PERFORMANCE MACHINE WHEEL PACKAGE WITH TIRE AND ROTORS

Performance Machine and Tucker Rocky/Biker's Choice® have taken away all the guess work and part number building when it comes to ordering wheels. Tucker Rocky now offers wheel packages that arrive at your dealership with tires and matching brake rotors mounted and ready to install. All you need to know are a few simple details and you can locate the kit part number quickly and place it on order. Performance Machine removes the liability of damaging a wheel during tire/rotor mounting and discs are installed, clocked and run-out checked at our factory at no charge to you. Wheels arrive, stock wheels are removed and a new PM set slides into place.

- No hassle, no mistakes
- All front wheel packages are dual disc
- 21 x 3.5 Front: package part number includes 21 x 3.5 front wheel, Metzeler 120/70B tire and two matching rotors.
- 17 x 6 Rear: package part number includes 17 x 6.0 rear wheel, Metzeler 200/55R tire

ROLAND SANDS DESIGN® DIESEL WHEELS PACKAGES

One of our most popular wheels, the Diesel is clean yet mean. We introduced the drilled rim lip speed dots on this wheel to help complement its simple design giving it just enough pop to be a stand out. The Diesel wheel will flow with whatever bike you put it on.

- CNC-machined from aluminum forging
- Smooth rolled rim lip with rim lip details
- Fully sealed, maintenance free; deep groove wheel bearings
- RSD logo badge
- Design-matched discs, pulleys and air cleaners available
- All front wheel packages are dual disc
- Includes 21 x 3.5 front wheel, Metzeler 120/70B tire and two 11.8 in. stainless steel matching rotors with replaceable outer bands

XTREME MACHINE WHEEL PACKAGE WITH TIRES AND ROTORS

Unique chrome and black wheels designed to make a Harley-Davidson® look cool. All front wheel packages are dual disc. Every wheel that rolls out is made with intelligence and pride. Choose from four best-selling designs and learn for yourself why Xtreme Machine's wheels are some of the most sought-after wheels for riders around the world. Each wheel is CNC-machined from the highest quality aluminum and put through rigorous testing.

- Design matched components for a complete custom look
- XM's innovative Xquisite finish is taken to the next level by polishing the exposed aluminum surface to a mirror-like finish
- Designed, engineered and manufactured right here in the USA

TIRES & WHEELS

PERFORMANCE MACHINE FRONT FORGED WHEELS

PM wheels are the finest wheels available to the motorcycle aftermarket. Innovative and stylish, the fit and function of PM wheels goes unmatched in the industry.

- Each PM wheel is tested in-house to stringent TUV standards
- Multiple sizes, fitments and designs
- Matching components
- Innovative, trademarked finishes
- Made in USA

Note: 14-17 FLH/FLT 21 in. wheels include fender risers. 14-17 FLH/FLT wheels will not work with O.E.M. rotors.

PERFORMANCE MACHINE FORGED TRIKE WHEELS

PM Trike wheels are the first of their kind to be manufactured for H-D® Trike applications and other select Trike manufacturers. PM's dedication to innovation has resulted in a wheel that will go unrivaled in design and function. PM starts with a specially designed wheel blank that was developed to be a perfect match to our forged motorcycle wheels. Using this exclusive forging, rather than a stock automotive forging, creates a more aesthetically appealing package for your three-wheeled ride. The wheel center is finished with a hub cap featuring a PM logo with machined openings to expose the lug nuts.

PERFORMANCE MACHINE ROTORS

Discs are designed and matched to wheel styles for a complete custom look. Two-piece design with replaceable outer band. Stainless steel offers optimal braking power with no squeal.

- Made in USA

Note: Paramount wheel design uses Heathen rotors. Will not work with stock H-D® wheels or 1999 and earlier stock H-D® calipers.

ROLAND SANDS DESIGN® FORGED WHEELS

Forged wheels place the highest material strength in the same direction as the operating load, creating a light and strong wheel. Contrast Cut finish starts with a polished wheel that has been black anodized, then recut to open up the design. Features a contour lip design for a graceful arc from spoke to tire.

