TRW Investing in Saginaw

TRW Integrated Chassis Systems, LLC plans to invest over \$27 million in the former Delphi Chassis facility in the City of Saginaw, retaining 750 employees at the site.

The company began operating the former Delphi brake plant in the fall of 2007.

The Saginaw City Council unanimously supported the transfer of existing tax abatements under Public Act (P.A.) 198 and P.A. 328 earlier this month. Saginaw Future assisted the City and TRW with the abatement transfer and worked with the Saginaw County Chamber of Commerce and area legislators to pass legislation allowing the transfer.

The P.A. 198 tax abatement program provides a 50% abatement of real and personal property for up to 12 years on plant and/or machinery and equipment. Instead of the property tax, the company pays an Industrial Facilities Tax (IFT) that reflects the abatement savings.

P.A. 328 allows communities to abate all new personal property taxes for a period of time. TRW's

TRW Automotive is located at 2328 E. Genesee Ave. in the City of Saginaw.

Morley Companies to Add 90 Jobs

Morley Companies, Inc. is located at One Morley Plaza in Saginaw Charter Township.

The Michigan Economic Development Corporation (MEDC) and Saginaw Future Inc. (SFI) are proud to support a major expansion project at Morley Companies, Inc.

The MEDC's Michigan Economic Growth Authority (MEGA) Board approved Michigan Business Tax Credits, which enabled Morley Companies to secure additional new business resulting in the creation of 90 new jobs at its Saginaw Charter Township site.

SFI and the Saginaw County Chamber of Commerce worked with area legislators to modify the current MEGA law, to include health care benefits in the eligibility criteria. This enabled Morley Companies to be the first in the State of Michigan to benefit from the law change and attract new business as a result.

To support the project, the Saginaw Midland Bay Michigan Works! will make available up to \$20,000 in incumbent worker training funds.

Christopher J. Furlo, Executive Vice President of Morley Companies, Inc., One Morley Plaza, Saginaw, Michigan, announced recently that as a result of a new,

TRW Investing in Saginaw

(Continued from page 1)

P.A. 328 expires in 2019.

TRW's Saginaw facility manufactures brake assembly components including modules, calipers and rotors for General Motors vehicles.

Saginaw Future continues to assist the company with an incentive package for an additional investment projected for 2009.

Morley Companies to Add 90 Jobs

(Continued from page 1)

multi-year contract with a nationwide market research provider, Morley will add 90 new, full-time associates in its Morley Interactive group.

The new positions will be located on Morley's 13-acre campus in Saginaw Charter Township. These Morley associates will be providing outsourced business processing services for several international OEM automotive clients.

Furlo said, "This new opportunity for Morley represents a critical step in securing additional revenue in domestically outsourced business processing activities within Michigan and the United States by allowing us to invest in technological infrastructure and personnel to support these undertakings."

Morley was founded in 1863 in Saginaw. It serves a diverse client base of Fortune 500 companies through its six product groups: Group Travel; Interactive; Research; Exhibits, Displays & Experiences; Business Theater; and Performance Improvement.

SFI Wants You!

Saginaw Future Inc. wants you to sign up for SFI E-News and electronic communications!

SFIE-News include economic projects assisted by SFI, and other significant investments in the region.

Learn about the latest government contract seminars through the Saginaw Future Inc. Procurement Technical Assistance Center. Also, stay informed on the educational opportunities being offered by local business organizations like the Saginaw Valley Manufacturers' Association.

Stay on top of new economic incentive tools in Michigan, statewide business competitions like the 21st Century Jobs Fund and business opportunities, such as NextEnergy's solar generator RFP.

For information on all of the latest business opportunities register your e-mail address, if you haven't already. Be sure to add your co-workers, clients, staff and friends.

Simply go to SaginawFuture.com/publications.htm and add your contact information to the form at the bottom of the Web page.

