

University of Kentucky

School of Library & Information Science (SLIS)

IS 402 Competitive Intelligence
Section 201, Fall 2020
August 24 - December 18

Instructor

Barbie E. Keiser, Adjunct Instructor
6101 Edsall Road #1502
Alexandria, VA 22304
Barbie.Keiser@uky.edu
Tel 703-823-4085
Preferred method of contact: email
Alternate email addresses:
bkeiser1@jhu.edu
Barbie.Keiser@gmail.com

Office Hours

- Email instructor to schedule a voice (phone) or text chat
- Expect a response within 24 hours

Class Information

- While this course is being taught ONLINE, efforts will be made to schedule synchronous sessions throughout the semester, based on availability of students. All sessions will be recorded for the convenience of others (to access later in the week).

Course Information

Course Description

This course examines competitive intelligence models, functions, and practices; the roles of information professionals in CI, and the management of CI. Discussion and practice topics include: intelligence ethical and legal considerations; identifying intelligence needs; intelligence project management, research methods, analysis, production, and dissemination; the uses of intelligence; intelligence sources and tools; managing the intelligence function; and the evolution of CI.

Course Objectives

This course introduces students to the study and application of basic Competitive Intelligence (CI) theories, concepts, processes and practices, and techniques and tools, set within the context of ethical business practice. At the conclusion of this course, students will be able to:

- Articulate the role of Competitive Intelligence (CI) and Competitive Analysis (CA) within for-profit and not-for-profit organizations
- Evaluate the quality of sources in a business intelligence context
- Build a comprehensive and cost-effective information strategy, independent of media and format, that is appropriate to your organization's culture
- Demonstrate an understanding of the use and value of different information sources available for competitive intelligence analysis
- Analyze and integrate information from a range of business information sources
- Organize CI in a logical fashion and make it accessible to those who need to/should use it, applying appropriate measures of security, so as to point toward a solution

- Appreciate effective, ethical techniques for conducting primary and secondary research, as well as the importance of ethics when presenting CA results and recommendations
- Develop actionable CI products to meet the needs of your organization/client.

Course Overview

During this semester, students will learn the fundamental principles and practices of competitive intelligence (CI). This course will have you exploring all facets of CI from organizational issues, such as how successful CI functions are managed, to practical individual skills building.

The course begins with a theoretical framework for competitive intelligence, and then extends this structure, focusing on how data and information collection and analysis is accomplished by competitive intelligence practitioners. Students will learn to apply the CI process and CI-related methodologies, techniques, and tools to better analyze an organization's current and future competitive position.

Course Outline

The course will enhance basic research fundamentals as well as introduce you to alternative means of obtaining and developing market, industry, and company insights. Topics include:

- Establishing an effective CI team and process
- Properly framing decision-support assignments (purpose and scope issues)
- Creating a source map and designing a collection plan
- Performing online (secondary) research
- Conducting primary (subject matter expert) interviews
- Applying analytic frameworks for competitive advantage (CA)
- Leveraging software tools
- Organizing and maintaining competitive data and information
- Effectively communicating competitive intelligence.

Required Reading

Readings required to master the topics for each week are included in the course calendar (below). Weekly lecture notes can be found in Canvas. These are designed to remind you of points made in the readings and during the live or recorded discussions, hitting only the highlights. (Good listening and reading comprehension are essential skills for CI practitioners.)

Required Textbooks:

Tyson, K. (2010). *The complete guide to competitive intelligence*, 5th edition. Chicago: Leading Edge Publications. ISBN 978096632195-090000 available at Amazon.com (\$46.68 on Amazon; used texts are available from as low as \$21). 4th edition is acceptable.

Bensoussan, B. E. and Fleisher, C.S. (2013). *Analysis without paralysis: 12 tools to make better strategic decisions*, 2d edition. Upper Saddle River, NJ: FT Press. ISBN-10: 0-13-310102-9 or ISBN-13: 978-0-13-310102-7. It's available in paperback from Amazon and other online sources for around \$30. There is a Kindle version available on Amazon for \$28.63. (Be sure that you're ordering the second edition.) VitalSource offers non-expiring access to the e-textbook (\$36.99) at <https://www.vitalsource.com/products/analysis-without-paralysis-babette-e-bensoussan-v9780133086300>

Student Evaluation

Grading Parameters

Final grades will be based on the following activities and weights in the table below.