- Made in USA by Performance Machine

ROLAND SANDS DESIGN® BRAKE ROTORS

Hutch Brake Rotors

High-grade 420 stainless steel replaceable outer bands and billet aluminum CNC-machined inner carriers. Cross drilled bands for increased ventilation blanchard ground bands ensure precise and even tolerance.

- 13 in. rotors attach via floating elements
- Front rotors are drilled for standard H-D® bolt pattern 3-1/4" x 5" x 5/16" and rear rotors are drilled for standard H-D® bolt pattern 3-1/4" x 5" x 3/8"
- All rotor carriers are counter bored with 2.22 in. ID
- A reducer spacer (Mfg/N 1710-0636) is sold separately for 1.985 in. ID
- Made in USA

Note: Wide rear wheels require use of rotors with 2.50 in. I.D. RSD rotors will fit 84-99 H-D® applications only if used in conjunction with Performance Machine calipers and RSD wheels. RSD rotors will not work with stock H-D® wheels.

ROLAND SANDS DESIGN® DIESEL BELT SPROCKET

CNC-machined for an exact match to the Roland Sands Design wheel lineup. Precision-shaped tooth profile is designed to fit the belt perfectly. Contrast cut finish starts with a polished pulley that has been black anodized, then recut to open up the design.

- Made in the USA by Performance Machine

Note: All applications require mounting bolts to be purchased separately.

XTREME MACHINE WHEELS

Radical and authentic, these wheels push the envelope in design and manufacturing. The Xtreme Machine brand represents the true form of self-expression and scream customization.

- Reaper and Stiletto wheels, pulleys and rotors are available in chrome and Black Cut
- Fierce and Launch wheels available in chrome, Black Cut and Black Cut Xquisite
- Black Cut wheels are black-anodized with machine-cut, non-polished exposed aluminum edge
- Black Cut Xquisite wheels are Black-Anodized with mirror polished aluminum edge
- Turbo wheels, pulleys and rotors are available in chrome and solid black-anodized
- ABS applications available; please contact your sales rep for details on models not shown
- Made in USA by Performance Machine
- 14-17 FLH, FLT 21 in. wheels include fender risers

XTREME MACHINE BRAKE ROTORS

420 stainless steel, ground finish. Two-piece machined aluminum rotor. Xtreme machine rotors will not work with O.E.M. H-D® wheels or 99-earlier calipers. Machined to match the pattern of Xtreme Machine wheels for a complete custom look. Black Cut rotors are black-anodized centers with machine-cut, aluminum edges. Black Cut Xquisite rotors are black-anodized centers with machine-cut and polished aluminum edges.

- Must use 6-piston Xtreme Machine or PM caliper

Note: FLT/FLH rotors will not fit 14-17 O.E.M. wheels.

TWIN POWER™ AXLE SPACERS

1 in. ID spacers are made from 6061 billet aluminum bar stock, 1-1/2 in. OD with a mechanical finish, designed for ball bearing wheels.

1-1/8" OD X 3/4" ID spacers are made from 12L15 alloy steel and flash chrome-plated, designed for 3/4 in. Timken® and ball bearing wheels with a hard-coat finish, so they can be used as wheel seal adaptors.

JIMS® LOCKDOWN AXLE KIT

High-performance is much more than how much power a machine makes or how fast it will go. At JIMS, we know reliability and safety are also important. To these ends, we now offer our axle retention upgrade kit. The O.E.M. axle nut washer can become weakened or deformed, and that can lead to loosening, even with a castle nut system. To avoid this loosening and the problems associated with it, we have developed a much stronger part to replace the washer along with superior adjuster plates for the final drive.

- Kit includes a special slotted axle nut washer part as well as stronger swingarm end caps that have a better fit into the swingarm

COLONY AXLE NUT AND SPACER KITS

Add stunning chrome highlight to your front axle by simply replacing your plain dull O.E.M. spacers. Beautifully designed with a smooth finish and a high-luster, triple-chrome finish. A definite must when adding billet wheels or chrome fork accents and caliper covers.

- Kit includes a grooved spacer, chrome nut and all necessary washers
- Replaces O.E.M.s 43520-00, 43521-00

RIVERA PRIMO AXLE SUPPORT

High-horsepower and torque can create tremendous strain on your entire driveline, including the rear axle. To help eliminate the axle-bending consequences of high-power hole shots and brute force, Rivera Engineering has developed this CNC-machined billet steel rear axle support for use on 1984-99 Softail and 1982-94 FXR models equipped with spoke or cast wheels and a 3/4 in. axle.

