

VOLVO CAR SERVICE AND PARTS BUSINESS					
<h1>Special Tools Bulletin</h1>					
TITLE: Shop Equipment					
NO: 002	ISSUE DATE: 2018-05-24		CAR MARKET: United States and Canada		Page 1 of 6
	STATUS DATE: 2018-07-16				

“Right first time in Time”

As Volvo sales and service volumes increase and our vehicles become more complex, it is more important than ever, that our service facilities keep pace with customer expectations.

The Volvo workshop plays a critical role in the ownership experience. This experience can often be dictated by the actions and capabilities of the service facility. It is critical that our shops have the latest tools and equipment available.

Having a clean, well-lit environment with state of the art equipment will enable the technicians to perform cost efficient repairs and fault tracing that will support the fix right - first time - in time (FRFTIT) goal.

For optimal efficiency, it is essential your technicians have the best equipment available when they need it. Generally, tools and equipment should be located in a dedicated area and in such condition that they can be put to use in less than 2 minutes.

Service Personnel: Read and initial	SERVICE MANAGER	PARTS MANAGER	WORKSHOP FOREMAN	SERVICE TECHNICIANS												

Tools and equipment used for measuring should be regularly checked, cleaned and calibrated.

Health and safety equipment will prevent unnecessary accidents and injuries. To ensure everyone's safety, technicians should have access to personal protective equipment (PPE), including safety glasses, gloves and ear protection, to name a few.

In order to meet this challenge, the Volvo Dealer Equipment program provides you with one-stop access to many name brand equipment manufacturers and suppliers, including:

Special Tools Bulletin 002

Below is a general list of equipment that every workshop should have. It is not intended to be all inclusive, but it does highlight specific equipment that Volvo considers mandatory for every workshop to have.

Some tools are classified as “Volvo Special Tools” and are available outside the program. They are listed here to illustrate the importance of having them available.

Ordering of equipment couldn't be easier. The Volvo Dealer Equipment program enables retailers to buy workshop equipment through Bosch and have it billed directly to the monthly parts statement. * **(US only)**. This enables you to better budget the cost of higher priced items.

The Volvo Dealer Equipment program is accessible at the following link:
