TheBrain 11 Release History

Version 11.0.147
June 25, 2021
- New Feature
  - (#8596) Improved performance: Siblings are not shown when there are more than 50 parents
- Fixes
  - (#8531) macOS: Drag/drop causes crash in many situations after macOS 11.4 update
  - (#8542) Thought with hundreds of parents causes error on activate

Version 11.0.146
June 23, 2021
- Fixes
  - (#8532) Sync failures from negotiation stage should be counted

Version 11.0.145
April 20, 2021
- Fixes
  - (#8435) Some syncs log an error upon completion

Version 11.0.144
April 20, 2021
- Fixes
  - (#8423) Brains with consecutive sync errors should not auto-sync
  - (#8432) Windows: Add the ability to disable update checks for Enterprise users

Version 11.0.143
March 13, 2021
- Fixes
  - (#8395) Should not prompt restart for license change if account type is read-only
  - (#8412) Multiple instances with different users should be possible

Version 11.0.141
March 11, 2021
- Fixes
  - (#8314) Exception when importing more than 300,000 files at once (2nd change)

Version 11.0.140
March 8, 2021
- Fixes
  - (#8318) Error opening `Options` menu if no brain is open

Version 11.0.139
March 8, 2021
- Fixes
  - (#8314) Exception when importing more than 300,000 files at once

Version 11.0.138
March 4, 2021
- New Features
  - (#8303) Read only users can customize pins for themselves
- Fixes
  - (#8271) Windows: Built in fonts used in the plex cause error upon resuming use

Version 11.0.137
February 25, 2021
- Fixes

○ (#5257) Data imported into a brain from a brain backup does not sync

Version 11.0.136
February 9, 2021
- Fixes
  - ○ (#4422) Windows: OutOfMemoryException related to animated toolbar buttons
  - ○ (#7089) Thought links in notes don't work after importing a .brz into another brain
  - ○ (#7390) Windows: .msi installer is not signed
  - ○ (#7551) Export to Folders fails
  - ○ (#8025) Notes: When converting from HTML, ignore more span tags
  - ○ (#8094) Windows: Drag and drop a brain tab to a second monitor may lead to crash

Version 11.0.135
January 20, 2021
- Fixes
  - ○ (#8032) When BrainBox tab is open, opening edit menu causes an error
  - ○ (#8040) macOS: Crash when creating/opening event
  - ○ (#8045) macOS: Brain theme dialog causes error

Version 11.0.134
January 15, 2021
- Fixes
  - ○ (#7631) macOS: Big Sur causes graphical glitch with combo boxes
  - ○ (#7978) Windows: Disabled search warning dialog appears behind the app

Version 11.0.133
January 15, 2021
- New Features
  - ○ (#8023) Improve conversion of HTML to Markdown (esp. content inside of tables)
- Fixes
  - ○ (#7098) macOS: Emoji widths are incorrect if text size is not standard (title, heading, etc)
  - ○ (#7244) macOS: Shift-Control-Tab does not work as a keyboard shortcut
  - ○ (#7250) Ordered lists in tables are not automatically renumbered
  - ○ (#7334) Multiple main windows and log in dialogs on launch of v12 if additional accounts that are logged out are present
  - ○ (#7536) Stopping attachment addition from BrainBox should not still delete the file from BrainBox
  - ○ (#7788) Windows: Paste into notes can lead to error depending on clipboard state
  - ○ (#7884) Online > Sync Automatically menu does not match status shown when clicking the cloud toolbar arrow
  - ○ (#7941) Colors in CSS in exported HTML documents are incorrect when local culture uses commas instead of periods for decimal separators
  - ○ (#7968) Notes: When converting from HTML, comments can cause parts of the content to be removed
  - ○ (#7983) Notes: Sometimes the selection highlight is not drawn

Version 11.0.132
November 16, 2020
- New Features
  - ○ (#7571) Improve predictability of integrity of resumed data transfer
- Fixes
  - ○ (#7389) MSI license agreement shows placeholder

Version 11.0.131
October 27, 2020
- Fixes
  - ○ (#7478) German localization issue causes error on startup

Version 11.0.130

October 26, 2020
- New Features
  - (#7191)   Ability to set a unique endpoint during installation
- Fixes
  - (#7276)   Attachments table with null position or notetype causes error
  - (#7380)   Windows: Link to HTTPS mp4 file causes a fatal error
  - (#7421)   Trial expiration screen unclear about services
  - (#7429)   After running v12, the content tabs in v11 are hidden

Version 11.0.129
October 17, 2020
- New Features
  - (#7377)   Remote video files play in local media player
- Fixes
  - (#7340)   Error caused by attempt to update notes toolbar with an invalid state
  - (#7345)   Decryption - message added at encryption is not visible
  - (#7346)   Error when decrypting a file
  - (#7378)   macOS: Media player controls do not animate smoothly when mouse is moving

Version 11.0.127
October 9, 2020
- New Features
  - (#7265)   macOS: Notes: Enable dictionary Lookup
- Fixes
  - (#7258)   Use correct license when there are multiple authenticated accounts with different licenses
  - (#7310)   Chrome update 86.0.4240.75 fails to open URLs

Version 11.0.126
September 22, 2020
- Fixes
  - (#6324)   macOS: UI responsiveness deteriorates over time until restart
  - (#7207)   License Change Detected prompt should not show upon opening the brains list
  - (#7231)   Possible issues when brain is accessible via group
  - (#7240)   Plex font weight may be too light

Version 11.0.125
September 20, 2020
- Fixes
  - (#7233)   Windows: Fails to open when certain fonts are in use in the plex
  - (#7235)   macOS: Error trying to persist tab state
  - (#7236)   Error when showing brains list

Version 11.0.124
September 19, 2020
- Fixes
  - (#7232)   Brain thumbnail for brain that access is set via group fails to update and displays "Loading thumbnail..."

Version 11.0.122
September 18, 2020
- Fixes
  - (#7226)   Windows: .OTF file preview causes error

Version 11.0.121 (Windows only)
September 15, 2020
- Fixes
  - (#7221)   Windows: Notes: Error caused by unset default typeface

Version 11.0.120
September 15, 2020
- New Features
  - (#6273) Cross-platform fonts in plex and notes
    - Fonts available on macOS and Windows for the plex and notes:
      - Axis Tempus ACR
      - Cortex
      - Fira Sans
      - JDash
      - Lora
      - Merriweather
      - Roboto
      - Roboto Condensed
      - Roboto Mono
- Fixes
  - (#6859) macOS: Incoming notes theme change fails sync

Version 11.0.119
September 11, 2020
- Fixes
  - (#7186) Time difference sync error appears after waking from sleep even if clock is correct
  - (#7217) Notes: Error when attempting to retrieve typeface

Version 11.0.118
September 11, 2020
- Fixes
  - (#7012) Windows: Some Chinese characters do not display in the notes and the TPD
  - (#7176) Windows: Dialog boxes can be opened with their title bar off-screen
  - (#7217) Notes: Error when attempting to retrieve typeface

Version 11.0.117
September 10, 2020
- New Features
  - (#7204) `Copy File Path` command in attachment actions/context menu
- Fixes
  - (#6045) Windows: Password dots are invisible in dark mode login
  - (#6708) When an image is deleted from notes, the corresponding image file remains
  - (#7208) Bottom of search box outline in toolbar is too thin
  - (#7211) Notes: When a large image is at the bottom of a note, sometimes it is not fully rendered

Version 11.0.116
September 5, 2020
- New Features
  - (#7198) Brain Theme: Wallpaper alignment
- Fixes
  - (#6859) macOS: Incoming notes theme change fails sync
  - (#7183) Tables converted from HTML sometimes do not convert their content to markdown
  - (#7194) Emoji in calendar events appearing on the timeline can cause a crash
  - (#7197) Windows: Exception attempting to set custom color
  - (#7199) macOS: After clicking on splitter max/minimize button, the cursor gets stuck in the resize mode

Version 11.0.115
September 3, 2020
- New Features
  - (#7163) Display type and tag full names when hovered over in pop up lists
  - (#7174) Wider type and tag selection popup
- Fixes

- ○ (#7118)   macOS: When a dark page background is in use, the page flashes as the cursor flashes
- ○ (#7183)   Tables converted from HTML sometimes do not convert their content to markdown
- ○ (#7187)   Windows: Main window title bar may be inaccessible when creating a new window

Version 11.0.114
September 1, 2020
- • Fixes
  - ○ (#5596)   Windows: Main window title bar may become inaccessible when display settings change
  - ○ (#7024)   Windows: Crash on insert of emoji via Windows IME
  - ○ (#7105)   Replace all with empty string sometimes removes text that it shouldn't
  - ○ (#7107)   Find and replace can sometimes cause a crash
  - ○ (#7154)   macOS: PDF Preview does not open on the first page

Version 11.0.113
August 28, 2020
- • Fixes
  - ○ (#6824)   Russian localization update
  - ○ (#7036)   macOS: Save dialogs should correctly display the default file name instead of "untitled"
  - ○ (#7050)   Cyrillic text bold and italics does not work on some fonts
  - ○ (#7054)   Japanese localization fixes
  - ○ (#7104)   macOS: Default value of "Conserve energy" should be "true"
  - ○ (#7115)   Notes: Images inside of tables are not accounted for correctly when calculating column widths
  - ○ (#7116)   Notes: Line breaks do not happen when the breakable point is a space that is surrounded by non character text (links/emoji/etc)
  - ○ (#7119)   Notes: Links that start with images do not work
  - ○ (#7130)   BrainBox is empty message does not fit inside of popup
  - ○ (#7153)   Notes: Default text size is too large

Version 11.0.112
August 20, 2020
- • New Features
  - ○ (#7046)   Notes: Display number of results found
  - ○ (#7102)   macOS: Set keyboard focus to search or notes when dock icon is clicked
- • Fixes
  - ○ (#6594)   macOS: Clicking the app icon in dock does not restore minimized or closed window
  - ○ (#7101)   Notes: Find does not find text inside of tables

Version 11.0.111
August 19, 2020
- • New Features
  - ○ (#7095)   macOS: Preferences > System > Conserve energy
- • Fixes
  - ○ (#2034)   Data Integrity Scan: Check for inappropriate "TypeOf" and "SubTagOf" links
  - ○ (#7094)   macOS: Delayed UI response and high CPU despite smooth animation