- Includes a sealed ball bearing and mounting hardware with axle spacer
- Use with a belt drive pulley or chain drive sprocket

TIRE CONVERSION INFORMATION

Aspect Ratio

The aspect ratio of a tire is the relationship of the tire cross section height to the cross section width. In a tire with an aspect ratio of 85, for example, height is about 85% of the tire width. "Low profile" tires have an aspect ratio of less than 80. The aspect ratio of a tire is often contained in the size marking, e.g., 130/90 x 16, etc.

Tire Size Markings

Motorcycle tires are manufactured in a number of different countries with differing requirements in terms of load, dimensions and speed ratings. This has resulted in various size markings. The following charts give a guide to the relationship between various size markings.

Speed Ratings (Sustained Speed)

Tire manufacturers do not recommend the use of their products in excess of legal speed limits.

R = 106 mph	H = 130 mph
S = 112 mph	V = 149 mph
T = 118 mph	W = 168 mph
	Z = 150 + (Contact Manufacturer)

WARNING:

Dealers: Convey this important information to customers and tire fitters: The above are size marking conversion charts only and do not imply the ability to interchange sizes. Consult motorcycle manufacturer for correct replacements for original equipment tires. Critical clearances, motorcycle compatibility and stability, load bearing capacity, speed rating, radial versus non-radial, pattern and tread compound requirements, inflation recommendations, and front to rear matching will all vary with tire selection. Wrong selection can result in tire failure, loss of control with serious injury or death.

Front Tires			Rear Tires		
Metric	Alpha	Inch	Metric	Alpha	Inch
80/90	MH90	2.50/2.75	110/90	MP85	4.00/4.25
90/90	MJ90	2.75/3.00	120/90	MR90	4.50/4.75
100/90	MM90	3.25/3.50	130/80		5.00/5.10
110/90	MN90	3.75/4.00	130/90	MT90	5.00/5.10
120/80		4.25/4.50	140/80		5.50/6.00
120/90	MR90	4.25/4.50	140/90	MU85/MU90	5.50/6.00
130/90	MT90	5.00/5.10	150/80	MV85	6.00/6.25
			150/90	MB85	6.00/6.25

Abbreviations used in this section:

B - Belted	Pr - Ply Rating
Blk - Black	RBL - Raised Black Letters
BW - Blackwall	RWL - Raised White Letters
MWW - Medium Whitewall	SW - Slim Whitewall
NW - Narrow Whitewall	WW - Whitewall
OWL - Outlined White Letters	WWW - Wide Whitewall

IMPORTANT SAFETY INFORMATION:

DEALERS CONVEY THE FOLLOWING TO CUSTOMERS AND TIRE FITTERS:

1. Follow Tire Mounting Safety Precautions as specified by the tire manufacturer.
2. Checking of tire pressures is the most important tire-maintenance function you and your customer may perform. NOTE: For high-speed, fully loaded or dual-riding touring motorcycle applications, inflate front tires to maximum recommended by vehicle manufacturer for Dunlop fitment and rear tires to maximum load inflation pressure on sidewall. Rear touring tires must be inflated to a minimum of 36 psi for light to medium loads and 40 psi for dual riding and other loads. Never exceed maximum load indicated on tire sidewall, or vehicle capacity load found in owner's manual.
3. Replacements for worn, differently patterned or constructed tires will not react the same. When new tires are fitted, they should not be subjected to maximum power, abrupt lean-over or hard cornering until a reasonable run-in distance of approximately 100 miles has been covered. This will permit the rider to become accustomed to the feel of the new tires or tire combination, find the edge, and achieve optimum road grip for a range of speed, acceleration and handling use. Advise your customer to check and adjust to recommended inflation pressure after tire cools for at least three hours following run-in. Remember: New tires will have a very different contact patch and lean-over edge. New tires, new with older, as well as different pattern combinations require careful ride evaluation.
4. The letters S, H, V, and Z included in the size markings of some of our street tires are speed ratings recognized by the European Tire and Rim Organization and Japanese Industry Standards. The ratings are assigned based upon controlled indoor wheel testing. Dunlop does not recommend the use of any of its products in excess of legal speed limits.
5. For purposes of assessing clearance, inflated section width is not the tread width. Section width is the width of the tire measured from sidewall to sidewall at the widest point in the case of most tires. The exceptions are in some of the knobby tires where the knobs on the sidewall protrude farther than the section width.
6. Metric-sized sport tires do not have the same load capacity as alpha-numeric (i.e., MT90H16) touring tires and should not be used for the same service.

