

USDA, ORGANISMS AND VECTORS PERMITTING: PROTECTING AMERICAN AGRICULTURE

TROY BIGELOW, DVM STAFF OFFICER U.S. DEPARTMENT OF AGRICULTURE ANIMAL AND PLANT HEALTH INSPECTION SERVICE VETERINARY SERVICES 12/04/19

• Who we are

•What do we do

•The application process

•Guidelines for no permit required

•Questions

Where Are We

We are under the Agriculture Select Agents Services (AgSAS)

OV Director: Vacant

- 2 Staff VMO's
- **1** Veterinary Permit Examiner
- 1 Program Assistant
- An AgSAS Support Staff

What do we do

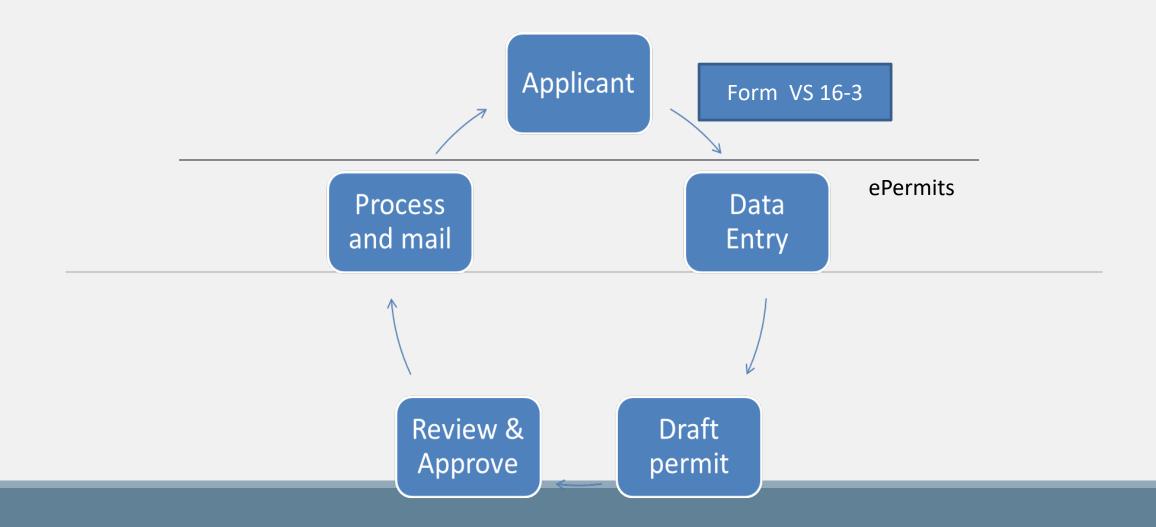

Regulate the importation and interstate transit of organisms and vectors of pathogenic diseases of livestock and poultry "No organisms or vectors shall be imported into the United States or transported from one State or Territory or the District of Columbia to another State or Territory or the District of Columbia without a permit"

What do we do

- •On Average we issue around 3,000 permits annually
- •We review applications to verify they need a permit
- •We perform outreach to stakeholders
- •We assign laboratory inspections for those agents with higher risk to US livestock and poultry industries
- •We verify inspection results and issue permits

OV Application process

United States Department of Agriculture

The application process

What needs a permit

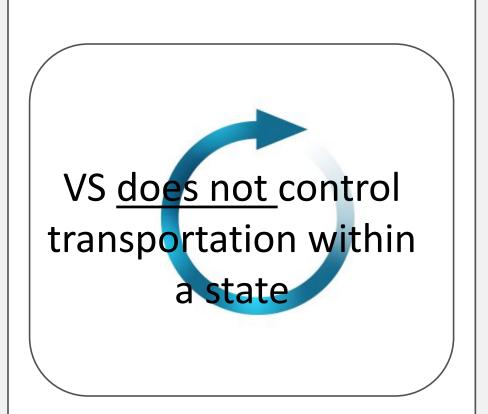

What do we review

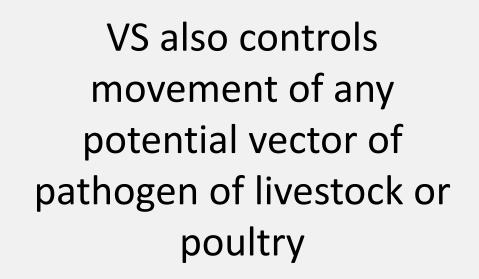

VS permit is required to receive livestock and poultry pathogens from outside of the state or the country

