# 1 Introduction to Leawo TunesCopy

Leawo TunesCopy is designed as an iTunes DRM removal program and a DRM media converter. It helps remove DRM from iTunes Movies and TV Shows purchased or rented, and then helps convert those iTunes encrypted M4V video files to common MP4 video files for smooth playback on ordinary media players or mobile devices. Download and install Leawo TunesCopy, and then kick it off to enter the main interface as shown below.

## 1.1 Limitations of Trial Version & Method of Getting Registered Version

The trial version of Leawo TunesCopy allows you to have a free trial before you purchase the registered version. It should be noted that the trial version is limited in features and functions. Here limitations of trial version are presented together with the method of getting the registered version.

### 1.1.1 Limitations of Trial Version

The trial version of Leawo TunesCopy allows you to convert only the first 5-minute content of corresponding files for free. Using the trial version, you cannot get free technical support or free upgrade. Registered version allows you to get program update for free while trial version does not.

### 1.1.2 Method of Getting Registered Version

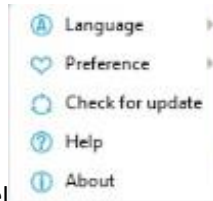

To enjoy the unlimited features of Leawo TunesCopy, you need to purchase a registration code for getting the registered version. Click the key icon  at the top right to enter the Register page, where you need to click the green “Buy” button  to get the registration code. After receiving registration code, you are required to enter the code into the box and click  to

activate the related functions.

## 1.2 Home Page Settings

## 2 Remove DRM from iTunes M4V and Convert M4V to MP4

As a professional iTunes DRM removal program, Leawo TunesCopy provides a comprehensive solution for you to remove DRM from iTunes video. Removing DRM from iTunes movies/TV shows gets easier with the help of Leawo TunesCopy. As video in iTunes is copy protected M4V

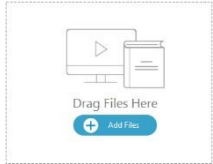

format under Apple’s Digital Rights Management (DRM) technology, removing DRM from iTunes video means removing DRM from iTunes M4V. Leawo TunesCopy is designed to remove DRM from M4V and then convert M4V to MP4, a much more universally recognized video format by various video players and mobile devices. From the DRM protected iTunes M4V to unprotected MP4 conversion process with the help of TunesCopy, audio tracks (Dolby 5.1 surround sound included) and subtitles can be maintained, and original quality will be 100% preserved. Without decoding and encoding video, the program is 50X faster in removing DRM from M4V and saving as MP4 than many other DRM media converter programs.

**Note:** You need to authorize the computer to play the M4V file by signing in with your Apple ID that you used to purchase or rent the file (movie or TV show). During the iTunes DRM removal process, you are not allowed to operate iTunes.

## 2.1 Step 1. Add M4V File(s) from iTunes

After entering the main interface of TunesCopy, you can click “Add Files” button on the sub-menu

bar  or “Add Files” button in the middle of program interface  to

browse and choose M4V rental or purchase in the pop-up “Add Files” panel. Choose at least one M4V file and click “Add” to begin importing M4V file from iTunes into TunesCopy. TunesCopy allows you to import all files at a single time by clicking “Add All” button.

## 2.2 Step 2. Choose Audio Tracks and Subtitles

After importing M4V files into TunesCopy, you can view the file list under different categories “All”