Version 11.0.110 (Windows Only)
August 18, 2020
- • Fixes
  - ○ (#7087)   Windows: Video playback colors are washed out (blacks are dark gray)

Version 11.0.109
August 17, 2020
- • Fixes
  - ○ (#7045)   Search in Report not returning results when - (dash) is in the query
  - ○ (#7065)   HTML Export sometimes does not include images
  - ○ (#7073)   Notes: Remotely available font information fails to update due to caching
  - ○ (#7078)   Notes: Crash when saving a note consisting of only an empty new line

- ○ (#7084) Occasional error when window is closed
- ○ (#7086) Windows: When an attached sound is automatically played, the first second may be skipped

Version 11.0.108
August 13, 2020
- • New Features
  - ○ (#6997) Notes context menu option to allow Copy as HTML Source
- • Fixes
  - ○ (#5253) License detection issue with multiple accounts
  - ○ (#5364) Prompt user when opening a file whose protocol handler cannot be found
  - ○ (#6226) Forgotten Thoughts do not sync in some cases
  - ○ (#6903) Duplicate Tab command for BrainBox should create new BrainBox tab
  - ○ (#6948) Labels on types are not propagating to thoughts of that type
  - ○ (#6956) macOS: Adding an emoji at the end of a thought name via TPD causes crash
  - ○ (#6972) Error when renaming a PDF via dedicated BrainBox Tab
  - ○ (#7008) Do not show upgrade dialog when launching with a licensed account logged in
  - ○ (#7021) Incomplete Spanish localization
  - ○ (#7049) Thought type's child links are converted to jumps when pasting from one brain to another
  - ○ (#7058) `Link Thickness` should be renamed to `Link Line Width`

Version 11.0.107
August 4, 2020
- • New Features
  - ○ (#7018) Spanish Localization
- • Fixes
  - ○ (#7017) Localization cleanup

Version 11.0.106
August 4, 2020
- • New Features
  - ○ (#5475) Paste of thought(s) into notes
  - ○ (#7015) Do not spellcheck URLs and email addresses
- • Fixes
  - ○ (#6794) Parenthesis assisted sorting doesn't work when combined with context sensitive thought names
  - ○ (#6943) Notes: Toolbar disappears briefly when notes is focussed via keyboard shortcut
  - ○ (#6952) Notes: Emoji width calculations are inaccurate
  - ○ (#6961) Edit/Insert link dialog should be positioned at the start of the link text
  - ○ (#6986) Japanese Localization Fixes

Version 11.0.105
July 25, 2020
- • Fixes
  - ○ (#6910) Notes: Link dialog box location is incorrect if note is scrolled
  - ○ (#6944) Notes: Selecting text that wraps where the last character is an emoji causes crash
  - ○ (#6945) Notes: Non Latin characters are not rendering
  - ○ (#6951) URLs to specific tweets on twitter.com are titled as numbers
  - ○ (#6952) Notes: There is too much space to the right of emoji

Version 11.0.104
July 24, 2020
- • New Features
  - ○ (#6911) Japanese Localization
  - ○ (#6941) Username as attachment/thought title when pasting a Twitter URL
- • Fixes
  - ○ (#6750) Gravatar image does not update
  - ○ (#6822) macOS: SkiaSharp memory leak in Path.CubicTo > Canvas.DrawPath

- (#6852) Title parsing should use OpenGraph title tag (for YouTube videos for example)
- (#6862) Paste Thoughts as Jump Thoughts when pasting from Text Outline under a Type
- (#6879) Hide Events attached to Private/Forgotten Thoughts when Private/Forgotten Thoughts are hidden
- (#6894) Update to SkiaSharp 2.80.1
- (#6910) Notes: Link dialog box location is incorrect if note is scrolled
- (#6921) Error opening thought link to a deleted thought
- (#6924) Display does not completely update when system tags are displayed/hidden
- (#6943) Notes toolbar disappears briefly when notes is focussed via keyboard shortcut

Version 11.0.103
July 14, 2020
- Fixes
  - (#6672) Full sync will fail when using Um Al Qura calendar
  - (#6691) Linking an existing thought with semicolons in its name creates multiple new thoughts
  - (#6753) Move BrainBox tab to new window results in error
  - (#6774) Windows: Updating gets stuck if you decline to restart the first time
  - (#6859) macOS: Incoming notes theme change fails sync
  - (#6881) Search box ListPopover NRE
  - (#6897) No thought link is created when creating thought from existing text via Insert Link to Thought
  - (#6898) Windows: Notes: Trailing space should not be included when auto-selecting text for links
  - (#6904) Windows: Opening BrainBox tab causes plex to stop responding to mouse
  - (#6905) Windows: Login button on brains list window is too tall
  - (#6906) Error displaying license information using Persian calendar

Version 11.0.102
July 13, 2020
- New Features
  - (#6857) BrainBox popup toolbar icons with command to open BrainBox in new tab
- Fixes
  - (#5533) BrainBox search should not be cleared when content is updated (after adding something, syncing, etc)
  - (#6896) Windows: Error clicking on a brain from the brains list

Version 11.0.101
July 12, 2020
- New Features
  - (#6277) Notes: Automatically select the nearby word when inserting a link if no selection exists
  - (#6891) Notes: Preselect content of edit box in `Insert Link to Thought` dialog
- Fixes
  - (#6871) Memory leak on certain dialogs (thought properties, create thought, etc)
  - (#6892) Notes: Insert thought/link input box should appear at current cursor location
  - (#6895) Default to showing all notes toolbar buttons instead of compact toolbar

Version 11.0.100
July 10, 2020
- Fixes
  - (#6886) Using the arrow keys to select an existing thought to link to selects every touched

Version 11.0.99
July 10, 2020
- New Features
  - (#2461) Link to multiple existing thoughts via typing in the create thought dialog
  - (#6744) Edit menu includes `Copy as Text` and `Copy as HTML` when notes is focussed
  - (#6792) Notes: Preference to restore cursor and scroll position when returning to a note
- Fixes
  - (#6551) Thought icon click and drag should cancel if mouse not released inside icon area

- ○ (#6587)　Notes: Do not show context menu for read-only brain
- ○ (#6644)　Localization: Polish is incomplete
- ○ (#6748)　If an HTML note contains a base64 encoded image and followed immediately by bold or other formatting, an error occurs
- ○ (#6772)　Actions on the tab context menu should be applied to clicked upon tab, not the currently open tab
- ○ (#6800)　Notes should be excluded in `internal attachment` report
- ○ (#6819)　Windows: File access denied when pasting an image as an attachment or icon
- ○ (#6840)　Notes: Right/left arrow keys may skip positions when navigating across a line boundary
- ○ (#6853)　Offline activation of a trial license is valid until "Jan 1, 0001"
- ○ (#6866)　Error when getting folder names for folder export if Thought's name has only a period
- ○ (#6868)　Clicking on malformed URL link in Notes causes an error

Version 11.0.98
June 18, 2020
- • Fixes
  - ○ (#6831)　Paste command on the Plex shows localization code
  - ○ (#6832)　macOS: Notes editor rendering causes memory usage to increase
  - ○ (#6835)　Copying an SVG file from notes throws an exception
  - ○ (#6837)　Pasting a YouTube link into notes causes an error
  - ○ (#6838)　Notes: YouTube preview images should show a "play" button overlay on them

Version 11.0.97
June 15, 2020
- • New Features
  - ○ (#6653)　macOS Notes: Enable all Control+Shift modified cursor movement
- • Fixes
  - ○ (#6817)　Preferences > Behaviour > Toggle Commands issues
  - ○ (#6820)　macOS: Error if icon in dock is clicked while app is in the process of starting
  - ○ (#6821)　macOS: Rendering of links causes memory leak due to bug in graphics library

Version 11.0.96
June 11, 2020
- • Fixes
  - ○ (#6804)　Error on checking for update with Chinese and Polish localizations
  - ○ (#6805)　Mistakes in localization can cause errors at runtime
  - ○ (#6806)　Updated Polish and Russian localizations

Version 11.0.95
June 8, 2020
- • New Features
  - ○ (#6790)　Default avatar shows the user's initials
  - ○ (#6791)　Preferences > Behavior > Show Accounts on Brains List
- • Fixes
  - ○ (#6741)　macOS: Auto-update from 11.0.80+ not working for some
  - ○ (#6784)　When not logged in, confusion due to not seeing brains for non-local users
    - ▪ (#6785)　Show login button on welcome screen if not logged in
    - ▪ (#6786)　Show user account buttons on brains list
  - ○ (#6787)　Remove "Open BrainBox" button from brains list
  - ○ (#6793)　Window positions are not restored if they touch the edge of the screen

Version 11.0.94
June 6, 2020
- • Fixes
  - ○ (#6768)　macOS: Crashing on clicking links to other brains pasted as attachments
  - ○ (#6771)　Error on changing theme/wallpaper
  - ○ (#6773)　Find and/or replace causes hang if there is only one result and it is at the start of the first line

- ○ (#6778) Exporting to folders gives error if any thoughts have notes that are read-only
- ○ (#6779) Files added/created are being set as read-only
  - ▪ (#6757) Copied in file attachments are being created as read-only
  - ▪ (#6758) Error on moving a file into TheBrain
  - ▪ (#6770) Error on "Paste Image" when adding attachment to thought
  - ▪ (#6775) Error when adding a file from the templates list
- ○ (#6780) Deletion fails if there are read-only internal attachments on a thought
- ○ (#6781) Hardware-based customization icon
- ○ (#6783) Windows: Installer should not cause/recommend a reboot/restart

Version 11.0.91
June 4, 2020
- • Fixes
  - ○ (#6759) Windows: If Chrome Canary is the default browser, URLs don't open properly
  - ○ (#6761) Error when expanding the Help menu for certain TeamBrain configurations
  - ○ (#6765) About dialog should scale down to fit within available screen height
  - ○ (#6766) Windows: Existing instance is not presented when app is relaunched

Version 11.0.90
June 3, 2020
- • Fixes
  - ○ (#6755) Escape key should not exit presentation mode if keyboard navigation is in progress

Version 11.0.89
June 2, 2020
- • New Features
  - ○ (#6751) Allow plex interaction while preferences dialog is open
- • Fixes
  - ○ (#6592) Copy and paste of notes that include images from one thought to another does not copy the image data
  - ○ (#6670) Report won't close when the app window is very narrow
  - ○ (#6717) Crash on clicking hidden private thought in selected panel
  - ○ (#6722) Windows: Error on new window/tab to a thought with media on autoplay
  - ○ (#6729) macOS: Some windows (such as Preferences and Reminders) disappear when dragged to a different screen
  - ○ (#6734) Pasting captured Thought icon into Note should create a copy of the icon's image file
  - ○ (#6745) Read-only file status should not prevent update on sync
  - ○ (#6748) If an HTML note contains a base64 encoded image followed immediately by bold or other formatting, an error occurs