DUNLOP® MOTORCYCLE TIRES...PLACING A PREMIUM ON PERFORMANCE!

Ever since their first American-made Dunlop tire rolled off the Buffalo, New York, production line in 1923, they have placed a premium on performance. Dunlop's Buffalo plant continues as the flagship production facility - with motorcycle tires designed and engineered there earning Dunlop the proud distinction of being the only company manufacturing motorcycle tires in North America today. In September of 1999, Dunlop Motorcycle Tires took another major growth step when it entered into a new partnership with Goodyear Tire and Rubber Company, as part of a joint North American venture, which will produce a wide range of premium tire products.

Dunlop is the only tire you'll ever see coming off the line on a Harley-Davidson® motorcycle. You'll find their name featured prominently throughout the industry's original equipment fitments - preferred, recommended and even required by companies and consumers everywhere who share Dunlop's uncompromising commitment to quality. That success is itself a demonstration of the performance power of being market responsive...offering the perfect tire to meet every rider's needs...a dose of Dunlop to defang the Sport rider's addiction to the rush of racing...smooth-riding durability Street riders can count on to get them to whatever destination sparks their passion. We may call it "premium performance", but to the world, it's "Dunlop Superiority".

Front Rear

DUNLOP® AMERICAN ELITE

The only replacement motorcycle tire for Harley-Davidson® motorcycles, which is designed, tested and made in America, the Dunlop® American Elite replacement tire line ensures that industry-leading Dunlop® tires will be on your customers' Harley-Davidson® motorcycles for years to come. Dunlop's decades-long engineering experience with Harley-Davidson® motorcycles is the foundation for the all-new Dunlop® American Elite line of replacement tires. Tread design provides even tread wear and quiet operation in all conditions, wet and dry. The sidewall design proudly features the American Elite name and made in USA logo.

NEW! DUNLOP® ELITE 4 TIRES

Potential fitment for hundreds of touring bike models from the 1970s to present day. Featuring Dunlop's Multi-Tread MT Technology on all rear sizes in the range. Offers significantly higher mileage when compared with current single-compound tires. A bold, new tread pattern offers excellent grip in wet and dry conditions, with a particular focus on even wear and lower road noise.

METZELER

METZELER ME 888 MARATHON ULTRA

Focused on mileage improvement and overall wet and dry handling, these tires feature new profiles, structure, tread pattern and compounds. New compound technology offers improvement in two important areas: material and process. The compounds offer better abrasion resistance thus, providing more mileage, but at the same time the choice of new resins improve the level of chemical grip on wet surfaces. New tread design not only gives increased mileage vs. ME 880, it also has better water drainage, resulting in more resistance to aquaplaning. The tire's profile modifies the shape and dimensions of the footprint; the contact patch is 5% shorter and 15% wider vs. ME 880; this profile has been chosen to improve the wear of the compound under footprint; a shorter and wider profile helps by better distributing the force necessary to transfer the engine torque to the ground.

- All sizes in the ME 888 range benefited from mileage increase and wear regularity upgrades, placing ME 888 on the top of the category in mileage, handling, stability and comfort until the end of its life

METZELER SPORTEC M3

An aggressive design that accentuates the look of your bike while the tread design promotes uniform wear. This tire features a revolutionary compound that delivers high grip under the heavy power delivery of the latest high-performance sportbikes, while providing excellent mileage and high-performance throughout its life cycle. Improved mileage is due to the combination of compound and tread pattern development. Steel for maximum support and precision proven radial/value structure for performance bikes. Compound, along with an advanced tread pattern, inspires confidence in wet conditions and reduces hydroplaning. The profile is balanced, front and rear, to enable the best handling motorcycle and offer excellent high-speed stability while the tread pattern provides grooves where needed for drainage and compound only where grip is required most.

