

ICD-10 Codes

ICD-10 is the 10th revision of the International Statistical Classification of Diseases and Related Health Problems, a medical classification list by the World Health Organization. It contains codes for diseases, sign and symptoms, abnormal findings, complaints, social circumstances, and external causes of injury or diseases. For more information regarding WHO and their coding standards visit their [website](http://www.who.int): www.who.int

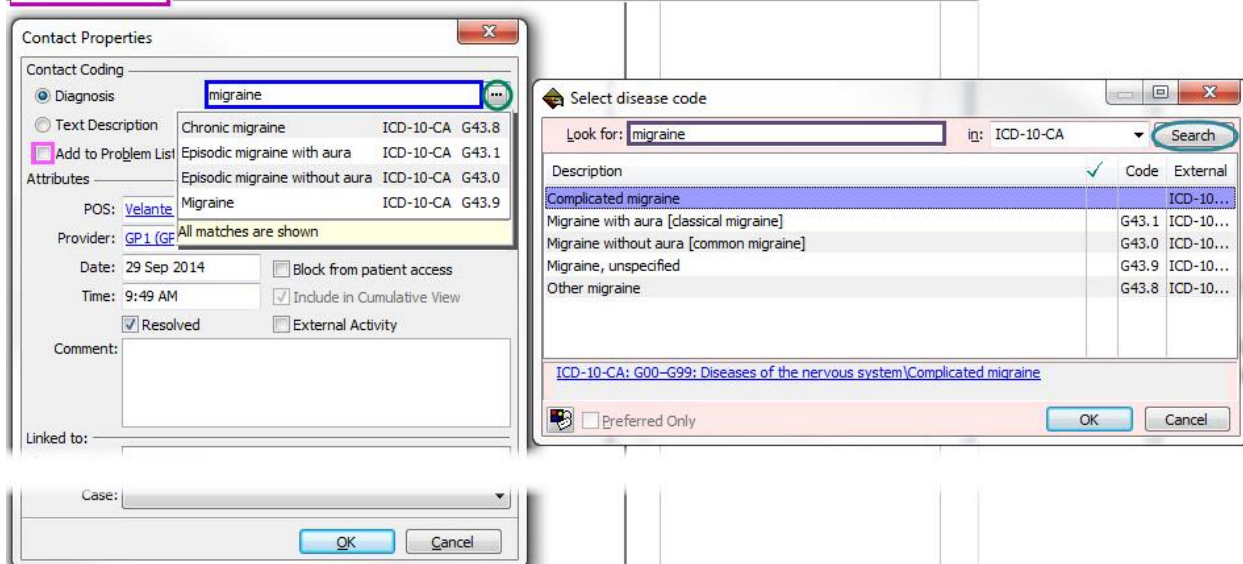

ICD-10-CA is an enhanced version of ICD-10 that has been developed by the Canadian Institute of Health Information (CIHI) for the classification of morbidity in Canada. **Your EMR uses the ICD-10-CA coding standards.** For more information regarding CIHI and their coding standards visit their [website](http://www.cihi.ca): www.cihi.ca or [ICD-10-CA Tabular list](#).

Using ICD-10-CA codes in the EMR

Coding a Contact Problem

Your EMR provides you with the ability to use ICD-10-CA coding standards when entering patient contacts or problems. Consistently coding patient contacts will allow you to optimize EMR use through features such as Find Object queries and Dynamic Groups. You will also be able to sort patient encounters by diagnosis with a simple click.

Problem 1 (Resolved)

1. When in the New Encounter, click on **Problem** to open the **Contact Properties** window.
2. In the **Diagnosis** field, begin typing the patient problem. Allow a few seconds for the system to return matches. Double click the matching problem in the list if more than one is found.
 - a. **NOTE:** The list of codes searched in the Contact Properties **Diagnosis** field is like a favourites list, once a code is used once, it will be available from this field. This is not a complete search of all ICD-10-CA codes.
3. If you do not receive a match in the **Diagnosis** field search, click the **Elliptical tool** to open the **Select disease code** window in order to search the entire ICD-10-CA list.
4. Enter the diagnosis criteria into the **Look for field** and click **Search**. **Select** the diagnosis code from the list and click **OK** to populate the **Diagnosis** field in the **Contact Properties** window. **NOTE:** When searching with the ICD-10 alphanumeric code, be sure to use capital letters, example R51 not r51. You can also use % for wild card searches, enter R70% to find all codes within this range.
5. Select the **Add to Problem List** checkbox to add the problem to the patient's Problem List, click **OK**.

	Osteoarthritis	M19.9
	Flat foot, pes planus (acquired)	M21.4
SLE	Systemic lupus erythematosus	M32.9
PMR	Polymyalgia rheumatica	M35.3
	Ankylosing spondylitis	M45
	Spinal stenosis, unspecified	M48.09
	Disc herniation	M51.2
DDD	Degenerative disc disease	M51.3
	Sciatica	M54.3
	Lumbago with sciatica	M54.4
LBP	Low back pain	M54.5
	Lumbago	M54.5
	Musculoskeletal back pain	M54.9
	Radial styloid tenosynovitis (de Quervain)	M65.4
	Synovitis and tenosynovitis unspecified, unspecified site	M65.99
	Rotator cuff tendinopathy	M75.1
	Achilles tendonitis	M76.6
	Lateral epicondylitis	M77.1
	Fibromyalgia	M79.7
	Osteoporosis	M81.9

N00-N99 – Diseases of the genitourinary system

Abbreviation	Description	ICD-10 Code
	Acute nephritic syndrome	N00.9
	Chronic nephritic syndrome	N03.9
	Unspecified nephritic syndrome	N05.9
	Acute pyelonephritis	N10
	Chronic pyelonephritis	N11.9
	Vesicoureteral reflux	N13.7
ARF	Acute renal failure	N17.9
ESRD	End stage renal disease	N18.5
CRF	Chronic renal failure	N18.9
	Renal failure	N19

Please note that the data contained within this document has been collected by Velante from implemented physicians but has not been clinically validated.

	Interstitial cystitis, chronic	N30.1
	Cystitis, unspecified	N30.9
	Neuromuscular dysfunction of bladder	N31.9
BNO	Bladder neck obstruction	N32.0
UTI	Urinary tract infection	N39.0
BPH	Benign prostatic hypertrophy	N40
	Testicular torsion	N44.08
	Fissure and fistula of nipple	N64.0
PID	Pelvic inflammatory disease	N73.9
	Endometriosis, unspecified	N80.9
