

# TOPIC 12: ENVIRONMENTAL CLEANING & DISINFECTION

Presenter: Katelyn Glatt, ADN, RN  
Division of Infectious Diseases and Epidemiology  
February 22<sup>nd</sup>, 2022

# AGENDA

- Welcome
- Cleaning and Disinfection: What is the Difference?
- Why Cleaning and Disinfection Matter
- What is Contact Time?
- Reflection

# LEARNING OBJECTIVES

- Describe the difference between cleaning and disinfection.
- Discuss why it is important to follow the label instructions on a disinfectant product.

# ACKNOWLEDGEMENT

- This Project Firstline presentation is brought to you by the North Dakota Department of Health (NDDoH), Division of Infectious Diseases and Epidemiology, and presented by NDDoH COVID-19 Nurse Consultants. All presenters have been trained on Project Firstline materials in correlation with the Centers for Disease Control and Prevention (CDC).

# INTRODUCTIONS

- Katie Glatt ADN, RN
- Bismarck, ND
- COVID-19 Nurse Consultant
- ICAR facilitator
- Project Firstline Facilitator

# INTRODUCTIONS

- Morgan Messer ASN, RN
- Jamestown, ND
- COVID-19 Nurse Consultant
- Project Firstline Facilitator

# INTRODUCTIONS

## Please introduce yourself with:

- Your name
- Your role (e.g., organization, unit)
- Do you think cleaning and disinfecting is important in healthcare?

HELLO

MY NAME IS

# CLEANING AND DISINFECTION: WHAT'S THE DIFFERENCE?

# INSIDE INFECTION CONTROL

## CLEANING? DISINFECTION? WHAT IS THE DIFFERENCE?

EPISODE 16

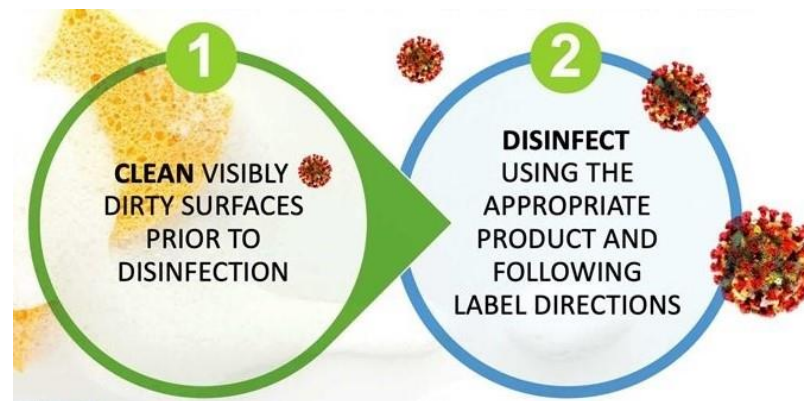

# DEFINITIONS

## Cleaning

Cleaning is a process that removes things like dust, dirt, grime, and other spills, smears, and everyday messes from surfaces, along with some germs.

## Disinfection

Disinfection is a process that kills germs.