Also make sure SFI e-mails end up in your inbox, not your bulk or junk folders. Add sfi@saginawfuture.com to your e-mail address book or trusted sender list. If you have any questions, contact Greg LaMarr at 989-754-8222 ext. 231 or e-mail glamarr@saginawfuture.com

CMI-Schneible Invests in New Line

CMI-Schneible Co. is investing \$700,000 in a new production line and is expected to add 18 employees as a result.

The company won a contract to help produce V-6 engine blocks, which will diversify its capabilities. CMI-Schneible already processes GM's Generation IV V-8 engine blocks.

Saginaw Future was able to assist the company and the community with an investment incentive, along with previous support.

In 2006, the manufacturer invested \$3 million in two new processing cells for engine block grinding and finishing that led to seven workers being hired.

CMI and two other GM-Saginaw Metal Casting Operations suppliers have co-located at the former Nodular Plant site on Veterans Memorial Parkway since 2003. The site was formerly a contaminated brownfield that was re-developed through public and private sector support. The total investment to build the combined facility was \$60 million.

The CMI-Schneible Group of companies includes seven facilities and over 300 employees.

CMI-Schneible Co. is located at 2220 Veterans Memorial Parkway in the City of Saginaw.

Chesaning Manufacturing - Preferred Supplier

Chesaning Manufacturing is located at 307 S. 4th St. in the Village of Chesaning.

Chesaning Manufacturing Company, Inc. has been producing aerospace tooling and test equipment for over 45 years. The company recently became one of five preferred General Electric suppliers.

Due to a need for larger tooling capabilities, Chesaning Manufacturing found it necessary to expand its production processes. The company will purchase nearly \$350,000 in new equipment and as a result of the investment, three to four new workers are expected to be hired.

SFI is assisting Chesaning Manufacturing and the community with an investment incentive and job training funds. The company manufactures everything from small hand tools to large overseas containers complete with tool sets for an engine overhaul.

In 2005, the Jetool division of Chesaning Manufacturing was selected as the *Procurement Contractor of the Year* by the Saginaw Future Inc. Procurement Technical Assistance Center. Its tooling and test devices are used on commercial and government air carriers for F-100 engines.

Equipment Purchase for Mistequay

Mistequay Group Ltd. is purchasing new equipment valued at \$266,000 in order to expand its capabilities.

The new equipment which includes grinding, milling, and boring machinery, will complement building upgrades made by the company just over a year ago. Computer software and hardware will also be added to complete the project.

Mistequay Group, located at 1212 N. Niagara St. in the City of Saginaw, is expected to create two new jobs.

Saginaw Future assisted the company and the community with a tax abatement application. This is Mistequay's third expansion since 2002, which totals more than \$1.6 million.

Mistequay Group offers a wide range of machining and manufacturing services to a diverse base of customers in over 30 states, as well as Canada, Mexico, France and the United Kingdom.

Company customers are from a number of industries that includes aircraft and aerospace, satellite, automotive, defense, agriculture, hydraulics and many more.

Mistequay Group, established in 1959, has more than 185 employees with locations in Saginaw and Standish, Michigan, along with Fort Collins, Colorado.

More than \$4.3 Million in Government Contracts

The Saginaw Future Inc. Procurement Technical Assistance Center (PTAC) assisted five area companies attain more than \$4.3 million in government contracts. The companies won a total of 36 federal government contracts in the third quarter of 2008.

The numerous products and services provided include specialized aerospace equipment, metal fabrication and prescription drugs.

The federal government is a multi-billion dollar purchaser of goods and services. States and local governments are also major purchasers of products and services. The Saginaw Future Inc. PTAC provides no fee assistance to businesses that are interested in tapping this market. Saginaw Future's Procurement Manager, Delena Spates-Allen, has over 20 years of expertise to help businesses acquire federal and state government contracts.

The services offered by the Saginaw Future Inc. PTAC include bid matching service, market research, specifications and standards, federal acquisition regulations, subcontracting opportunities and much more. During 2007, the Saginaw Future Inc. PTAC helped area companies win a total of 182 government contracts with a total value of more than \$3.6 million.

