BALL PLACEMENT - TRUGOLF

BALL PLACEMENT: FULL SHOTS
DRIVER, WOODS, HYBRIDS & IRONS

Place the ball on a tee behind the FRONT row of sensor holes closest to the screen. As your club passes over the sensors on its way to make contact with the ball, critical information is gathered helping determine the speed, path, and face angle of the club.

BALL PLACEMENT: CHIP SHOTS
JUST CHIPPING
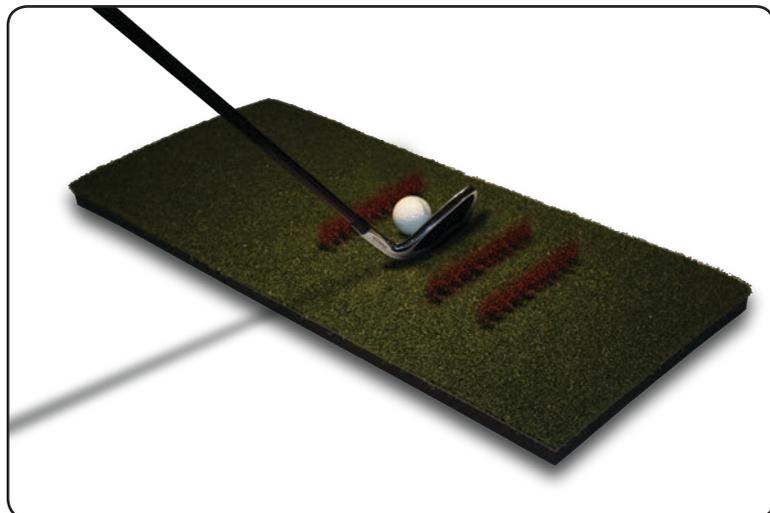

For a chip shot, place the ball on the hitting mat behind the FRONT row of sensor holes closest to the screen.

BALL PLACEMENT: PUTTING

For a putt, place ball BEHIND the back row of sensor holes (3-4"), and then follow through to hit the putt. The speed and direction of PUTTS are determined exclusively by the movement of the ball over the THREE ROWS of sensor holes.

TEES
Rubber tees should be used just as one would use them in outdoor golf. The use of tees does not change ball placement specifications.