Assignment	Weight (%)
Active participation in class discussions	15%
Homework assignments designed to demonstrate understanding of the topics covered in the readings, recorded lectures, and discussions	10%
Secondary research matrix (team effort)	15%
Primary research project (team effort)	15%
Teaching one analytic technique (individual effort)	15%
Company profile (individual effort)	15%
CI presentation (team effort)	15%

Grading Rubric (See Submission of Course Assignments for details.)

The following grading rubric will apply to the course. Grading rubrics for individual assignments can be viewed in Canvas. As always, *students will be judged on the basis of showing improvement through the semester.*

Category	Level 4	Level 3	Level 2	Level 1
Consistent effort in developing CI analysis	<ul style="list-style-type: none"> Designs concise, focused Key Intelligence Topics and Questions appropriate to the CI effort, limiting the scope of the work to accommodate the short semester Develops a high quality research plan designed to acquire diverse content relevant to the topic and conduct appropriate analysis, based on Key Intelligence Topics/Questions Thoughtful postings are made throughout the semester Consistently responds to 	<ul style="list-style-type: none"> Designs Key Intelligence Topics/Questions appropriate to the CI effort, limiting the scope of the work to accommodate the short semester Develops an adequate plan designed to acquire diverse content relevant to the topic and conduct appropriate analysis, based on Key Intelligence Topics/Questions Postings are made throughout the semester Sometimes responds to comments made by classmates Includes primary source 	<ul style="list-style-type: none"> Key Intelligence Topics/Questions require more focus to be effective within the time constraints of a short semester Minimally successful at developing a plan for completing the CI analysis Some postings are made through the semester Rarely responds to comments made by classmates Includes some primary source material, but with little or no context provided 	<ul style="list-style-type: none"> Fails to develop an objective for the CI effort Unable to develop a appropriate Key Intelligence Topics and Questions to guide the work of the team Few postings are made through the semester Never responds to comments made by classmates Does not include primary source material

	<p>comments made by classmates</p> <ul style="list-style-type: none"> Includes primary source material with clear reference to context and relevance to topic 	<p>material with adequate reference to context and relevance to topic</p>		
Contribution to the learning community	<ul style="list-style-type: none"> Aware of community needs Attempts to motivate group discussion throughout the semester Approaches topic creatively Interacts freely Demonstration of analytic technique to the class showed mastery of the technique 	<ul style="list-style-type: none"> Attempts to direct discussion toward creation of new knowledge Presents relevant viewpoints for group consideration Interacts freely Demonstration of analytic technique to the class showed originality and insight 	<ul style="list-style-type: none"> Occasionally makes meaningful reflection on group efforts Marginal effort to become involved with the group Demonstration of analytic technique to the class was adequate 	<ul style="list-style-type: none"> Makes no effort to contribute to the community Seems indifferent Demonstration of analytic technique to the class was perfunctory
Critical thinking and relevance	<ul style="list-style-type: none"> Contributions to class discussion (and postings) are thoughtful, insightful, and analytical, demonstrating knowledge and understanding of the topic Contributions to class discussion (and postings) are consistently on- topic Provides additional references related to the topic Prompts further discussion of the topic 	<ul style="list-style-type: none"> Contributions to class discussion (and postings) deliver information showing that thought, insight, and analysis have taken place Contributions to class discussion (and postings) are mostly on- topic Prompts further discussion of the topic 	<ul style="list-style-type: none"> Contributions to class discussion (and postings) are generally competent, but information delivered seems thin and commonplace, offering no further insight Contributions to class discussion (and postings) are occasionally off- topic 	<ul style="list-style-type: none"> Contributions to class discussion (and postings) are rudimentary and superficial, displaying no evidence of effort, insight, or analysis Contributions to class discussion (and postings) are often off- topic Makes short or irrelevant remarks
Collection and connection	<ul style="list-style-type: none"> Locates quality** information on a topic from a variety of sources Successfully integrates compiled information into a high quality, 	<ul style="list-style-type: none"> Locates needed information from a variety of sources Successfully integrates compiled information in appropriate format to effectively 	<ul style="list-style-type: none"> Shows minimal evidence of source evaluation Minimally successful at compiling information Frequently cites information inaccurately/inappropriately Little effort is made to diversify content 	<ul style="list-style-type: none"> Shows no evidence of source evaluation Unable to integrate information from multiple sources No effort is made to