> bacteria virus fungi parasite

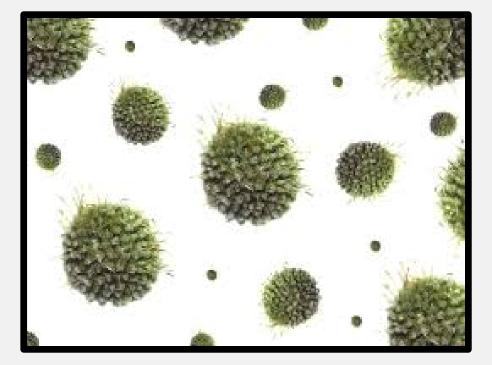

Intrastate transport

Insect vector: mosquito, ticks, etc.

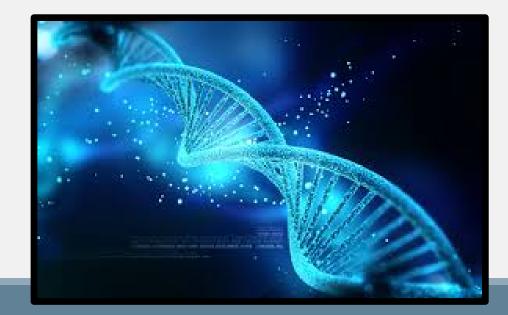

Imported media vector: FBS, trypsin, egg etc.

For <u>import</u>, a Permit is also required for movement of killed pathogens and vectors and their derivatives

Antigens Vaccine components DNA/RNA

VS permit is required for **importation** into U.S. of any organism (including nonpathogens) if exposed to medium of animal origin

VS does not control movement of nonpathogens e.g., yeast, mold, lactobacillus

VS does not regulate human only pathogens or Human Diagnostic Samples

```
How do I apply? VS 16-3
```

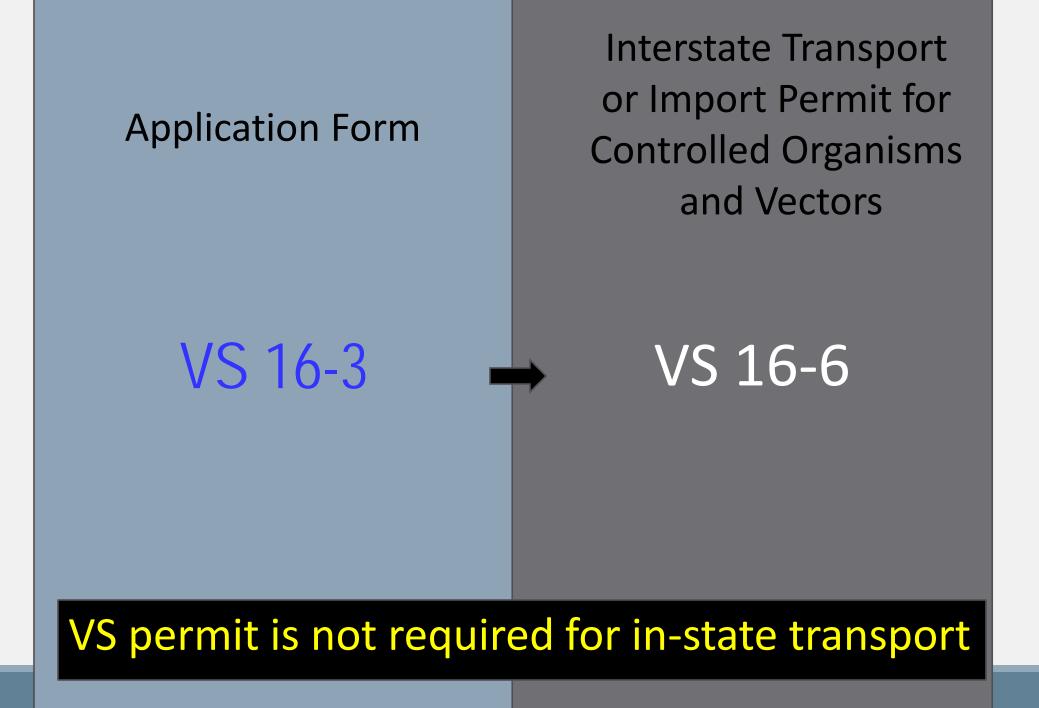

• Web page has info:

http://www.aphis.usda.gov/animal-

health/organisms-vectors

- ° ePermits
- Email: <u>OV@aphis.usda.gov</u>
- US Mail: USDA-APHIS-VS-NIES
 4700 River Road, Unit 2
 Riverdale, MD 20737

