# Cityscape Collection

We now have a solution for those smaller scale urban lot settings! Introducing the Unilock Cityscape Element Collection. This collection was designed with the following criteria in mind. All the Elements are designed to be no greater than 32" deep so that they can fit through a gate. All the Elements are less than 1600 lbs (with the exception of the brick oven top unit – which is closer to 2100 lbs) so that a narrow access walk behind loader can be used for installs. The fireplace, fire pit, and fire table all feature a unique “green” VioFlame Bio Ethanol burner – which should meet the burn codes of most metropolitan areas, especially where wood burning is prohibited. The bar and grill island feature an optional Kenyon electric grill, again meeting the code requirements of many major cities. All Elements come standard with Unilock’s Ledgestone coping – in any color available.

The accent materials can be specified as well and include Copthorne, Holland Premier, Hollandstone, Il Campo, Series 3000, Umbriano, or Unigranite. This flexibility will allow your clients to tailor their Cityscape Elements to fit their particular style. Note: Call for specific weights prior to ordering.

# Unilock Custom Collection

With the wide variety of pavers and wall materials that Unilock manufactures, we realized that there is a desire to be able to create Elements that are unique. Your clients can now create Elements that fit in perfectly with the creative outdoor living projects they are designing. We are answering that request with our exciting new Unilock Custom Elements Collection. We have taken the ever popular Tuscany platform and tweaked it slightly to create three new Custom “styles”.

**Unilock Custom Elements Collection**

Three distinct styles (arched, peaked, straight) allow for almost endless customization. You and your clients can now decide on the following details:

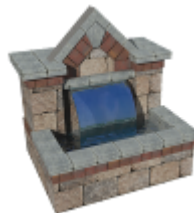

- body color
- accent brick style
- accent color
- 4” decorative saw tooth or accent brick banding
- inset and arch shapes
- inset patterns
- coping material
- lighting

Since the platform is the same, the price is still very competitive with a standard Tuscan fireplace. All the standard Elements are incorporated in the collection such as: fireplaces, wood boxes, hearths, brick ovens, grill and bar islands, fire tables, fire pits, water features, and pillars. Here are a few examples of Unilock Custom Elements:

Gas Fireplace:  
Arched

Water Feature:  
Peaked

Grill Island:  
Straight

In an effort to simplify each item when ordering, we’ve standardized each type of Custom Element. On the first page you will see some examples of each style (Arched, Peaked, and Straight) and on the second page you will find a detail of each Element that also doubles as an order form. If your dealer or contractor is interested in a Custom Element, you can then print those two pages back to back and send it to them as an order form. Please contact us at 877-332-6842 if you have any questions. It may take some time in the beginning to walk you through the process. All these components are also available on Sketch Up Warehouse.

**NOTE: BASE PRICE DOES NOT INCLUDE ANY BANDING, INSETS, OR COPING UPGRADES. BRUSSELS XL IS STANDARD FOR COPING.**

***Five Step Order Process:***

1. Pick the style and main body color
2. Pick the accent brick and color
3. Pick your coping upgrades
4. Total up your order, sign, date, and send to Harmony
5. Harmony will return sales order confirmation

# Kitchens & Islands

## Unilock Custom Kitchen Series

As outdoor living continues to grow in popularity, so does the complexity of outdoor kitchens. We are excited to announce that we now have a solution for creating elaborate and customizable outdoor kitchens. These kitchens are available in either pre-designed configurations or in modular cabinet form – similar to how an interior kitchen would be designed. Each pre-designed kitchen is shown with a list of stainless components. All the components are manufactured by OCS and are available through Harmony. In the following pages, you will first see our four kitchen series. Each series features five-six examples of outdoor kitchens in progressively larger sizes and features. The series are divided into the following groups:

**-100 Series (Straight)**

**-200 Series (45 Degree)**

**-300 Series (L Shapes)**

**-400 Series (U Shapes)**

All pre-designed kitchen examples are shown with Copthorne accents. Keep in mind, however, that accents (4" Banding and Insets) are available in the following choices: Copthorne, Holland Premier, Hollandstone, Il Campo, Series 3000, Umbriano, or Unigranite. Also, all units are available with XL, Fullnose, or Ledgestone coping and foot rail. Please note that kitchens are priced as shown with the options in each example.

**NOTE: BASE PRICE DOES NOT INCLUDE ANY BANDING, INSETS, OR COPING UPGRADES. BRUSSELS XL IS STANDARD FOR COPING. PLUMBING AND ELECTRICAL ARE NOT INCLUDED AND MUST BE DONE ON SITE.**

Note: All these kitchens and modular components will be available on Google Sketch Up Warehouse (keywords Harmony Outdoor Living or Unilock), if you'd like to download them and incorporate them (to scale) within your designs.

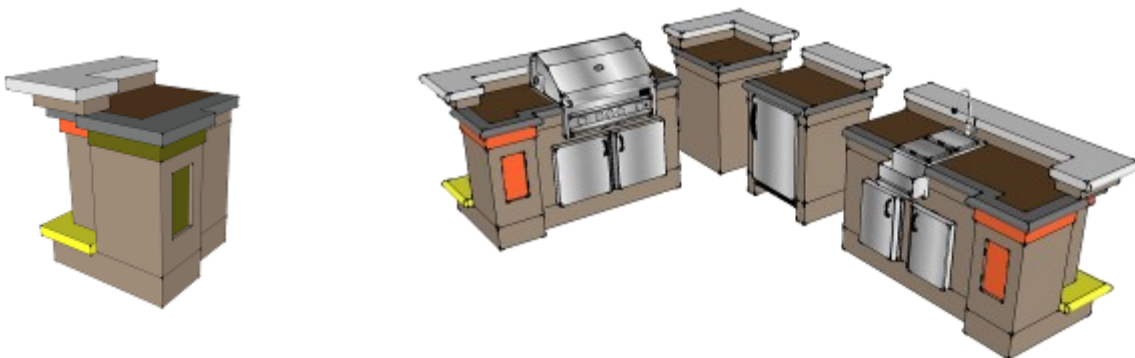

# Kitchens & Islands

## Modular Kitchen Components

After the **Pre-Designed Kitchen Series** section you will find the individual **Modular Kitchen Components** themselves. Feel free to let your creativity run wild and mix and match the different components. Keep in mind, you must always have an End Cap, Brick Oven, or Fireplace, on each end of the kitchen. In between you can create endless configurations using corners, 45s, and filler cabinets. Be sure to also check out some of the specialty cabinets, such as wine racks, refrigerator cabinets, and niches. Also, each component will show what the maximum cutout is for a grill or top unit, and the maximum dimension for any doors or drawers. Each component is color-coded to show the upgrade options available for banding, insets, coping, and foot rail.

When creating an outdoor kitchen, it is critical that you contact us directly to ensure that all the stainless components and configurations are possible. We will convert your concepts to a 3D full color rendering to ensure that you are getting exactly what you want.

**NOTE: BASE PRICE DOES NOT INCLUDE ANY BANDING, INSETS, OR COPING UPGRADES. BRUSSELS XL IS STANDARD FOR COPING. ALL CUTOUTS ARE LISTED AS ADDITIONAL FEES. PLUMBING AND ELECTRICAL ARE NOT INCLUDED AND MUST BE DONE ON SITE.**

Note: All these kitchens and modular components will be available on Google Sketch Up Warehouse (keywords Harmony Outdoor Living or Unilock), if you'd like to download them and incorporate them (to scale) within your designs.
