Assortment 2018-2019

High-tech

Sharing a healthy future

Dear customer,

We are pleased to present to you our international tomato variety booklet, a handy overview of our tomato varieties developed for high-tech growing conditions.

Like last year we are presenting our varieties to you in order of size. We have decided on the following four weight categories: Mini (0-30 g), Cocktail (30-60 g), Large (60-160 g) and XL (160+ g). Also, we have grouped them together in terms of harvesting method (truss or loose) and shape (round, plum, etc).

Although we have made this overview as complete as possible, we recommend that you always observe our varieties in one of the Rijk Zwaan trial centers. The main trial centers for high-tech varieties are in Kwintsheul, The Netherlands and in Leamington, Canada. Our main trial center for protected varieties is in El Ejido, Spain. Besides these, there are many local trial stations around the globe. Ask your local representatives to make an appointment.

We invite you to visit our new Retail Center in Berlin, in which we:

- Showcase our latest retail solutions
- Analyse retail assortments
- Share insight with retail teams
- Conduct in-depth and varied consumer research projects

If you have any technical questions or creative ideas, please do not hesitate to contact your local representative. For now, we wish you success and hope to talk to you soon about your interest in our varieties.

Mini (<30g), truss

Truss tomatoes are associated with a more exclusive standard of quality, a more intense flavour and a stronger aroma. Among other things, Rijk Zwaan selects the varieties based on flavourful fruits, uniform truss and productive crops.

72-008 RZ F1 (t)

Fruit weight	12 - 15 g
Shape	Round
Resistance	ToMV:0-2/Ff:A-E/Fol:0,1/Si Ma/Mi/Mj
Features	Very good taste and production. Bright red fruit on an attractive truss. Can also be harvested as loose fruit. Firm and crunchy with good shelf life.

Caldino RZ F1 (72-161)

Fruit weight	13 - 16 g
Shape	Plum
Resistance	ToMV:0-2/Ff:A-E/Fol:0,1/Si Ma/Mi/Mj
Features	Very attractive truss formation with tasty, plum shaped fruits. Good ripening uniformity down the truss.

72-006 RZ F1 (t)

Shape	Blocky
Resistance	HR ToMV:0-2/Fol:0 IR Ma/Mi/Mj
Features	Dark red fruit with distinctive shape. High production.

Brioso R& F1

Cocktail (30-60g), truss

Brioso RZ has been a reference point for many years. It is embraced by growers and retailers alike thanks to its unique combination of ease of growing, productivity and flavour. Despite Brioso's success, we are continuously looking for ways to improve and diversify. Good examples of our breeding efforts include tasty and unusually shaped varieties such as Imperoso, Tatami and Papeletto.

Imperoso RZ F1 (72-146)

Fruit weight	25 - 30 g
Shape	Round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0 IR On (ex Ol)/Ma/Mi/Mj

Balancan RZ F1 (72-533)

Fruit weight	140 - 160 g
Shape	Slightly flat
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0/Si IR On (ex Ol)/Sbl
Features	A small beef variety that can be used as a large loose tomato. Uniform fruit size and an attractive shape.

Large (60-160g), truss

Although there has been huge growth in snack sized tomatoes there is still strong demand for a more traditional size of tomato. Our selection covers the diversity within the segment which ranges from great tasting to highly productive whilst also covering different fruit shapes and sizes.

Roterno RZ F1 (72-230)

Fruit weight	90 - 100 g
Shape	Round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0/Si IR TSWV/On (ex Ol)/Ma/Mi/Mj

Resistance	HR ToMV:0-2/Ff:A-E/For/Va:0/Vd:0 IR On (ex Ol)
Features	A high production truss tomato with large fruit. Good truss formation.

XL (>160g), loose

Beef tomatoes often have to fit with strong local preferences; they must be ribbed, round or pointed, red, green or pink, or sometimes even have to ripen from the inside out. Although Rijk Zwaan's beef tomato breeding programme is still relatively young, we continue to achieve encouraging results year after year.

Managua RZ F1 (72-528)

Fruit weight	150 - 180 g
Shape	Flat round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0/Si IR On (ex Ol)
Features	Firm, flat round fruit with a nice colour. Small beef tomato with high production.

Montenegro RZ F1 (74-669)

Fruit weight	160 g average
Shape	Flat round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/Sbl/Va:0/Vd:0 IR TYLCV/Ma/Mi/Mj
Features	Nice tasting greenback tomato that ripens internally first.