Version 11.0.88
May 28, 2020
- • New Features
  - ○ (#6732) Notes: Make paste of color information from HTML an optional preference (results in cleaner text)
  - ○ (#6739) Statistics dialog shows `Local Id` of brain e.g. U01/B01
- • Fixes
  - ○ (#6735) Windows: Thought links in notes are not working
  - ○ (#6736) Notes: Subscript and Superscript tags cannot be escaped
  - ○ (#6737) Windows: brain:// protocol does not work from external applications if TheBrain is already open
  - ○ (#6738) Notes: Exception during paste of image leads to unrecoverable error

Version 11.0.87
May 27, 2020
- • Fixes
  - ○ (#6643) Localization: Chinese is incomplete
  - ○ (#6727) Windows, dual screens: Fixes for displays at different scales do not function

Version 11.0.86
May 25, 2020
- Fixes
  - (#6642) Localization: German is incomplete
  - (#6645) Localization: Portuguese is incomplete
  - (#6658) On trying to edit Link Type, Plex becomes unresponsive
  - (#6726) Invalid thought icon on a tag causes error

Version 11.0.85
May 19, 2020
- New Features
  - (#6502) Notes: Headerless tables (using empty header cells)
- Fixes
  - (#6611) Tables in Notes should use the available horizontal space better
  - (#6709) OneNote links are no longer recognized
  - (#6710) Notes: Adding images from local sources is not working
  - (#6711) Timeline preferences are not applied at startup
  - (#6712) `Calendar week starts on Monday` should be in Preferences > Look & Feel > Timeline

Version 11.0.84
May 18, 2020
- Fixes
  - (#5628) BrainBox browser extensions should work on a Pro License
  - (#6592) Copy and paste of notes that include images from one thought to another does not copy the image data
  - (#6607) Text boxes should not paste Markdown
  - (#6705) Text for BrainBox commands is redundant

Version 11.0.83
May 15, 2020
- Fixes
  - (#4465) Sync error: Access to remote delta unpack directory is denied
  - (#5152) When syncs are resumed multiple syncs may happen at once
  - (#6523) Hide Private Thoughts while active thought is private causes crash
  - (#6603) On a very narrow window, Hidden Brains checkbox overlaps other controls
  - (#6689) Brain Access and Sharing Save button and email invitations are disabled
  - (#6694) NRE when clicking Edit menu option on the Brains List page
  - (#6696) Shift+Tab on an otherwise empty line with blockquote results in an error

Version 11.0.82
May 14, 2020
- Fixes
  - (#4920) Many large thought icons fail to load and cause memory exceptions
  - (#6693) After hovering a thought icon, the larger version loads but does not display immediately

Version 11.0.81
May 13, 2020
- Fixes
  - (#4457) Recurring all day event is displayed a day early on the timeline
  - (#6113) Windows: Context menu causes focus to be lost, which causes system tags to hide then show unexpectedly
  - (#6524) Thoughts copied from Brain to Brain may show an older version of notes from v10
  - (#6601) Deleting a lot of events takes a long time - show progress
  - (#6602) When pasting a typed thought multiple times, it is possible to create links to multiple types
  - (#6650) Error on exporting to folders: trailing space after Thought name
  - (#6657) Placeholder text should not be spellchecked
  - (#6667) macOS: Ability to open Grammarly in embedded browser

- ○ (#6674) macOS: Error preventing startup when attempting to discover system templates
- ○ (#6677) macOS: Some attachment templates for different extensions cannot be distinguished
- ○ (#6678) macOS: Objective C exceptions can't be caught and cause the application to terminate without notice
- ○ (#6683) Windows: Exception setting up Explorer `Send to` function prevents startup
- ○ (#6685) "BrainBox is Empty" does not translate into Russian
- ○ (#6687) Media back/forward command hint messages are wrong
- ○ (#6688) Notes: Becomes unresponsive when a very large amount of text on a single line is selected

Version 11.0.80
May 6, 2020
- • Fixes
  - ○ (#4973) Windows: Local URL link in embedded browser fails to activate thought
  - ○ (#6660) macOS: Codesigning error upon opening after update

Version 11.0.79
May 3, 2020
- • New Features
  - ○ (#6641) German, Russian, Chinese, Polish, and Portuguese localizations
- • Fixes
  - ○ (#6568) Notes: Exported HTML should include all notes style settings even when no font is set
  - ○ (#6599) SkiaSharp AccessViolationException
  - ○ (#6636) Notes: A link within a link should not be allowed
  - ○ (#6637) A few pieces of text cannot be localized
  - ○ (#6640) Localization: Refactor code, utilize fallbacks for missing strings
  - ○ (#6647) macOS: Keyboard focus is lost after creating or editing a thought

Version 11.0.77
April 30, 2020
- • New Features
  - ○ (#6527) Option to make Paste Without Formatting the default in Notes
  - ○ (#6620) Notes: Save automatically every 30 seconds
  - ○ (#6634) Reorganized notes preferences
- • Fixes
  - ○ (#6335) Unable to move Read Only files and folders into TheBrain
  - ○ (#6585) Events deleted count is not always correct
  - ○ (#6593) PDF preview fails when renaming/deleting/moving file in/out of Brain and PDF is open in app
  - ○ (#6597) Error on exporting to folders: "Could not find a part of the path"
  - ○ (#6600) Error setting layout generation
  - ○ (#6623) Notes: Multiple images in a single line can cause crash
  - ○ (#6624) Notes: Markdown links that include titles are not recognized
  - ○ (#6626) Export to folders uses one folder for multiple thoughts in the same hierarchy level with the same name

Version 11.0.76
April 25, 2020
- • New Features
  - ○ (#6532) New preference for default visibility of thumbnails in PDF preview
  - ○ (#6572) Preferences > Keyboard shortcuts tab - send focus immediately to the search field
  - ○ (#6604) Paste Without Formatting to be added to the Edit menu when notes has focus
- • Fixes
  - ○ (#5809) Windows, dual screens: Drag to create a new child thought - no new thought name field appears
  - ○ (#6427) Creating a child from a type/tag should indicate in the dialog that new thought will be typed/ tagged
  - ○ (#6453) Pasting thoughts under a type should link pasted thoughts as jumps instead of children
  - ○ (#6563) 'Open Attachment' on a link with multiple attachments causes error

THE BRAIN

- ○ (#6575) Brain settings should not be added to undo list on startup/open brain
- ○ (#6579) Notes: HTML files with invalid styles cause an error
- ○ (#6581) macOS: Unable to select date from Delete Events calendar drop-down
- ○ (#6583) Thought with link to an external read-only file should not fail to delete
- ○ (#6605) Notes: Large images encoded within text as base64 data cause poor performance
- ○ (#6610) Notes: Improve performance of image tag detection

Version 11.0.75
April 20, 2020
- • New Features
  - ○ (#6588) Utility to enable Windows search of older notes by adding BOM to start of the files
- • Fixes
  - ○ (#6408) Windows: Non-ASCII characters are not indexed by Windows search
  - ○ (#6589) Dialogs are not always centered correctly
  - ○ (#6590) Commands under File > Utilities should disable (not disappear) when a brain is not open
  - ○ (#6591) Count of hidden brains should be part of checkbox

Version 11.0.74
April 17, 2020
- • New Features
  - ○ (#2986) Hide brain command on brain context menu
  - ○ (#4620) Bulk delete of events by date range from the timeline
  - ○ (#6382) Open Brain to Home Thought command on brain context menu
- • Fixes
  - ○ (#4801) Allow all users to see who has what level of access to a shared brain
  - ○ (#6275) Unable to move Read Only files into TheBrain
  - ○ (#6311) Unable to scroll through added users in the Brain access and Sharing window
  - ○ (#6322) PDF Preview/Media player is not re-initialized after hovering over another thought
  - ○ (#6335) Unable to move folders with Read Only files into TB
  - ○ (#6363) No warning or info when deleting a thought with an open file attachment
  - ○ (#6390) Keyboard shortcut for Delete Attachment causes an error while an event is displayed in content area
  - ○ (#6423) Dialogs allow multiple instances to be opened
  - ○ (#6485) When deleting a single recurring event, closing the recurring event warning dialog proceeds with deletion
  - ○ (#6491) Windows: Brain Access and Sharing dialog's user access level selection menu does not show check mark in dark mode
  - ○ (#6513) Windows: Right click on Add Attachment > Create File entry should not do anything
  - ○ (#6522) Keyboard shortcut for Delete Selection does not work
  - ○ (#6538) Deleting a thought with an open file attachment should fail gracefully
  - ○ (#6541) Notes: Paste of link containing underscore does not retrieve title correctly
  - ○ (#6543) `Visible when Parent of Active Thought` should be disabled for readers
  - ○ (#6555) When report time filter is changed using menu the plex may stop responding
  - ○ (#6556) Windows: Some context menu check marks do not show in dark mode
  - ○ (#6558) Error when opening brain access dialog
  - ○ (#6559) Windows: Notes style weight sub menu is not styled correctly in dark mode
  - ○ (#6560) Should not show "failed to shutdown" unless failure happens soon after startup
  - ○ (#6561) Notes: URLs including parenthesis are not recognized correctly
  - ○ (#6562) Application state should be saved more often
  - ○ (#6566) Moving attachment out of Brain while the attachment is open should fail safely
  - ○ (#6567) Notes: When exporting to HTML, headings are not recognized if there is not an empty line above them
  - ○ (#6576) Redo of move folder into Brain causes error

Version 11.0.73
April 13, 2020
- • New Features
  - ○ (#6544) More powerful recent changes popup

