macroscopic invasion of neighboring organs. The thymoma extends into the neighboring tissues or organs of the lower neck or upper chest area, including the pericardium (covering of the heart), the lungs, or the main blood vessels leading into or exiting from the heart.</i>	<input type="checkbox"/> Stage IVa <i>Pleural or pericardial dissemination. The thymoma has spread widely throughout the pleura and/or pericardium.</i>	<input type="checkbox"/> Stage IVb <i>Hematogenous or lymphatic dissemination. The thymoma has spread to distant organs.</i>