	<p>original product to effectively accomplish the planned objective</p> <ul style="list-style-type: none"> • Postings are diverse in terms of content and format, demonstrating a concerted discovery effort • Efforts are made to connect threads, identify patterns, or make connections to people as well as ideas and publications • Efforts are made to connect to real-life situations • Thoughts are clear and concise • Follows laws, regulations, and institutional practices regarding access to and use of information resources • Demonstrates an understanding of plagiarism 	<p>accomplish the planned objective</p> <ul style="list-style-type: none"> • Postings are diverse in terms of content and format, demonstrating a concerted discovery effort • Some efforts are made to connect threads, identify patterns, or make connections to people as well as ideas and publications • Efforts are made to connect to real-life situations • Thoughts are clear, but sometimes vague • Follows laws, regulations, and institutional practices regarding access to and use of information resources • Demonstrates an understanding of plagiarism 	<ul style="list-style-type: none"> • Few efforts are made to connect threads, identify patterns, or make connections to people as well as ideas and publications • Limited or unclear connections made • Minimal and vague thoughts • Lacks adequate knowledge of laws, regulations, and institutional policies regarding access to and/or use of information resources • Commits unintentional plagiarism 	<p>diversify content</p> <ul style="list-style-type: none"> • No effort is made to connect threads, identify patterns, or make connections to people, ideas, or publications • Thoughts are unclear • Lacks knowledge of laws, regulations, and institutional policies regarding access to and use of information resources • Shows evidence of willful plagiarism
Uniqueness	<p>Contain rich and fully-developed new ideas, connections, or applications</p>	<p>Contain some new ideas, connections, or applications</p>	<ul style="list-style-type: none"> • Contain few new ideas, connections, or applications • Postings are generally more a rehashing or summary of comments made by others 	<ul style="list-style-type: none"> • Contain no new ideas, connections, or applications • Postings usually begin with "I agree with so-and-so"
Style*	<p>Information is well organized and coherent, with few spelling, grammar, or stylistic errors</p>	<p>Information is organized and coherent, but with several spelling, grammar, or stylistic errors</p>	<ul style="list-style-type: none"> • Information is not organized and therefore the meaning remains unclear • Obvious spelling, grammar, or stylistic errors that begin to interfere with content 	<p>Obvious spelling, grammar, or stylistic errors that make understanding impossible</p>

*Some consideration will be given to students for whom English is a second language, but team members should be watching for these types of errors and offering assistance/suggest corrections. All students are encouraged to work with a grammar and/or style guide, such as Strunk and White's *Elements of Style*.

**Students are encouraged to refer to the *Guidelines for Conducting Research* posted in Canvas for a quick review of how to evaluate resources for quality. While developed for a Knowledge Management course, the criteria for evaluation of resources apply to CI as well.

Grading Scale

The grade for **excellent** performance in a course will be a **B**. The grade of **A** will only be awarded for **extraordinarily** excellent performance. The grade of **C** will be reserved for those who demonstrate **average** performance. The grade of **D** indicates **low achievement** and will not be awarded at the graduate level. Grade appeals will **ONLY** be considered in the case of a documented clerical error.

[90% – 100%] = **A (Exceptional Achievement)**

[80% – 89%] = **B (High Achievement)**

[70% – 79%] = **C (Average Achievement)**

[60% – 69%] = **D (Low Achievement)**

[0% – 59%] = **F (Failing)**

Final Exam Information

While there is no final examination in this course, there is a final term assignment (Company profile) due by 6AM on December 8. *This deadline is critical* so that grades can be sent to the registrar in time for all who are graduating in December.

Course Calendar

The instructor reserves the right to alter course content or adjust the pace to accommodate class progress. The content of each week is described in the table below. Please complete the assigned readings **before** reviewing any recorded session or participating in a live Zoom session. This will ensure that you can contribute intelligently to the conversation and are ready to apply what you have learned in the readings to real-life situations. For your convenience, several of the PDF titles (with active links from the course calendar) have been uploaded to Canvas.

