

Update on NAWIPS/GEMPAK Migration to AWIPS II

Unidata Policy Committee Meeting Michelle Mainelli NCEP Central Operations 15 April 2010

- NAWIPS/AWIPS Team
- Migration Goals
- FY10 Activities
- GEMPAK 6.0
- User Perspective: NAWIPS vs AWIPS II
- Hardware Configuration
- Unidata Involvement & Benefits
- Key Takeaways
- Training resources

Unidata Policy Committee Meeting - NAWIPS/AWIPS-II Status

NAWIPS/AWIPS II Team

- Develop meteorological app. software to meet NCEP requirements
- Transition NAWIPS functionality to AWIPS II environment
- 18.5 members Increased from 11-12 members prior to migration
- Roughly 60-40 split between IT and earth science backgrounds, some overlap
 - All new hires have significant experience in Java (OOAD), SOA, XML, PostgreSQL, Eclipse, Subversion, JUnit, GeoTools
- Almost 250 yrs experience in software design & development

Migration Goals

- NWS Hardware and Software consolidation
- Migration to AWIPS II must include:
 - All functionality in current NAWIPS GUI programs
 - Product generation, multi-panel display, obs & product display
 - Data Decoders
 - Raw and GEMPAK formats to AWIPS II format
 - Archived data will be accessible
 - GEMPAK
 - Legacy command line interface
 - Forward capability

Hardware Consolidation

ND ATMOSPH

N-AWIPS

AWIPS

AWIPS II System With N-AWIPS (will include large monitors)

Unidata Policy Committee Meeting – NAWIPS/AWIPS-II Status

Software Goals

- No changes to the forecaster workflow
 - Some visual differences may be unavoidable
- Adopt and/or adapt new technology
 e.g., GeoTools, integrated pan and zoom
- Challenges
 - Concurrent Raytheon development
 - Development Environment
 - Eclipse, Java

FY10 Activities

- Software development is on schedule
- Hardware configuration determination in progress
- Anticipate software ready for OT&E to begin by Q1FY11
- Migration activities continue in the following areas:
 - GUI integration & Interactive Product Generation & GEMPAK
 - Decoder migration is complete
- Continue to work closely with the NWS/OST AWIPS Program
- Testing & Test Plans Periodic drops of RTS baseline w/ NCEP integration

GEMPAK 6.0

- Official GEMPAK 6.0 release scheduled for April
- Modify GEMPAK to access the AWIPS II database
 - Allows users to continue to use their legacy batch scripts with the new database
 - Data management (DM) library extended to make AWIPS II service requests via http
 - Server-side microEngine scripts
 - Applies to all GEMPAK / NAWIPS applications
- Porting of images, sfc data completed
 - Model & upper-air data next
- GEMPAK will be supported until full replacement is ready
 - GUIs deprecated eventually

Unidata Policy Committee Meeting – NAWIPS/AWIPS-II Status

NAWIPS Perspective

within CAVE

NORR COMPLEXIC AND ATMOSPHERIC PARTING THAT TON COMPLEX LIS- DEPARTMENT OF COMPLEX

- Integrates NMAP2, NTRANS, NWX, NSHARP
 - Multiple tabbed loops
 - Flexible timeline
 - Includes single time resource collections
 - Flexible extended attribute assignment for displayable resources
 - e.g., multi-color displays
 - Procedure, Bundle and Resource selection and management
 - Multi-panel displays, spatially and temporally synchronized (or not)
 - GUI FOS bulletin select and display
 - SKEW-T / Hodographs