Paulanca RZ F1 (72-534)

Fruit weight	165 - 175 g
Shape	Slightly flat
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0 IR On (ex Ol)/Sbl
Features	High production with a good taste. Consistent fruit size throughout the season.

Rugantino RZ F1 (73-190)

Fruit weight	200 - 240 g
Shape	flat round, ribbed
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0/For/Sbl/Va:0/Vd:0
Features	A Coeur de Boeuf type with reliable setting to be harvested when the fruit is just breaking from green.

Rugantino RZ F1

XL (>160g), loose

Rugisso RZ F1 (73-193)

Fruit weight	200 - 240 g
Shape	flat round, ribbed
Resistance	HR ToMV:0-2/Ff:A-E/For/Va:0/Vd:0
Features	A Coeur de Boeuf with a light green shoulder. Good setting and low risk of yellow shoulders.

Securitas RZ F1 (72-625)

Fruit weight	260 - 270 g
Shape	flat round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0 IR On (ex Ol)/Sbl

Fruit weight	260 - 280 g
Shape	flat round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Va:0/Vd:0 IR On (ex Ol)
Features	A very consistent beef tomato with good production. Good setting ability so pruning is essential. High round fruit that is good for slicing.

Taymyr RZ F1 (72-617)

Fruit weight	260 - 300 g
Shape	flat round
Resistance	HR ToMV:0-2/Ff:A-E/Fol:0,1/For/Si IR On (ex Ol)
Features	Large fruit with a round shape.

Rootstock

A good combination of rootstock and cultural variety offers key advantages. With Suzuka RZ, we add to our assortment a new high vigour rootstock to compensate for the more generative circumstances and scions.

Bruce RZ F1 (61-068)

Resistance **HR** ToMV:0-2/Ff:B,D/Fol:0,1/For/Pl/Va:0/Vd:0

Features Vigorous rootstock that provides balanced strength.

Emperador RZ F1 (61-065)

Resistance **HR** ToMV:0-2/Fol:0,1/For/Pl/Va:0/Vd:0

IR Ma/Mi/Mj

Features A well balanced rootstock offering strength and control.

Kaiser RZ F1 (61-077)

Resistance **HR** ToMV:0-2/Fol:0,1/For/Pl/Va:0/Vd:0

IR Ma/Mi/Mj

Features A strong but generative rootstock. Aids early production.

Stallone RZ F1 (61-067)

Resistance **HR** ToMV:0-2/Ff:B,D/Fol:0,1/For/Pl/Va:0/Vd:0

Features High vigour and generative nature.

Suzuka RZ F1 (61-081)

Resistance **HR** ToMV:0-2/Fol:0,1/For/Pl/Va:0/Vd:0

IR Ma/Mi/Mj

Features Very strong and easy to manage rootstock which performs throughout the season.

1. Introduction

The relationship between a plant and a pest is very complex. The terms that describe the reaction of a plant variety to a pest are determined by tests under controlled environmental conditions with known and characterized biotypes, pathotypes, races or strains of the pest in question.

In practice however, the ability of a pest to cause disease in a plant depends on environmental conditions, the properties of the organism itself and the capacity of the plant to defend itself. Varieties within a plant species can differ in their ability to defend themselves. Under different conditions, such as age of the plant, pest pressure and virulence or adverse environmental conditions, the interaction between the same plant and pest may have different outcomes. Pests are known to develop and form new biotypes, pathotypes, races or strains that can cause damage to plants that remain unaffected by the original form of the pest. To promote consistency in the terms used to describe the reaction of a plant to a pest, ISF Vegetable and Ornamental Crops Section has defined the following terms.

2. Definitions

Susceptibility is the inability of a plant variety to restrict the growth and development of a specified pest.

Resistance is the ability of a plant variety to restrict the growth and development of a specified pest and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure. Two levels of resistance are defined.

High resistance (HR*): plant varieties that highly restrict the growth and development of the specified pest under normal pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure. strains that may emerge are not covered by the original resistance claim.

Disclaimer and legend icons

Intermediate resistance (IR^{*}): plant varieties that restrict the growth and development of the specified pest but may exhibit a greater range of symptoms or damage compared to high resistant varieties. Intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest pressure.

It is to be noted that if a resistance is claimed in a plant variety it is limited to the specified biotypes, pathotypes, races or strains of the pest.

If no biotypes, pathotypes, races or strains are specified in the resistance claim for the variety, it is because no generally accepted classification of the cited pest by biotype, pathotype, race or strain exists. New biotypes, pathotypes, races or Immunity is when a plant is not subject to attack or infection by a specified pest.
