PowerPoint presentations, are available through in-service trainings
4. To brace a door, identical cross boards are spaced at equal distances perpendicular to the vertical boards on the door. Diagonal brace $\overline{C B}$ is also added. Find two congruent triangles. How do you know they are congruent?

B

5. Most roofs on residential buildings are made of triangular roof trusses. Explain how the SSS postulate is used to make the truss parts to make congruent trusses.

6. Is the information you are given enough for you to prove that the two triangles are congruent? Explain.

The vertical beam $\overline{O B}$ is perpendicular to the porch roof. $\mathrm{P}, \mathrm{O}$, and R are equally spaced ( O is a midpoint of PR ).

PowerPoint presentations, are available through in-service trainings
7. Builders use the King Post truss, below left, for the top of a simple structure. In this truss, $\triangle A B C \cong \triangle A B D$. List the congruent corresponding parts. Hint: there are 3 pairs of angles and 3 pairs of sides

8. Sheds are advertised for sale. For $\$ 800$, you can purchase an $8^{\prime}$ X $8^{\prime}$ shed. They advertise they will build any size.
a) What would a $16^{\prime}$ X $16^{\prime}$ shed costs?
b) What size would $\$ 1600$ purchase?
9. What conjecture tells you that the two triangles listed are congruent?
a. $\triangle L U Z \cong \triangle I D A$

b. $\triangle C A V \cong \triangle C E V$

A

28. Find $m \angle R S T$ and $m \angle V S T$

29. Find $m \angle 1$ and $m \angle 2$

30. Two school crossing signs are shown below. They are similar with a scale factor of two. If the area of the small figure is 28 sq. inches, what is the area of the large figure?

31. Simplify:
a. $\sqrt{32}$
b. $\sqrt{50}$
c. $3 \sqrt{80}$
32. Yesterday, Sam was planning to put a circular window with a radius of one foot in his new house. Today, Sam changes his mind and decides to put in a bigger circular window with a radius of two feet. By how much will the area of the bigger window change? Circle one.

It will double
It will triple
It will quadruple
It will be half
33. Find the distance from Denver to Limon using the grid below.

Each line segment represents 8 miles
34. Jessica designs two pens, one a square and one a circle, each with a perimeter of 120 ft .
a. Which one will maximize the area?
b. Find the radius of the circle.
c. Find the area of the square and of the circle

35. Find the slope of a line passing through:
a. $\left(\frac{1}{2}, 5\right)$ and $\left(2 \frac{1}{2}, 1\right)$
b. $(1,3.5)$ and $(6,3.5)$
c. $(-1,-5)$ and $(3,-1)$

39. Tony is surveying. He starts at point A and sites point D . He measures a $50^{\circ}$ angle between point D and a new point C . He measures $30^{\prime}$ to point C . At point C , he turns and measures $40^{\prime}$ towards the line between A and D. He places a stake at point B. If he were to come back to point A with the same measurements and orientation, would he be able to find the Corner D? Why or why not?

40. Given each set of points, determine if $\overleftrightarrow{J K}$ and $\overleftrightarrow{L M}$ are parallel, perpendicular, or neither.
a. $\mathrm{J}(-4,11), \mathrm{K}(-6,3), \mathrm{L}(7,7), \mathrm{M}(6,3)$
b. J (6,9), K (4,6), L (0,8), M $(3,6)$
c. $\quad \mathrm{J}(-8,1), \mathrm{K}(-5,-8), \mathrm{L}(0,10), \mathrm{M}(3,11)$
41. Find the length of the diagonals of the rectangular foundations. Find your answer to the nearest $\frac{1}{8}$ th inch.
a)
b)

$60^{\prime}$
42. Max is trying to compare numbers. Which of the following is closest to $\pi$ ?

$$
3 \sqrt{2},\left(\frac{3}{4}\right)^{-4}, 3.14^{0}, 3 \frac{1}{4}
$$

43. Evaluate each algebraic expression if $\mathrm{s}=5$ and $\mathrm{t}=-3$.
a. $3(2 \mathrm{~s}-\mathrm{t})$
b. $s+3 t-8$
c. $(\mathrm{s}+\mathrm{t})-2 \cdot 3$
d. $3 s-4 t+2$
e. $\mathrm{s}-\frac{t}{3} \cdot 5$
f. $-2 t^{3}$
g. $-s^{3}$
h. -t

PowerPoint presentations, are available through in-service trainings
50. Amber is in charge of selecting trees to be thinned. The circumference of a particular tree is 140 inches. Amber can estimate the diameter of the tree without cutting it down.
a) What is the diameter of the tree?
b) What is the largest square piece that can be cut from a cross section of this tree? Hint: You can use special right triangles for this.

51. Zach picks two 1 by 2 's to create a design. Each one measures 6 feet.
a) What is the length of the third board if he wants an equilateral triangle?
b) What is the range of lengths Zach can use to make the third side of the triangle if he does not care what type of triangle he makes?
52. Find the value of $x$.

53. Two 2 by 6 's are being used to create a truss for a 24 ' wide house. One 2 by 6 is 16 ' long. If you are not concerned with the truss design, what is the range of lengths the third side of the 2 by 6 can be?
54. Melissa is surveying. She starts at point A with 3 measuring tapes that are $25^{\prime}, 30^{\prime}$, and 50 ' and forms a triangle. She marks the 3 corners where the tapes intersect. If she were to come back to point A with the same measurements and oriented the same direction, would she be able to find the corners? Why or why not?

55. Sam is surveying. He starts at point A and measures a 30 ' line to point B . From point A , and from point B , he measures a $50^{\circ}$ angle. He extends the sides of each of the angles to where they intersect and places a stake named C. If he were to come back to point A with the same measurements and orientation, would he be able to find the Corner C? Why or why not?

56. Trent is a roofing contractor and is viewing the saltbox roof shown below for a roofing estimate. Find the area of the total roof if the house is 50 feet long.

57. A standard brick paver used to cover a walkway or a patio is a rectangle that is 4 " by 8 ". You have a 10 ft by 12 ft patio. How many brick pavers should you order to complete the patio (cover the patio with the small pavers)?
58. Simplify
a) $\frac{10 x^{3} y^{6}}{5 x y^{2}}$
b) $\frac{x^{4}}{x^{6}}$
c) $\frac{4 a^{5} b^{8}}{-2 a^{7} b^{10}}$
d) $\frac{12 x y^{4}}{2 x y^{4}}$
e) $\left(3 x^{2} y^{5}\right)^{3}$
f) $\left(3 x^{4} y\right)\left(-x^{2} y^{6}\right)$
g) $\left(3 x^{2}+2\right)+\left(-5 x^{2}-3\right)$
h) $\left(3 x^{2}+2\right)-\left(-5 x^{2}-3\right)$
i) $\left(3 x^{2}+2\right)\left(-5 x^{2}-3\right)$
59. A public parking lot is constructed so that all parking spaces in an aisle are parallel. If angle 1 is $43^{\circ}$, find the measure of angle 2 .