- ▪ (#6552) Filter recent changes by user
- ▪ (#6553) Configurable number of days for recent changes
- ▪ (#6554) Improve speed of recent changes display
- Fixes
  - ○ (#3165) Outline view context sensitive name removal does not work properly
  - ○ (#4849) Recent changes list does not show custom user avatar icon
  - ○ (#5936) Context sensitive names not hiding/showing Parent name consistently
  - ○ (#6013) Temporary white space appears over image pasted into notes
  - ○ (#6065) Windows: Notes scrollbar toggles on and off repeatedly when image is present and content just fits
  - ○ (#6108) Unchecking `Sync Automatically` from sync status popup does not work
  - ○ (#6483) Notes: NRE in LayoutLines
  - ○ (#6515) Image resizing handles are not cleared when navigating
  - ○ (#6518) macOS: Selected Thoughts area, Past Thoughts List area, and Pins area should clip thoughts in Outline and Mind Map layouts
  - ○ (#6520) Notes: Image resize handles are replicated when note width is changed
  - ○ (#6521) macOS: Double-click to open the TPD makes the cursor disappear
  - ○ (#6525) macOS: Notes: Ctrl+click should show context menu
  - ○ (#6526) macOS: Import text explanation is clipped on initial display
  - ○ (#6534) Notes: Link to missing file causes error
  - ○ (#6537) Error on opening Brain Theme window
  - ○ (#6539) Missing brain icon causes thumbnail to render as all black
  - ○ (#6542) Some html notes from TheBrain 10 are freezing up TheBrain 11
  - ○ (#6545) Can't check sync status nor change auto-sync settings when a sync is in progress
  - ○ (#6546) Notes: Some notes are very slow to load
  - ○ (#6547) Notes: Images with base64 encoded `data` source do not load
  - ○ (#6550) macOS: Recent changes hint window does not show on mouseover after scroll by dragging

Version 11.0.72 (Windows)
April 3, 2020
- Fixes
  - ○ (#6514) Windows: Error opening brain access and login windows

Version 11.0.71
April 3, 2020
- Fixes
  - ○ (#6510) Right click on attachment tab causes error

Version 11.0.70
April 2, 2020
- Fixes
  - ○ (#6387) Windows: The application does not stay running in the background
  - ○ (#6490) Error when attempting to display Note content
  - ○ (#6507) Notes: Multi-line tables are not exported to HTML properly
  - ○ (#6508) Popup menus that open from toolbar buttons and icons are not aligned with the button
  - ○ (#6509) Increased background CPU usage due to unnecessary rendering of notes

Version 11.0.69
April 2, 2020
- New Features
  - ○ (#6493) Shift+Enter for multi-line bullets, headings, etc
  - ○ (#6494) Multi-line table cells (`Enter` inside of a table cell creates a new line within the cell.)
  - ○ (#6495) Support for <br> tags forcing a line break within a single physical line
- Fixes
  - ○ (#5291) TPD text/color switcher has unexpected results on thoughts that are typed
  - ○ (#5304) Windows, dual screens: Displays at different scales can cause dialogs to appear off-screen
  - ○ (#5807) Windows, dual screens: Context menus are not scaled correctly
  - ○ (#5808) Windows, dual screens: Existing thought list not showing

- ○ (#5809) Windows, dual screens: Drag to create a new child thought - no new thought name field appears
- ○ (#6019) Using the keyboard shortcut to delete a child thought while in outline view causes keyboard navigation to stop working
- ○ (#6474) Notes: Add toolbar button linking to Notes Markdown reference
- ○ (#6488) macOS: Notes: Cursor does not show when tab is moved between windows
- ○ (#6501) Notes: Copy/paste of multiple lines of text to/from a table should work as expected

Version 11.0.68
March 26, 2020
- • New Features
  - ○ (#3979) Keyboard shortcut for zoom in/out should work for notes when notes is focused
  - ○ (#6477) Pinch to zoom in/out of notes
- • Fixes
  - ○ (#6460) Notes: When converting from HTML, lines of dashes or underscores should be interpreted as horizontal rules
  - ○ (#6478) Notes: Zoom in/out commands should be the same as the plex zoom in/out commands
  - ○ (#6487) Notes: Failure to advance error when text is size is very large

Version 11.0.67
March 19, 2020
- • Fixes
  - ○ (#6465) Error while loading some notes (NoteType NRE)
  - ○ (#6466) Notes: ArgumentOutOfRangeException while updating toolbar status

Version 11.0.66
March 19, 2020
- • Fixes
  - ○ (#6268) Error caused by KezaSheet.LayoutLines
  - ○ (#6311) Unable to scroll through added users in the Brain access and Sharing window
  - ○ (#6383) Long Chinese thought names overflow the TPD text box and aren't completely visible
  - ○ (#6420) Notes: Pasting a YouTube link while manually writing Markdown link code causes error
  - ○ (#6430) Notes: When converted from V10, sometimes @@ symbols appear for checkboxes
  - ○ (#6435) Notes: Indented checkboxes from HTML notes don't get converted properly
  - ○ (#6437) Text boxes (such as Search) are very short when a single character is entered
  - ○ (#6440) Notes: If a Notes.md file is manually added to a thought folder, it is not interpreted correctly
  - ○ (#6442) Notes: When converting HTML, linebreaks that should not be removed sometimes are
  - ○ (#6443) Notes: Manually created checkboxes in HTML notes are not converted
  - ○ (#6455) Notes: Code sections do not display correctly when exported to HTML
  - ○ (#6456) Notes: Images from V10 notes notes are not visible when exported to HTML
  - ○ (#6457) Notes: When converting from HTML, indented titles should have `>` characters before the `#`, not after
  - ○ (#6460) Notes: When converting from HTML, lines of dashes or underscores should be interpreted as horizontal rules
  - ○ (#6461) Notes: When converting from HTML, dashes and underscores in link and image addresses should not be escaped
  - ○ (#6462) Notes: Deleting the entire text of a note can cause an error
  - ○ (#6463) Notes: When images are used as links, the next line's height is incorrect, images fail to wrap to the next line

Version 11.0.64
March 12, 2020
- • Fixes
  - ○ (#6425) Underlined and strikethrough text from v10 is not styled correctly in v11
  - ○ (#6428) Opening the thought properties dialog sometimes causes error
  - ○ (#6433) Inaccurate detection of failure to advance position when breaking line leading to error

Version 11.0.63

March 11, 2020
- New Features
  - (#6421) Notes: Export PDF - option to keep colors or use black text on a white page
- Fixes
  - (#6413) Conversion from html to markdown should escape dashes and underscores
  - (#6415) Select stock icon dialog error
  - (#6416) macOS: Select folder dialog errors
  - (#6419) Notes: Hang/Error when images are used as links or text follows image immediately
  - (#6422) Notes: Line spacing can't be set when decimal separator for locale is a comma
  - (#6424) Windows: Error viewing password-protected PDF attachment

Version 11.0.62
March 6, 2020
- New Features
  - (#6338) Thought icon should retain domain favicon for multiple URL attachments from same domain
- Fixes
  - (#6311) Unable to scroll through added users in the Brain access and Sharing window
  - (#6405) Windows: Crash during app initialization due to file permissions
  - (#6406) Error encountered during search
  - (#6410) Parsing certain markdown leaves app unresponsive

Version 11.0.61
March 5, 2020
- Fixes
  - (#5923) Copy as text outline with notes may not always contain the current changes to the active note
  - (#6288) Windows: Corner icon menu does not show in the correct location
  - (#6302) Notes: Font size in font selection box is very large when locale uses comma for decimal separator
  - (#6354) Notes: Chinese/Japanese/Korean should allow line breaks between most characters
  - (#6376) Only one cursor should show in Notes OR Search box, not both
  - (#6379) macOS: Brain Theme changes (colors etc) are not displayed immediately
  - (#6385) Notes: Line breaks should not happen between Markdown tags and text
  - (#6394) Notes: Chinese/Japanese/Korean extend beyond the margin
  - (#6395) Notes: Chinese/Japanese/Korean should allow line break after (but not before) `。` and `、`
  - (#6396) Notes: When there are line breaks between CJK characters, the background showing what is selected does not extend to the end of the line

Version 11.0.60
February 27, 2020
- Fixes
  - (#6358) macOS Mojave: Application will not start
  - (#6374) Do not create unnecessary modification logs

Version 11.0.59
February 26, 2020
- Fixes
  - (#6356) File attachments/notes not updated during sync

Version 11.0.58
February 25, 2020
- Fixes
  - (#6304) Commands from the context menu of TPD applied to wrong thought
  - (#6362) Missing word in description of `Open Folder` command
  - (#6365) License agreement references beta version

Version 11.0.57 - Official Release

February 24, 2020
- This release does not expire

Version 11.0.56 - Release Candidate
February 22, 2020
- Fixes
  - (#5979)   Notes: Support for backslash escape sequences
  - (#6285)   Pasting Local Thought URL into notes should link to the thought
  - (#6327)   Copy Thought and paste into notes of different brain should paste local thought link
  - (#6346)   Popup lists should show more items by default before showing a scrollbar
  - (#6347)   Converting some notes from HTML format may cause hang
  - (#6348)   macOS: No visual feedback on drag and drop while app is in the background
  - (#6340)   Issues when syncing as Reader
    - (#6341)   Unauthorized file deletion detected when syncing as Reader
    - (#6342)   Unauthorized attachment update detected when syncing as Reader
    - (#6344)   Changes are not reflected immediately when syncing as Reader
    - (#6345)   Removed file fails to delete when syncing as Reader

Version 11.0.55 (macOS)
February 19, 2020
- Fixes
  - (#6328)   macOS: Application will not start after reboot

Version 11.0.52 (Windows) / 11.0.53 (macOS)
February 17, 2020
- New Features
  - (#5734)   Notes: List of fonts can be browsed using `Next` and `Prev` buttons
- Fixes
  - (#4613)   macOS: High CPU usage when application is inactive (not syncing or animating)
  - (#5575)   Notes toolbar adjustments
  - (#6266)   macOS: In presentation mode, icon names are persistent
  - (#6296)   Notes: Pasting a thought should create a link to the thought
  - (#6302)   Notes: Font size in font selection box is very large
  - (#6305)   Text at the bottom of the Font window that shows the Font count is not visible in Dark Mode
  - (#6318)   Enable display of remote brains upon account creation
  - (#6319)   macOS: Notarization is failing

Version 11.0.51
February 10, 2020
- Fixes
  - (#4098)   Reports can return forgotten Thoughts
  - (#6260)   Windows: Notes: Scroll using page down does not work correctly after pasting a large amount of text
  - (#6271)   Notes: Pasting a link to an image that does not exist causes poor performance
  - (#6286)   When adding an attachment, only verify file access before move/copy operation
  - (#6294)   macOS: Notes: Page up/down should move cursor if option/alt key is pressed
  - (#6306)   macOS: Poor performance - UI sometimes responds slowly or lags

