QUESTION 41
An organization implements single sign-on (5SO) for use with Office 365 services.
You install an Active Directory Federation Services (AD FS) proxy server.
Users report that they are unable to authenticate.
You launch the Event Viewer and view the event information shown in the following screen shot:
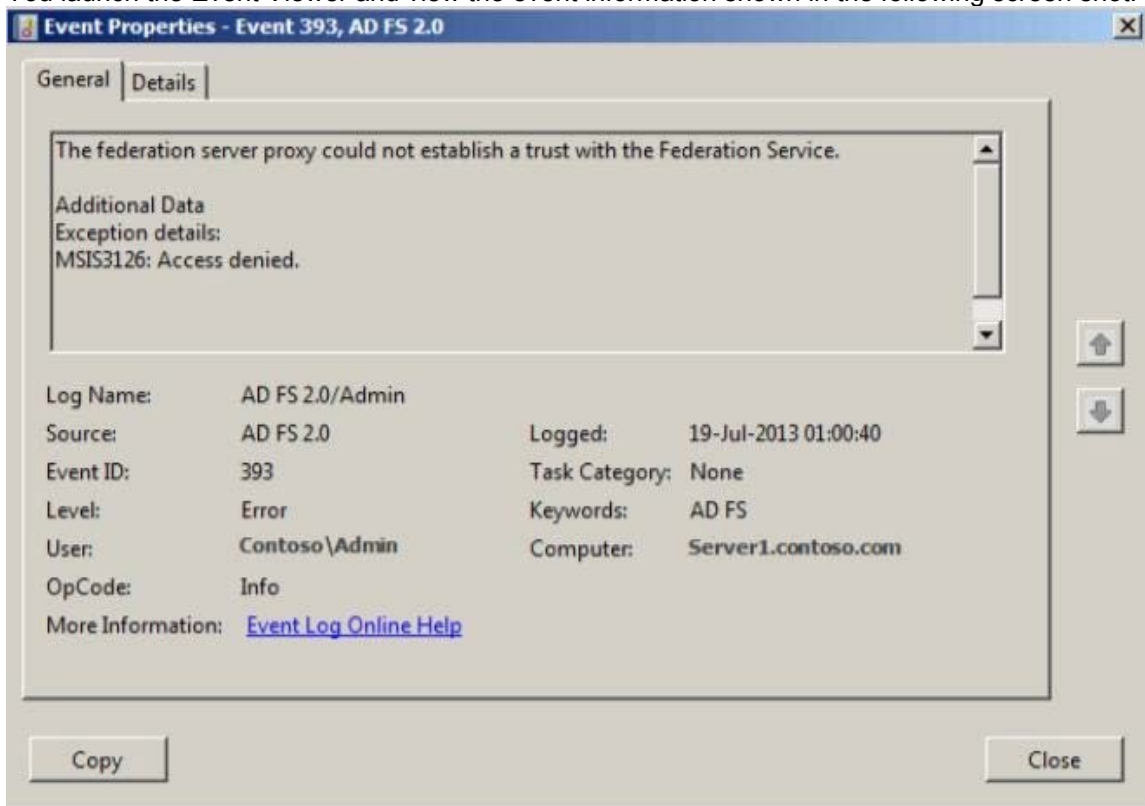

You need to ensure that users can authenticate to Office 365.
What should you do?

A. Re-enter the credentials used to establish the trust.
B. Verify the federation server proxy is trusted by the federation service.
C. Re-install the Secure Sockets Layer (SSL) certificate for the federation service.
D. Verify network connectivity between the Federation Service Proxy and federation server.

Answer: A

QUESTION 42
A company migrates to Office 365. 2,000 active users have valid Office 365 licenses assigned. An additional 5,000 user accounts were created during the migration and testing processes. These users do not have any licenses assigned.
You need to remove the Office 365 user accounts that do not have any licenses assigned by using the least amount of administrative effort.
Which Windows PowerShell command should you run?