CONTINENTAL MOTORCYCLE TYRES

Continental is Germany's largest tire manufacturer, fourth largest in the world and being founded in 1871 in Hanover, Germany, is also one of the oldest. They built their first motorcycle tire in 1904 and were on the first motorcycle that set the Land Speed Record at over 200 mph at Bonneville in 1956. Continental tires are test proven at the Contidrom test track which features 86° banking. Continental is committed to producing motorcycle tires using the very latest technology and compounds for today's bikes.

NEW!

CONTINENTAL ROAD ATTACK 3 TIRES

Performance-oriented pattern design for better drainage in wet conditions in combination with the optimized compound to improve wet grip. Comfortable and easy, whether on long rides or winding roads. Balanced characteristics from the first to the last mile. Featuring TractionSkin, a revolutionary new micro-rough tread surface that virtually puts an end to tire break-in. This is possible due to a new mold coating technology which eliminates the need for tire release agents. MultiGrip technology makes it possible to use a homogenous grip grading with a single compound thanks to temperature-controlled curing during the production process.

CONTINENTAL CONTI ROAD ATTACK 2 - SPORT MILEAGE RADIAL

Revolutionary technology that offers a level of grip, safety, mileage and dynamics never known before in the sport-touring radial market. With Traction Skin: the revolutionary micro-roughness of the tread optimizes the mechanical adhesion and offers the safest, fastest break-in period in the market; and Continuous Compound Technology like the ContiRace Attack, a single compound is used that through a temperature controlled curing process delivers the benefits of a multicomponent tire without the abrupt transition between the different compounds that other multicomponent tires are known for.

- Continuous Transition from Center to Shoulder = smooth and predictable performance
- Shoulder Tread Area = increased grip from center to shoulder
- Center Tread Area, wear-resistant = mileage

AVON TYRES

Whether you're choosing a set of Avon Tyres for your Harley® Power Cruiser, Custom, Xtreme Sport, Sport, Sport Touring, Standard, Dual, Purpose, SuperMoto, Sidecar or Vintage applications we place an emphasis on precision, quality and performance. Avon has been making motorcycle tires since 1911. Yet we don't just rely on our history and decades of experience, rather we build on it. We believe there's the feel of the tire, that subjective element that exists between the rider and the tires, that exemplifies that the right tires do make a difference. Avon Tyres, your only contact with the road.

Please phone Avon Tyres directly at 1-800-624-7470 to order Consumer Brochures for your dealership.

AVON COBRA TOURING/CRUISING/CUSTOM - AV71 AND AV72

For motorcycles including V-Rod and custom bikes, these tires feature Advanced VBD (Variable Belt Density) which provides improved grip and stability with large contact patch. Enhanced Aqua Flow tread gives optimal water dispersal. Special snakeskin sidewall treatment with Cobra logo.

RIDE-ON® LED PRESSURE ALARM

These alarms are easy-to-install; the valve caps simply screw onto the tire valve. They are self-adjusting; memorizes automatically the pressure every time it's fitted on tire. Reads pressures of 10 psi to 70 psi and automatically compensates for temperature changes eliminating false alarms. All components conform to RoHS requirements.

- Reliable warning flashes red for 750 hours when pressure drops by four PSI +/- 10%
- Anti-theft protection included and low battery alarms

TireGard™

TIREGARD™ WIRELESS TIRE PRESSURE SCREW-ON MONITORING SYSTEM

Enhanced sensors offer faster and better transmitting time on pressure and temperature changes, while providing continuous transmitting when in motion. 1/3 of an ounce sensors replace the screw-on stem cap, requiring no tire re-balancing. Patented anti-theft lock prevents the sensors from being accidentally lost. Unique G-Force sensing recognizes movement allowing the sensors to save battery power when parked and come alive once moved. Easy-to-install in less than three minutes with no tools required.

- 100% wireless with no wiring to connect for the monitor
- Includes a soft silicon monitor skin for added protection and batteries

NEW! K&L MC900 TIRE MACHINE

The K&L MC900 Tire Changer with Power Assist Arm is the ultimate machine designed to handle even the toughest motorcycle, automotive, ATV, UTV and trailer tires. The Power Assist Arm is equipped with a roller arm, pressing foot and lifting disk easily mounts and demounts tires. Perfect for one person jobs, the MC900 reduces service time and allows single operators to change more tires with less effort.