At the close of each week's recorded lecture, your instructor will review upcoming individual and team assignments due the following week, providing additional guidance for completion. After the lecture, questions for discussion among students will be posted in Canvas. Additional videos, such as recorded Zoom sessions with CI platform vendors, may be made available to students to enhance their understanding of technology as used by CI practitioners. Announcements of free webinars available from various organizations will be posted to Canvas. Feel free to register for any (or all) to hear from CI practitioners themselves.

Zoom-based conference calls to review progress on team assignments will be scheduled throughout during the semester; additional class meetings may be held based on progress through the semester. The instructor is always available should an individual or team request additional meeting/support.

Calendar References		
Week	Beginning	Topic
0	Completed by 8/24	<p>Personal introductions: Prior to the course, please upload a brief biographical sketch to Canvas that indicates why you chose this course and what you hope to learn during the coming weeks. (Both text and video are acceptable.) In it, tell me what you plan to do in the future. What type of career do you envision for yourself? How do you think that Competitive Intelligence might contribute to your success in that arena? There is no right or wrong answer here – it's not a trick question. <i>This is designed to help me use examples throughout the semester that will resonate with you/your classmates.</i></p> <p>Also, please read the following article to prepare prior to Week 1: Bose, R. (2008). "Competitive intelligence process and tools for intelligence analysis." <i>Industrial Management + Data Systems</i>, 108(4), 510-528.</p> <p>Individual assignment #1 due by noon on August 24: This semester, we'll be working in teams. Team assignments will be posted in Canvas once all students have made their preferences known via the Quiz. If you have not done so already, go to Quiz 1 and indicate your team preference. <Value = 0 points></p>
1	Aug 24 – Aug 30	<p>Welcome, review of syllabus, and formation of teams (the basis for the semester's work)</p> <p>History and current state of CI:</p> <ul style="list-style-type: none"> ▪ What is CI and how did it evolve? ▪ How does the CI function differ across settings? ▪ What's required to make CI work (well)? <p>Individual assignment #2 due by noon on August 31: Tell me how you got hold of a copy of the Bose article assigned for reading prior to the start of the semester. Be as specific as possible. This will indicate to me your normal process for information retrieval and allow me to offer alternatives in the coming weeks. Deposit your work in the Assignment section of Canvas. Feedback will be provided to the class as a whole, offering additional avenues you may wish to consider using in future. <Value = 0 points></p> <p>Reading: Tyson textbook, Preface + Chapter 1, <i>Introduction</i> Reading: Bensoussan/Fleisher textbook, Chapter 1, <i>The role of analysis</i> ProQuest Video Series: Competitive Intelligence for the non-Cler (5 brief videos) https://www.youtube.com/playlist?list=PLL15fy1ANqeVH4X1oPjYUgY7ucsObj2dw Crayon's blog post reviewing the findings of their State of CI 2020 survey https://www.crayon.co/blog/2020-state-of-ci-report-new-data-shows-94-of-businesses-are-now-investing-in-competitive-intelligence</p>

Course Assignments

Homework assignments are designed to reinforce concepts covered in the readings and lectures/discussions, helping the instructor understand where additional explanation or emphasis is required in future weeks. Each contains an element of what you will have to know/understand/do as a CI professional. Assignments are due by **noon** on the date indicated in the calendar. Please note that some homework assignments are designated as TEAM assignments; others are INDIVIDUAL assignments. Please make sure that your name and team are noted on all assignments submitted. (All members of a team will receive the same grade for team assignments.)

The instructor has recorded lectures via Zoom, deposited in Canvas. Students can check whether they have understood the content of recorded lectures by answering UNGRADED questions in Canvas Quiz. Those having difficulty answering a quiz can re-listen to the recordings, reinforcing the major concepts (learning objectives) outlined at the start of each lecture.

The instructor will be selecting responses to homework assignments as the basis for discussion threads. Students are encouraged to watch the Discussion Board throughout the semester for questions designed to reinforce what you are learning on your own or in teams. Thoughtful postings can help to raise your grade.