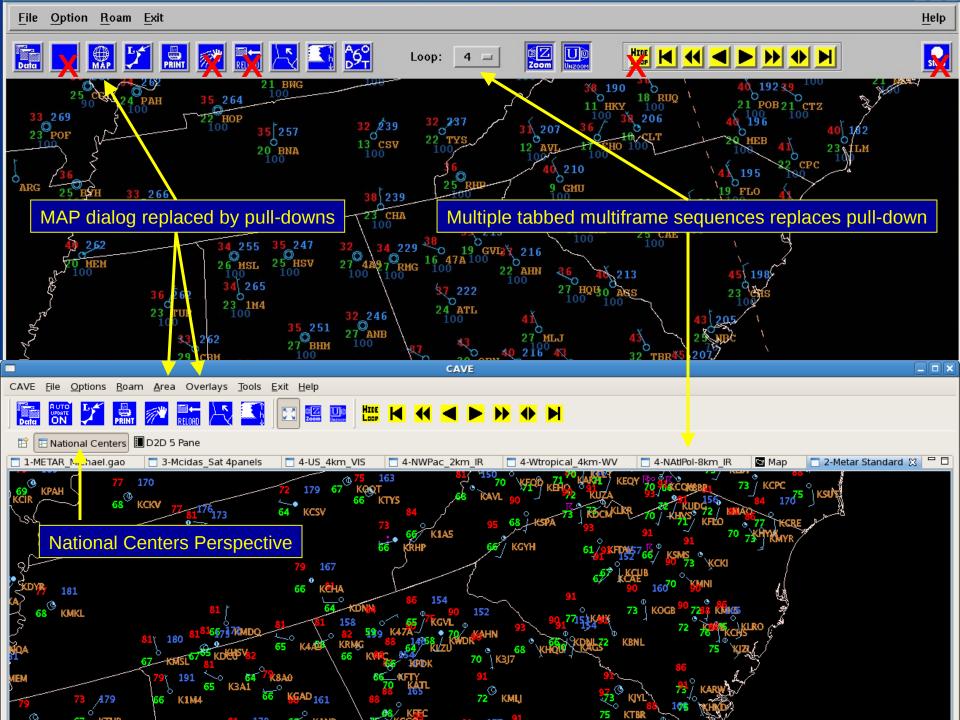

National Centers Perspective

User View – CAVE Top Buttons

NAWIPS Button Type	Functionality in CAVE Perspective	
Data	Yes - unchanged	
Мар	Yes - replaced with pull- down Area & Overlays	
PGEN	Yes - unchanged	
Print	Yes - unchanged	
Seek	Yes - unchanged	
Cloud Height	Yes - unchanged	
AODT	Yes - unchanged	

NAWIPS Button Type	Functionality in AWIPS II
Auto Update	Still under investigation
Wipe	Yes - unchanged
Reload	None at this time – AWIPS reloads data automatically
Loop	Replaced w/tabs, hotkeys unchanged
Animation Controls	Yes - unchanged
Stop	No
Zoom/Unzoom	Available in CAVE; however, unneeded