Consultation on exporting products and/or services internationally is also provided. The Saginaw Future PTAC educates businesses through formalized seminars and one-on-one consultations.

Pipeline to Benefit Dow Corning HIMS

Dow Corning Corporation HIMS is located at 1635 N. Gleaner Rd. in Thomas Township.

Dow Corning Corporation invested \$1.16 million in its Health Industries Materials Site (HIMS) in Thomas Township. The project includes construction of a nitrogen pipeline between Hemlock Semiconductor Corporation and HIMS, eliminating the need for tanker deliveries.

The company is making modifications to its cooling tower pumps and installing a larger air compressor. HIMS is also upgrading its injection molding equipment to meet changing customer requirements, retaining two jobs at the facility.

This is third recent investment at HIMS totaling nearly \$11 million. SFI was able to help the company and community with an tax abatement policy. HIMS, established in 1964, is the only Dow Corning site dedicated to supplying products to the health care industry. HIMS' products are used by customers around the world to manufacture a wide variety of health care products, including pharmaceutical tubing, pacemaker leads and more.

New Capabilities for InCal

InCal Technologies is located at 3870 E. Washington in Buena Vista Charter Township.

InCal Technologies purchased new equipment to expand its calibration and inspection capabilities. Computer equipment, accessories and software upgrades necessary for keeping pace with changing technology were also added.

The Buena Vista-based company invested \$83,500 and created three new jobs. This is InCal's third expansion investment since 2006, which totals nearly \$349,000.

The company specializes in providing dimensional calibration and Zeiss inspection coverage to meet customer needs. The third party accredited facility, established in 2004, is equipped with the very latest and highest quality measurement equipment, as well as highly qualified personnel.

InCal Technologies' temperature and humidity monitored laboratory enables precision measurements to an accuracy range of .000005 of an inch. The company provides commodity calibration management and sample approval inspection data including PPAP and GP-11 requirements.

Prints Plus Grows in Saginaw

Prints Plus Inc. is located at 2301 N. Michigan Ave. in the City of Saginaw.

Prints Plus Inc. has expanded its business through the purchase of a CCP650 Color Commercial Copier, which produces top quality full color copies.

The machine is also capable of delivering completely finished full color booklets, folded, stapled, face trimmed and/or two or three hole punched at a rate of 65 pages per minute.

The equipment will allow Prints Plus to maintain a competitive pace with the industry. The company specializes in large format commercial printing, copying, blueprints, signage and more.

The total project investment is \$75,000 and will create two new jobs. Saginaw Future assisted the company and the community with a tax abatement.

A 32-year in-house printer for the former Baker Perkins Inc. in Saginaw, Norman LaBrenz opened Prints Plus in 1989 after the factory shut down.

In 2000, he doubled the size of his business with a 2,772 sq. ft. expansion and purchased new equipment in 2006 valued at \$150,000.

www.SaginawValleySites.com Launched!

Saginaw Future Inc. recently launched Saginaw ValleySites.com making access to powerful business information research only a mouse-click away. The innovative Web site is an online program to attract and expand businesses and jobs in Saginaw.

SaginawValleySites.com is a property database that features industrial, commercial, office and retail properties available in Saginaw County, Michigan.

"SaginawValleySites.com provides immediate access to critical business and development information needed to facilitate job growth in Saginaw," said JoAnn Crary, president of Saginaw Future Inc. "We're excited to be the first organization in Michigan to be using the innovative property tool."

Saginaw Future announced the launch of the site to a crowd of private and public sector leaders at Saginaw Valley State University. Anatalio Ubalde, CEO and co-founder of GIS Planning, which built the Saginaw site, spoke on the site's capabilities and promotional opportunities. GIS Planning is an award winning software developer that specializes in economic development. JoAnn Crary also gave a presentation on new incentive opportunities expected to spur growth in the Saginaw Valley and Michigan.