This semester, students will work in teams, exploring how artificial intelligence (AI) and blockchain are being applied within specific industry sectors. Each student will select an industry team (via Canvas Quiz). Each team will decide whether it will explore the application of AI or blockchain within the industry. The calendar indicates those assignments that are team-based. Each team will produce a CI presentation concerning the team's industry sector based on the purpose and scope of the project the team devises for itself. How this is accomplished will be addressed in a recorded lecture. The industry overview presentation will include the following:

- an executive summary
- agenda/table of contents
- purpose statement
- the range of companies considered for profiling + information concerning how the team chose to narrow the scope of its CI project
- key intelligence topics and questions you are prepared to answer through your research/analysis effort
- market, industry, and company analyses that include a PESTLE, TOWS, and Business Model Canvas + 1 additional analytic technique you learned from assigned/recommended readings, recorded lecture, or student presentations during Week 12
- Findings derived from these analytic techniques, conclusions, drawn based on those findings, and "next steps" you'd recommend for players in that industry.

Examples of presentations will be posted to Canvas to serve as a model for your industry overview. In addition, each member of the team will select a company to profile for his/her final individual assignment in this course. Specifics for what should be included in an industry overview and individual company profile will be covered during the course.

Throughout the course, exercises will help teams populate a research matrix specific to its industry sector. Contents and processes for creating these matrixes will be addressed in recorded lectures. The matrixes will be submitted along with the team final presentation, treated as a separate assignment for grading (15% of your grade for the course). Maintaining up-to-date versions of this

matrix in your Canvas team site through the semester will allow the instructor to comment and advise on ways to improve the matrix and thus your secondary research effort.

In addition to the secondary research to be conducted during the semester, each team will develop materials necessary for conducting a primary research effort. Deliverables for this assignment consist of (1) a suitable data collection instrument, most likely an interview questionnaire (along with protocol for conducting the interview via email, telephone, or in-person), though survey or focus groups are certainly options and (2) identification of potential respondents/participants for this primary research gathering effort. It is NOT necessary for teams to *conduct* the primary research. Examples will be placed in Canvas, but teams need not use these as models if they have alternative resources or ideas.

Students will select one CI analytic technique to teach the class (based on responses to Canvas Quiz #2). Your effort will be assessed by the instructor as well as by your classmates. Guidelines for presentations will be covered in class, with additional material and examples posted in Canvas. You'll want to describe each technique, identify its purpose, indicate "best used for," strengths and weaknesses, and "how to do it." A rubric for assessing the presentations will be provided and form the basis for discussion (to be led by the instructor). (HINT: Use the organization of chapters in your *Analysis without paralysis* textbook as an example for this assignment.)

Participation

To successfully complete the course, active participation throughout the semester is required and is a component of each student's course grade. Please refer to the Grading Rubric (above) for details regarding how participation contributes to your grade.

A Canvas course site is set up for this course. As Canvas will be the primary tool used for communication between the instructor and the students, each student is expected to check the site throughout the semester. Vendors will pre-record demonstrations of their competitive intelligence platforms for review by students throughout the semester. These recordings will be available to students in Week 13 for review.

Submission of Course Assignments:

Use the Assignment section of the course's Canvas site to submit all individual assignments. Please use proper English grammar and best practices when citing material. Additional guidelines and pointers to tools will be shared with the class within Canvas.

There is no specific required length for any submission, format, or file type. Including your name and the assignment number on the document and in the file name (e.g., Keiser_Homework2) would be helpful. Assignments are due at noon on the date indicated in the course calendar, above.

Group Work and Collaboration:

CI is a team effort – no single person possesses all the skills (nor has the time) required to make a CI program successful. Adapting to teamwork, where members of the team may be miles (or even continents) away, is essential. Working as a productive team – contributing to the team effort - can only improve your final grade. This semester, the class will work as a team to complete the industry sector overview and analysis.

Course Polices and Guidelines

Students are expected to attend all scheduled class sessions. Failure to attend class will result in an inability to achieve the objectives of the course. Excessive absence will result in loss of points for team participation.

Excused Absences:

S.R. 5.2.4.2 defines the following as acceptable reasons for excused absences: (a) significant illness, (b) illness or death of family member, (c) trips for members of student organizations sponsored by an educational unit, trips for University classes, and trips for participation in intercollegiate events, (d) major religious holidays, and (e) interviews for graduate/professional school or full-time employment post-graduation, and (f) other circumstances found to fit "reasonable cause for non-attendance" by the instructor of record. Students should notify the professor of absences prior to class when possible.