A. Get-MsolUser -All -EnabledFilter "DisabledOnly" | Remove-MsolUser -Force
B. Get-MsolUser-EnabledFilter "DisabledOnly" | Remove-MsolUser -Force
C. Get-MsolUser -All -UnlicensedUsersOnly | Remove-MsolUser -Force
D. Get-MsolUser -UnlicensedUsersOnly | Remove-MsolUser -Force

Answer: C

QUESTION 43
Drag and Drop Question
Litware Inc. has an Office 365 Enterprise EI plan.
Employees have access to all Office 365 services. Employees in the human resources (HR) department must continue to use the on-premises SharePoint 2013 deployment due to legal requirements.
You need to disable access to SharePoint Online for all HR department employees.
How should you complete the relevant Windows PowerShell commands? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations in the answer area. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

-MsolUser	Import-Module MSOnline
-MsolUserRole	$cred = Get-Credential
-MSOnline	Connect-MsolService -cred $cred
-MsolService	$license = New [_____]
-MsolSubscription	-AccountSkuId "litware:STANDARDPACK"
-MsolUserLicense	-DisabledPlans [_____]
-MsolLicenseOptions	Get [_____] -All -Department "HR"	
SHAREPOINTWAC	Set [_____] -LicenseOptions $license
SHAREPOINTSTANDARD	

Answer:

```
-MsolUser
-MsolUserRole
-MSOnline
-MsolService
-MsolSubscription
-MsolUserLicense
-MsolLicenseOptions
SHAREPOINTWAC
SHAREPOINTSTANDARD
```

```
Import-Module  MSOnline

$cred = Get-Credential

Connect-MsolService -cred $cred

$license = New    -MsolLicenseOptions

  -AccountSkuId "litware:STANDARDPACK"

  -DisabledPlans    SHAREPOINTSTANDARD

Get    -MsolUser    -All -Department "HR" |

Set    -MsolUserLicense    -LicenseOptions $license
```

QUESTION 44
Hotspot Question
A company deploys an Office 365 tenant.
You prepare to use the bulk add tool to add users to Office 365.
You need to prepare a file to use with the bulk add tool.
Which fields must you include in the file? To answer, drag the appropriate response to each field.
Each response may be used once, more than once, or not at all. You may need to drag the split
bar between panes or scroll to view content.

Field	Required?
User Name	Yes / No
Display Name	Yes / No
First Name	Yes / No
Last Name	Yes / No
Job Title	Yes / No

Answer:

Free VCE and PDF Exam Dumps from PassLeader

Field	Required?
User Name	▾ **Yes** / No
Display Name	▾ **Yes** / No
First Name	▾ Yes / **No**
Last Name	▾ Yes / **No**
Job Title	▾ Yes / **No**

Explanation:
http://onlinehelp.microsoft.com/en-us/office365-enterprises/ff637601.aspx

User data column label	Maximum character length
User Name (Required)	The maximum total length of the user name is 79 characters (including @ symbol), in the format *name@domain.<extension>*. The user's alias cannot exceed 30 characters and the domain name cannot exceed 48 characters.
First Name	64
Last Name	64
Display Name (Required)	256
Job Title	64
Department	64
Office Number	128
Office Phone	64
Mobile Phone	64
Fax	64
Address	1024
City	128
State or Province	128
ZIP or Postal Code	40
Country or Region	128

QUESTION 45
Drag and Drop Question
A company has 50 employees that use Office 365.

You need to enforce password complexity requirements for all accounts.