Growth for Merrill Manufacturer

Siler Precision Machine, Inc. continues to develop and grow its Village of Merrill facility.

The company purchased a new Computer Numerical Control (CNC) Milling Center valued at nearly \$90,000, which will result in the creation of one job.

This is Siler Precision's fifth investment since 2002 totaling nearly \$700,000. The previous project included updating office space, meeting rooms and its main lobby to accommodate its growing business.

Siler Precision was established in 1994 when owners converted a vacant car dealership into a tool and die facility. The company manufactures specific dies, tools, die sets and industrial molds for manufacturers, and specializes in precision and CNC machining.

The company's machinists are also known for drilling, boring, lathe and mill work, as well as ID and OD grinding.

Saginaw Future has worked closely with Siler and was able to assist the company and the community with tax incentives.

Medical Device Opportunities

The Michigan Life Sciences Pipeline is an organization dedicated to providing a thriving home for the life sciences.

In order to help grow life sciences in Michigan, the Pipeline has scheduled seminars on intellectual property (IP) creation, licensing, and management for the remainder of 2008.

Christophe Sevrain, a former health care industry executive and serial entrepreneur, will be the main presenter.

Seminar attendees will learn how to apply specific business processes and best practices for the health care industry. These sessions will not only cover basic concepts of intellectual property protection, but also breakthrough strategies and execution models.

Rationale and methods for identifying and negotiating licensing agreements will also be covered.

The dates and locations for Michigan Life Sciences Pipeline seminars are as follows:

- 11/11/08 at Saginaw Valley State University in Saginaw (1 pm-5 pm)
- 11/20/08 at Tech-Town in Detroit (8 am-12 pm)
- 12/9/08 at Automation Alley in Troy (12 pm-4 pm)

The cost to attend the interactive sessions is \$195.00 (Pipeline members receive a discount) Please register on the Michigan Life Sciences Pipeline Web site at www.MichiganPipeline.com/seminars.php or call 248-593-1264.

Region Invests in Education & Infrastructure

Saginaw Valley State University College of Nursing and Health Sciences Building

A new College of Nursing and Health Sciences building at Saginaw Valley State University (SVSU) has received crucial funding from the State of Michigan. The State will provide \$21 million and SVSU will issue \$7 million in bonds to finance the remainder.

The College of Nursing and Health Sciences will house the schools of nursing, occupational therapy, kinesiology and social work under one roof. Construction of the \$28 million facility is slated for 2009 and the laboratory and classroom facility may open in the summer of 2010.

"About 2,000 SVSU students are enrolled in health-science fields and attend classes in scattered locations across campus," said SVSU President Eric Gilbertson. "The new building will provide a central location."

SFI, Saginaw County Chamber, area business leaders and SVSU backers have lobbied in support of the project for a number of years. Statistics show that health sciences professions are the fastest growing and the State of Michigan will be facing a shortage of 7,000 nurses in two years.

The new facility will help meet the nursing demand, give opportunities for young people and support the region's medical facilities.

MBS International Airport - New Terminal Design

Proposed MBS International Airport Terminal sketch.

After several years of discussion, plans for the new terminal building for MBS International Airport were revealed at a September event.

Those in attendance, including legislative representatives, government officials, community leaders and media representatives from throughout the region, were the first to see and hear about the innovative design of the 75,000 sq. ft terminal building, targeted for completion in three to five years.

The Airport Commission approved a new terminal building that will stand northeast of the present 1960s structure. Aviation architectural firm, Reynolds Smith & Hills Inc., presented the airstrip plan designed environmentally friendly. The terminal will feature steel-and-glass construction that relies heavily on natural lighting to reduce the need for electricity. White pine accents and other wood trim pay homage to Saginaw's lumbering history.

The terminal is to be funded without local taxes and instead will utilize funding under the FAA's Airport Improvement Program, along with aviation and user fees earmarked specifically for airports.