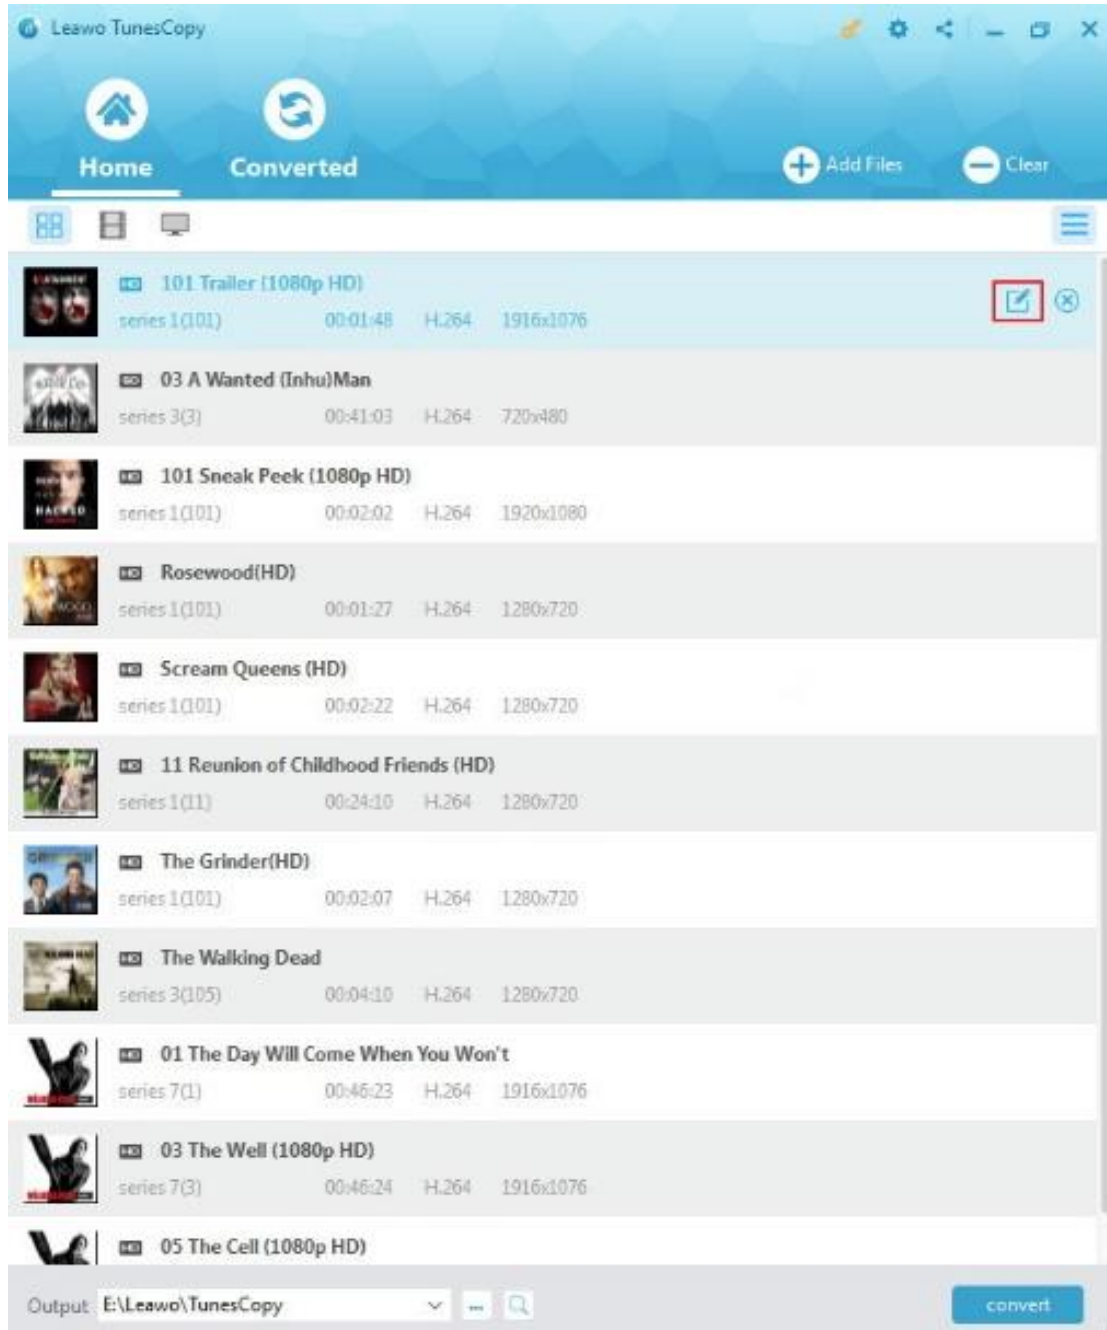

, “Movie” , and “TV Show” , you can also choose one file and click “Remove” button

to remove the file from the list. The “Clear” button  on the sub-menu bar is designed for removing all files in the list at one go. Before removing DRM from iTunes M4V, you can choose

- Audio Tracks
  - English America (AAC)
  - English America (AAC)
  - French Canada (AAC)
  - Spanish Latin (AAC)
- SubTitles
  - French Canada
  - English
  - Spanish Latin
  - Spanish Latin
  - English America

an M4V and click “Edit” button to freely choose audio tracks and subtitles for keeping in the output MP4 video file.