Version 11.0.50
February 5, 2020
- New Features
  - (#6272)   Custom brain icons
- Fixes
  - (#4206)   Windows: Application icon pinned to taskbar breaks after application update
  - (#5794)   Quick start brain does not show videos properly
  - (#5927)   macOS: OneNote links result in unexpected error
  - (#6134)   Windows: The `Menu` key should open the context menu for the notes
  - (#6202)   Notes: Pasted URL is broken if web page has square brackets in title

- ○ (#6203)   Notes: Some YouTube URLs pasted into notes are missing thumbnails
- ○ (#6236)   Notes Editor: Open in Browser should show selected fonts and image assets as expected
- ○ (#6261)   Crash when using keyboard shortcut for Switch Name and Label
- ○ (#6270)   Notes: Broken image links should show a placeholder image
- ○ (#6279)   Windows: Toolbar icons in dark mode are not high resolution
- ○ (#6281)   Media player visual tweaks
- ○ (#6282)   Windows: When display is set to 150% and dark mode is on, toolbar icons appear as squares
- ○ (#6283)   Windows: Color chooser swatches have white squares in the center
- ○ (#6292)   `iframe` content in HTML notes should convert to links in markdown

Version 11.0.48
January 24, 2020
- • New Features
  - ○ (#6241)   Auto play preference for audio/video files
- • Fixes
  - ○ (#5756)   Notes: Span end tag `}:` is drawn using the wrong colors
  - ○ (#5901)   TheBrain does not launch on macOS Catalina for some users
  - ○ (#6058)   Error when pasting large content into notes
  - ○ (#6084)   Startup is slow on first run after update to newer version
  - ○ (#6107)   CF_HTML header text should not be included when pasting after "Copy as HTML"
  - ○ (#6124)   Links sometimes disappear from the display after being modified
  - ○ (#6141)   Change wording of the TB prompt when opening an unsupported future version Brain
  - ○ (#6142)   Pasted image attachments are always saved as PNGs, making the files very large sometimes
  - ○ (#6178)   OutOfMemoryException when extracting a very large downloaded Brain
  - ○ (#6184)   Notes: Cursor moves to bottom of document when navigating in a table
  - ○ (#6187)   macOS: PDF shows raw formatting in embedded viewer when PDF title has special characters
  - ○ (#6195)   Unsafe character in URL attachment name only after link is renamed
  - ○ (#6207)   Attachment with no extension showing as embedded media
  - ○ (#6212)   Windows: Sometimes copying text causes error related to clipboard
  - ○ (#6213)   Check for newline characters in names during import
  - ○ (#6216)   Helvetica is listed multiple times in Brain Theme Plex Font
  - ○ (#6221)   Localization issues
  - ○ (#6232)   Windows: Various errors related to clipboard access
  - ○ (#6239)   Custom thought context menu commands list does not scroll
  - ○ (#6242)   Enable hardware-based customization
  - ○ (#6246)   Copy web attachment should also copy URL as text to clipboard
  - ○ (#6247)   Brain access and sharing dialog layout issue
  - ○ (#6248)   Undo of rename URL attachment results in error
  - ○ (#6249)   Folder attachments cannot be copied from TheBrain and pasted to the desktop
  - ○ (#6256)   When content area is hidden, do not auto-play videos
  - ○ (#6258)   Windows: Improve handling of multiple application instances
  - ○ (#6262)   Error converting HTML to MD

Version 11.0.47
January 13, 2020
- • New Features
  - ○ (#6163)   Clear inheritable properties of a thought command (reverts to setting from type)
  - ○ (#6172)   Support for .mov video files
- • Fixes
  - ○ (#4206)   Windows: Application icon pinned to taskbar breaks after application update
  - ○ (#6017)   Undo of wallpaper change should add/delete the wallpaper image accordingly
  - ○ (#6076)   Error: Sync already initialized
  - ○ (#6130)   Resend activation link missing on desktop
  - ○ (#6136)   Media attachments can't be deleted/moved
  - ○ (#6147)   Plex and Notes swap icon does not work until Notes/Plex is hidden and shown again

---

- ○ (#6160) Dropping a URL in the content tab area does not attach it to the Thought
- ○ (#6173) Media player commands activated via keyboard shortcut cause error if media player is not active
- ○ (#6185) Default Themes - Note style doesn't update immediately
- ○ (#6202) Pasting URL in notes is broken if web page has square brackets in title
- ○ (#6208) Attempting to undo after attaching an internal PDF file causes error
- ○ (#6211) When creating a Brain Backup, TB should inform users of invalid file names
- ○ (#6217) Make "time too different" errors less prominent

Version 11.0.46
December 13, 2019
- • New Features
  - ○ (#2821) Prioritize and separate user file attachment templates from templates
- • Fixes
  - ○ (#6122) Unable to move a PDF file attachment out of TheBrain using "Move file out of Brain" command if the PDF is still loaded in the previewer
  - ○ (#6171) Windows: Performance of entire application is increasingly degraded as run time increases

Version 11.0.45
December 13, 2019
- • New Features
  - ○ (#2651) Windows: The `Menu` key should open the context menu for the focused thought
  - ○ (#3935) Option to not display Brain name in Tabs
  - ○ (#5993) Embedded player for video and audio file attachments
  - ○ (#6086) Paste of wallpaper via a copied image file
  - ○ (#6111) Copy from BrainBox (rather than Move)
  - ○ (#6135) Windows: Improved performance when `Compact Title Bar` is enabled
- • Fixes
  - ○ (#4902) No preview for JPG attachments
  - ○ (#5249) Some image files do not load when their extension is .jpg but do load if renamed to .jpeg
  - ○ (#5481) JPG image attachments preview displays incorrectly
  - ○ (#5912) In readonly mode, should not be able to edit notes/attachments
  - ○ (#6149) Windows: Portrait images with extension .jpeg do not show in correct orientation
  - ○ (#6150) macOS: Selecting a theme in the Brain Theme window results in an error
  - ○ (#6151) Windows: Link label text appears in the wrong position in v11
  - ○ (#6161) Paste icon command exception checking if clipboard text is file path

Version 11.0.44
December 10, 2019
- • New Features
  - ○ (#3058) Empty the internal trash to the OS trash
  - ○ (#4000) Add "Move" option when pasting an existing URL or external file
  - ○ (#4057) Separate preferences for Notes and Events indicators
- • Fixes
  - ○ (#3638) Disabled `Paste` command should show in context menu
  - ○ (#5666) TB11: Drag emoji through single-line text box in Thought properties name field drops emoji into name and replaces entire string
  - ○ (#5912) In readonly mode, should not be able to edit notes/attachments
  - ○ (#6093) Clicking on a search result for an event with no associated thought should not activate a thought
  - ○ (#6121) Selection context menu: `Set Type` should be before `Set Tags`
  - ○ (#6125) Windows: After using the report's time popup menu, the plex stops responding
  - ○ (#6129) UI of prompt for already existing external file/URL attachment should match UI for already existing internal attachment
  - ○ (#6144) Initial events indicator setting should be set based on prior notes indicator setting
  - ○ (#6145) macOS: YouTube video should stop playback (esp. audio) when video attachment no longer showing

Version 11.0.42
December 3, 2019
- New Features
  - (#4238) URL attachments context menu command: `Open Using Wayback Machine`
  - (#5939) Preset date ranges for reports
  - (#6102) Make thought and link types uncheckable, consistent with tags
- Fixes
  - (#3963) Notes: Images aren't inserted at dropped location when dragging in as a file from Finder/ Explorer
  - (#4422) Windows: OutOfMemoryException related to animated toolbar buttons
  - (#5556) Invalid attachment name handling needs improvement
  - (#6094) macOS: Changing colors while a non custom theme is selected causes TheBrain crash
  - (#6112) Windows: OutOfMemoryException in KezaToolbar
  - (#6119) Animations for buttons, notifications, etc should not use bespoke timers
  - (#6120) macOS: Utilize fewer CPU resources when idle

Version 11.0.41
November 27, 2019
- New Features
  - (#6046) Notes: Copy images to clipboard as images
- Fixes
  - (#5281) Notes: Links to thoughts in a copied/duplicated Thought do not work
  - (#6101) Windows: Logo is the wrong scale on the login window

Version 11.0.40
November 26, 2019
- Fixes
  - (#6083) Failure to find Brain key during RestoreWindowState

Version 11.0.39
November 25, 2019
- New Features
  - (#6088) Option to suppress newer data version warning
- Fixes
  - (#1939) Right-click context menu in Selected Thoughts should show correct context menu
  - (#4544) Search should not find links whose thoughts are forgotten/private if those thoughts are filtered from display
  - (#5362) Windows: "Maximized" window doesn't fill screen when scale is >= 200% and compact title bar is on
  - (#5686) Windows: Difficult to resize window when compact title bar is enabled
  - (#5876) Windows: If closed while maximized, next launch opens in a maximized state but not covering the full screen
  - (#6025) Shift+Click on search result causes multiple focus rectangles to be shown
  - (#6040) Changing colors while a non custom theme is selected causes error
  - (#6084) Startup is slow on first run after update to newer version
  - (#6090) Update sample text for notes theme to describe how to make changes
  - (#6096) Brain commands (Rename, Statistics, Access and Sharing, etc) may not apply to the currently open brain

Version 11.0.38
November 20, 2019
- New Features
  - (#2542) Preferences > Show wander delay setting in seconds
  - (#6061) New notes editor command to bind to shortcut for Center Cursor in Visible Area
  - (#6062) Notes: Allow theme editor to toggle Italics for paragraph and heading styles
- Fixes
  - (#6048) Windows: Startup fails - event logs mention kernelbase.dll
  - (#6052) Content does not default to Notes if Attachments as List is active

- ○ (#6066) Logging is needed to better track startup time
- ○ (#6067) Export dialog causes error when current note style is "Foundation" or other new style name
- ○ (#6068) Remove old notes code
- ○ (#6072) Increase logging of file access errors during export/sync
- ○ (#6075) Export > Folders should export notes as Markdown
- ○ (#6078) Text in export, import, and tips should be readonly
- ○ (#6081) macOS: Help > Show Tips does not work

Version 11.0.37
November 15, 2019
- • Fixes
  - ○ (#2594) When context sensitive names are disabled via preferences, existing displayed thoughts are not updated until the active thought is changed.
  - ○ (#6024) If tips window is already open, show tips command should not do anything
  - ○ (#6057) Attempting to open a remote Brain results in an error
  - ○ (#6059) Required authentication produces an error