How should you complete the relevant Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

-MsolUser	**Answer Area**	
-MsolUserRole	Get [_____] |	
-MsolUserPassword	Set [_____] [_____] $true	
-StrongPasswordRequired		
-StrongAuthenticationRequirements		

Answer:

-MsolUser	**Answer Area**	
-MsolUserRole	Get [-MsolUser] |	
-MsolUserPassword	Set [-MsolUser] [-StrongPasswordRequired] $true	
-StrongPasswordRequired		
-StrongAuthenticationRequirements		

QUESTION 46
Drag and Drop Question
You are the Office 365 administrator for your company.
Your company uses Office 365 for collaboration.
You must reset the password for all of the employees in your company.
You need to ensure that all employees create a new password the next time they sign in to Office 365.
How should you complete the relevant Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

-MsolUser	**Answer Area**	
-MsolUserPassword	Get-MsolUser -All |	
-ForceChangePassword $true	Set [_____] [_____]	
-NewPassword Pass#123#		
-PasswordNeverExpires $true		
-StrongPasswordRequired		

Answer:

-MsolUser	**Answer Area**	
[blank]	Get-MsolUser -All |	
[blank]	Set [-MsolUserPassword] [-ForceChangePassword $true]	
-NewPassword Pass#123#		
-PasswordNeverExpires $true		
-StrongPasswordRequired		

QUESTION 47
You are the Office 365 administrator for your company.
You must use Windows PowerShell to manage cloud identities in Office 365.
You must use a computer that runs Windows 8 to perform the management tasks.
You need to ensure that the Windows 8 computer has the necessary software installed.
What should you install first?

A. Microsoft Office 365 Best Practices Analyzer for Windows PowerShell
B. Windows PowerShell 4.0
C. Remote Server Administration Tools for Windows
D. Microsoft Online Services Sign-in Assistant

Answer: D
Explanation:
http://technet.microsoft.com/en-us/magazine/hh750396.aspx

QUESTION 48
Drag and Drop Question
You are the Office 365 administrator for your company.
The company has two administrators named User1 and User2.
Users must be able to perform the activities as shown in the following table:

Administrator	Activities
User1	o Reset passwords for standard user accounts. o Reset passwords for other members of the same role. o Must **NOT** reset passwords for other administrator accounts.
User2	o Reset passwords for all administrator accounts.

You need to grant the appropriate administrative role to each user.
What should you do? To answer, drag the appropriate role to the correct user. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

	Answer Area	
password administrator	**Administrator**	**Role**
delegate administrator	User1	
billing administrator	User2	
global administrator		

Answer:

Answer Area

Administrator	Role
User1	password administrator
User2	global administrator

Available options:
- password administrator
- delegate administrator
- billing administrator
- global administrator

QUESTION 49
Drag and Drop Question
A company deploys an Office 365 tenant.
You need to enable multi-factor authentication for Office 365.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer Area

Actions:
- Enable multi-factor authentication for all user accounts.
- Instruct users to use a mobile phone to complete the registration process.
- Create a multi-factor authentication provider with the Per Enabled User usage model.
- Create a multi-factor authentication provider with the Per Authentication usage model.
- Instruct users to obtain a single-use password to complete the registration process.

Answer:

Answer Area

Remaining actions:
- Create a multi-factor authentication provider with the Per Enabled User usage model.
- Create a multi-factor authentication provider with the Per Authentication usage model.

Answer Area order:
- Enable multi-factor authentication for all user accounts.
- Instruct users to obtain a single-use password to complete the registration process.
- Instruct users to use a mobile phone to complete the registration process.

QUESTION 50
Drag and Drop Question
Contoso Ltd. plans to use Office 365 services for collaboration between departments.
Contoso has one Active Directory Domain Services domain named contoso.local.
You deploy the Windows Azure Active Directory Sync tool.
You plan to implement single sign-on (SSO) for Office 365.
You need to synchronize only the user accounts that have valid routable domain names and are members of specified departments.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

	Answer Area
Use the Active Directory Users and Computers MMC snap-in to change the user principal name (UPN) suffix to contoso.com for all Contoso users.	
Use domain-based filtering to exclude all users in the domain contoso.local.	
Use the Active Directory Users and Computers MMC snap-in to change the user principal name (UPN) suffix to contoso.com for all users in the specified departments.	
Use user attribute-based filtering to exclude all users that have contoso.local in the userPrincipalName attribute.	
Add the user principal name (UPN) suffix contoso.com to the domain contoso.local by using the Active Directory Users and Computers MMC snap-in.	
Add the user principal name (UPN) suffix contoso.com to the domain contoso.local by using the Active Directory Domains and Trusts MMC snap-in.	

