[PRODUCT INFORMATION]

[[{Product Name} [This collar kills fleas and ticks for up to 6 months.] Collar is a [double layer] sustained-release system [containing deltamethrin] combining the insecticidal actions of vapors and powders [working in [two] [three] ways to provide head to tail protection]. Thus, collar has the effect of simultaneous usage of a spray and powder [in the control of fleas and ticks, including ticks that may carry Rocky Mountain spotted fever]. Use {Product Name} year round for most effective control. [Replace every 6 months or sooner if needed.]]

[[{Product Name}], containing deltamethrin insecticide, has been specially formulated using [patented] insecticide-release technology. [Maximum effectiveness may not occur for 2-3 weeks after collar placement.] [If your dog is infested, you may consider shampooing your dog with an EPA registered [brand name] [flea and tick shampoo] to provide immediate relief from itching and biting before applying the [collar][product name]. Fleas (*Ctenocephalides sp.*) on the dog will be killed and ones which are present in the dog's environment that may appear on your pet will be killed. Collar will also kill ticks for up to 6 months. Collar will kill ticks including Brown dog tick (*Rhipicephalu sanguineus*), American dog tick (*Dermacentor variabilis*), and deer ticks (*Ixodes scapularis* and *Ixodes pacificus*), which may carry the Lyme disease. This collar should be worn continuously.]
