 - 18.9.3 Double Sampling Plan 537
 - 18.9.4 Acceptance Sampling by Variables 541
 - 18.9.5 Nomogram Method for Single Sampling Plan 542
- 18.10 Six Sigma 548
 - 18.10.1 Approaches for Six Sigma 549
 - 18.10.2 Types of Six Sigma Belts 551
 - 18.10.3 Benefits of Six Sigma 552

Objective Type Questions 553 *Questions* 556

19. MAINTENANCE PLANNING AND CONTROL

- 19.1 Maintenance Objectives 560
- 19.2 Types of Maintenance 560
- 19.3 Basic Reasons for Replacement (Need for Replacement) 561
- 19.4 Deterministic Type of Items that Deteriorate with Time 561
- 19.5 Replacement Problems 563
- 19.6 Simple Probabilistic Model for Items which Fail Completely 570
- 19.7 Determination of Maintenance Crew Size 575
 19.7.1 Crew Size Determination Using Analytical Queuing Model 575
 19.7.2 Simulation of Maintenance System 576
- 19.8 Reliability 581
 - 19.8.1 Reliability Improvement 582
 - 19.8.2 Reliability Calculations 583
 - 19.8.3 Reliability Program 585
- 19.8.4 Failure Modes, Effects and Criticality Analysis [FMECA] 586
- 19.9 Information System for Maintenance Management 587
 - 19.9.1 Benefits of Computerized Information System 587
 - 19.9.2 Procedures for Information System Design 587
- 19.10 Total Productive Maintenance 589
 - 19.10.1 Objectives of TPM 589
 - 19.10.2 Wastes Eliminated in TPM 589
 - 19.10.3 Equipment Maintenance Techniques 590
 - 19.10.4 Benefits of TPM 590
 - 19.10.5 Performance Measures of Maintenance System 591
 - 19.10.6 Pillars of TPM 591

Objective Type Questions 594 *Ouestions* 597 560-601

20.	MOD	ERN PRODUCTION MANAGEMENT TOOLS	602-663
	20.1	Just-In-Time Manufacturing 602	
		20.1.1 Introduction 602	
		20.1.2 Overview of JIT 602	
		20.1.3 Basic Principles 603	
		20.1.4 Universal Problem Solving Sequence 603	
		20.1.5 Push/Pull Production 603	
		20.1.6 Kanban Systems—Pull System 604	
	20.2	Computer Integrated Manufacturing and Flexible Manufacturing System	605
		20.2.1 Computer Integrated Manufacturing 605	
		20.2.2 Flexible Manufacturing Systems (FMS) 607