Answer:

	Answer Area
Use the Active Directory Users and Computers MMC snap-in to change the user principal name (UPN) suffix to contoso.com for all Contoso users.	Add the user principal name (UPN) suffix contoso.com to the domain contoso.local by using the Active Directory Domains and Trusts MMC snap-in.
Use domain-based filtering to exclude all users in the domain contoso.local.	
Use the Active Directory Users and Computers MMC snap-in to change the user principal name (UPN) suffix to contoso.com for all users in the specified departments.	Use the Active Directory Users and Computers MMC snap-in to change the user principal name (UPN) suffix to contoso.com for all users in the specified departments.
Use user attribute-based filtering to exclude all users that have contoso.local in the userPrincipalName attribute.	Use user attribute-based filtering to exclude all users that have contoso.local in the userPrincipalName attribute.
Add the user principal name (UPN) suffix contoso.com to the domain contoso.local by using the Active Directory Users and Computers MMC snap-in.	
Add the user principal name (UPN) suffix contoso.com to the domain contoso.local by using the Active Directory Domains and Trusts MMC snap-in.	

QUESTION 51
Your company has a hybrid deployment of Office 365. All mailboxes are hosted on Office 365.
All users access their Office 365 mailbox by using a user account that is hosted on-premises.
You need to delete a user account and its associated mailbox.
Which tool should you use?

A. The Remove-MSOLUser cmdlet
B. The Remove-Mailbox cmdlet
C. The Office 365 portal
D. Active Directory Users and Computers

Answer: D
Explanation:
When deleting accounts from Active Directory and directory synchronization runs the associated object will be deleted from Azure and also soft deleting the mailbox.

QUESTION 52
You use a centralized identity management system as a source of authority for user account information.
You export a list of new user accounts to a file on a daily basis.
Your company uses a local Active Directory for storing user accounts for on-premises solutions.
You are configuring the Windows Azure Active Directory Sync tool.
New user accounts must be created in both the local Active Directory and Office 365.
You must import user account data into Office 365 daily.
You need to import the new users.
What should you do?

A. Use the Office 365 admin center to import the file.
B. Create a Windows PowerShell script to import account data from the file into Active Directory.
C. Use the Windows Azure Management Portal to import the file.
D. Create a Windows PowerShell script that uses the MSOnline module to import account data from the file.

Answer: B

QUESTION 53
Drag and Drop Question
An organization plans to deploy an Office 365 tenant. The company has two servers named SERVER1 and SERVER2. SERVER1 is a member server of the Active Directory forest that you are synchronizing. SERVER2 is a standalone server. Both servers run Windows Server 2012.
You need to use the Windows Azure Active Directory Sync tool to provision users.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

	Answer Area
Install and run the Windows Azure Active Directory Sync tool on SERVER2.	
From the Office 365 admin center, activate directory synchronization.	
Install and run the Windows Azure Active Directory Sync tool on SERVER1.	
Activate all synchronized users.	
Install Active Directory Domain Services (AD DS) on the member server.	

Answer:

	Answer Area
Install and run the Windows Azure Active Directory Sync tool on SERVER2.	From the Office 365 admin center, activate directory synchronization.
	Install and run the Windows Azure Active Directory Sync tool on SERVER1.
	Activate all synchronized users.
Install Active Directory Domain Services (AD DS) on the member server.	

QUESTION 54

An organization prepares to implement Office 365.
You have the following requirements:
- Gather information about the requirements for the Office 365 implementation.
- Use a supported tool that provides the most comprehensive information about the current environment.
You need to determine the organization's readiness for the Office 365 implementation.
What should you do?