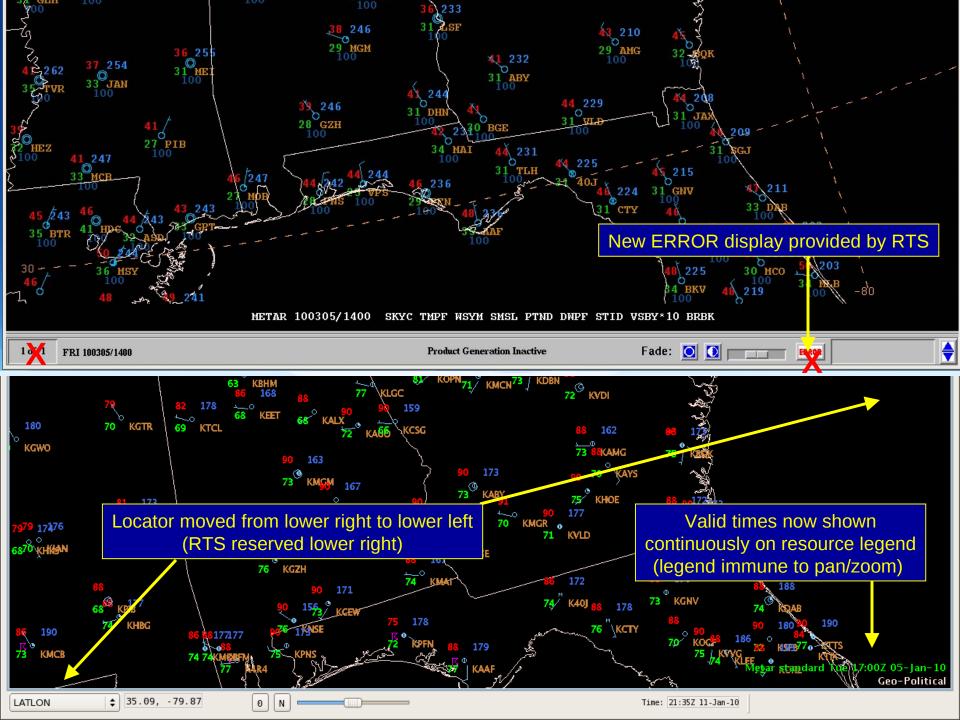

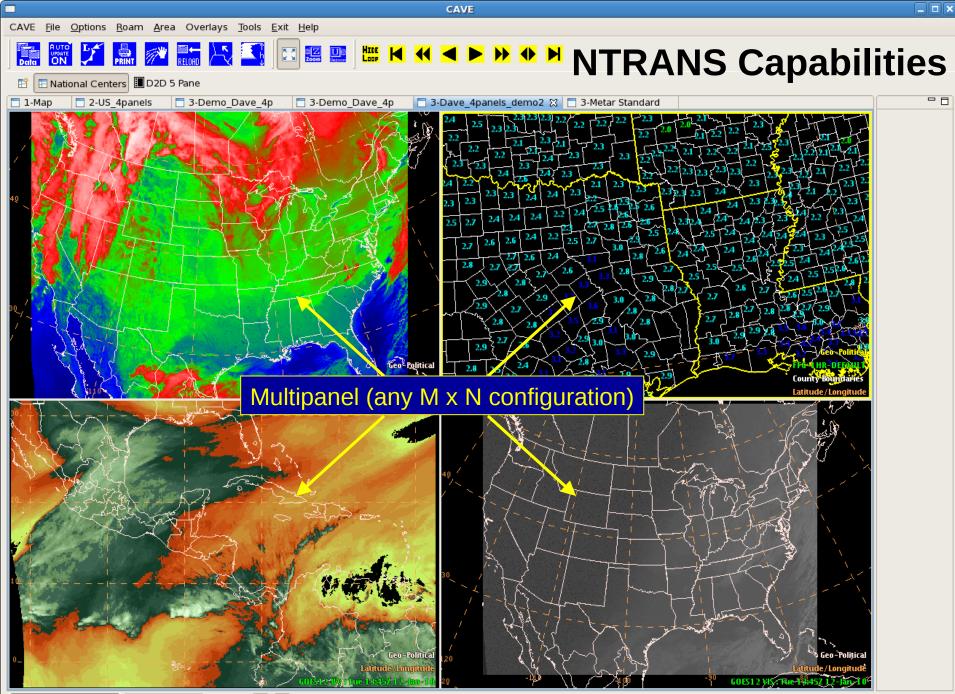

National Centers Perspective

User View – CAVE Bottom Buttons

NAWIPS Button Type	Functionality in CAVE Perspective
Valid Time	Yes - unchanged
Locator / Lat/Lon Readout	Moved from lower right corner to lower left
PGEN hints	Still under investigation
Fade	Yes - unchanged
Error	Functionality in AWIPS
Loop Counter	Yes - unchanged

PGEN Capabilities

- National Center configuration TBD ASAP
 - Separate HW Configuration Project between NCO and OST
 - SIB testing NAWIPS migrated software on a RFC test bed, NHDA
 - Government engineering analysis completed by end April 2010
 - Finalize configuration/proposal with RTS & submit procurement June 2010
 - Test bed at NCO by August 2010
- HW will arrive at NCs for OT&E beginning Fall 2010
 - Phased to arrive at Centers based on seasonal requirements
- Minimum Configuration
 - CAVE (workstation) requires a video card that supports OPEN GL w/ 256M video RAM
 - EDEX (Data server) requires 2G RAM
 - Each Center will most likely require 2 EDEX

Unidata Involvement

- Weekly status telecons Periodic migration telecons
- IV&V, OT&E (baseline + NAWIPS extensions)
 - Test plans, cases and execution
- User training (limited) web based
- Design and development collaboration
- Liaison with University community

- Developers conference scheduled late FY10
- NCEP continues to view Unidata as a very important partner for NCEP's total mission.