Version 11.0.36
November 14, 2019
- • New Feature
  - ○ (#5969) Auto select first attachment when opening list of attachments
- • Fixes
  - ○ (#2645) Setting background color should disable wallpaper
  - ○ (#5743) Check min version required by brain database when opening
  - ○ (#6047) Dismissing the Link Properties dialog leaves empty box and plex stops responding

Version 11.0.35
November 13, 2019
- • New Features
  - ○ (#2077) Notes: Ability to resize images for videos
  - ○ (#4419) Rename URL to non-HTML content using filename
  - ○ (#6041) Notes: `Select All` command in context menu
- • Fixes
  - ○ (#3174) macOS El Capitan: PDF preview does not work
  - ○ (#3436) In the Notes Editor, Shift+Return can remove a space
  - ○ (#3446) AttachmentWebView: right-click Context should work correctly
  - ○ (#3491) macOS: Notes: Backspace of bullet makes cursor jump
  - ○ (#3669) Notes Editor - Cursor jumps away from blank line created with Shift+Enter
  - ○ (#4516) Japanese text converts to underscore lines instead of kanji
  - ○ (#5484) Switching to italics mode while typing on the same line in notes switches back to normal on next word
  - ○ (#5715) Deleting an attached PDF does not work if TheBrain is/was previewing that attachment
  - ○ (#5772) Notes: Text is missing from printed output/PDF export if last paragraph straddles the page boundary
  - ○ (#5837) Windows: Plex not responding after deleting a link via link properties dialog
  - ○ (#5892) Tips windows not sized properly for several seconds
  - ○ (#6021) Default state for metadata overlay on images should be hidden
  - ○ (#6023) Notes: Copy as HTML/Copy as Text are disabled for MD files that are not notes
  - ○ (#6026) Keyboard shortcuts for indent and outdent are not displayed if any custom shortcuts have been set
  - ○ (#6027) All command names should be capitalized using title case
  - ○ (#6028) Unable to change Notes theme to black text white page when in dark mode
  - ○ (#6029) Paste without formatting always pastes into the notes editor even if focus is elsewhere
  - ○ (#6034) Rich clipboard content should not be pasted into simple textboxes
  - ○ (#6035) Text editor should ignore MD table tags
  - ○ (#6036) Brain opening is slow to complete
  - ○ (#6042) Notes theme sync causes error
  - ○ (#6043) Windows: List of colors in brain theme dialog moves as you interact with it

Version 11.0.34
November 11, 2019
- Fixes
    - (#6009) Undoing initial Brain Theme should revert to default Theme
    - (#6018) Clicking on avatar causes an error

Version 11.0.33
November 7, 2019
- New Features
    - (#2759) Image preview > Context menu > Copy as Image
    - (#5870) Notes: `Edit Link` context menu command
- Fixes
    - (#1811) Starting Thought in a new brain can be removed with Edit > Undo
    - (#3873) Notes: Drag and drop image directly from Chrome should embed/insert as expected
    - (#5915) Toggling siblings on immediately after navigation does not work
    - (#5949) Notes: Chinese text sometimes does not render correctly
    - (#5955) Cannot access a disposed object (DialogBackend)
    - (#5989) macOS: Error encountered when quitting the app
    - (#5990) Windows: Keyboard shortcuts should not be present for macOS commands (Application > Hide Others and > Hide TheBrain)
    - (#5997) Forget/Delete context menu command from a report is disabled when keyboard focus is notes
    - (#5999) Windows: Alt+F4 closes all windows instead of just the current window
    - (#6000) Notes toolbar layout firing when notes are not visible, causing many log entries
    - (#6005) Repeated notes toolbar error on startup
    - (#6007) Error when replacing keyboard shortcut after search
    - (#6012) Notes: Images pasted from files on Windows use backslashes in path, preventing display on non-Windows clients
    - (#6014) macOS: Drag and drop of emoji into an edit box results in extra emoji

Version 11.0.32
November 6, 2019
- New Features
    - (#5994) Additional color settings for notes (background and edge colors)
- Fixes
    - (#5837) Plex not responding after deleting an imported Link Type
    - (#5963) Search tokens may be rebuilt when not necessary ("First-Use Preparation" shows when opening)
    - (#5984) Windows: Text is not always copied exactly
    - (#5991) macOS: Should not select a space when using Option+Right Arrow
    - (#5992) Auto sync status incorrectly shows as disabled
    - (#5996) macOS: Application not responding after unplugging and plugging external displays
    - (#6000) Notes toolbar layout firing when notes are not visible, causing many log entries
    - (#6002) Clicking on plex does not set focus to search box if a Bluetooth keyboard is in use

Version 11.0.31
October 25, 2019
- New Features
    - (#2543) "Steal" keyboard shortcut if typed combination is currently in use
    - (#2573) Toggle siblings keybinding
    - (#5972) Ability to select and copy text from the PDF previewer
- Fixes
    - (#3357) Importing MindManager files fails
    - (#3818) Hidden prefix should be removed from type changes message in history of thought
    - (#5975) Crash when copying text in notes

Version 11.0.30

October 24, 2019
- New Features
  - (#2891) Add "Last Sync Date" to Statistics in Brain list
  - (#3497) Arrange thoughts by date (oldest first)
  - (#5916) Support for delete by word (Windows: Ctrl+Backspace/Delete, macOS: Cmd/ Alt+Backspace/Delete)
  - (#5929) Sort by context sensitive name
  - (#5931) Activate a thought quickly by typing its name and pressing enter without waiting for results to appear
- Fixes
  - (#2498) Notes: Superscript and subscript can be on at the same time
  - (#3817) Hidden prefix should be removed from type name on type button in TPD
  - (#5466) Home Thought can be deleted from the report
  - (#5661) Windows: Unable to delete Thoughts with an internal folder if Brains data folder is not on C drive
  - (#5897) Notes: In dark mode, a "ghost" image of the text prior to the most recent change is visible
  - (#5911) Images inside of MD files need updated filenames to match GUID on assign brain GUID
  - (#5926) Extra notes interrupt plex keyboard navigation
  - (#5934) Text in font selection dialog is unreadable in dark mode
  - (#5941) Do not open .md and .txt files when they are created from templates
  - (#5943) macOS: No selected theme causes error on export
  - (#5944) It should not be possible to change the keyboard shortcuts for some commands
  - (#5947) Toolbar button tooltips/hints do not update keyboard shortcuts immediately
  - (#5948) Windows: Keyboard focus is lost when search results display
  - (#5950) Move right by one word (Ctrl/Alt+Right) should move to the start of the next word
  - (#5962) Local-only user only has read-only access
  - (#5970) Windows: Exception in System.Windows.Media.Fonts
  - (#5973) Stack overflow when saving a note and "Update on hover" is enabled
  - (#5974) macOS: High CPU usage and suboptimal UI responsiveness

Version 11.0.29
October 16, 2019
- New Features
  - (#3523) When internal browser address is selected, automatically select it
  - (#4353) Better preservation of formatting on copy/paste from Google docs to TheBrain
  - (#5321) Accept URLs using protocols containing numbers
  - (#5415) Windows: Updated internal browser to Chromium 75
  - (#5490) Notes: Unable to paste a picture copied as a thought attachment
  - (#5804) Notes: Paste without formatting
  - (#5920) Windows: Enable use of `Alt` as a standalone modifier for keyboard shortcuts
  - (#5922) Preferences tab navigation via Ctrl+Tab and Ctrl+Shift+Tab
  - (#5924) Notes: Copy as text
  - (#5925) Notes: Copy as HTML
- Fixes
  - (#3877) Mac: Text/space is automatically highlighted on right-click in Notes.
  - (#4240) macOS: Can't paste Chinese with Cmd+V shortcut
  - (#4288) Wingdings do not paste into thought names or notes
  - (#4394) Line breaks inserted after hyphens when copying to email
  - (#4512) Blank spaces when pasting text outline with Danish letters in notes
  - (#4673) Resizing TheBrain window when YouTube video is playing - cause freeze / crash
  - (#4829) Emoji options in the Windows keyboard shortcut list
  - (#4859) Windows: Copy of image file and paste into notes fails
  - (#4874) Possible errors when opening attachments
  - (#4972) Windows: right-clicking on emoji in notes editor causes crash
  - (#5024) Pasted text from email/Evernote in notes removes spaces
  - (#5038) macOS: Cut and paste inserts extra line
  - (#5044) Undo is not available after pasting into notes
  - (#5248) Separators in date/time format for notes are changed

- ○ (#5277)   Notes: Can't paste after shift+enter
- ○ (#5347)   Amazon web pages no longer load in embedded browser
- ○ (#5511)   Renamed URL reverts back to original name once a Thought is created from it
- ○ (#5550)   Notes Editor: Insert Link to Thought can create a double link
- ○ (#5917)   Edit menu undo and redo commands do not apply to the notes editor
- ○ (#5918)   Preferences > Keyboard issues
- ○ (#5919)   Windows: Default back/forward shortcuts should be Alt+Left/Right
- ○ (#5921)   Windows: Default open properties shortcut should be Alt+Enter
- ○ (#5928)   Notes toolbar buttons appear in a vertical column
- ○ (#5932)   Unindenting a numbered list moves cursor to next line when at end of line
- ○ (#5933)   Indent of numbered list item over 9 puts cursor in wrong place
- ○ (#5938)   Remove the keyboard shortcut for Expanded View

Version 11.0.28
October 11, 2019
- • Fixes
  - ○ (#4208)   macOS: Double click title bar does not follow action set in System Preferences > Dock
  - ○ (#5900)   Attaching a URL to an existing Thought breaks the url
  - ○ (#5913)   macOS: Clicking tag button from create thought dialog sometimes causes error

Version 11.0.27
October 11, 2019
- • Fixes
  - ○ (#5907)   Assign Brain new GUID does not update GUIDs in brain links in markdown notes
  - ○ (#5909)   Windows: Missing dependencies on some computers
  - ○ (#5910)   Additional Markdown files are treated as plain text