## 2.3 Step 3. Set Output Directory

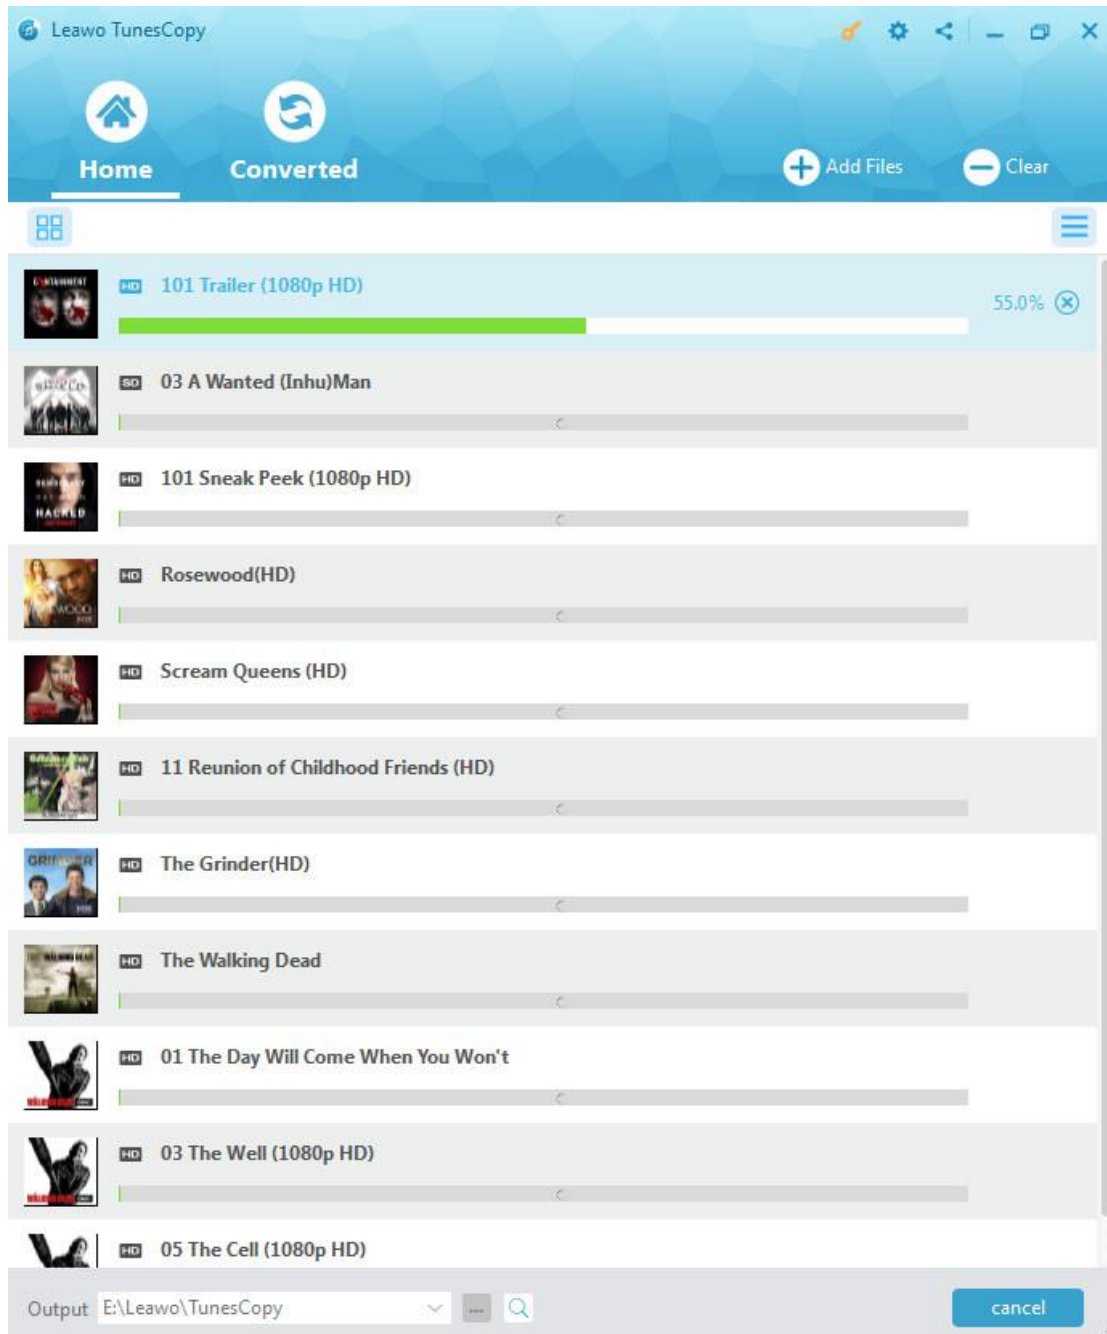

Click “...” button at the bottom of “Home” list  to set an output directory for containing output MP4 file.

## 2.4 Step 4. Start to Remove DRM from M4V and Convert M4V to MP4

Click the blue “Convert” button  at the bottom for removing DRM from M4V and converting M4V to MP4. After a while, the iTunes DRM removal and conversion process will be completed.

**Note:** Before conversion process takes place, you will be asked to authorize the computer for

playing the iTunes video if you have not yet authorized the computer.

## 2.5 Step 5. Locate Converted Video File

After conversion completes, you can find the converted iTunes video file now in MP4 video

format under “Converted” section. You can click the “Open file” option at the end of a target file to open the output MP4 file. Alternatively, you can make use of the quick searching bar at the bottom for fast locating.

The screenshot displays the Leawo TunesCopy application window. The title bar reads "Leawo TunesCopy" and includes standard window controls. The interface features a top navigation bar with "Home" and "Converted" tabs, and buttons for "Add Files" and "Clear". Below this is a toolbar with icons for grid, list, and play, and a hamburger menu icon. The main content area shows a list of converted files:
