

UNDERWATER TREADMILL SYSTEM FOR DOGS & SMALL ANIMALS

A SYSTEM WITH THE MOST BENEFICIAL AQUATIC THERAPY OPTIONS FOR YOUR PATIENT

WHY WATER

Hydrotherapy in an underwater treadmill uses the natural properties of water, or the principles of relative density, buoyancy, hydrostatic pressure, surface tension, viscosity and resistance to achieve its therapeutic benefits in a safe environment. Exercising in water can help reduce fatigue and pressure on joints, soothe aches, and help with balance. It can also improve mobility and flexibility, allowing canines and small animals to recover from surgery or an injury quicker, and experience greater performance potential and well-being.

AQUAPAWS SS (SIMPLY SMART) UNDERWATER TREADMILL

The AquaPaws SS underwater treadmill system is designed to improve the lives of canines and small animals by offering low-impact, high-resistance aquatic therapy or workouts for rehabilitation from injury, optimal training and conditioning, and weight loss. The AquaPaws SS provides the natural properties of water (buoyancy, resistance and hydrostatic pressure) for a rigorous cardiovascular workout with reduced impact and stress on joints with enhanced features new to the AquaPaws product line.

The latest unit in the AquaPaws underwater treadmill line, the AquaPaws SS offers a lower entry threshold, magnetic door, larger running surface, larger windows, and holds up to 30" of water to accommodate larger breeds. The treadmill also offers adjustable speeds for a more rigorous workout, along with several optional features like resistance jets, an incline adjustment, and therapy bench to enhance patient outcomes. It's also a more user-friendly system, with a shorter frame for easier access to the dogs, the touch screen control panel has an articulating arm that can be mounted on any corner, and no tools are required for maintenance and cleaning. There are even optional UV and Ozone sanitary systems available to help keep the water cleaner, longer.

AquaPaws SS is a unique underwater treadmill system specifically designed to give dogs and other small animals the benefits of aquatic therapy for training and conditioning with increased cardio and muscle strengthening, rehab from injury, and general exercise for wellness and weight loss.

FEATURES:

- 1 6" Entry**
Does not require a ramp or step
- 2 No Door Handle**
Uses water pressure and magnets
- 3 Standing Platform**
Located inside the unit on both sides of the treadmill for a therapist to stand and work with the patient inside the system
- 4 Large Running Surface**
Over 10 sq. ft. of running surface (the largest on the market) to accommodate large breeds
- 5 Touchscreen Control Panel**
With articulating arm that can be mounted on any of the four corners
- 6 Lower Side Rails**
Increase tech comfort with better access to patients
- 7 Optional Resistance Jets**
Adding resistance jets can increase the workout difficulty or offer soothing spa affect, especially for older or arthritis patients
- 8 Optional Incline / Decline**
Add incline feature for a more rigorous workout

Optional UV and Ozone Sanitary Systems

Help keep water clean, longer

Optional Therapy Bench

Saves 3' of Floor Space

The low entry threshold does not require any steps or ramps, saving floor space outside the entry door and helps avoid a potential trip hazard

Up to 30" of water for larger breeds

Speed range from 0.1-9MPH

Overall unit height is 4" shorter for easier access to the patient while working from outside the treadmill

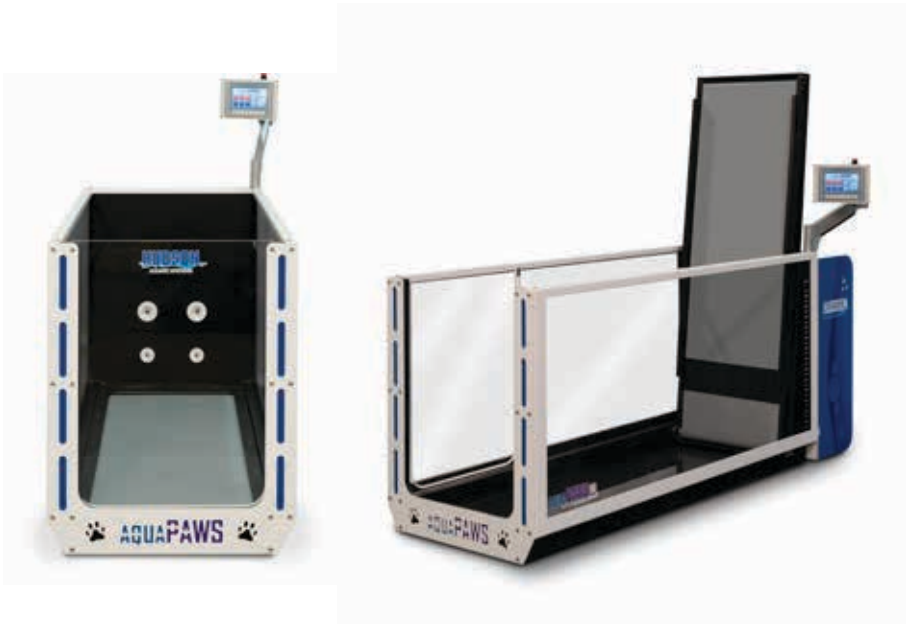

BENEFITS:

- Earlier intervention and rehabilitation
- Buoyancy allows less stress on joints and muscles for a quicker recovery and faster results
- Reduce recovery time
- Adjustable water depths for controlled weight-bearing exercises
- Water provides resistance throughout the range of motion
- Warm water relaxes muscles and increases circulation
- Adjustable speed range from 0.1-9MPH allows for a comfortable speed for the smallest injured dog to the top athlete. Speed is adjustable by 0.1 increments
- Easy cleaning makes for a sanitary environment and no tools required for maintenance
- Ask Sam Water Quality Specialist available for the life of the unit to help with any water quality issues
- 24/7 service support phone line