Unidata Policy Committee Meeting - NAWIPS/AWIPS-II Status

Benefits for Unidata Users

DORA AND ATMOSPHERIC PORTUGUES

- Facilitate Research => Operations
- Classroom tool / training
 - Weather Event Simulator ~ 2012
- NWS operational system
 - Simulates a fully operational forecasting system
- Less data processing required
- Run your own EDEX to create database
- Modern development environment/platform
 - Flexible & expandable architecture
 - Object oriented languages such as Java and Python

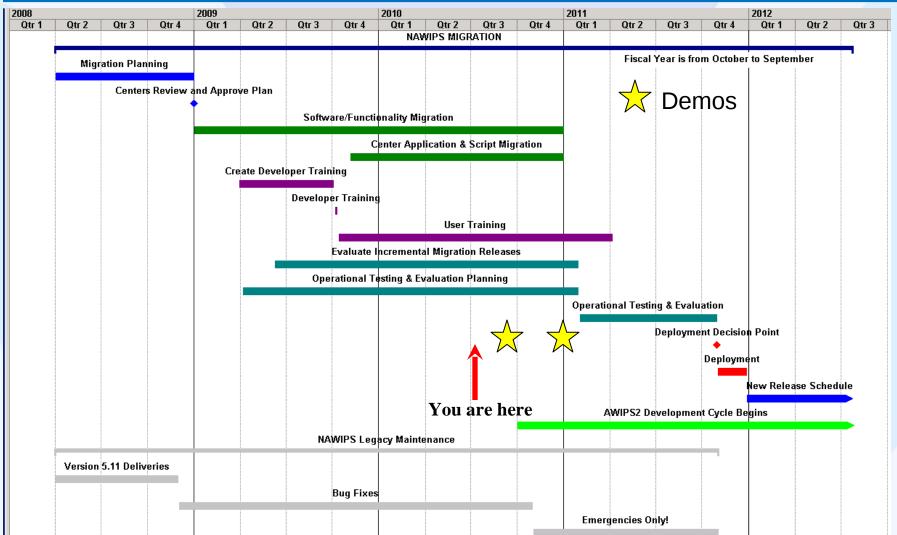

NAWIPS Roadmap

Unidata Policy Committee Meeting – NAWIPS/AWIPS-II Status

Key Takeaways

- NAWIPS/AWIPS II software migration on schedule
- NC transition highly dependent on Raytheon development
- GEMPAK supported until a full replacement is ready
- Hardware configuration finalized June 2010
- Unidata OT&E involvement early 2011
- First NC operational release Fall 2011
- Unidata support of GEMPAK extends 18 months after 1st delivery – Spring 2013
- GEMPAK is free to anyone who wants to use it

Once NWS implemented, AWIPS II will have open software policies

Training Resources

- Training Portals: http://www.nwstc.noaa.gov/AWIPS/ADE/ADE_resources.html
- NCEP Central Operations AWIPS II Wiki Site: http://wiki.ncep.noaa.gov/nco/sib
- AWIPS Migration training and resources:

http://www.nwstc.noaa.gov/nwstrn/awips.htm

- Includes new AWIPS II SOA module
- Suggested training:
- Java, Advanced Java (best practices)
- Please note that Java allows "wrapping" of C and FORTRAN
 - Best implemented when performance is an issue

"From the Sun to the Sea… Where America's Climate, Weather, Ocean and Space Weather Services Begin"

Unidata Policy Committee Meeting - NAWIPS/AWIPS-II Status

Software Strategy

- Studied AWIPS-II system as delivered by Raytheon
- Break down existing functionality into small pieces
- Trac wiki and ticketing system
- Employ "agile scrum" development environment
- Use Eclipse Rich Client Platform
 - CAVE is an Eclipse application made of various plugins
- Hudson continuous integration