292329

The MC900 Deluxe Tire Machine with the Leverless Tower is the ultimate Tire Machine for even the toughest motorcycle, automotive, ATV, UTV and trailer tires. The Leverless Tower eliminates traditional tire tools that can mar the surface due to tough tire applications and operator error. This ensures a smooth demounting process, flexing the bead just enough for removal. Works with all types of tires, including run flat, high profile and motorcycle tires with tubes. Leverless feature only works with rims 3 in. and wider.

- Comes complete with Quick Release attachment

BIKEMASTER® HEX AXLE TOOL

The BikeMaster Hex Axle Tool fits most of the late models hexagonal axle holes. It is made from chrome vanadium tool steel, not hollow, so it won't break like others.

- 17, 19, 22 and 24 mm hexes built into one tool

P/N	Retail
151884	24.95

LANG TOOLS™ REAR AXLE 36 MM NUT RATCHET WRENCH FOR V-TWIN

Lang Tools Reversible ratcheting wrench is used to remove and install the 36 mm rear axle nut on Harley-Davidson® FL Touring models. Extra-long wrench contains a 1/2 in. square drive for a torque wrench. Insert torque wrench at 90° angle for proper torque reading. Custom 36 mm double-hexagon torque grip wheel allows access to reach the application without the removal of exhaust. Loosening and tightening of this nut is a necessary procedure when tightening a drive belt or changing a rear tire. Vinyl grip provides a comfortable ergonomic grip and prevents the wrench from scratching or marring the bike.

- Use on 02-14 Touring; 05-14 (most) V-Rod models

P/N	Retail
151215	93.95

EXCLUSIVE

BIKEMASTER® 2-IN-1 TIRE GAUGE

The 2-in-1 Tire Gauge from BikeMaster will accurately measure your tire pressure to 60 psi as well as measure wear across your tires. The sufficient depth of the sipes (the tread or grooves in your tires) is essential for water clearance. Manufactured to exact specifications, this gauge has braided steel hose and an anodized collar.

P/N	Retail

NEW!
DYNAPLUG® MICRO PRO INFLATOR

A small, but durable package that meets or exceeds customer's expectations. They are offering the world's smallest precision inflator. It's ideal when space and weight are at a premium. The Dynaplug Micro Pro Inflator delivers efficient, reliable performance with an inflation rate of 0-36 psi in 3 minutes for tires sized 100/90-19 and up to 5 minutes for 150/70-17 sizes. Features a 30 minute run time and only requires 20 minutes for cool down.

- Made in USA

Includes:

- Universal cig/BMW® style power cord
- Ballistic nylon, dual-compartment pouch
- Battery clips to SAE plug
- Ring terminal to SAE plug
- SAE-to-SAE extension cord

RIDE-ON® TIRE BALANCER AND SEALANT

Ride-On Tire Protection System is a tire balancer and sealant compound that evenly coats the inner surface of tires. This coating balances tires and makes them into self-sealing tires while you ride. Eliminates need for those old, ugly wheel weights. Specially formulated to hydrodynamically balance high-speed tires, dampen road noise and vibrations that cause a rough ride. If your tire is punctured, the centrifugal force of the rotating tire and the internal air pressure forces Ride-On into the hole, sealing it instantly (up to 1/4" in tubeless tires and 1/8" in tube tires). Ride-On is a green, biodegradable product that is designed to be non-hazardous and non-flammable and contains corrosion inhibitors that protect all alloys of steel, aluminum, magnesium and yellow metals against oxidation.

COUNTERACT TIRE BALANCING BEADS DIY KIT

Increases tire life, improves fuel economy.

- No more external weights
- Reduced vibrations and heat build up
- Tires are balanced all the time not just over 30 mph like other products
- Guaranteed safe for all tire pressure monitoring systems (TPMS)
- Can be used in tubes and tubeless tires
- DIY kits include bead bags, applicator bottle with tube, valve core remover, valve caps and valve cores

Note: A standard two wheeled motorcycle would need P/N 531873, motorcycles with an extra large rear tire would need P/N 531875.

Description	P/N	Retail