° Fax: 301-851-2239

Biocontainment

Permit restrictions prevent importation of CSF, ASF, SVD, FMD, HPAI, NDV

Safety testing/treatment (FADDL/DVL)

Biosafety levels – Veterinary pathogens do not necessarily have BSLs

 Biosafety in Microbiological and Biomedical Laboratories, appendix D

Lab inspection –Service Centers, SA inspectors

Is inspection required - organism

National/OIE Reportable Disease?

Endemic?

Importance to industry/economic impact

Level of pathogenicity

Risk of spread/infectivity/mode of transmission

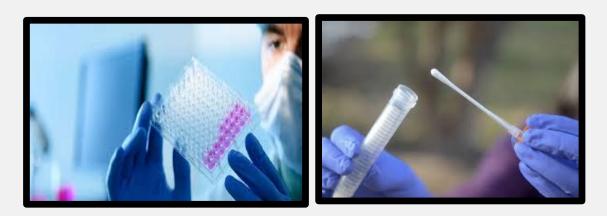

Would VS respond to outbreak?

Emerging

Is inspection required - permit?

- Analytical
- Live culture

ISD

BMBL is basis for inspection checklists

Inspected lab database in ePermits

Inspection valid for 3 years

Approval of labs – based on inspector recommendation

Deficiencies – addressed with applicant

CFR 9, section 130 covers inspection fees

Guidelines - no permit required

- 1100 Human Pharmaceuticals and Human Vaccines Containing Animal
- 1101 Non-Human Primate Material (excluding cell cultures)
- 1102 Feline and Canine Material
- 1103 Live Laboratory Mammals and Their Material (for research purposes)
- 1104 Amphibians, Fish, Reptiles, Shellfish and Aquatic Species (includes venom)
- 1105 Chemically Synthesized Materials
- 1110 Microbially Produced Materials
- 1114 Recombinant Microbes and Their Products
- 1116 Non-Pathogenic Microorganisms (and their extracts)
- 1119 Pet Chews/Treats Made of Antlers or Rawhide
- 1120 Cell Cultures/Lines, Recombinant Cell Cultures/Lines, and Their Products (for in vitro use)
- 1121 Test Kits
- 1122 Vitamins and Minerals
- 1123 Histopathological fixed slides

NEWSFLASH!!!

Guideline 1125

INTERSTATE Movement Only

 GL 1125 is VS permission to move non-infectious materials
 GL 1125 is VS permission to move previously imported materials that meet the requirements United States Department of Agriculture

1125: No permit for:

Non-pathogenic microorganisms not able to spread communicable disease to livestock, poultry, or aquatic animals.

Biological agents (not capable of introducing or disseminating infectious diseases to livestock, poultry, or aquatic animals.

Toxins or toxoids that are not infectious (able to multiply) or able to spread communicable disease

Samples from animals or aquaculture systems not confirmed as infected by laboratory testing, not exposed to or suspected of illness caused by an infectious pathogen, and not experimentally infected with organisms or vectors.

Inactivated forms of pathogens.

Viable or dead insect vectors – excluding screwworms and other arthropods such as ticks – of livestock, poultry, or aquatic animal pathogens reared in a U.S. laboratory colony, not known to have been exposed to or to carry pathogens on the VS Pathogen List.

Animal Health Contact Us	Organisms and Vectors Guidance & Permitting
Program Overview	Last Modified: Nov 1, 2019
Animal Disease Information	The Veterinary Services, Organisms and Vectors (OV) Permitting Unit regulates the importation into the United States, and interstate transportation, of organisms and vectors of pathogenic diseases of livestock and poultry. The Code of Federal Regulations, in 9 CFR, §122.2 7, mandates that "no organisms or vectors shall be imported into the United States or transported from one State or Territory or the District of Columbia to another State or Territory or the District of Columbia without a permit".
Emergency Management Export from the U.S.