Version 11.0.26
October 10, 2019
- • New Features
  - ○ (#5822)   Integrated ability to edit text files
- • Fixes
  - ○ (#3873)   Notes Editor: drag and drop image directly from Chrome should embed/insert as expected
  - ○ (#4588)   Bulleted lists cannot retain Bold formatting
  - ○ (#5057)   Unordered list does not retain formatting when using arrow keys
  - ○ (#5411)   macOS: Remove temporary view fix
  - ○ (#5580)   Remove formatting button does not affect Super/Subscript
  - ○ (#5801)   TheBrain 11 does not start on some Windows environments
  - ○ (#5873)   Windows: Space added in search box when selecting a result using the `Enter` key
  - ○ (#5889)   Spellcheck should be disabled for readonly controls (tips, export, etc.)
  - ○ (#5890)   macOS: HintWindows do not display (recent changes details and icon names)
  - ○ (#5893)   CJK character not displaying correctly in TheBrain's txt file previewer
  - ○ (#5894)   Line breaks should be allowed after semi-colons
  - ○ (#5896)   Multiple lines with checkboxes can't be toggled if some but not all boxes are checked
  - ○ (#5897)   macOS: Notes: In dark mode, a "ghost" image of the text prior to the most recent change is visible
  - ○ (#5898)   Windows: The last search query should be pre-selected when it auto populates
  - ○ (#5899)   Clear formatting should remove paragraph type (bullets, checkboxes, headings, etc)
  - ○ (#5905)   First open of a brain after startup causes an error
  - ○ (#5906)   Tilde should not be interpreted as subscript when at the start of a word

Version 11.0.23
October 7, 2019
- • New Features
  - ○ (#1165)   Tab key navigation for all dialogs
  - ○ (#2695)   Block quotes using standard Markdown `> ` prefix
  - ○ (#3716)   Search option in stock icon library
  - ○ (#3965)   Notes: Enable copy/paste, drag/drop multiple images at a time

- ○ (#5877) Show name of stock icon when hovering over it in the icon selection dialog
- ○ (#5883) New menu command: Options > Check Spelling as You Type
- Fixes
  - ○ (#2081) Right click in Notes should activate editor
  - ○ (#2474) Last character of long, new thought name cannot be seen
  - ○ (#2810) macOS: Emoji & Symbols popup shortcut does not work in some places.
  - ○ (#4459) Windows: Relative position of IME is not correct and changes with scale
  - ○ (#5136) If preference on drag is set to move, you cannot drag attachments from one thought to another
  - ○ (#5679) Arrange Thoughts by Date Activated not working
  - ○ (#5746) In dark mode notes and edit boxes should invert
  - ○ (#5762) Windows: Unable to rename/delete/cut/move internal and external PDFs while previewing
  - ○ (#5834) When a Brain is opened, set keyboard focus to search
  - ○ (#5842) Text at the bottom of the Brain Access and Sharing window does not wrap
  - ○ (#5878) Windows: Exception when renaming an attachment that is in use
  - ○ (#5880) Windows: Sometimes can't delete thought with PDF attached
  - ○ (#5881) When application is opened, set keyboard focus to search box
  - ○ (#5882) Spellcheck cannot be permanently disabled

Version 11.0.22
October 2, 2019
- Fixes
  - ○ (#5863) Continuous errors when "update displayed content on hover" is enabled

Version 11.0.21
October 2, 2019
- New Features
  - ○ (#2243) Integrated editing and preview of markdown attachments (not just notes)
  - ○ (#4601) Multiple notes per thought/link
  - ○ (#4725) Preview of .json files
  - ○ (#5815) Notes: Show character count when hovering over word count
  - ○ (#5844) Redesigned UI for adding attachments
- Fixes
  - ○ (#4364) Text pasted into a code area should retain all spacing and text
  - ○ (#5461) Thought's multiple attachment window does not scroll when using down arrow to traverse through attachments
  - ○ (#5545) Text pasted in a Thought's Notes not responding to user edits
  - ○ (#5735) Cannot right click on a hidden private Thought from a report
  - ○ (#5766) Crash when creating a new thought from the timeline in a Read Only Brain
  - ○ (#5768) Notes compact toolbar preference does not update immediately
  - ○ (#5777) Icon categories are not in alphabetical order
  - ○ (#5795) Right click on attachment tab when attachment as lists acts as if it is a right click on background area
  - ○ (#5797) Create event dialog on the Timeline is off-screen
  - ○ (#5802) Windows: Startup is slow (splash screen stays on for a long time)
  - ○ (#5812) Notes: Word count is inaccurate
  - ○ (#5814) Error when hovering over BrainBox icon or clicking avatar if window has no tabs
  - ○ (#5816) Error encountered when window restoration state is corrupt
  - ○ (#5820) Double clicking on Note/Attachment Tab does not maximize
  - ○ (#5832) Windows: Chinese IME does not work in notes
  - ○ (#5841) macOS: When naming a Thought, Command-J will add :-: and --: to the thought name
  - ○ (#5847) Notes: Print/Export to PDF fails when a table is present
  - ○ (#5849) Toggling of word count does not work until resize or reload
  - ○ (#5850) Keyboard shortcuts for notes should not do anything if note is not focused
  - ○ (#5852) Sometimes, the keyboard focus is set in notes without the hidden tags being displayed
  - ○ (#5854) Windows: Text input issues
    - ▪ (#5800) Windows: Korean IME does not work in notes
    - ▪ (#5833) Windows: Emoji keyboard does not add emoji

- ▪ (#5855) Windows: `AltGr` modified key presses are ignored
- ▪ (#5856) Windows: Dictation does not work
- ○ (#5859) An error is raised when attempting to log in with invalid credentials
- ○ (#5860) Log contains inaccurate messages about attachment search
- ○ (#5861) Search for internal files and notes does not work if Brains folder capitalization has been changed
- ○ (#5862) On high DPI screen, IME appears in the wrong location

Version 11.0.19
September 24, 2019
- • Fixes
    - ○ (#5779) Brain icons missing from icon library
    - ○ (#5786) macOS: Text entry field for tags/types popup from toolbar is squished
    - ○ (#5787) Windows: Checkboxes in notes cannot be checked
    - ○ (#5788) Windows: CKJ characters copied from notes get corrupted
    - ○ (#5791) Selecting a font does not always work (wrong font in tag)
    - ○ (#5798) Windows 7: Error messages on startup and during interaction due to missing emoji typeface

Version 11.0.18
September 23, 2019
- • Fixes
    - ○ (#5767) Notes toolbar's "More Notes Editor Actions" button causes error
    - ○ (#5782) If focus is set to notes by clicking below the note in the grey area, the hidden tags are not shown
    - ○ (#5783) Bullets and other lists should not be indented when inside of a table
    - ○ (#5784) Notes toolbar does not wrap icons properly
    - ○ (#5785) Dragging above the top of the document should move the cursor to the start of the document

Version 11.0.17
September 20, 2019
- • Fixes
    - ○ (#5773) Non-breaking spaces are flagged as spelling mistakes
    - ○ (#5781) Setting justification on a note without a theme causes an error

Version 11.0.15
September 19, 2019
- • Fixes
    - ○ (#5728) Drag to select of multiple right-justified lines can cause error
    - ○ (#5750) Thought title within Brain tab doesn't update when thought name changed
    - ○ (#5763) Issues with new icons conflicting with old icons
    - ○ (#5764) Icon directory can no longer be customized
    - ○ (#5765) Stock icons window should have a default category when in the Browse option
    - ○ (#5771) Applying formatting (bold/italic/etc) does not work - selection is lost
    - ○ (#5773) Non-breaking spaces are flagged as spelling mistakes

Version 11.0.14
September 18, 2019
- • New Features
    - ○ (#4469) New library of over 1,900 modern icons
    - ○ (#5660) Command to hide/show all Thought Types in a brain at once
    - ○ (#5760) Icon discovery interface including browsing, suggestions, recent icons, and search
- • Fixes
    - ○ (#1544) ThirdPartyNotices.txt should be included by installer in root folder of application
    - ○ (#3332) Select Stock Icon can be slow to load
    - ○ (#4208) macOS: Double click title bar does not follow action set in System Preferences > Dock
    - ○ (#5392) Read-only access user should not be able to make any changes

- ○ (#5426) macOS: Rotated text in plex and timeline does not show correctly
- ○ (#5536) Markdown notes are not counted distinctly from internal files in Statistics dialog
- ○ (#5647) macOS: TB11 Desktop Wallpaper scaling issue
- ○ (#5719) New note content is not showing up in search results
- ○ (#5720) Unable to delete an attachment, while BrainBox "Add attachment" window is open
- ○ (#5726) Changing justification on a heading centered by the theme causes error
- ○ (#5728) Drag to select of multiple right-justified lines can cause error
- ○ (#5732) notes.md file should not show in list of attachments when clicking on thought icon
- ○ (#5737) Cannot set heading centered by theme to left justified
- ○ (#5740) macOS: Double click in plex maximizes window
- ○ (#5744) Search box starts off thin
- ○ (#5751) Windows: Can't scroll areas that should be scrollable (lists of thoughts, etc)

Version 11.0.13
September 9, 2019
- • New Features
  - ○ (#5644) Notes: Set custom font family for selected text
  - ○ (#5727) Set justification of table column by adding justification prefix to cell in header row
- • Fixes
  - ○ (#5576) Tables in notes can only be left justified
  - ○ (#5577) Checkboxes, bullets and numbered lists in tables
  - ○ (#5681) Notes: Show local fonts only if cannot download list of fonts
  - ○ (#5711) Notes: printing should set foreground to black and background to white
  - ○ (#5717) Deleting the content of a note should delete the notes.md file
  - ○ (#5718) Notes: Export to PDF when page color is not white leaves white at top and bottom of page
  - ○ (#5721) Windows: Extra unused space in TPD
  - ○ (#5722) Print button in Notes Toolbar is not working
  - ○ (#5723) Note Font previews all look the same
  - ○ (#5724) Frequent crashes after customizing my Note Fonts
  - ○ (#5725) Clicking below a short note in the grey area should set focus to notes
  - ○ (#5729) Column widths are not wide enough when a table cell includes a bullet/checkbox/numbered list
  - ○ (#5731) Bullets and checkboxes do not render if the first word after the bullet is too long to fit on the line