If a course syllabus requires specific interactions (e.g., with the instructor or other students), in situations where a student's total EXCUSED absences exceed 1/5 (or 20%) of the required interactions for the course, the student shall have the right to request and receive a "W," or the Instructor of Record may award an "I" for the course if the student declines a "W." (Senate Rules 5.2.4.2.1)

Verification of Absences:

Students may be asked to verify their absences in order for them to be considered excused. *Senate Rule 5.2.4.2* states that faculty have the right to request appropriate verification when students claim an excused absence due to: significant illness; death in the household, trips for classes, trips sponsored by an educational unit and trips for participation related to intercollegiate athletic events; and interviews for full-time job opportunities after graduation and interviews for graduate and professional school. (Appropriate notification of absences due to University-related trips is required prior to the absence when feasible and in no case more than one week after the absence.)

Academic Policies in relation to COVID-19

Fall Academic Calendar and Reading Days

Several modifications to the academic calendar have been made in response to the COVID-19 situation. The current calendar is available [here](#).

The calendar features a Reading Day. The current Dead Week restrictions on certain instructional activities would continue to apply to Reading Days. An additional restriction would apply to Reading Days, namely no required class meetings or, more generally, no "required interactions." Reading Days are not academic holidays.

Religious Observances (Senate Rules 5.2.4.2.D)

Students anticipating an absence for a major religious holiday are responsible for notifying the instructor in writing of anticipated absences due to their observance of such holidays. Please check the course syllabus for the notification requirement. If no requirement is specified, two weeks prior to the absence is reasonable and should not be given any later. Information regarding major religious holidays may be obtained through [the Ombud's website](#) or calling 859-257-3737.

Make-Up Work (Senate Rule 5.2.4.2)

Students missing any graded work due to an excused absence are responsible: for informing the Instructor of Record about their excused absence within one week following the period of the excused absence (except where prior notification is required); and for making up the missed work. The instructor must give the student an opportunity to make up the work and/or the exams missed due to the excused absence, and shall do so, if feasible, during the semester in which the absence occurred. The instructor shall provide the student with an opportunity to make up the graded work and may not simply calculate the student's grade on the basis of the other course requirements, unless the student agrees in writing.

Academic Integrity – Prohibition on Plagiarism (Senate Rules 6.3.1):

Per university policy, students shall not plagiarize, cheat, or falsify or misuse academic records. Students are expected to adhere to University policy on cheating and plagiarism in all courses. The minimum penalty for a first offense is a zero on the assignment on which the offense occurred. If the offense is considered severe or the student has other academic offenses on their record, more serious penalties, up to suspension from the university may be imposed.

Plagiarism and cheating are serious breaches of academic conduct. Each student is advised to become familiar with the various forms of academic dishonesty as explained in the Code of Student Rights and Responsibilities. Complete information can be found at the following website: <http://www.uky.edu/Ombud>. A plea of ignorance is not acceptable as a defense against the charge of academic dishonesty. It is important that you review this information as all ideas borrowed from others need to be properly credited.

Part II of Student Rights and Responsibilities (available online <http://www.uky.edu/StudentAffairs/Code/part2.html>) states that all academic work, written or otherwise, submitted by students to their instructors or other academic supervisors, is expected to be the result of their own thought, research, or self-expression. In cases where students feel unsure about the question of plagiarism involving their own work, they are obliged to consult their instructors on the matter before submission.

When students submit work purporting to be their own, but which in any way borrows ideas, organization, wording or anything else from another source without appropriate acknowledgement of the fact, the students are guilty of plagiarism. Plagiarism includes reproducing someone else's work, whether it be a published article, chapter of a book, a paper from a friend or some file, or something similar to this. Plagiarism also includes the practice of employing or allowing another person to alter or revise the work a student submits as his/her own, whoever that other person may be.

Students may discuss assignments among themselves or with an instructor or tutor, but when the actual work is done, it must be done by the student, and the student alone. When a student's assignment involves research in outside sources of information, the student must carefully acknowledge exactly what, where and how he/she employed them. If the words of someone else are used, the student must put quotation marks around the passage in question and add an appropriate indication of its origin. Making simple changes while leaving the organization, content and phraseology intact is plagiaristic. However, nothing in these Rules shall apply to those ideas so generally and freely circulated as to be a part of the public domain (Section 6.3.1).

Please note: Any assignment you turn in may be submitted to an electronic database to check for plagiarism.

