GUARDEX®

GIANT SIZE CHLORINE TABLETS

Guardex Giant Size Chlorine Tablets contain a concentrated chlorine compound which will provide a stabilized chlorine disinfection and algae control program.

DIRECTIONS FOR USE

1. For the most effective use of this product, your pool should be properly conditioned. To condition your pool, add Guardex Conditioner and Super Chlorinator as directed on the conditioner package. If your pool is already conditioned, simply superchlorinate by adding Guardex Super Chlorinator to the pool, as directed on the label, to obtain a 1.5 ppm chlorine residual. To determine chlorine residual, use a Guardex 4-in-1 Test Kit.
2. Place one Guardex Giant Size Chlorine Tablet in the pool's plastic skimmer basket to provide daily chlorination. Avoid metal objects. Add additional tablets if needed to maintain a chlorine residual of 1.0 to 1.5 ppm as determined by your test kit.
3. Keep pH between 7.4 and 7.6 and total alkalinity between 100 and 120 ppm as determined by an adequate test kit. Check

TRICHLORO-S-TRIAZINETRIONE (TCCA)

DANGER: KEEP OUT OF REACH OF CHILDREN

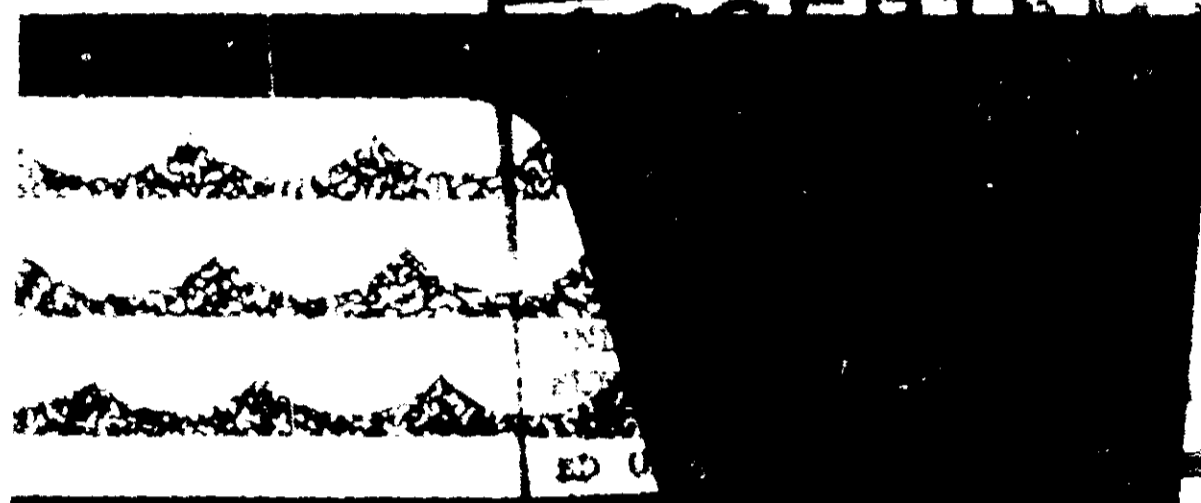

Harmful or fatal if swallowed. Causes eye damage. Do not get in eyes. May cause severe burns or damage to broken skin. Do not get on skin. Irritating to nose and throat. Dust may be harmful if inhaled. Avoid inhalation of dust. Strong oxidant. May cause fire if contaminated. See first aid and other dangers on right side panel.

alkalinity after each refilling of your pool. If an alkalinity adjustment is indicated, add 3 pounds of Guardex pH Stabilizer for each 10 ppm increase of alkalinity needed in 20,000 gallons.

WARNING: DO NOT USE IN CALCIUM HYPOCHLORITE FEEDERS

DANGER: DO NOT bring this chemical in contact with other chemicals. DO NOT use any other chemical in this container or put this chemical in another container except Trichloro-s-triazinetrione (TCCA) feeding devices. An explosion or fire may result if this material is brought into contact with other chemicals or contaminants.

Rinse container thoroughly with water before discarding. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

FIRST AID: Internally — feed bread soaked in milk followed by olive oil or cooking oil. Call a physician. In case of contact — remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention. Clean contaminated clothing before reuse.

bleaches or acids.

FIRST AID: If inhaled, move
to fresh air. If on skin,
wash with water. If in eyes,
flush with water for 15
minutes. If swallowed, do
not induce vomiting. Seek
medical attention.

Superchlorination is needed to destroy ammonia that may be added to the water by small children who are not "pool trained" and from the lawn and garden fertilizers that find their way into the pool. Ammonia ties up chlorine so it is not nearly as effective an algacide or bactericide. It also may cause severe eye irritation.

Super chlorinator will aid in the control of most algae and bacteria. This material contains no stabilizer and should be used for superchlorination only.

DIRECTIONS FOR USE: Superchlorinate in the deep end of the pool. With water temperatures above 75° F., super chlorinate once every 2 weeks with 8 oz. Super Chlorinator per 10,000 gallons pool water. One cup equals approximately 8 oz. (IMPORTANT: For use in plastic or vinyl-lined pools, always predissolve Super Chlorinator in a plastic pail before adding to pool using a dilution ratio of 8 oz. to a gallon of water.)

If water temperatures reach 85° F. or higher, or if you have a large number of daily swimmers, once-a-week superchlorination is desirable. All superchlorination should be done when there are no swimmers present and swimming should not be resumed until chlorine residual has dropped below 2.0 ppm. However, never permit the residual to go below 1.0 ppm at any time.

DANGER: KEEP OUT OF REACH OF CHILDREN.
Dust may be harmful if inhaled. Irritating to skin, eyes, nose and throat. Do not ingest. Avoid contact with eyes. Wash thoroughly with water. May cause fire if contaminated with other chemicals. See first aid and other precautions on right side panel.

DANGER: Strong oxidant. Keep away from combustible organic materials to avoid fire. Prevent any burning material such as a lighted cigarette from falling into product. Drench fires with water. When measuring, use only a clean plastic or glass cup. Flush spilled product with water. Keep in cool, dry place in original container. Rinse empty container thoroughly with water and discard it.

May produce severe chemical burns.

FIRST AID: External—flood eyes or skin with large amounts of water for 15 minutes. If irritation persists, get medical attention. For eyes—call physician.

Internal—drink large quantities of water or milk. Follow with milk of magnesia, vegetable oil or beaten eggs. Call a physician immediately.