Version 11.0.12
September 5, 2019
- • New Features
  - ○ (#3868) HTML file attachment should preview in built in browser
  - ○ (#5685) Save notes before crashing
  - ○ (#5691) Consolidate all notes preferences into a single preferences tab
- • Fixes
  - ○ (#5568) Drag and drop of an image from Google images into notes causes crash
  - ○ (#5581) Insert hyper link in notes should add URL Name/Title
  - ○ (#5582) Windows: Find and Replace in Notes - find/replace text boxes do not render
  - ○ (#5632) Notes are not saved until a new thought is activated
  - ○ (#5637) Can't scroll large Brains Thumbnail List
  - ○ (#5695) Unable to copy Thoughts using selection window
  - ○ (#5696) Paste url in Notes causes crash
  - ○ (#5705) Line spacing should not be applied to non-editor keza controls
  - ○ (#5706) Preferences can only be opened once
  - ○ (#5707) Windows: Presentation mode causes TheBrain to crash
  - ○ (#5716) macOS: Mouse drag operations don't work (resize splitter, drag and drop of tabs, etc)

Version 11.0.11
August 29, 2019
- • New Features
  - ○ (#5688)   Plex thought sorting: (The) Beatles should sort with B bands, not T bands

- Fixes
  - ○ (#5309) Upgrade notification sometimes ignores "Do not remind me" checkbox
  - ○ (#5369) Reports time option set to bad date

Version 11.0.10
August 29, 2019
- New Features
  - ○ (#3414) Saved Brain Theme should also save a Custom Notes Style
  - ○ (#4264) Copy text style/format into notes
  - ○ (#4713) Search web command auto-fills with selected text in notes
  - ○ (#5643) Support for SVGs in notes
  - ○ (#5664) Preferences for new editor
  - ○ (#5689) Editable Notes Styles
- Fixes
  - ○ (#1436) When docking a floating tab, the resulting tab has the compact style toolbar
  - ○ (#2704) Notes Editor - Custom font color is not saved
  - ○ (#4497) Windows: Note menu selections do not work if you are clicking over an open Report
  - ○ (#4521) Note icon is not always removed after the note content is deleted
  - ○ (#4570) Notes Editor: Paste text after a Shift+Enter (single space return) does not work
  - ○ (#4729) Improve user experience of notes editor initialization
  - ○ (#5337) Tags with hidden ordering number do not have checkmark in selection dialog
  - ○ (#5555) Toggling Forgotten Thoughts on/off makes a Type that was not marked "Visible When Parent of Active" re-appear
  - ○ (#5565) Adding an attachment from BrainBox using the "Add Attachment" window, causes other attachments' menu options to be grayed out
  - ○ (#5574) Images that are in a heading are not displayed correctly
  - ○ (#5588) Color selection popups do not have a background
  - ○ (#5617) Timestamp in YouTube URLs is ignored in the embedded player
  - ○ (#5631) Right click on attachment tab acts as if it is a right click on tab background area
  - ○ (#5651) Opening the thought type/tag popup more than once causes an error
  - ○ (#5667) Change wording in Import window - It is possible to undo an import
  - ○ (#5692) Text entry content is not vertically aligned
  - ○ (#5699) Windows: Notes toolbar does not adjust when content area is made narrower
  - ○ (#5700) Update content on hover results in a crash

Version 11.0.6
August 2, 2019
- Fixes
  - ○ (#5570) Notes: Print not working
  - ○ (#5573) Windows: Notes pane will not go narrower than the tool bar
  - ○ (#5633) Missing fonts caused bold/italic and styles not to render correctly in notes
  - ○ (#5615) Windows: Multiple displays with different scales cause title bar to be shown at the wrong scale

Version 11.0.5
August 2, 2019
- New Features
  - ○ (#4783) Keyboard shortcuts for zoom in/out, etc of PDF being previewed
  - ○ (#5607) Printing of PDFs
  - ○ (#5627) Redesigned PDF Toolbar
  - ○ (#5630) Accurate, high performance, PDF rendering
- Fixes
  - ○ (#3208) Buttons not available in PDF viewer depending on window size
  - ○ (#3255) macOS: Keyboard navigation conflicts with multi page PDF attachment
  - ○ (#3402) PDF preview does not work when filename includes accented characters
  - ○ (#4387) Cursor jumping in notes editor
  - ○ (#4535) Spell check reverts super/subscript text
  - ○ (#4939) Strange issue with PDF preview

- ○ (#5326) macOS: PDFs with unusual characters in their name do not display correctly
- ○ (#5512) Dragging Attachments issues
- ○ (#5543) Dragging URL to an existing Thought in Plex should not clobber thought name
- ○ (#5549) macOS: Closing a modal dialog causes a hard crash
- ○ (#5561) Windows: When only one tab and one window are open, clicking the tab causes the window to move
- ○ (#5562) Windows: Close tab button does not work
- ○ (#5572) Export to PDF does not work - results in crash
- ○ (#5578) Set text foreground/background color in notes not working
- ○ (#5583) Find and Replace - selection is not easily apparent
- ○ (#5589) Windows: Cannot click on buttons in toolbar (account/avatar, inbox)
- ○ (#5590) Windows: Floating a tab results in an error
- ○ (#5603) Previewing large PDF file attachments causes TheBrain to hang
- ○ (#5604) Tall images prevent pdf export and printing of that page
- ○ (#5610) Extra large PDFs fail to render
- ○ (#5621) Windows: Previewing a linked PDF attachment whose path does not exist anymore, causes hard crash
- ○ (#5629) macOS: Text and other content does not show inside of embedded browser

Version 11.0.3
June 26, 2019
- • New Features
  - ○ (#346)   Spellcheck for Thought names
  - ○ (#2058) Notes: Center/Right/Left paragraph alignment
  - ○ (#2201) Typing "[ ] " or "- " or "+ " at the start of a line creates a checkbox
  - ○ (#2167) Markdown support in notes
  - ○ (#2647) Do not hide notes toolbar when not in use
  - ○ (#3109) Support for tables in notes
  - ○ (#3782) Typing "* " at the start of a line creates a bullet list item
  - ○ (#4207) Improved find and replace UI, not covering notes content
  - ○ (#4372) Leave cursor on highlighted text after using Find/Replace
  - ○ (#4467) Notes: Inline code formatting
  - ○ (#5276) macOS: Option to make dark/light theme follow OS automatically
  - ○ (#5424) Brain Statistics: Show number of thoughts with assigned icons and total icon files size
  - ○ (#5434) macOS: Faster embedded browser
  - ○ (#5474) macOS: Improved keyboard access to dialog boxes via `Tab` key
  - ○ (#5558) macOS: Faster rendering and smoother animation
- • Fixes
  - ○ (#592)   Notes background color does not change sometimes
  - ○ (#1045) Numbered lists in Notes do not match font size of surrounding text.
  - ○ (#1443) Inserting a Checkbox in notes pushes an existing line down
  - ○ (#1571) Popup menus appear at cursor location instead of button location
  - ○ (#1638) Typing at the end of a pasted URL in Notes Editor is not intuitive
  - ○ (#1681) Mac: URL Link Icon Not Deleted when using ⌘+A to select all and delete
  - ○ (#1732) Mousedown in notes view sets focus
  - ○ (#1739) Notes find and replace native dialogs
  - ○ (#2106) Large notes can cause issues
  - ○ (#2114) Notes Editor: Issues with nested numbered lists and checkbox lists
  - ○ (#2287) Selecting multiple rows of an UL OL or checkbox and pressing tab/shift tab should indent/outdent
  - ○ (#2329) Refactor SpellChecker C#/JS API to check many words at once
  - ○ (#2499) Notes Editor - SuperScript appears wrong and cannot be removed
  - ○ (#2515) Notes Editor - Tables in Notes lose formatting when Spellcheck is on
  - ○ (#2726) Notes: Selecting a color does not work if no text is selected
  - ○ (#2806) macOS: Placeholder text for Thought Name is difficult to see on dark background Brains
  - ○ (#3161) Windows: NotesEditorWebView only initializes when the notes editor is visible
  - ○ (#3294) Notes: Cursor placement can affect functionality of buttons
  - ○ (#3333) Notes Editor typing delay

- ○ (#3334)   macOS: toggling Show Word Count removes cursor from notes window
- ○ (#3340)   Notes: Return is not inserted when a selection exists
- ○ (#3554)   YouTube links in Notes do not open properly in browser
- ○ (#3746)   Notes editor spelling error appearance
- ○ (#3769)   "Toggle Checkbox List" button in Notes not rendered properly.
- ○ (#3811)   macOS: When emoji icons are used for a Thought icon, sometimes they are drawn as two characters
- ○ (#3860)   Notes Editor: Spell check causes each run of multiple spaces to be converted to one space
- ○ (#3869)   Not possible to write under a horizontal ruler in Notes with list above.
- ○ (#3885)   YouTube videos in Notes are Low Res
- ○ (#3886)   Windows: Pasting a Vimeo URL into notes - video doesn't play
- ○ (#3917)   Notes: Cursor goes to invalid spot
- ○ (#3918)   Notes Editor: Paste URL into URL causes problems (paste URL twice)
- ○ (#3921)   Notes Editor: spell-check should not replace all instances of same misspelled word when user replaces one
- ○ (#3946)   Spaces or tabs at the start of a line in notes are lost
- ○ (#4136)   Text copied and pasted from notes into Gmail does not allow line breaks between words
- ○ (#4144)   Notes: Spell checking does not work when there are hyphens in words
- ○ (#4195)   Cursor jump when selection spans multiple lines
- ○ (#4229)   Notes - Right click directly to the right of a word auto selects the word
- ○ (#4292)   Notes Editor: Pasting a Local Thought URL onto selected text should use correct icon
- ○ (#4302)   Small Grey box appears/blinks in Notes area
- ○ (#4503)   Chinese input is adding characters in notes, rather than replacing
- ○ (#4684)   macOS: Notes: Dragging the icon to the right of a URL causes a crash
- ○ (#4915)   Until notes is displayed, sometimes "Waiting for editor to be ready" repeats in the log
- ○ (#4957)   Indented checkboxes do not work
- ○ (#4971)   Windows: Emojis should be ignored by spellchecker in the notes editor
- ○ (#5069)   Find and Replace dialog not keeping keyboard focus
- ○ (#5144)   URLs added to BrainBox get named properly but their name is lost on dragging to plex
- ○ (#5194)   Notes Code style removes indents
- ○ (#5386)   Letters with Spanish accents being incorrectly entered
- ○ (#5394)   Input lag on notes
- ○ (#5395)   Ctrl+B to bold text in Notes is not functioning properly
- ○ (#5402)   Notes periodically unresponsive
- ○ (#5487)   Find & Replace window in Notes is not dismissed when navigating to another Thought