Per University policy, students shall not plagiarize, cheat, or falsify or misuse academic records. Students are expected to adhere to University policy on cheating and plagiarism in all courses. The minimum penalty for a first offense is a zero on the assignment on which the offense occurred. If the offense is considered severe or the student has other academic offenses on their record, more serious penalties, up to suspension from the University may be imposed.

However, nothing in these Rules shall apply to those ideas, which are so generally and freely circulated as to be a part of the public domain.

Please note: Any assignment you turn in may be submitted to an electronic database to check for plagiarism.

Academic Integrity – Prohibition on Cheating (Senate Rules 6.3.2)

Cheating is defined by its general usage. It includes, but is not limited to, the wrongfully giving, taking, or presenting any information or material by a student with the intent of aiding himself/herself or another on any academic work which is considered in any way in the determination of the final grade. The fact that a student could not have benefited from an action is not by itself proof that the action does not constitute cheating. Any question of definition shall be referred to the University Appeals Board.

Academic Integrity – Prohibition on Falsification/Misuse of Academic Records (SR 6.3.3)

Maintaining the integrity, accuracy, and appropriate privacy of student academic records is an essential administrative function of the University and a basic protection of all students. Accordingly, the actual or attempted falsification, theft, misrepresentation or other alteration or misuse of any official academic record of the University, specifically including knowingly having unauthorized access to such records or the unauthorized disclosure of information contained in such records, is a serious academic offense. As used in this context, "academic record" includes all paper and electronic versions of the partial or complete permanent academic record, all official and unofficial academic transcripts, application documents and admission credentials, and all academic record transaction documents. The minimum sanction for falsification, including the omission of information, or attempted falsification or other misuse of academic records as described in this section is suspension for one semester.

Accommodations due to disability:

If you have a documented disability that requires academic accommodations, please see me as soon as possible during scheduled office hours. In order to receive accommodations in this course, you must provide me with a Letter of Accommodation from the Disability Resource Center (DRC). The DRC coordinates campus disability services available to students with disabilities. Visit the [DRC website](#), [email the DRC](#), contact them by phone at (859) 257-2754, or visit their office on the corner of Rose Street and Huguelet Drive in the Multidisciplinary Science Building, Suite 407.

Non-Discrimination Statement and Title IX Information:

UK is committed to providing a safe learning, living, and working environment for all members of the University community. The University maintains a comprehensive program which protects all members from discrimination, harassment, and sexual misconduct. For complete information about UK's prohibition on discrimination and harassment on aspects such as race, color, ethnic origin, national origin, creed, religion, political belief, sex, and sexual orientation, please see [the electronic version of UK's Administrative Regulation 6:1 \("Policy on Discrimination and Harassment"\)](#). In accordance with Title IX of the Education Amendments of 1972, the University prohibits discrimination and harassment on the basis of sex in academics, employment, and all of its programs and activities. Sexual misconduct is a form of sexual harassment in which one act is severe enough to create a hostile environment based on sex and is prohibited between members of the University community and shall not be tolerated. For more details, please see [the electronic version of Administrative Regulations 6:2 \("Policy and Procedures for Addressing](#)

[and Resolving Allegations of Sexual Assault, Stalking, Dating Violence, Domestic Violence, and Sexual Exploitation](#)"). Complaints regarding violations of University policies on discrimination, harassment, and sexual misconduct are handled by the Office of Institutional Equity and Equal Opportunity (IEEO), which is located in 13 Main Building and can be reached by phone at (859) 257-8927. You can also visit [the IEEO's website](#).

Faculty members are obligated to forward any report made by a student related to IEEO matters to the Office of Institutional Equity and Equal Opportunity. Students can *confidentially* report alleged incidences through the Violence Intervention and Prevention Center, Counseling Center, or University Health Services.

Technology Information & Resources

Students are expected to have a minimum level of technological acumen and the availability of technological resources. Students must have regular access a computer with a reliable Internet connection and audio capabilities. Please see the Canvas online guide for additional guidance: <https://guides.instructure.com/m/4214/l/82542>

Please be certain that your computer and/or browser allow you to view Adobe Reader documents (.pdf). As your instructor, I am your first go-to person for technology problems. Please e-mail me at Barbie.Keiser@uky.edu for the timeliest response.