# WHY CLEANING AND DISINFECTION MATTER

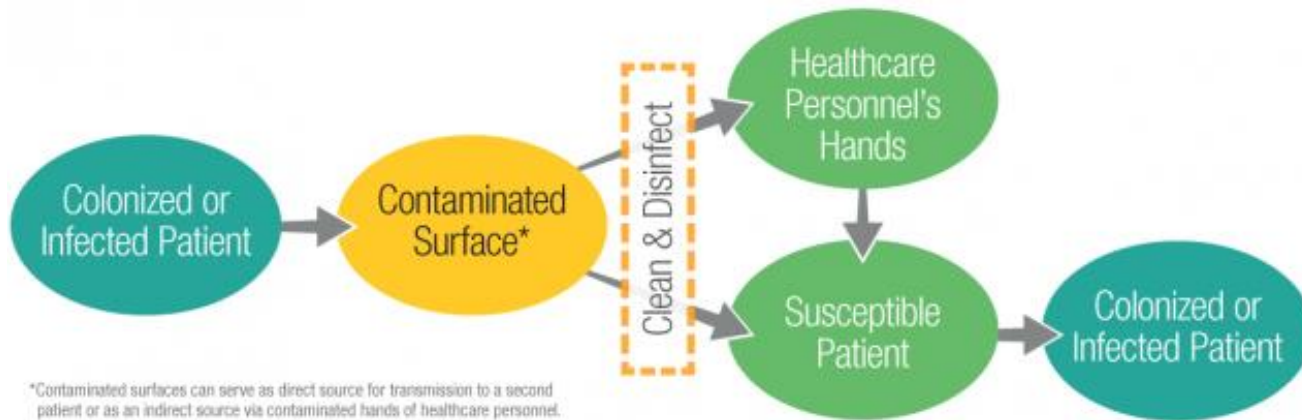

# PATIENTS MAY HAVE WEAKENED IMMUNE SYSTEMS

In healthcare, we have patients who are ill or weak.

## Why does that matter?

Germs are more likely to cause problems in these patients, because their immune defenses may not be the same as someone who is healthy and living at home.

# THE HEALTHCARE ENVIRONMENT SHOULD BE KEPT CLEAN

**It is important to keep the healthcare environment clean to stop germs from spreading.**

## Where and When?

- Patient Rooms
- High-touch Surfaces
  - Bed rails
  - Keyboards
  - Light switches
- Surfaces and objects that often have a lot of germs on them
  - Toilet seats

# WHAT IS CONTACT TIME?

# INSIDE INFECTION CONTROL

## WHY DOES CONTACT TIME MATTER FOR DISINFECTION?

EPISODE 22

# DEFINITION

## Contact Time

Sometimes called “dwell time,” this is the amount of time a disinfectant needs to sit on a surface, without being wiped away or disturbed, to effectively kill germs.

# THE DISINFECTANT LABEL

## What information do you need from a disinfectant's label?

1. Is the product EPA-approved?
2. On which surfaces can the disinfectant be used?
3. What germs has the disinfectant been proven to kill?
4. Should the product be diluted?
5. What is the contact time?

# DOS AND DON'TS FOR DISINFECTION

## Dos

- **Do follow the listed contact time.** This ensures items are disinfected to keep germs from spreading.

## Don'ts

- **Don't rush** the process. Wait until contact time is complete before using objects or surfaces or before a new patient comes into a room.
- **Don't wipe** the surface to dry it faster.
- **Don't blow** on the surface to dry it faster.

# DISINFECTANTS THAT KILL SARS-CoV-2

EPA's **List N** is a searchable database that makes it easy to find products that kill SARS-CoV-2

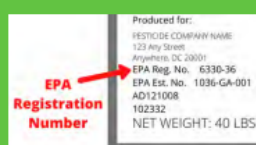

## WHICH DISINFECTANTS KILL COVID-19?

FIND OUT AT [EPA.GOV/LISTNTOOL](https://www.epa.gov/listntool)

EPA expects all products on List N to kill SARS-CoV-2, the specific coronavirus that causes COVID-19

**I already have a product. Does it kill SARS-CoV-2?**

???

Produced for:  
PESTICIDE COMPANY NAME  
123 Any Street  
Anytown, DC 20001  
EPA Reg. No. 6330-36  
EPA Est. No. 1036-GA-001  
AD121008  
102332  
NET WEIGHT: 40 LBS

**EPA Registration Number**

Find the EPA Registration Number on the label

Enter only the first two parts of the Registration Number

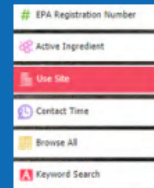

If that number is on List N, EPA expects the product to kill SARS-CoV-2 ✓

**I need to find a product to kill SARS-CoV-2.**

Use List N's Search Tool to browse products

Use the first two parts of the EPA registration number when searching for products to purchase

If you need a more advanced search, choose "Export to CSV." Use Excel, Sheets, or Numbers to filter ✓

# REFLECTION: WHAT DID YOU LEARN TODAY?

# KEY TAKEAWAYS

- **Cleaning removes visible dirt**, dust, spills, smears, and grime, including organic material like blood, as well as some germs, from surfaces. It's important to clean before disinfecting because dirt and grime can make disinfectants not work as well.
- **Disinfecting kill germs** on surfaces or objects.
- It is important to **keep the healthcare environment clean to stop the spread of germs.**
- **Follow the instructions on the disinfectant label** – especially instructions for contact time.
