IRELAND'S WILD COAST

A personal journey along one of the most spectacular coastlines in the world featuring the wildlife and wild places that make it so special. Emmy award winning wildlife cameraman Colin Stafford-Johnson takes viewers on an authored odyssey

along Ireland's rugged Atlantic coast - the place he chooses to make his home after 30 years spent shooting some of the world's most celebrated wildlife films. The series will follow Colin from the southwest corner of the island to finish on the tip of Northern Ireland. Along the way, he gives intimate personal insights into the wild animals and wild places he discovers. We begin on Skellig Rocks - stormbound ocean pinnacles off the southwestern corner where early Christian monks built a monastery on the summit almost 1500 years ago. His next stop is the deserted Great Blasket Island, home to a wildlife spectacle more familiar from Antarctica - vast numbers of Seals coming ashore in winter to fight, mate and moult before he heads inland in search of the island's last surviving herd of Red Deer from prehistoric times. Back on the coast he goes on the trail of Humpback Whales which are making their mark in Irish waters returning year after year in increasing numbers before heading north along the coast to meet a lonely dolphin who has set up residence off Ireland's striking Burren region. Colin ends in Clew Bay, an iconic inlet half way up Ireland's west coast and the place Colin chose to make his home after decades traveling the world.

Two part series airs Tuesday, March 20th at 8PM and 9PM

NOVA

PREDICTION BY THE NUMBERS

Predictions underlie nearly every aspect of our lives, from sports, politics, and medical decisions to the morning commute. With the explosion of digital technology, the internet, and “big data,” the science of forecasting is flourishing. But why do some predictions succeed spectacularly while others fail abysmally? And how can we find meaningful patterns amidst chaos and uncertainty? From the glitz of casinos and TV game shows to the life-and-death stakes of storm forecasts and the flaws of opinion polls that can swing an election, “Prediction by the Numbers” explores stories of statistics in action. Yet advances in machine learning and big data models that increasingly rule our lives are also posing big, disturbing questions. How much should we trust predictions made by algorithms when we don’t understand how they arrive at them? And how far ahead can we really forecast?

Airs Tuesday, March 30th at 7PM

Important notice for KLCS cable and satellite viewers:

Dear KLCS Viewers,

We are excited to announce that KLCS will soon be upgrading its signal to bring you better picture and sound quality.

We are moving our frequencies to make room for wireless internet broadband services.

We want to make sure that every provider who carries KLCS gets notice of this change and we're asking for your help.

If you are viewing KLCS and your provider is not listed below, can you please let us know your city, what channel number you are watching and the name of your video service provider?

Call us at **(213) 241-4002**, or email us at thomas.taitt@klcs.org and let us know your video service provider and city of service.

If you watch us on AT&T U-Verse, DirecTV, DISH Network, Frontier, Verizon FiOs, Charter, Cox, Mediacom or Spectrum, you do not need to call us.

Thanks for being a KLCS viewer, and we can't wait for you to see our improved channel!

Sincerely,

Robin Gee
KLCS General Manager