A. Run the Windows PowerShell cmdlet Get-MsolCompanyInformation.
B. Run the OnRamp for Office 365 tool.
C. Install the Windows Azure Active Directory Sync tool.
D. Run the Office 365 Deployment Readiness Tool.

Answer: B

QUESTION 55
Drag and Drop Question
A company plans to implement an Office 365 environment to manage email.
All user accounts must be configured to use only a custom domain.
You need to provision an Office 365 tenant for the company.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

QUESTION 56
A company plans to use Office 365 to provide email services for users.
You need to ensure that a custom domain name is used.
What should you do first?

A. Add the custom domain name to Office 365 and then verify it.
B. Verify the existing domain name.
C. Create an MX record in DNS.
D. Create a CNAME record in DNS.

Answer: A

QUESTION 57
You create an Office 365 tenant.
You assign administrative roles to other users.
You hire a new user named User2.
User2 must NOT be able to change passwords for other users.
You need to assign an administrative role to User2.
Which role should you assign?

A. Service administrator
B. Global administrator
C. Delegate administrator
D. Password administrator

Answer: A
Explanation:
http://technet.microsoft.com/en-us/library/hh852528.aspx

QUESTION 58
Hotspot Question
You are the Office 365 administrator for your company. User1 leaves the company.
You must delete the account for User1.
In the table below, identify when each type of data will be deleted.
Make only one selection in each column. Each correct selection is worth one point.

User1 Exchange Online mailbox	Documents Created by User1 on SharePoint Online	Timeframe
○	○	Never removed
○	○	Removed immediately
○	○	Removed after 30-day grace period
○	○	Removed after 90-day grace period

Answer:

User1 Exchange Online mailbox	Documents Created by User1 on SharePoint Online	Timeframe
○	●	Never removed
○	○	Removed immediately
●	○	Removed after 30-day grace period
○	○	Removed after 90-day grace period

QUESTION 59

Hotspot Question
A company has an Active Directory Domain Service (AD OS) domain.
All servers run Windows Server 2008. You have an on-premises Exchange 2010 server.
The company plans to migrate to Office 365.
In the table below, identify the required action for each phase of the pilot.
Make only one selection in each column. Each correct selection is worth one point.

Planning Phase	Migration Phase	Project Action
○	○	Assign licenses to users.
○	○	Prepare the on-premises Active Directory for directory synchronization.
○	○	Raise the forest functional level to Windows Server 2008.
○	○	Upgrade the Exchange server to Exchange 2013.

Answer:

Planning Phase	Migration Phase	Project Action
○	●	Assign licenses to users.
●	○	Prepare the on-premises Active Directory for directory synchronization.
○	○	Raise the forest functional level to Windows Server 2008.
○	○	Upgrade the Exchange server to Exchange 2013.

QUESTION 60
Drag and Drop Question
You are the Office 365 administrator for your company. The company has Office 365 Enterprise E3 licenses for each of its 250 employees. The company does not allow email or Lync Online licenses to be assigned to external contractors.
User1 is an external contractor who requires access to SharePoint and Office Web Apps only.
You need to add a license for User1's account.
What should you do? To answer, drag the appropriate action to the correct location or locations. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select the purchase services option.

Select the licensing option.

Select the users and groups option.

Enable External Users in SharePoint.

Add an Office 365 Enterprise E3 license for User1.

Answer Area

Step	Action
1.	Sign in to the Office 365 admin center.
2.	
3.	Add an Office Web App with SharePoint (Plan 1) plan.
4.	
5.	Assign licenses to User1.

Answer:

Select the purchase services option.	
Select the licensing option.	
Select the users and groups option.	
Enable External Users in SharePoint.	
Add an Office 365 Enterprise E3 license for User1.	

Answer Area

Step	Action
1.	Sign in to the Office 365 admin center.
2.	Select the purchase services option.
3.	Add an Office Web App with SharePoint (Plan 1) plan.
4.	Select the users and groups option.
5.	Assign licenses to User1.
