HOME HISTORY BOOK

As one of the most successful tools within our line of marketing material, the *Home History Book* acts as a repository by eliciting critical information about a home from the seller. The content captured can then be used for the development of the listing advertisement, property brochure, website copy and more.

Agent Benefits: Gives the agent the ability to elicit information about a property to use in advertising and marketing and builds a unique bond and partnership between the agent and seller.

Consumer Benefits: Keeping a copy of the *Home History Book* in the home for all potential homebuyers to see, the seller's comments can help create an emotional appeal. Emotion is a major component in the home-buying decision.

LISTING/MARKETING PRESENTATION Our comprehensive online listing presentation is continuously updated, helping to ensure the latest brand features and benefits are being communicated to a seller client. Dozens of pages with pre-written copy and visuals are available to use—many of which can be customized with your local message. It is up to you to describe the features and benefits that you, your company, and the *Sotheby's International Realty* brand bring to the table to assist the sellers in achieving their real estate goals.

Artfully uniting...

PRESENTATION COVERS Your listing presentation can be even more distinctive by utilizing a professional cover to neatly bind the pages into—quickly and easily in your office. LIST HUB The listings our network represents are automatically distributed to some of the most highly visited websites in the world. This online listing distribution platform, powered by List Hub, also offers a robust reporting platform to measure online activity and results to properly gauge interest levels of potential buyers.

Agent and Client Benefits: While the Sotheby's International Realty partnerships provide global exposure to your property, the Lithub reporting platform allows you to measure results allowing both the agent and client to make changes to the marketing plan according to the activity captured in the reports. What this means is adjustments made to the marketing plan may optimize the exposure of a property, driving more inquiries which may result in reducing the time a property is on the market.
